COMBINED WITH CISCO DAILY NEWS AND CISCO AMERICAN AND ROUND-UP, NOVEMBER 1, 1937

CISCO—One of the healthiest areas in U.S.A., with a countryside devoted to blooded cattle, hogs, sheep, peanuts, cotton, fruits, feeds, poultry, gas, oil; two railroads; Bankhead highway; huge concrete swimming pool.

VOLUME XXIV.

CISCO, TEXAS, TUESDAY, NOVEMBER 16, 1943.

NUMBER 59

REDS WORK TOWARD INVASION OF GERMANY

MORE COUN-TIANS JOIN ARMED FORCE

The appended list of selectees, who have passed the army, navy, marine and coast guard armed forces induction station examinations, was furnished the Daily Press by the Eastland county draft board. Some of the board states are already in service, while the others will report to the objection center soon.

Boeing Star—Emery E. Watson, Clifford P. Watkins, Bruce M. Carroll, Lee M. Rutledge, C. L. Finney, Dundard D. White.

Cisco—Marshall F. Sublett, John J. Eskine, Lloyd E. Johnson, Wil- L. Thetford, Clyde V. Scott, J. E. Norris, Jr., Livius Lee Lankeford, Jere B. Loftin, Charles W. Fowler, Buster B. Hurst, Claud A. Ramsey (Negro), Wadsworth Ross, Leroy Jones, Royce W. Prudett.

Eastland—Travis L. Cook, A. L. Davenport, Arthur W. Smith, Cecil F. Flippen, Ray Hatten, Charles R. Freyschlag, Grady Rogers (Negro).

Ranger—Michael P. Ready, Dalton T. Hatten, Earl L. Young, Howard M. Segars, Jerry T. DeVore, Cyrus N. Moore, Harvey L. Fawcett, Paul T. Bullock, Stacy L. Kim.

Carbon—Clifford E. McCulley, Gene B. Seals, Lee Roy Maxwell.

FOREIGN PROP-ERTY OWNERS MUST REPORT

Ciscoans who own property in foreign countries were notified by Postmaster Luther McCrea today that they must file reports of foreign holdings with the treasury department before December 1. The notice was given by means of a poster placed on display in the local postoffice.

The postmaster points out that it is necessary for the government to have as complete information as possible on the American stake abroad to assist the military authorities and civilian governments in the fighting fronts and to bring about sound solutions of post-war problems.

Report forms, known as TFR-301, may be obtained through commercial banks, or from the nearest federal reserve bank, the postmaster states. Penalties are provided for those who willfully fail to file reports.

CATTLE MARKET SAGS.

FT. WORTH, Nov. 16.—The cattle and calf market at Fort Worth today was very slow with only sales carrying prices about 20¢ to 30¢ on most classes except good slaughter steers. Some buyers again were talking lower prices today. Good butcher hogs were steady but all hogs outside of government-supported weights were weak to lower.

HERBERT F. RAWLL

Founder and President of Christmas Club who announced today that approximately \$300,000,000.00 of this year's total Christmas Club distribution of \$420,000,000.00 was being used by the members for War Savings Bonds and other Government War, anti-inflationary purposes.

KANSAS FAMILY—Kansas can boast of big crops in families as well as on the land. Take, for example, family of Mr. and Mrs. Math Fries of Ness County. It consists of 11 sons and eight daughters. Statisticians assert that if Fries went into the Army, Uncle Sam would pay his wife \$400 a month, figuring dependency allotments for the 19 kids.

SAVING RATIONED MEATS

The Texas deer season, which opened this morning and lasts 45 days, was hailed with pleasure by the usands of Texans, who, bright and early, took to the brush of mountain and valley to participate in this great sport. Point-free meat, which means a saving of rationed meat, also added to the hunting lure this year.

It is impossible to print the names of all Ciscoans who joined the throng of hunters today, and many will await the return of the early trippers to deer zones in the hope of benefitting from their experiences, but the following local folk have already departed:

Dr. G. M. Stephenson and L. B. Denning, Jr., in Gillespie county.

O. J. Tillinghast, W. J. Foxworth, J. T. Anderson, Mr. Tillinghast's brother from Lubbock and Ab Cooper, on the Llano river between Llano and Mason; expect to return Friday.

