SHRADER GAVE HIS LIFE FOR HIS COUNTRY

Mrs. and Mrs. John H. Shrader of Scranton have been notified by the war department that their son, Jackson P. Shrader, 26, a technician of the fifth grade and attached to the medical corps of the 3rd division, was killed in action in North Africa on September 16. The young man had previously been reported as missing.

Jackson P. Shrader was well known and highly esteemed in Cisco, having attended Randolph College here following his graduation from Scranton high school. Before entering the service in February, 1941, he was an employee of Montgomery-Ward in Fort Worth.

During his training period he was located at Camp Bowie, Tex., Camp Blanding, Fla., Denver, Colo. and Camp Edwards, Mass. The telegram from the war department to the bereaved parents and a letter would follow.

3 HOME DEMONSTRATION CLUBS BUSY

Mason Valley Home Demonstration club women have been painting and remodeling their homes. Mrs. W. E. Tankersley painted her kitchen. Mrs. Charles Brockman remodeled her living room and dining room and painted them. Mrs. D. B. Franklin, Mrs. C. R. Westfall and Mrs. T. L. West have each added one new room to their homes and have painted inside and out. Mrs. J. W. Harrison and Mrs. A. F. Beck have painted their homes inside and Mrs. Thad Henderson has painted the cabinet and woodwork in her kitchen.

Mrs. R. O. Buckley, home food supply demonstrator of Dedden Home Demonstration club, kept her sales slips for the cream sold during October and will receive \$6 for this. The AAA is making payments of 6 cents per pound butterfat to those who can give proof they would be due more than \$1 for the month of October. Similar payments will be made for the sale of milk, cream and butter in November and December.

Flatwood Home Demonstration club has sent 25 boxes to boys in the service this year. From replies received, the boxes have been greatly appreciated.

North Star Home Demonstration club refinished the inside of its club house. They have tacked six quilts and quilted one to make some money. Miss Gladys Martin, county agent, reports.

Our pretty little niece tries to keep her husband from worrying about her conduct. She does everything in her power to keep him from finding out what it is.

AMERICANS CAN BE THANKFUL

Eastland, Texas, November 23, 1943. The Daily Press, Cisco, Texas.

The great annual day of Thanksgiving will be here again Thursday. While this definite custom dates only from early American history, since the birth of man this feeling has from time to time found lodgement in the heart of mankind.

Today most all of our thoughts are centered on World War No. II. Deep sorrows have already come to or close to nearly all American families, and before the war terminates most all of us will walk through deep shadows. Notwithstanding all this, there are still many things for which we can all be truly thankful. We all have an opportunity to definitely express this thankful feeling.

We must continue to support our boys and girls on the far-flung army fronts in all theaters of the great world conflict and the most tangible and effective way to do this at this time for an entire people is for each one of us—as far as our individual affairs will permit—to go to our banks and post-offices and at once buy our fair share of the Series E, F and G Bonds to make possible this country's subscription of \$54,700 as our November quota of the national war cost.

When we have done this to the extent of our abilities we can then be at least truly thankful for this duty performed in this great crisis of our nation's history.

For one single moment we must not fail those who are doing one thousand times more for us at home than we can ever possibly do for them!

Very kindly yours,
CYRUS B. FROST,
Eastland County Chairman.

LIVESTOCK QUOTAS.

WASHINGTON, Nov. 24.—The War Food Administration said today that an order suspending quota limitations on livestock slaughter would continue in effect until further notice. The suspension had been scheduled to expire Dec. 1.

U. S. CASUALTIES.

WASHINGTON, Nov. 24.—Announced casualties in all armed services of the United States since Pearl Harbor total 121,319, with the army bearing the greater share—89,650 as of Nov. 11.

MANPOWER SHORTAGE—Another man-job bites the dust as 18,000 persons watch six girl jockeys in action at Rockingham Park, Salem, N. H. The six rough riders are, from left: Margaret Griffin, Dorothy Harris, Helen McCarthy, Leila Phillips, 13-year-old June Reardon who brought in winning horse, and Mildred Lamond.

