## School Board and Many Citizens Advocate Expansion For Cisco College

Whether or not Cisco Junior College will continue to expand as an institution serving hundreds of high school students in this area—who otherwise would have to go away to expensive colleges—was put squarely before a group of Cisco business men in a meeting called at the chamber of commerce Friday night at the request of the school board.

Without hesitation the entire group voted to ask the board to call a special election for the purpose of determining whether or not a tax of 20 cents on the \$100 valuation should be voted for the college. This tax, it was explained, would guarantee not only the continued existence of the school but its growth into a strong, large institution that would save the parents of this area many thousands of dollars annually which would otherwise be spent at colleges elsewhere. Such a tax would mean that hundreds of students who could not get a college education otherwise—because of the cost—would be able to secure at least two years of college training while staying at home.

**Buildings Debt Free.**  
The college, organized in 1940, with its own excellent buildings and attractive campus debt free, has been maintained successfully since that time and has graduated many students, who have gone on to successful college training elsewhere, or into good paying jobs. The work of the school board in maintaining the school under difficult conditions was praised by the group and it was explained that with the end of the war rapidly getting nearer, the time has come to make out boldly to make the college a bigger, more forceful asset to the community and area.

**Separate Faculty.**  
A twenty-cent tax, it was explained, would provide about \$600 per year to pay the overhead expenses of the school, while the state aid and tuition income would provide for the salaries of the teachers and other necessary staff.

It would make possible within a short time a SEPARATE COLLEGE FACULTY, so that the prestige of the school would be greatly increased.

With the certain increase in the student body after the war, the burden upon the teaching force would become too great to be taken care of by present teaching faculties.

**Legislative Threat.**  
It was also explained that legislation—almost passed in the last session of the state legislature—would deny junior colleges which have no local tax support out of the state aid funds now being allocated on the basis of one per student. This would deprive Cisco Junior College immediately, if passed, unless citizens vote the tax as recommended by the meeting Friday night.

A twenty-cent college tax, it was further explained, would represent about \$3 per year on the average home in Cisco.

**School Board's Position.**  
"It is just a question of whether or not the people of Cisco want to make their college an institution of the greatest service to their children, providing college training for these children at home and spreading the benefits of high education among the hundreds of students who cannot, because of the lack of money, go away to other colleges," said Garland Vance, president of the board. The board is putting the ques-

tion before the people for their decision.

"We feel that a good job has been done so far; we have not asked for any contribution to support the college, and very likely the college can go on after a fashion without a tax, for a time at least. But it is not a question for the school board to decide; we are taking orders from the people and we are simply laying this matter before them for their decision."

Ranger Junior College, it was stated, already has a special 20-cent tax for its support.

**Cisco's Responsibility.**  
The question should not be considered simply from the standpoint of the comparatively small number of families who can spend from \$500 to \$1,500 a year to send their children off to college, it was brought out in the discussion. It should be considered from the standpoint of Cisco's responsibility to the much larger number of children whose parents CANNOT provide this financing and who would not get college training without a community college which they could attend at home.

While the saving in actual money to families who would otherwise send their children away to college would be many thousands of dollars a year, the benefit to the students who could get two years of college work in no other way would be a great community asset. A College-trained student earns several hundreds of dollars more per year than a high school graduate, besides being a more valuable citizen, it was stated. Thus Cisco Junior College would tend to raise the level of citizenship in the community, while it would also serve to attract more families who would come here to live for the educational advantages offered.

Junior colleges are growing all over the nation, because they are meeting a definite need in bridging the gap between youthful high school graduates and senior colleges. Most high school graduates of today are too young to send away to school, and with a local junior college they can stay at home until they are older and more experienced, and the training they receive during the first two college years in small schools is much more effective because of smaller classes and closer contact with teachers. Junior college graduates do much better in university and senior college as a rule than high school students who go immediately into the larger college atmosphere, it was brought out.

Parents and taxpayers of the city were urged to give serious consideration to this proposal from the standpoint of its benefit to Cisco as a community and its future citizens. Copies of the petition may be found at the chamber of commerce, the Cisco Daily Press and Cisco Lumber & Supply Company.

It is hoped to secure at least 250 names to the election petition.

**BROTHERS ON FURLOUGH.**  
First Sgt. Melvin R. Johnson, who has been overseas thirty-two months and has seven battle stars arrived in Cisco June 21. He was attached to the 12th air force and B-25 Mitchell bombers. Sergeant Johnson's brother, Corp. George H. Johnson, also arrived from overseas with the 86th Division, landing on the east coast June 16. He came to Cisco June 22. The two brothers are together for the first time in three years and will spend their 30-day furloughs here in the home of their mother Mrs. L. L. Johnson.