Mr. and Mrs. Marston Surles, Mr. and Mrs. Wesley Smith, Mr. and Mrs. Bill Bennie, Mr. and Mrs. Clyde Wilkins and B. B. Longacre of Ft. Worth; on Garrett ranch near Llano and will remain there until the end of the week.

Charles J. Kleiner and Dr. D. Hall; Mason county.

From Austin comes this comment on the hunting season in Texas:

"Hunters this year have an almost unprecedented opportunity to vary their shooting, if they can solve the ammunition shortage. The wild turkey season is concurrent with deer hunting, both ending Dec. 31. Dove hunting will be legal in the south zone until Nov. 30, and the season on ducks and geese runs from Nov. 2 to Jan. 10.

"Excellent bags of doves and ducks have been reported from fortunate hunters who have ammunition.

"Deer hunters have an added problem this year if they do kill a buck. Available cold storage space is reported to be almost nonexistent. Last season's kill was approximately 35,000.

"Most hunters in Austin, who patronize leases in the Hill country west of Austin and in South Texas, were reported waiting for cooler weather to make their first hunt. An exception was Gov. Coke Stevenson, who expected to be hunting the first morning with a party of friends with whom he has hunted for seventeen years."

23 SOLDIERS ENJOY CISCO HOSPITALITY

Twenty-three soldiers of the eighth army corps, Camp Bowie, were entertained by Cisco people over the weekend. A dance was held at the Service club Saturday night and Sunday afternoon they visited Lake Cisco, went pean hunting and horseback riding.

Mrs. Philip Pettit, chairman of the Service club, made arrangements for the young men's visit here. Hostesses included Mrs. C. E. Moore, Mrs. John Brice, Mrs. Jimmie Allen, Mrs. Bob Carswell, Mrs. James Waddell, Mrs. Forrest Wright, Mrs. Charles C. Jones, Mrs. W. W. Milner, Mrs. A. C. Green, Mrs. O. J. Russell, Mrs. E. P. Crawford.

CISCO BOY IS NOW A PARATROOPER

Turner S. Kisner, son of Mr. and Mrs. D. L. Kisner, 808 Twelfth street, Cisco, who has been attending the parachute school at Ft. Benning, Ga., successfully made his fifth and qualifying jump last Friday night.

This tactical night jump completed Kisner's parachute training, which lasted four weeks and included jumping from the towers 250 feet high and learning completely the technique of safe jumping and landing. The Cisco young man has thus earned the right to wear the Wings and Boots of the U. S. army's most modern soldier, the Paratrooper.

Fort Benning is the school at which all army paratroopers in Tunisia, Sicily, New Guinea and all over the world, received their initial jump training. In the last six months, as the result of constant study and refinement in instruction, casualties in training have been reduced over one third. At the present time a man jumping from a plane at the parachute school has less than 1 per cent chance of being injured.

PROTEST MEAT PROGRAM.

CHICAGO, Nov. 16.—The American Meat Institute insists that the government's cattle price stabilization plan which is to become effective Dec. 1 would increase the confusion already created in the livestock and meat industry and would aggravate the unfavorable outlook for beef producers.

BAGGED THE LIMIT.

SOUTH PACIFIC, Nov. 16.—Lt. Ralph Tuttle of Coffeyville, Kan., staged a one-man air raid on the Bonis airstrip in the island of Buka before dawn Nov. 13 and scored one of the most impressive bags yet reported by a single fighter—three single engine monoplanes, a biplane, a Japanese and 15 Japanese all destroyed.

SURE OF SEAT—So many spectators daily appear at trial of Alfred de Marigny, charged in Nassau, Bahamas, with murder of his father-in-law, that seats are at a premium. Mrs. Taylor Knowles of Miami, Fla., makes sure of a seat by bringing hers with her, as well as her lunch.

BREAKABLE TOYS—Stores are warning parents this year that Christmas toys can't be guaranteed, for war materials are cardboard, plaster, cheap wood, wicker and fabric. Above, WAC, WAVE, Army mule and Navy goat are shown in New York, giving military touch to this season's selections.

JUNIOR COLLEGE SUPPORT

"Great oaks from little acorns grow" is an age-old truth that has been the stimulus for the accomplishment of many big things.

