BETTER TEACHERS.

Stringfellow Barr, president of St. Johns College, wants to see standards of general education greatly raised. He would like to have every ambitious young American given a college education. It wouldn't hurt a carpenter, he thinks, to have a knowledge of architecture, nor a plumber to be able to enjoy books or the fine arts.

But there is a great lack of good teachers. In Ohio, for example, 10,000 teachers have left their jobs since Pearl Harbor and one-tenth of those have not been replaced at all. The other 9,000 are new, retrained to some extent by 4,500 substitute teachers who are untrained or substandard.

There is need to restore the dignity of the teacher in the eyes of students and parents. Higher pay would help, too, by giving an incentive to fine young people to enter the profession, equip themselves more fully and stay in it. Most city schools pay teachers somewhere near adequate salaries, but rural schools are strangely retrograde. The farmer has his living on the farm and handles little cash. He forgets, in thinking of money for the teacher, that her education has been expensive, her present living likewise.

Men in the services are reported as anxious for education, for themselves or their children, better than anything they have previously known. Perhaps they will be able to broaden and intensify future learning by their demand.

It is grand to sweat the Nazi, but Brother Stalin may be getting just a little bit too ambitious in nothing areas. However, many Americans are beginning to feel that more of the Stalin "push and go" is needed in the Cassino area if we are to win unconditional surrender by next Christmas. It might be wise—and the far thing, too—to restore General Patton to good standing and turn him loose on the enemy. Like Texas Rangers, old blood and guts believes in wading in and taking over—NOW.

IDEAS ABOUT TAXES.

A wise man once said that there were six schools of taxation. There were those who thought the rich should pay the taxes, those who thought the poor should pay the taxes, those who thought the other fellow should pay the taxes, those who wished to dodge taxes legally, those who wished to dodge taxes illegally, and those who wished to dodge taxes, whether legally or illegally.

All of them will be disappointed by the present and future tax bills. More spending inevitably means more taxes and America has become the greatest spender of tax moneys on earth.

HARD TO UNDERSTAND.

No reasonable American would scheme to draw Eire into the war, against its will. The people of South Ireland have a right to enjoy peace and security, and are to be congratulated that in one area at least, peace is possible.

But more than ever in these perilous days, no nation can "live unto itself" or "die unto itself." The Irish people are an intelligent and gifted race, who have made innumerable contributions to modern civilization and are capable of making more. They are much indebted to their neighbors for the secure position they now occupy.

It would be folly, of course, for them to invite the hostility of Germany by overt acts. But it is hard for the Allied Nations, and especially for Americans, to understand why President De Valera openly consents with Nazis and Japs, gives them free access to Eire and lets them use it for Axis espionage against England and America.

STONE WEIGHT—Now that sign explaining that one stone equals 14 pounds have been put up, Americans in England are able to figure out their weight. WAC Ada Bell makes quick comparison when she discovers the weights 3 stone.

HERE'S HOW YOUR TRUCK CAN HELP WIN THIS WAR!

All along your regular delivery routes are homes with vitally needed war material lying idle... waste paper! We've got to get that waste paper in to help win this war!

Our armed forces use 700,000 different items made or wrapped with paper... blood plasma containers, supply parachutes, ammunition cases. And waste paper reserves are dangerously low!

Your truck can render a patriotic service. Here's what you can do about it.

When your trucks make regular deliveries, they could collect waste paper... ask the housewife for her tied bundles of old cartons, wrappings, and newspapers... turn them in at one of our waste paper collection depots.

Don't let your trucks return empty. Put them into the war. They can serve the country. Have them collect waste paper. Every trip may save a life!

**DEPENDABLE** transportation means more than ever these days to busy wartime drivers.

Here's what a big-city physician, name on request, recently said: "In my general practice, I can always count on my Studebaker these war days for reliable, low-cost performance."

That doctor is one of many hard-working civilians who are getting exceptional tire, gas and maintenance economy from their Studebaker Champions, Commanders and Presidents.

In fact, today, after well over two years of war, hundreds of thousands of essential motorists from coast to coast are still enjoying dependable transportation at low cost, thanks to the quality of Studebaker craftsmanship and the advanced principles of Studebaker engineering.