HERE WERE THEIR HOMES—Only blackened skeletons remain of their homes in Orel, Russia. These residents of town return to find that retreating Germans destroyed ruthlessly. Soviet general talks with them about future plans.

CISCO HUNTERS RETURN MINUS DEER

In speaking of his recent deer-hunting trek to Mason county, O. J. Tillinghast said the five days spent on the Llano river below the town of Mason were chuckful of pleasure; that while his party failed to get what they went after, nevertheless all returned home in good spirits and feeling that the outing was well worthwhile.

The party was composed of J. T. Anderson, W. J. Foxworth, O. J. Tillinghast, Cisco, and G. W. Tillinghast, brother of O. J., from Fort Worth. They occupied an old ranch house owned by August Donop of Mason, which was equipped with running water and electric lights. The pasture in which they hunted to no avail consisted of 640 acres.

The Cisco Tillinghast feels they might have had better luck had they camped out in the open and away from electric lights and other city conveniences; or if it had been possible to keep Anderson and Foxworth quiet during hunting hours.

LOWER MEAT POINTS.

WASHINGTON, Nov. 24.—The Office of Price Administration is moving toward further lowering of meat ration point values for civilians as heavy marketing of hogs and cattle continues to flood the nation's packing centers.

ALMOST LIKE MOTHER'S—Americans in England demand apple pie and British bakers have learned to make the tasty dish. Now they supply plenty to Yanks. Above is a bakery girl carting out a trayload of pies fresh from the ovens. Pies are headed for U. S. Army mess table.

CISCO WOMAN DIED IN RANGER AT 7 AM.

Mrs. Madeline Brooks, 68, died in a Ranger hospital at 7 o'clock this morning, after a short illness. She was the widow of Elzie Brooks, who died here about two years ago.

George H. Gray of Laredo, Texas, had lived at her home on the old Eastland highway, just inside the city, until her recent removal to the Ranger hospital. She had resided here for some twenty years.

The funeral will be held at 3 o'clock Friday afternoon at the Church of God, with the pastor, Rev. C. S. Moad, officiating and Thomas funeral home having charge of the remains. Burial will be in Oakwood cemetery beside her late husband.

EARLY MORN SERVICES TOMORROW

Cisco's traditional Thanksgiving service, which for several years has been well attended by the people of the various churches and of no church, will be held tomorrow morning at 7:30 o'clock at First Presbyterian church. This meeting is sponsored by Cisco Ministerial association, of which Rev. Cooper Waters, pastor of First Baptist church, is the president.

The sermon will be delivered by Rev. J. R. Wright, pastor of First Christian church and past-president of the sponsoring association. Others who are to have part in the service of worship, which will be in charge of the president, are Rev. Seth Kirkpatrick for the prayer, Rev. C. S. Moad for the scripture reading, S. E. Hittson as song leader, Mrs. S. E. Hittson as organist and Rev. L. H. Clegg to give the benediction.

Members of the various choirs of Cisco are invited to be present a few minutes before the hour and to fill the choir left for a consolidated group of singers who will lead the congregation in uplifted singing of appropriate hymns of thanksgiving.

The early hour of 7:30 has met with general approval in past years as evidenced by the good attendance. The day then is left free for family gatherings and other customary activities without interruption, according to statements from various of the ministers. The service will be limited to one hour. The offering will be given to Cisco Community Chest, by action of the Ministerial association.

HOUSE IS READY TO STRIP OPA

WASHINGTON, Nov. 24.—The House was set today for a move to override administration opposition on another domestic issue and strip the OPA of control over gasoline and oil prices.

As the full House defeated the administration's food subsidy program yesterday, critics of the OPA succeeded in getting the out of the banking and currency committee a bill by Rep. Wesley E. Disney, D., Okla., to give control of gasoline and oil prices to Petroleum Coordinator Harold L. Ickes. It would empower Ickes to increase the price of crude oil, leaving OPA the rationing duties.