Those of Cisco who are college-minded have vision of Junior college becoming a state-operated institution after the present war, when the scramble will come for young men of the Cisco Country to finish their education interrupted by the call to arms, and given a boost by the fact that this education will be paid for by Uncle Sam as his bonus for giving up college careers to defend America.

In the minds of those of Cisco who are following the trend of educational events and plans, and who are making a study of the future educational program of the state department of education, there is little doubt of this ultimate end, so it behooves citizens to be constantly working to help bring this about.

Happily, the people of Cisco and surrounding areas are aware of this development and will be found ready to join the ranks of helpers to the extent they are made aware of the program and the advantages that will accrue to the public—not only educationally but as a business stabilizer to this section.

Fortunately, Cisco Junior College is not asking money support, since the school is not in need of financial aid at this time. However, it does need—as all schools do—the enthusiastic moral support of everybody. Not merely a passive support of good will, but active boosting for the institution as an educational factor that will most certainly raise the standard of citizenship as the school expands.

As a business asset, the path is clear. Already many communities are being tied in with Cisco as their educational center by patronage of Junior College as a secondary school for their children—an institution where they may send their sons and daughters for a two-year college course, with all the privileges of a fully accredited school, where the work they do will allow them to enter any university of the first class in Texas without further examination.

Naturally, as the patronage of communities extends its boundaries, the seat of this college, which is Cisco, will become more and more the seat of their patronage in a business way. From the standpoint of a trading place, Cisco business institutions cannot fail to grow and thrive.

President R. N. Cluck and his board of education have a clear view of this long distance program and are working to bring that vision nearer and into an actuality.

The fact that Junior college has had small patronage during the past years, is no cause for discouragement. Harvard University, one of the great schools of America, had an enrollment of less than thirty students during the first fifteen years of its existence, and during the first few years, a much smaller enrollment—some years only four or five students. So Junior College is not suffering from lack of enrollment, although Mr. Cluck and his faculty members would prefer a much larger enrollment than at present. But the thing they and others who are school-minded want is the wholehearted, enthusiastic moral support of the whole community of Cisco. They want Ciscoans to think and talk the future development of their school. And it is their school and

(Turn to Page THREE)

NAZIS ADMIT THAT 32 DIVISIONS GAIN IN 5 CLOSELY SYNCHRONIZED SECTORS

MOSCOW, Nov. 16.—Red armies rolled westward today on a 200-mile line, laying siege to Gomel and Rechitsa in a White Russian drive which threatened to split the German forces by unhinging the central and southern fronts on both sides of the Pripyet marches. Success of the strategy would open the way for invasion of Germany.

Front reports indicated the fall of Gomel, key German base in lower White Russia, was imminent, and Rechitsa, across the Dnieper 25 miles to the west, was equally insecure. Both had been by-passed, and now are under assault.

The German radio reported that well over 32 Russian divisions totaling some 500,000 men, were attacking in five closely synchronized sectors of a 500-mile front—six to seven in the Dnieper Bend, near Dnepropetrovsk; "strong forces" above Krivoi Rog; 10 divisions in the Cherkassy area; "strong" forces in a direct attack on Rechitsa; and 16 divisions along the Smolensk-Orsha highway. Dents of penetrations in the German positions on all fronts were acknowledged.

The collapse of the German defenses in the Gomel sector, which would separate their armies by a Soviet wedge driven into the marshland to the west, was heralded by cutting off the Gomel-Pinsk-Warsaw railroad behind Rechitsa, leaving both Gomel and Rechitsa virtually isolated and under direct attack.

Attacking Red army units also cut the trunk highway to Ovruch junction in the area southwest of Rechitsa. Detachments of Gen. Nikolai F. Vatutin's first Ukrainian army were moving up against Ovruch for a junction with the Soviet forces striking from White Russia.

Pacing the drive west of the middle Dnieper, swift Soviet cavalry and armored forces reached points 15 miles from Korosten and 25 miles from Ovruch.

The consolidation of Soviet positions around captured Zhitomir enabled the Red Command to shift the weight of its campaign northward.

