One superintendent let a cat out of a bag. He said, "The very reasons that make a a good soldier mentally keep him from being a conservative, sensible voter." This superintendent identifies sense ond conservatism. Not all Americans would agree with him that more conservatism was needed in the electorate.

Columbus, even after four voyages, never appreciated this. As Pohl points out in his new book, "Amerigo Vespucci, Pilot Major," Vespucci did some really colossal exploring, sailing along several thousand miles of South American coast line, farther south than anyone else for many a year. In a voyage of such length he could not help seeing that this was no Asia, but a region entire-

Vespucci had other merits than skill in navigation. As a mathematician and astronomer he estimated the circumference of the earth within 50 miles of the actual figure-a wonderful achievement for those days. Columbus remains supreme, but plenty of glory is left for Vespucci.
