PATTON NABBED 45,000 NAZIS

This Duty Must Be Tackled---Let's Make It Thorough!

Certain that all Ciscoans recognize the advantage of maintaining a physically clean city, the Daily Press is following the suggestion of a leading citizen that the home-town paper take the lead in helping to organize a Clean-up Campaign of much wider scope than has probably ever been undertaken lo-

Let it be understood however that to organize and successfully conduct such a movement, the aid of city commission, chamber of commerce, churches, public schools and each and every civic organization in Cisco will be necessary.

If there are too many hold-outs among these ordinarily wide-awake bodies, there is little use of atempting the sort of campaign that is in mind—that of actually making Cisco one of the cleanest, healthest cities in the Lone Star state.

But, if a thoroughly aroused group of Ciscoovers can be chosen from the civic groups referred to, the fruition of plans yet to be evolved by such group will most certainly result in creating here an unusually desirable place in which to live and perform one's part in the work of a world that is rapidly becoming conscious of an opportunity to do something out of the ordinary.

Of course, some concrete plan in which to attack the truly huge task that lies ahead will have to be worked out, and that means a public meeting

In the meantime, in an effort to do its part, the Daily Press here and now offers a prize of \$25 to the organization offering the best plan whereby the alleys and lawns of Cisco may be converted into presentable, attractive places instead of the eyesores and lisease-breeders that now too often exist.

Representatives of the various civic organizations may address suggestions to The Daily Press immediately, and the publisher will name the winner mail the check AFTER the Cleanup is organized

HITLER BRIDGE-Only twisted wreckage remains of the Adolf Hitler bridge, which crosses the Rhine River at Uerdingen. The middle span of the bridge was blown up as retreating Nazis made their way to the east bank at this point. (Signal Corps photo).

SEEKING SAFETY-German civilian pulls two-wheeled cart, hurrying to evacuate family and possessions to safety as Allies enter town of Muenchen-Gladbach. Smallest members of family ride atop pile of belongings and oldest son walks alongside father.

Most versatile vehicle of the war helps in Philippines invasion

Studebaker Weasel

THIS new "Champion" in invasion warfare is the amaz-ing Studebaker Weasel—powered by the same brilliant 6-cylinder engine that gives such outstanding operating economy to the Studebaker Champion motor car.

Swiftly, stealthily, the Weasel moves forward over sand, snow, mud, swamp or solid ground. When necessary, it takes to deep water like a boat.

Designed by Studebaker engineers, the Weasel is coming off the Studebaker production lines in increasing quantities. It supplements more than 55,000 Cyclone engines that Studebaker has already built for the Flying Fortress, more than 165,000 heavy-duty Studebaker military trucks.

CLEARANCE

MAY THE BEST WOMAN WIN!

There's the bell . . . hold your hat . . . hang on to your purse . . . and may the best woman win!

Bargain sales look as exciting as ever these days, but this ancient sport isn't what it used to be. So much merchandise is up in price or down in quality.

However, there's at least one real bargain that still provides high prewar quality at low prewar prices. That's the electric service you enjoy in your home.

Actually, you're getting about twice as

much electricity for your money today as you did 15 years ago. If your total electric bill is no less today, it's because you have more electric conveniences now and use them more. But the cost per kilowatthour average is much less.

The credit for this wartime bargain belongs to your friends and neighbors in this company. Their hard work, plus sound business management, made it possible. You can count on them to continue to furnish cheap, dependable electricity for still finer electric living after the war.