YANKS THROWN 200 MILLION BACK NORTH BARRELS LI-OF VENAFRO QUOR STORED

ALGIERS, Nov. 16.—Two slashing German counter-attacks seeking to stave off an Allied threat to their Italian winter defense line have driven American outposts from a small area of vital Mount Croce north of Venafro, it was disclosed today.

In a good sized skirmish which was practically the only activity on the 90-mile trans-Italy front, Americans of Lieut. Gen. Mark W. Clark's Fifth Army yielded slightly before the latest Nazi lunges of a series started several days ago.

Bad weather immobilized most Allied forces but the British Eighth Army gained some high ground north of Atesa and patrols made sorties across the Sangro river near the Adriatic. The Americans were fighting in rugged terrain on the western end of the line.

The Allied commentator in announcing the action did not reveal the extent of the German gain north of Venafro but it appeared to be slight.

MEXICO WILL SEND MORE WORKERS HERE

WASHINGTON, Nov. 16.—WMC officials said today that a tentative agreement had been reached with the Mexican government by which the number of Mexican nationals brought into this country for railroad maintenance work would be increased from 15,000 to 20,000.

Denial word from Mexico City making the agreement effective is expected to be received here soon, said Robert Clark, WMC employment official.

One provision of the new agreement, Clark said, would permit American railroads to keep the number of Mexican nationals employed on their lines steadily at 20,000.

WASHINGTON, Nov. 16.—Five Senators set out today to pry some whiskey loose in time for Christmas by breaking up what they called a "nationwide conspiracy" in the liquor industry.

Chairman Van Nuys of Indiana, of a judiciary subcommittee, told reporters that the very threat of a congressional investigation already has led to reports that "we may expect the withdrawal of some liquor from government warehouses very soon."

"If the inquiry leads to the release before Christmas of some of the more than 200,000,000 gallons now stored in government warehouses," Van Nuys said, "the government should reap a big reward in taxes and there will be less opportunity for the sale of dangerous bootleg liquors at enormous prices."

NEW IDEAS—New treatment of mental cases arising from war were reported by Brig. J. R. Rees, chief of British Army's neuropsychiatric service, who has completed tour of American hospitals. He is shown during press interview on arrival in New York.

THE CISCO DAILY PRESS

(Consolidated with Cisco Daily News and Cisco American and Round-Up, November, 1937.)

Entered as Second Class Matter December 11, 1934, at the post office at Cisco, Texas, under Act of March 8, 1879.

A. E. O'FLAHERTY, Publisher and General Manager;

Published daily except Saturday and Monday at Cisco, Eastland county, Texas, by Free Press Publishing Corporation, incorporated under the laws of Texas. Editorial and publication offices at 304-308 D avenue, Cisco, Texas.

SUBSCRIPTION RATES: \$2 per year by mail (outside Cisco) in Eastland, Stephens, Shackelford, Callahan, Brown and Comanche counties, Texas; outside the above-mentioned counties \$3.50; \$4.75 in U. S. outside of Texas.

Per year, in advance (Cisco) \$5.00
Per week, by carrier boy 12c

CORDELL HULL.

It is a familiar truth that able and useful men often have to leave home to be appreciated. This is not exactly the case with Cordell Hull, who has been pretty well appreciated all along, but certainly he has risen in stature and general estimation as a result of his diplomatic visit to Moscow.

By all accounts he made a great hit with Stalin and the other statesmen there, and his presence and influence had an important part in the great program adopted for international cooperation.

As a statesman, Secretary Hull now stands at the peak of his career. At the age of 70, as with the shrewd hero Ulysses, "age hath still his honor and his toil."

Mr. Hull should and must have a prominent part in winding up this war and launching a more orderly world. Notwithstanding his age, many Americans would like to see him in the presidential chair. His honesty, intelligence and human understanding are unquestioned. On the other hand he is not and has never been accused of being a "politician," hence will contribute his best efforts to America as secretary of state or as plain Cordell Hull, U. S. citizen.

ARMY SCHOOL.

The biggest school on earth is perhaps the American army. The Russian army might rival it, though no definite word has crossed the ocean to show what schooling the Soviets are giving their soldiers. Our army, as is well known, has long given instruction in all manner of practical trades, as well as in the languages and civilizations of the countries in which Americans are likely to be fighting.

