YANKS ON IWO, CORREGIDOR

Jim Collins and George Boyd Announce Candidacy

The Daily Press has been authorized to announce the names of J. J. Collins and George Boyd as candidates for re-election as members of the city commission, subject to the will of voters at the April 3 election.

Mr. Boyd, fire and police commissioner, is now completing his second elective term (four years), while Mr. Collins, water commissioner, is serving his first elective term of two years. Before his election two years ago, Commissioner Collins, by appointment, served four months of the unexpired term of Neal Lane, resigned.

Messrs. Collins and Boyd, long-time residents of Cisco, are considered good, trustworthy business men and have given the city their best efforts since they entered office.

W. V. Miller Laid to Rest in Oakwood Beside His Wife

The funeral of W. V. (Vinnie) Miller, former esteemed Cisco citizen, who died at his home in Mercedes, Tex., Wednesday at the age of 88 years, was held at Thomas funeral home, Cisco, Saturday afternoon, with burial in Oakwood cemetery beside his wife. Rev. J. R. Wright of First Christian church and Rev. W. A. Ryan of First Methodist church were the officiating ministers.

Floral offerings were profuse and a quartet composed of Mrs. Jennie Shockley, Mrs. J. S. Mobley, O. L. Duckett and Ernest Hittson sang "What a Friend We Have in Jesus" and "Sweet By and By."

Pallbearers were Robert Grantham, Haywood Cabaness, K. H. Pitard, J. L. Thornton, George Boyd and Dick Lauderdale.

Immediate survivors include two sons, Messrs. Raby and Nick Miller, three grandchildren and a great grandchild.

Almus Fannin At Busy Transport Command Base

Technical Sgt. Almus L. Fannin, route two, Cisco, was recently assigned to an air transport command base in France, the Daily Press is informed.

Fannin is a member of the unit personnel section of that base, which was rebuilt by ATC's European division from wreckage left by German demolition.

The young man's mother is Mrs. Joe Hale and his station has been in four months from complete desolation, with 136 dynamited buildings bordering bombed runways, to a thriving passenger and freight air terminal where important allied personnel and vital strategic cargoes shuttle daily to and from the war fronts.

LENTEN SERVICES.

Every Sunday night until Easter (April 1) there will be a special lenten service at Grace Lutheran church, F avenue and sixteenth street, when the pastor, Rev. G. T. Naumann, will speak on the general theme, "On Golgotha's Holy Ground." The services will begin at 8 o'clock. The Lutheran church observes the forty days before Easter by a special consideration of the suffering and death of Jesus, the Savior. The public, says the pastor, is invited to attend these services.

Unusual Storm of Friday Night May Mean Spring Near

A drop in temperature of about 20 degrees Friday night brought sleet, snow, ice, rain, lightning and thunder—the last being more terrifying to some than any of the others, since, to common belief, this means frost during the night of April 16. According to the city fire department, about .5-inch of rain fell during the night.

The Cisco Ice company said the thermometer stood at about 35 degrees Saturday morning, sliding from the warm 55-degree weather, which made fishermen think of the finny tribe and the relaxation of casting from boat or bank while soaking up sunshine vitamins.

Most fruit trees are about ready to burst into bloom, while doves and other spring-time birds have been singing during the early mornings of the past week.

Now, if we are to have cold weather—frost-killing weather—it might mean another short fruit crop year, or perhaps none at all. However, the more optimistic, who believe nature usually makes no mistake, think spring is really here and any late cool weather will do little harm.

Many people planted gardens last week and are hoping that spring is here to stay.