**MAGIC PILLS FROM WHITE MAN**—Natives load boxes of drugs and vitamin pill supplies (top) on river boat headed for back country of Bengal, India. To supplement deficient diet of rice and sweet potatoes, over 40 million tablets already have been sent under auspices of American Relief for India. Sulfa, other drugs, multi-vitamin tablets and evaporated milk are purchased in the United States and shipped passage free in British vessels. Little Indian boy (bottom) opens mouth wide to take multi-vitamin pill. Effect of vitamins on under-nourished people is so profound, natives call diet supplement "Magic Pills."

## Co. Commissioner Eastland Business Men Are Stepping Out

The county commissioners of Eastland county, starting with the month of June, will each receive \$2,500 annually instead of the \$1,800 heretofore received. This is in line with House Bill No. 84 recently passed by Texas legislators.

The order increasing the salaries was passed at the regular meeting of Eastland county commissioners court on June 11.

Parents and taxpayers of the city were urged to give serious consideration to this proposal from the standpoint of its benefit to Cisco as a community and its future citizens. Copies of the petition may be found at the chamber of commerce, the Cisco Daily Press and Cisco Lumber & Supply Company.

It is hoped to secure at least 250 names to the election petition.

**EASTLAND, June 23.**—A fundraising committee will begin work Monday in Eastland taking subscriptions for the proposed Eastland County Fair and Livestock show, according to a statement by Dan Childress, president of the Eastland County Livestock association, which is sponsoring the fair.

The new organization will be incorporated and will be known as the Eastland County Fair Association. It is proposed to purchase land, erect grandstands, hangers, etc., as well as fence the grounds.

It is planned to make the new organization not only a county-wide show, but one for use by exhibitors anywhere who desire to make use of its facilities. Football games, rodeos, stock auctions, etc., will be encouraged.

**CAPT. RUSSELL HONORED.**  
WITH V CORPS IN CZECHOSLOVAKIA. — Capt. Wendell H. Russell of 1102 west Seventh street, Cisco, Texas, a member of the 987th FA battalion, was recently awarded the bronze star for meritorious services during the period 25 April 1944 to 8 May 1945, in the United Kingdom, France, Belgium, Luxembourg, Germany and Czechoslovakia. He is the husband of Mrs. Betty Virginia Russell.

**BLACK GETS MEDAL.**  
Staff Sgt. Thomas D. Black, with the 90th infantry division in Germany, has been awarded the bronze star medal as a communication from the public relations section. He participated in the battles of Normandy, northern France and Germany. His wife, Mrs. Ethel S. Black, lives on route four, Cisco.

Jim Dillion, long-time Eastland county resident and farmer in the Nimrod area, Saturday announced that Friday, June 29, had been set as the date for work at Pisgah cemetery, seven miles southwest of Cisco on the Nimrod road. A new fence will be erected, weeds chopped out and the grounds given a general cleaning.

Mr. Dillion, a native of Dallas county, has lived in the Nimrod sector for many years, coming to the county with his father when a child. He recalls the cyclone of April 28, 1893, and quoted a remark of his father while they watched the terrifying clouds that hovered over Cisco on that memorable date.

Pisgah cemetery was laid out before that time and is the last resting place of many prominent Eastland county folk. The late Ed Bradshaw and Mr. Dillion formerly took the lead in keeping the burial place in shape. A general invitation is extended to all workers to be present Friday and lend a hand. "Bring your lunch," said Mr. Dillion.

**SPECIAL TAX COLLECTOR.**  
Eastland county commissioners this week entered into a contract with Horace Walker of Dallas, member of the Austin law firm of Hinsley, Terry & Walker, to collect Eastland county delinquent taxes. The contract has been forwarded to Austin for approval by the state comptroller and the attorney general. It must be approved by them before it becomes a contract.

Mrs. Frank C. Kelton of Dallas is expected to arrive today for a visit with her parents Mr. and Mrs. C. L. Tume.

## JAUNTS BY IDLE FOLK IS HURTFUL

WASHINGTON, June 23.—Travel rationing is not in immediate prospect because the office of defense transportation can't devise a satisfactory system. Need for travel rationing exists, but how to do it? Workable system would require a bureau in almost every railroad, airline and bus station. ODT hopes its propaganda will work: "Is this trip necessary?" "Take your vacation at home and make it easier for service men."

Detroit auto makers are wringing their hands over government controls issued and issuing from half dozen agencies; over everchanging outlook for materials and plant capacity; over prices of materials; over redistribution of labor; over continued production of war materials.

Rep. Marcantonio, (American-Labor, New York) says he is preparing to expose an OPA situation which will be "more shocking than anything to date."

Military high command is expected to oppose Stewart-Maybank bill which would give all servicemen with one year in Europe a furlough in this country before being sent to Pacific.

Opponents of postwar universal military training count on Congressional delay to defeat the proposal. Meanwhile, Army and Navy continue to insist military training will be essential to American defense.

Membership drives by veterans organizations will start soon. Among top items on American Legion National Committee program in Indianapolis June 28, is discussion of how to attract World War II veterans to Legion. Relatively few veterans of current war show desire to join old or new vet groups. Battle veterans may be more inclined to join than short-term soldiers.