Now a new subject has been added, casting a shadow of things to come. This treats of the government of conquered countries, especially Germany. Captains and majors predominate in the classes. A thorough survey is given of Germany's government, economic and religious structure, and ways of life generally. If the administration of Germany after Hitler's fall is not successful, it will not be because our soldiers do not know what they have to face.

This knowledge, of course, is not restricted to the United States. Great Britain and Russia will both have something to say about the next government of Germany.

It is by no means too early to make these preparations. There are increasing signs of late that the end of Nazism is in sight.

OUR PUBLIC SCHOOLS.

It was given out in Austin the other day that after being duly purged the scholastic census rolls carried the names of 1,494,267 children who are entitled to share in the apportionment of the available school fund, which this year will be \$25 per capita, or \$37,156,675 in the aggregate.

If the experience of a good many years may be relied on, out of that number 1,280,146 will have been enrolled in the public schools during the year, and out of that enrollment there will have been an average daily attendance of 1,067,044.

Expressed otherwise, out of the entire number of scholastics only about 85 per cent will enter the public schools, and out of that 85 per cent only about 80 per cent will attend regularly, equivalent to 68 per cent of the scholastic population.

The difference between the number of scholastics and the number of enrolled does not measure the violation of the compulsory attendance law, for some of the enumerated scholastics go to private schools, though the allowance to be made on that score is small, not to say negligible.

In any case, the available school fund will this year make an allotment of \$25 per capita for 214,121 scholastics, at the cost of \$5,353,025. WHO WILL NOT ENTER THE PUBLIC SCHOOLS, and also for 204,102 who, though enrolled, are customarily absent, which item of waste amounts to \$3,061,550.

These are the financial consequences of distributing the available school fund on the basis of scholastic population. But that practice has other deleterious consequences of different kind.

One is that of giving local school authorities a seductive incentive for conniving at violations of the compulsory attendance law; for, by getting per capita apportionments for scholastics who are not taught, they are enabled in many instances to operate their schools without the aid of a local tax levy.

During the 1941-42 school year, 1,090 out of 6,260 common school districts did that.

Pretty certainly the number will be greater this year for the increase in the amount of the per capita apportionment from \$22.50 to \$25 will make it an easier accomplishment.

School districts which do that disqualify themselves for equalization aid, and schools which are maintained with only the money derived from the available school fund are pretty certain to be sub-standard. This is another, and probably the most evil of the consequences which are chargeable to the policy of apportioning the available school fund on the basis of scholastic population.—Dallas News.

WEDNESDAY IS BUNDLE DAY FOR CISCOANS

Wednesday has been designated

JAPS NOT HERE ANYMORE — Yanks and Aussies gave plateau at Lae, New Guinea, a shellacking with bombs and shells. When they arrived there in person, this is the scene that was presented. There's not a whole building anywhere

Our Merchant Marine

Our armed merchant ships bore the brunt of sea warfare in the Revolution.

These privateers carried our ambassadors, dispatches and gold to Europe, under the enemy's guns, and brought back arms and ammunition for our troops.

1,000 merchantmen, commissioned as privateers, captured at least 3,000 enemy ships.

The greatest transportation job in history is now being done by the American Merchant Marine, moving men, equipment and materials of war to all parts of the world.

Information courtesy of American Merchant Marine, New York.

Buy ANOTHER War Bond TODAY!