Man's Best Friend Is Very Often a Serious Nuisance

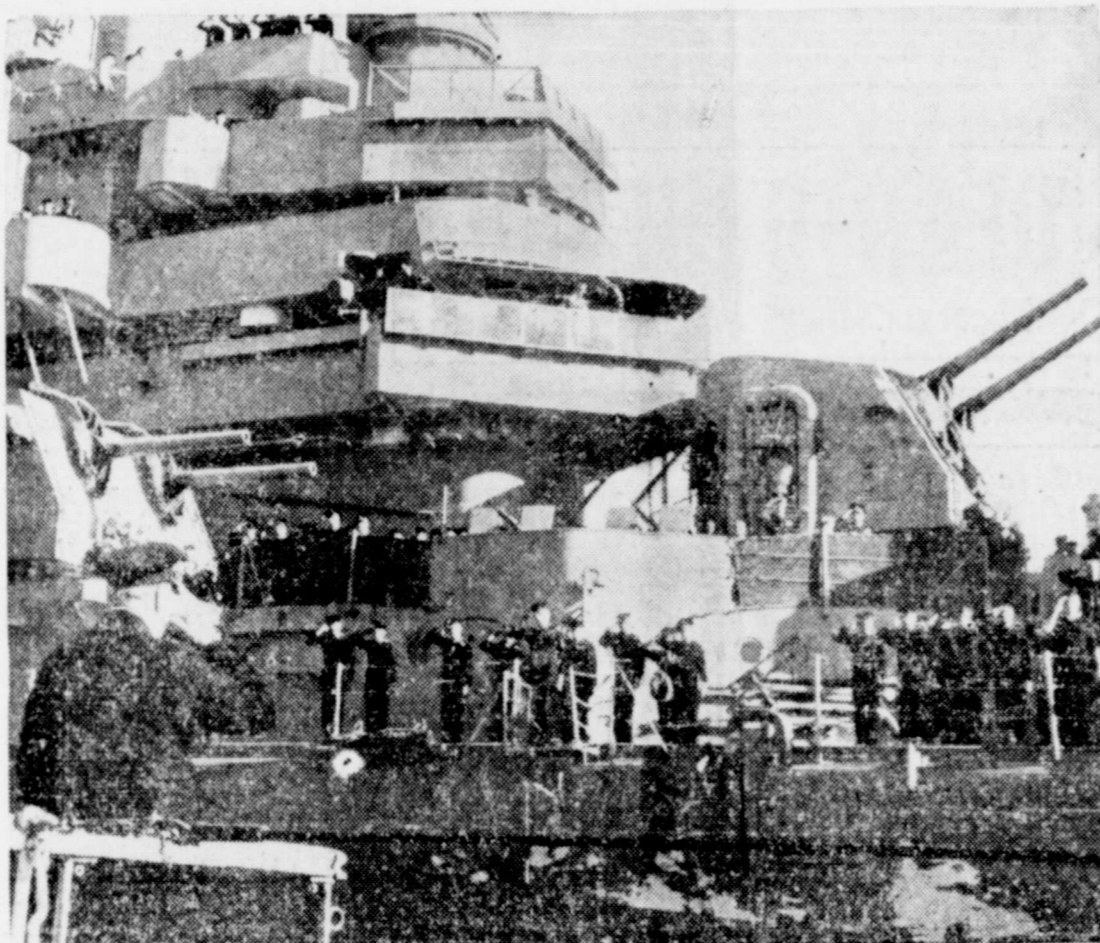

From the almost daily complaints received at both the city hall and the Daily Press office, Cisco's uncontrolled canine population would seem to be increasing at an unusually rapid rate, with attendant property damage as well as worry to those residents frequently kept from a night's rest because of Carlo's inherited habit of incessantly barking at the moon or anything else that attracts his attention. Damage to vegetable and flower gardens is also emphasized by the thoroughly justified complainers.

So, their first duty being to those of the animal kingdom who pay taxes and keep the home fires burning, the mayor and city commissioners have decided to try and do something about it, although it is humanly impossible to either muzzle all dogs or "fence them in."

George W. Downie, city secretary, stated Saturday that plans are now being worked out by the commission for a closer check on local dogs, which will include vaccination, registration or impounding.

AWALT TO COME HOME. Mrs. J. R. Poplin of Cisco has been informed that her son, Sidney Owen Awalt, 30, boatswain mate, who has been a prisoner of the Japs for three years, has been liberated from a Philippine prison. In his letter to his mother, the young man said he expects to start for home within the near future. Awalt joined the navy about eight years ago.

JAP NAVAL WAR ABOUT OVER, SAID

WASHINGTON, Feb. 17.—Don't imagine it will be over soon in the Pacific, even if we force the Jap fleet out of hiding, sink it. Elimination of Jap air force and airplane plants will still be necessary before the way to Tokyo is open. And note how long Germany has held out with greatly crippled air force.