A vote on the bill, which had been pigeonholed by administration supporters, was scheduled for Dec. 13.

JAPS USING GAS.

CHUNGKING, Nov. 24.—The Chinese army organ, Sao Tang Pao, appealed to President Roosevelt yesterday to remind Japan that he meant business when he threatened retaliation in kind against any Axis power employing poison gas. The appeal followed a Chinese high command allegation that the Japanese have been using poison gas extensively in the current battle in central China.

ROAD TO TOKYO IS NOT ROSY, BUT WE FACE THE FUTURE CONFIDENTLY, SAYS GEN. NIMITZ

PEARL HARBOR, Nov. 24.—Powerful American forces secured victory in the Gilbert Islands today and defied the Japanese to stop their rolling offensive on the mid-Pacific sea route toward Tokyo.

Only 80 hours after troops stormed islets in the coral chain on Japan's outer line of Empire defenses, Admiral Chester W. Nimitz, Pacific Fleet commander, announced the Gilberts were in the firm grip of the U. S.

"While it isn't a rosy road to Tokyo, we face the future with complete confidence," he said. "We went prepared to meet attacks."

American attack units will consolidate their positions for further operations, he said, adding they were ready to meet the Japanese fleet anytime.

Tokyo Radio quoted a Japanese naval spokesman as acknowledging that the islands were in Japan's main defense line across the vast Pacific, adding that the chance for a naval "showdown" was welcomed. The spokesman predicted "tremendous" sea battles.

Nimitz spoke to newspapermen yesterday evening shortly after his daily report and said that 27th Army divisions troops from New York had captured Makin Atoll, that Marines were slowly but surely cleaning out Tarawa and that the situation on Abemama was "well in hand."

The report also disclosed that carrier-borne aircraft from the big fleet which accompanied the invasion forces were teaming with Army Liberators from the South Pacific in continuous blows against the Marshalls to the north of the Gilberts. The Marshalls may be the next invasion objective.

The offensive so far, Nimitz said, cost only light casualties on Makin and somewhat heavier casualties on Tarawa. Not an American ship had been lost up to the time of his report. The Japanese had tried nothing but intermittent air attacks.

When newspapermen asked him to expand on the long-range aspects of the offensive begun 3200 miles southeast of Tokyo—to answer the question "where do we go from here?"—Nimitz replied with a confident smile:

"Wherever the Japs are. The object of the Gilberts offensive was to establish contact with the enemy. We expect to have some airfields, probably one on Makin as well as Tarawa. We have got to have places to roost when we start working on these people. We must be prepared to meet the Jap fleet."

MIGHTY AIR PLANES HIT BERLIN AGAIN

LONDON, Nov. 24.—An hour-long parade of Britain's biggest bombers—only a few hundred short of the 1000 which hit the city 24 hours earlier—all but paralyzed battered, burning Berlin last night with another 1500 tons of explosives in the third assault of an offensive to smash the Nazi capital.

The RAF's four-engined heavyweights stoked fires still raging from previous raids, set new conflagrations and wrought further shattering destruction all the way from the center of Berlin to its industrial outskirts.

Though it was estimated it will take at least 25 to 30 major raids to wipe out Berlin to the extent Hamburg was blasted, little doubt was held here that Berlin's life has been shattered at least temporarily with traffic brought to a standstill, water, electricity and gas service disrupted and food supplies endangered.

Reports reaching Sweden said thousands of Berliners were fleeing the city.

GERMANS HIT REDS FOR A BIG ADVANCE

MOSCOW, Nov. 24.—Strong German forces pushing toward Kiev with violent tank and air attacks have failed to break Russian army positions in depth, Red Star reported Wednesday.