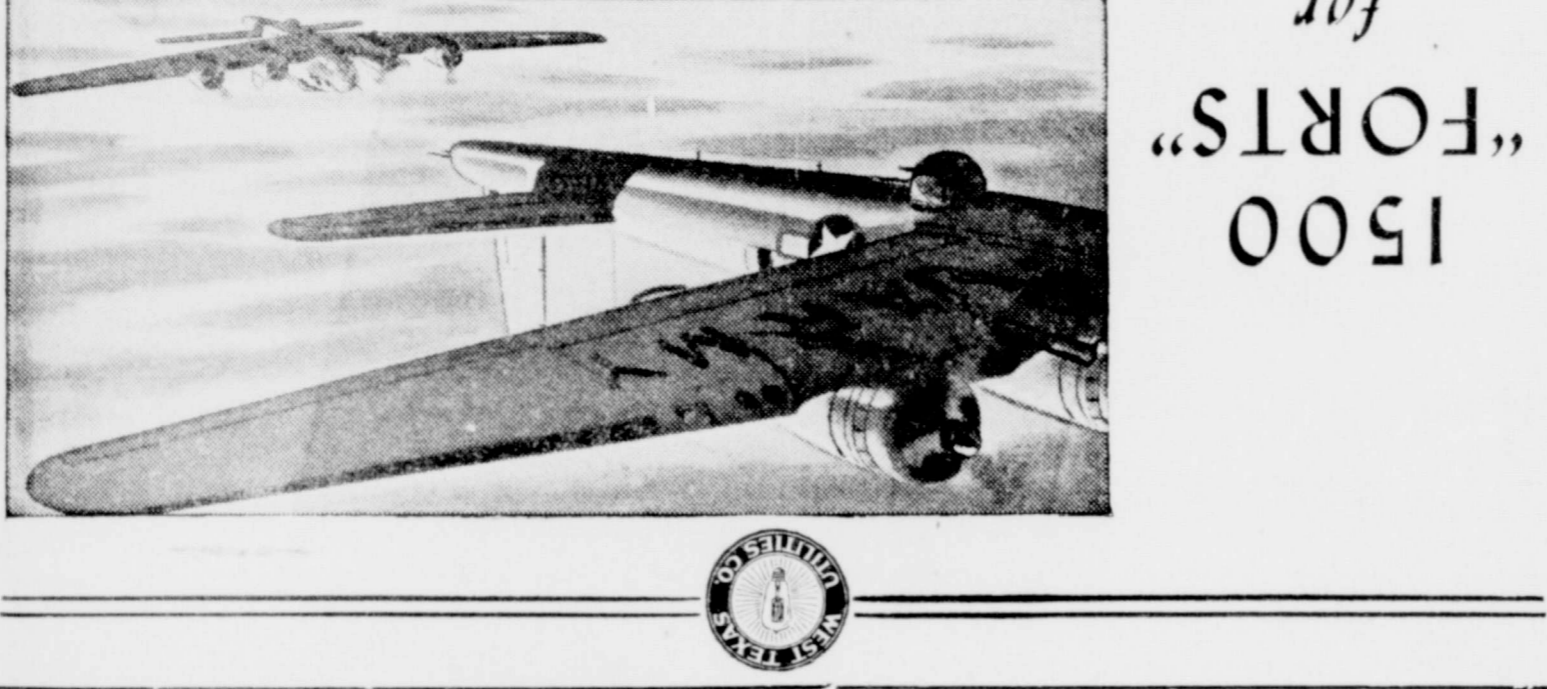

That's What We're Doing to TOKYO and BERLIN for 1500 "FORTS"

Reddy: That's the way we're spending our wages.
 You: What are your wages, Reddy?
 Reddy: Your electric bill, the small sum you pay me for the jobs I do for you daily.
 You: But just how do you convert them into dollars to send over Berlin and Tokyo?
 Reddy: Like this: Fifteen cents out of every dollar you turn over to me my company turns over to the federal government as taxes—which in terms of the entire industry means over 400 million dollars. And that's ENOUGH TO BUY MORE THAN 1,500 GIANT BOMBERS—at a quarter-million each!

That's why we're spending our wages.
 You: But how do you manage?
 Reddy: By business management under free enterprise—that's how!

That's why we're spending our wages.
 You: But how do you manage?
 Reddy: By business management under free enterprise—that's how!

The Basic Value of Your Home—
 ... is in the title, not in the location, the cost of the improvements, nor the fertility of the soil, for without that security which a good title guarantees, there could be no value. The abstract is a written history of the title, and the only means yet devised whereby imperfections may be discovered and curative processes made possible.
 Wise buyers and leaders never make land transactions without an abstract.

War conditions won't let you build but you can—
 Insulate your Home
 Do Wall Papering
 Paint all you want
 Put on a new roof
 And keep your home in good repair.
 We have the materials you need.

parents. She will spend a few weeks with her parents, Mr. and Mrs. W. W. Milner, before going to Santa Ana, Calif., to join her husband, Lieut. E. A. Smith.