But the naval war's nearly over, our men think. U. S. Navy is "spoiling" for a fight, is chestily confident it will have little trouble sending the Jap fleet to the bottom of the Pacific. Some think Spruance's armada alone could polish off everything the Japs have left.

Naval spokesmen believe the Japs still have a powerful airforce left, that it will put up its greatest fight as the battle lines move into the Jap home islands.

Navy is guarded in talking about future plans, but no one doubts there's big stuff ahead; that big announcements may come in a matter of days.

Battle over who shall be overall commander of advance on Tokyo continues. Navy wants it and the big show this week may help its side of the argument. Chances are MacArthur will not be tapped for this assignment, though he wants it.

Two cabinet changes and one in the Supreme Court are up-coming, according to dope here. They involve retirement of Secretary of War Stimson—he'll be 78 this summer; drafting of Frank Murphy from the court to return to the Philippines and tackle the toughest job of his career; and promotion of Attorney General Biddle to the court.

For Secretary of War? Signs are Stimson would like to turn the job over to Assistant Secretary John J. McCloy, another New Yorker, Republican, lawyer, long-time friend. For attorney general? Best bet is Judge Samuel Rosenman.

OPA oil dealer's survey completed Nov. 7 showed 45 per cent opposition to rationing and 7 per cent uncertain as to its necessity. Budget Bureau has been asked to approve a new survey in view of new trends of global warfare, but there's little hope dealers attitudes have changed. However, as long as Petroleum Admn. allocations remain as they are, there'll be no change in OPA rationing policy, either to tighten or to loosen, officials say.

MORE GOOD CITIZENS.

Mason Pee of Sweetwater has purchased the Home Supply store at 418 D avenue from John Dunn and J. B. Pratt. Mr. and Mrs. Pee and their 15-year-old son have already moved to Cisco and are diligently searching for a five- or six-room house into which they can move their household effects. Mr. Pee traveled out of Sweetwater for the Western Windmill Co. for 18 years. They are members of the Methodist church and located here after a wide quest for a modern residence city possessing good schools.

JAP CAPITAL AT FORMER CITY 750 MILES FROM TOKYO, IS BURNING; BATAAN IN THE BAG

ADMIRAL NIMITZ'S HEADQUARTERS, GUAM, Feb. 17.—American troops stormed ashore early today on Iwo Island, only 750 miles south of Tokyo, enemy broadcasts reported, while carrier planes hit the burning Japanese capital itself for the second straight day of a diversionary assault.

Invasion forces swarmed over the southwest and southeast beaches of Iwo in twin landings only 10 minutes apart, a Tokyo Domei broadcast said. It added the customary claim that the troops had been "repulsed" after fierce fighting.

The report of the invasion came on the second day of an earth-shaking bombardment of Iwo by more than 30 American warships—ranging from battleships to destroyers—and scores of carrier and land-based bombers. Most shore batteries were knocked out yesterday.

A landing on Iwo would represent an amphibious jump of 750 miles—half-way to Tokyo—from the Marianas for the Americans and would give them at least three strategic air bases within Flying Fortress, Liberator and fighter-plane range of the enemy capital.

Wave after wave of American carrier planes sent hundreds more tons of bombs crashing down on smoking Tokyo today. A Japanese communique said the second day of the unprecedented assault got under way at 7 a. m. (5 p. m. Friday, CWT) and the raid still was continuing eight and a half hours later.

The enemy communique admitted that 61 Japanese planes had been lost in yesterday's nine to 10-hour attack, but claimed 147 American planes were shot down and more than 50 damaged. Tokyo broadcasts warned without elaboration that American forces may "attempt to come near the homeland at two points, one of them the Boso Peninsula, western arm of Tokyo Bay and site of the Yokosuka naval base.

Domei said American forces began landing operations on Fatassu Beach in southwest Iwo about 10:30 a. m. (8:30 p. m. Friday, CWT), but were "completely smashed."

Following the failure, all enemy troops withdrew far out to sea," the broadcast said.

Ten minutes later American troops began landing on Kamayama Beach on the southeastern tip of the tiny eight-square-mile island, Domei said.

INVADE CORREGIDOR.

WASHINGTON.—American troops invaded the fortress island of Corregidor at the entrance to Manila Bay by air and sea today.