Three successive retreats which

the Russians have made since the start of the major German counter-attacks in the Ukraine were attributed to heavy pressure of superior enemy numbers, but the army newspaper indicated the main Russian line was intact for the decisive stage of the battle.

Kiev was recaptured Nov. 6 and the Germans Wednesday were within 45 miles of the Ukrainian capital in the environs of Brusilov, after covering nearly half the distance back from Zhitomir.

FOOTBALL BIG EVENT IN CISCO TOMORROW

With clear weather, the Thanksgiving Day football game at Chesley Field tomorrow afternoon at 2:30 is expected to draw a large crowd of fans from Cisco and surrounding towns.

The Cisco team will put up a good fight against the much stronger aggregation from Breckenridge and the visitors may not have the walkover they are said to anticipate.

The game will be called promptly at 2:30. Coach Sweeney says, and the local bang and pep squad will be there to do their part. The Breckenridge team will arrive tomorrow morning.

HE KNOWS THEM.

FT. WORTH, Nov. 24.—J. H. Course, a teacher of economics in universities in Japan for 13 years, who left Japan 20 days before the Pearl Harbor attack, urged the extermination of the Japanese as the only safe course for the United States, Tuesday at the Lions club luncheon at Hotel Texas.

FROZEN LAKES.

As winter settles down over the Great Lake region between Canada and the states, the biggest and most efficient hauling system on earth is icebound. Ordinarily it means idleness for the 16,000 men who operate the freighters. From mid-December to late March they loaf around and rest up from their hard jobs. But not this winter.

The War Man-Power commission will ask the members of the Lake fleet to report to the U. S. employment service. They will not have their occupational deferments extended through the winter months unless they take temporary employment in essential work while on shore. Then in the spring their deferments may be canceled if they do not return to the lake shipping industry.

This sort of compulsion may "gripe" a good many of the inland mariners, but it is sound policy in war time. And in fact many of them have been following it on their own initiative the last few years. It is rather tough, though, on some of the inland "tars." They love the lakes as salt water sailors love the sea, and a rolling deck better than solid land.

GERMAN PEACE RUMORS.

First the rumor, then the reality. This being the usual order of events, special significance attaches to the spread of reports in Germany that peace is coming soon.

These rumors extend to the army. On the Russian front tales of an early armistice caused many soldiers to go easy on the fighting because "there would be peace in a few days." This story comes from Sweden, with the addition that Field Marshals von Manstein and von Kluge found it necessary to issue an order of the day, absolutely denying the possibility of peace.

Both soldiers and civilians must know that the peace terms will not be soft. Yet so dreadful is their present state that an armistice on any terms is dreamed of with eagerness.

OUT OF THE SHELL.

"Life is a game from which no one can withdraw with his winnings at any time." So says Andre Maurois, the French author whose life of Shelley and other biographies have made him even better known to English-speaking people than to his own countrymen.

This is true of countries as well as individuals. Even after winning the war, the United States cannot hope to draw back into its shell and expect to remain untroubled by what happens in the world outside.

OLD IRON MINES.

It takes war requirements to bring out national resources. One of the most necessary materials, of course, is iron. For half a century the nation has depended mainly on the enormous deposits of the upper Lake Superior region, where most of the iron lies in pockets near the surface and is mined with big scoop shovels. But the abnormal demand also brings into use again mines not operated for generations.

One of the most unexpected developments is the opening of a "pre-revolutionary" area in the Adirondack Mountains, by the Republic Steel Corporation. Ore produced there is unusually rich, being classified as "high grade magnetite sinter" containing 60 to 68 per cent iron. Incidentally it is interesting to learn that ore may be produced again from mines in the Lake Champlain district about Albany, N. Y., near Port Henry. That is where Benedict Arnold got the iron for his warships and cannon balls, when he fought the British in that region early in the Revolutionary War.

There are many small mines, containing accessible iron and other minerals necessary now for war use, scattered around the United States. More will be heard of them as the war proceeds.