KIND PEOPLE PROVIDE GIFT FOR ORPHAN

SEATTLE, Wash., Nov. 17.—Seven-year-old Patrick Huey will receive an electric train for Christmas—the train his daddy promised him three years ago. That was the year his mother,

Mrs. Edison Huey, dropped dead as she was decorating the Christmas tree for Pat. There were no Christmas festivities in the Huey household that year.

Meanwhile, Pat's daddy, a naval reservist, was summoned to active duty and Pat went to live with his grandparents, Mr. and Mrs. Samuel E. Huey.

Seven days after his sixth birthday Pat received a telegram from the government—"We regret to inform you. . . . His daddy had been killed in action."

This year his grandparents searched everywhere for an electric train. None could be found. Finally they appealed to a Seattle department store. Last Sunday the store took full page advertisements in Seattle papers asking for a train for Patrick Huey.

All Monday and Tuesday grown-ups and children called the store and begged for the opportunity of donating their train to bring a small boy happiness.

Some of the twenty-eight offers came from parents of boys who've outgrown trains and are in the armed forces overseas; others came from children who loved their trains but thought Pat deserved their trains. Most of the sets were incomplete.

Then Clayton Peterson, one of those who offered a train, agreed to collect all the trains and repair and reassemble them in the best possible railroad system.

BOY GOT TWO.

AUSTIN, Nov. 17.—Dudley Fowler, 16-year-old deer hunter, got two firsts Tuesday. He brought in the first buck of the 1943 hunting season, and it was also the first deer he had ever killed. He shot the buck in a pasture less than 10 miles from the city limits of Austin.

13 Per Cent of Our Food Goes to Our Armed Forces

Your Government says a soldier or sailor needs 5 1/4 pounds of food a day, or 1 1/2 civilian rations. To make sure that the right food is always available at the right time, the armed forces need a 90-day reserve for men quartered in this country—and a nine-month supply for men overseas. The right foods are the "protective foods"—meat, fats and oils, milk, canned goods, citrus fruits, dairy products—foods which are "short" in the civilian supply.

THE BIG JOB

is right in your daily homemaking routine

The Controlled Heat of your Gas Range will help

- #### CUT FOOD WASTE
- Plan Right • Cook Right • Eat Right
1. Know the seven basic food groups and plan your meals from them.
 2. Plan by the week so that two or more protein foods will not be included in the same meal.
 3. Plan a vegetable plate or a nourishing soup as the main dish for several meals during the week.
 4. Use fresh foods in season. Cook most vegetables in a small amount of water; using only about one-half inch in a covered utensil.
 5. Cut down your grocer's waste. Don't pinch fruits. Don't handle vegetables.
 6. Serve smaller portions with the provision for seconds. Establish a rule for eating everything served.
 7. Don't buy rationed foods for the sake of using stamps. Don't give away or trade stamps.

Buying bonds, working for the Red Cross, helping with Civilian Defense—of course you are helping! But the big job is making the food our farmers are producing go just as far as it will. • Cook only the amount of vegetables needed. Serve left-overs creamed, in casserole dishes, or cold—in salads. • Cook vegetables and fruits in their skins wherever possible—and over a low gas flame. • Roast meats at low temperature in your gas oven to reduce shrinkage. Use left-overs in stews, meat pies and hash.

Our Home Economics Department will be glad to help you with specific information on how to cook and process food for wartime meals. Be sure to pick up each week at our office your free copy of our Modern Homemaking Bulletin.

She's right in the center of things

The telephone operator wears no uniform but she's a vital worker in the war. Her job is to get through the calls that build ships and guns and planes and tanks. And help a soldier talk to the folks back home.

When she tells you the Long Distance circuit you want is busy, you can help by canceling your call if it isn't really necessary.

If you must telephone Long Distance, please limit the call to not more than 5 minutes. You will be helping everyone when you do this.

Helpful Tricks in Saving Used Fats

TAKE ANY TIN CAN and tie cheese-cloth loosely over top. Or set an old strainer on top, and leave it there. Add every drop of kitchen fats you can no longer use for cooking. Or just throw fats into can unstrained, and when can is full, strain the whole lot at once into another can.

PLEASE HELP! Used fats no matter how black are needed desperately for ammunition and for medicines. Save them in a tin can, not glass. Any kind of can will do. Rush them to your meat dealer. Start doing it today, won't you?

Approved by War Production Board, Paid for by Industry.