"Fierce battles now are raging on the southern shores of the island," a Tokyo domestic broadcast said. Paratroopers opened the assault, swarming down on the island from transport planes, and soon afterward sea-borne forces stormed ashore from assault landing barges, Tokyo said.

The reported combined operation followed by only a few hours Gen. Douglas MacArthur's announcement of the re-conquest of Bataan in an amphibious landing Thursday on the tip of the peninsula, five miles north of Corregidor.

No further details of the Corregidor fighting were given in the broadcast, which was recorded by the FCC. However, it opened the final phase of an offensive to unlock Manila Bay to American shipping. Corregidor's giant batteries, which held off Japanese assaults on the island for months in 1942,

had been all but neutralized by a terrific air and sea bombardment earlier this week.

They fired a few rounds at the convoy carrying troops to Bataan Thursday, but were silenced quickly by salvos from American cruisers and destroyers, dispatches from Manila said. Tokyo said American mine-sweepers began clearing the channel between Bataan and Corregidor Tuesday, followed by 19 troop-jammed transports.

After Corregidor has been captured, American shipping safely can enter the bay. Once inside the bay, American warships could lend their support to the annihilation of the last pockets of enemy troops holding out along the Manila waterfront. Newly-captured Cavite Naval Base south of Manila also could be restored to use.

BATAAN IN BAG.

MANILA.—American troops have redeemed historic Bataan with a bold sea-borne landing on the southern shores of the peninsula under the guns of Japanese-held Corregidor.

"We have captured Bataan," Gen. Douglas MacArthur announced in a triumphant communique.

Less than 48 hours after the landing, all the peninsula's militarily important objectives were in American hands. MacArthur's troops were pursuing the disgruntled enemy over the same dark ground where on April 11, 1942, some 30,000 Americans and Filipinos laid down their arms and began their tragic death march to Camp O'Donnell.

Covered by the big guns of the U. S. Seventh Fleet and the bombs and bullets of hundreds of American warplanes, a big invasion convoy swept into the mouth of Manila Bay at dawn Thursday to spill tanks, troops and guns ashore at Mariveles.

The startled Japanese coastal defenders fought back briefly, then broke and fled into the hills under a storm of rockets and gunfire.

THEY'RE COMING, ADOLF!

LONDON, Feb. 17.—Russian troops closed on shell-ripped Guben, 50 miles southeast of Berlin, Saturday and hammered toward Cottbus, a second gateway fortress city on the Spree river 47 miles from the Nazi capital.

BOWLING WELDER Therman Gibson of Detroit scored 1,615 points to knock down the \$5,100 jackpot in the \$43,200 Petersen Individual Bowling Classic held recently in Chicago. Gibson a member of the E and B team of Detroit, edged out Basil Fazio, Akron, O., by eight pins.

SORRY SPECTACLE.

Contending that congress and the war production board have legalized the so-called conference method of initiating railroad rates during the war, R. V. Fletcher, of Washington, D. C., vice president of the Association of American Railroads, in commenting on the department of justice's antitrust suit against the railroads, says: "This is no time for either public or private agencies to require an essential industry to answer charges based upon a narrow and technical interpretation of the law."

"I measure my words when I say that it is a tragic thing for men to be charged with violation of law by reason of their doing what the highest authority in the government has approved as being essential to the war effort and in the public interest."

"The Association of American Railroads... does not exist as a rate-making body. In this time of war, when it is necessary for the war and navy departments to secure rate adjustments upon short notice, the Association has been functioning as a part of an over-all rate authority, with power to make changes in rates applicable to military traffic when the ends of justice require prompt action."

"Yet the justice department seeks dissolution of the Association of American Railroads at a time when, without some central organization, we would have a repetition of what happened in the First World War, when, as a result of congestions, conflicting orders and confusion, the war effort was enormously retarded."

GERMAN INFLUENCE.

"Meetings of mice, presided over by the cat." So Argentines describe the Pan-American conferences called by the United States. This report comes from Felix J. Weil, author of the new book, "Argentine Riddle."