HULK HELPS—After Yanks blasted Jap ship, ship was conveniently beached on this island in Solomons to form a breakwater and protect landings by Allied forces. Here, in its shadow, U. S. Coast Guardsmen unload lumber and other supplies.

JAP BLASTER—Half-track-truck 75 mm. gun makes landing on shore of Bougainville Island. Big guns like this were used in the invasion to wipe Japs out of their pillbox strongholds, so that Marines could clean up the island. Proof again that, given the equipment, Yanks can outfight either end of the Axis.

ISLAND LANDING—About 200 Japanese opposed landing parties at this spot on Treasury Island, Solomons. But Allies quickly turned their opposition into rout. Then troops, mostly New Zealanders, brought their supplies ashore, as above.

NIGHT COUGHS
 YOUR CHILD'S coughing at night — caused by throat "tickle" or irritation, mouth breathing, or a cold—can often be prevented by rubbing throat and chest with Vicks VapoRub at bedtime.
 VAPORUB'S poultice-and-vapor action loosens phlegm, relieves irritation, helps clear upper air passages, thus tends to stop mouth breathing and invite restful sleep. Try it!

Scorn Overweight Motor Oil this Winter of War

"The Lighter the oil the better"... Discover how very light, by changing to Winter OIL-PLATING

Have you ever been a new papa? Have you ever had to enlarge the hole in the nipple of baby's bottle? The hot milk, just about as fluid as anything, barely comes through. Far "skinnier" than small holes in nipples are many of the oil spaces in your car's engine. That's still true after it is middle-aged or beyond. Any oil...any oil...has a hard enough time coming through and spreading all around. Overweight oil—easily thickened by cold—is far worse. The lightest oil your engine can use this season is rightest. And you can know that light oil will more than stand the gaff when it

includes the ability to give your engine internal OIL-PLATING.

Because a Winter change to Conoco Nth motor oil adds OIL-PLATING to engine parts, you can go your car's limit on lightness. Any good plating is a protective surface, and so is OIL-PLATING—attached all over your engine's insides, as if strongly "magnetized" there by a synthetic that's part of patented Conoco Nth. Now every moving part enveloped in its close-fastened OIL-PLATING must slide upon the rupture-resistant fluid film of Conoco Nth. Safety is multiplied!—though your economical Conoco Nth is so light that your battery, too, has every chance to outlive the Winter, and the War. OIL-PLATE at Your Conoco Mileage Merchant's—today, Continental Oil Co.

Dread Engine Acid Fought by OIL-PLATING

Normal combustion always leaves acids inside of your engine when it stops.

Formerly it seldom stood idle long. Soon mileage and speed heated your engine enough to oust acids.

But nowadays rationing may force long rests, while corrosive acids gnaw. To combat corrosion, metals are plated. You combat acid corrosion with your engine OIL-PLATED.

Where our Food is going...

Your Government says that thirteen per cent of our total supply goes to our armed forces at home and abroad, ten per cent to our Allies and liberated peoples, and two per cent to our territories (Puerto Rico, Hawaii, Alaska, etc.).

The rest of the supply—the bulk—three-fourths of the total—stays home to feed the civilian population. This three-fourths, however, is about equivalent to the average amount of food produced in this country in the years 1935 to 1939. Not all of this supply is made up of "favorite" foods—but it is the type of food to give the citizen a healthful, balanced diet.

One-fifth of all Food produced is wasted

There's Plenty YOU can do to reduce this WASTE

Like all other managers' jobs, your job as general manager of the household is complicated by wartime conditions. The biggest part of your job is making the tremendous amount of food our farmers are producing go just as far as it will. So plan carefully your meals and shopping. Shop the first of the week and early in the day. Avoid careless handling of fresh foods, as this is a big cause of food waste. Department of Agriculture estimates that one fresh tomato out of every seven has to be discarded because of bruising by customers. If one-third of what is wasted can be saved it will add about eight per cent to our food supply.