This distrust arises partly from our superior strength, partly from the fact that in the past our hands have not always been clean. Our occupation of Haiti, San Domingo and Nicaragua did not sit well with Latin Americans; and because they have long memories, they recall even today the Mexican War of 100 years ago, which cost Mexico the provinces of California and the Southwest. That war, termed unjust by Abraham Lincoln, arises to plague us still. In recent years the United

States has done much to lay this distrust. But we need not be surprised if scheming dictators, and the German-influenced ruling Argentine clique, continue to invoke our past aggressions.

STARVATION.

The greatest famine in European history is in store for Germany, says the business commentator, John W. Love. The prolonged German resistance means the tearing up of railroad tracks, the destruction of railroad yards, the burning of mills and elevators, and the break-up of the whole machinery of distribution. Part of this destruction will be incidental to the Russian advance, part will be accomplished by the Germans themselves as part of their "scorched earth" policy. Add the failure to tend and harvest crops, and the sum is wholesale starvation. Even if Berlin is not destroyed, if it cannot get or transmit food, it will suffer. "The Germans will eat even if the rest of Europe has to go hungry." This shameless Nazi pronouncement will be remembered by the conquered peoples, now coming into their own. It looks like a new example of reaping what has been sown. The Nazis sowed starvation.

George Washington's Birthday February 22, 1732.

JUST two hundred and thirteen years ago a man was born, whose destiny seemed for the purpose of founding a nation where liberty of thought, speech and action could have a place in which to develop.

A MAN born to wealth, but whose sympathies seemed to be with the men of the lower strata of society --men who had to toil for their living--toil to support their families.

THE STERLING traits of character of this great individual shine brightly after the lapse of years, and we have come to teach his principles of honor and manhood to our children that they may be worthy of the liberties we have managed to keep alive after these more than two hundred years.

WE ARE FIGHTING for principles of freedom and liberties of action today -- in foreign fields as well as on the home field of politics where we must guard what Washington and his associates fought so valiantly to wrest from the despots of the mother country.

WE'LL ALWAYS have to fight for them if we retain them. If we become lax, these liberties will slip away from us to be lost forever.

The roadways of the world are worn deep with Studebaker wheel marks

ON the war fronts from France to Russia, and from Italy to India and the Pacific islands, over 165,000 military vehicles built by Studebaker have been writing new pages of transport history.

Scores upon scores of thousands of heavy-duty Studebaker military trucks have recently been supplemented by steadily increasing quantities of Weasel personnel and cargo carriers, designed by Studebaker engineers and powered by the famous Studebaker Champion engine.

Studebaker is now one of the largest truck manufacturers in the world—and over 55,000 Wright Cyclone engines for the Boeing Flying Fortress have also been built by Studebaker.

In addition to all this war production activity, Studebaker cars and trucks in civilian service continue to impress the world with their remarkable stamina and exceptional operating economy.

BACKACHE, LEG PAINS MAY BE DANGER SIGN
Of Tired Kidneys

If backache and leg pains are making you miserable, don't just complain and do nothing about them. Nature may be warning you that your kidneys need attention. The kidneys are Nature's chief way of taking excess acids and poisonous waste out of the blood. They help most people pass about 3 pints a day. If the 15 miles of kidney tubes and filters don't work well, poisonous waste matter stays in the blood. These poisons may start nagging backaches, rheumatic pains, leg pains, loss of pep and energy, getting up twice, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with stinging and burning sometimes shows there's something wrong with your kidneys or bladder. Don't wait! Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from the blood. Get Doan's Pills.

SUPPOSE THAT YOU COULD FLICK A SWITCH

AND GET A SIZZLING STEAK!

Be wonderful, wouldn't it? Sizzle... sniff... m-m-m... a-a-a-ah!

"But," you say, "steaks are scarce and expensive. Steaks are rationed. Steaks have gone to war."

That's right — and there are good reasons why.

But is it any less wonderful that you CAN still get electric service at the flick of a switch — without shortage or rationing — at low pre-war prices — when vast amounts of electricity have gone to war plants?

Our folks have done their war job so quietly, and well that it's easy to take 'em for granted. We hope you won't—that you'll remember their hard work as you use radio, range, refrigerator, washer, cleaner and the other electric servants that make wartime living so much easier.

What you can take for granted is the fact that your friends in this company will provide plenty of low-priced electricity to run the mechanical marvels in your post-war home.