## Negro Spiritualist Was Living the Life of Riley

DALLAS, June 23.—Habeas corpus proceedings were scheduled today in the case of a 26-year-old Negro spiritualist, who is being investigated by city police, FBI men and postal inspectors on charges ranging from clairvoyance to tax evasion and mail fraud.

The young "father," as he is called, was arrested by local police who raided the Negro's lavishly-furnished "temple."

The spiritualist, who claims by his calling cards to be the greatest doctor in the world, is apparently doing quite well. Police said they found small bills amounting to \$15,000 stashed out around the "temple."

"Father's" larder, a huge, super-deluxe refrigerator was crammed with thick steaks, chickens, butter, bacon, ham and other hard-to-gets.

A case of Scotch whiskey was found. Also a case of bourbon (the good, straight kind) and a few cases of good beer, and several cartons of popular brand cigars.

**PUT 'EM IN ARMY.**  
DALLAS, June 23.—Drivers of all trucking lines operating in Dallas had voted to join other striking drivers who walked off their jobs June 12, at the Johnson Motor Lines.

## TOKYO RADIO BRAGS SUICIDE AIRMEN SINK OR DAMAGE AT LEAST TWENTY-TWO US SHIPS

GUAM, June 23.—Tokyo radio claimed suicide pilots, continuing attacks which sank two American ships and damaged three off Okinawa the same day Americans conquered the island, crashed into at least 20 more vessels Friday night and Saturday.

The unconfirmed enemy broadcasts asserted an unidentified Allied warship was known to have been sunk in Friday night raids which scored "considerable successes." Kamikaze (suicide) pilots returning after daylight hit 19 others, Tokyo said, including two battleships, three destroyers and 14 unidentified vessels.

Latest confirmed enemy air attacks began Thursday night and continued until noon Friday. During these assaults, Admiral Nimitz announced, two light naval units were sunk, an auxiliary heavily damaged and two other craft lightly damaged.

As American soldiers and marines grimly hunted out the last scattered remnants of Japanese troops, and the Stars and Stripes were raised formally over the island at 10 a. m. Friday, the enemy threw in 20 separate raids in small groups.

The two American vessels sunk and the one heavily damaged were hit Thursday night. In daylight Friday American fighters drove off all but a few of the raiders, Nimitz announced.

Aground in isolated sectors some semblance of fighting continued amid the confusion that has become the normal attendant of every island conquest of this war.

There was suicidal resistance from tiny strong points; there was a wave of Japanese hara kira suicides; but there were also many surrenders by both enemy soldiers and civilians which swelled the bag of prisoners far beyond the 4,000 previously announced by Nimitz. The toll of more than

90,000 Japanese dead also was rising.

Patrols of the victorious U. S. 10th Army killed 596 of the die-harders Thursday night and early Friday while 160 others used hand grenades to commit suicide.

Having massed on Okinawa the greatest concentration of artillery they have yet used on the Pacific islands, the Japanese were down to five machine guns Friday.

Al Dopkins, Associated Press correspondent on Okinawa, reported Japanese prisoners streamed out of their caves and into American hands so rapidly that soldiers had to hustle to get the horde into compounds. Most had been wounded but all looked well-fed. Many had surrendered after being told to do so by Japanese-speaking Americans with loud-speakers.

**THE WAGES OF SIN.**  
FORT WORTH, June 23.—A 38-year-old carpenter hacked his common-law wife to death with a hatchet in a Riverside trailer camp early today because "she had quit believing in anything." Dead was Mrs. Ethel Mae Eliand of Wilson, Conn., about 35, her head almost severed from her body by repeated blows from the hatchet. She was identified through ration books. The admitted slayer is W. H. Hatch, sandy-haired, slender and medium-tall, who came to Fort Worth about six months ago from New Orleans. He was accompanied here by the woman.

**USES VETO AWE.**  
AUSTIN, June 23.—Gov. Coke R. Stevenson has vetoed bills increasing the salaries of district attorneys \$1,000 a year and permitting public schools to transport for compensation pupils of parochial, denominational and private schools.

**FATHER AND SON**—Gen. Dwight D. Eisenhower is shown with his son, Lt. John Sheldon Eisenhower who accompanied the General of the Army home. After tremendous ovations in Washington, New York welcomed the conquering hero with a celebration that surpassed any tribute in its history.

#### BIG SHIPS.

When this war ends, we shall have not only the biggest and most effective navy in human history, but the greatest individual ships. Of these, the queen is the S. S. America, built in an American shipyard and intended for passenger service, but used as a transport. With a new name, the West Point, the great giant traveling in solitary pride carried more than 350,000 men to Europe without a single loss. She is truly a "whale of a ship," with 93 feet beam and 723 feet length, and she carries a crew of 800 men and 7,700 passengers.

That makes her the queen of transports. It raises the natural question, how far ships of any kind can profitably go in the matter of combined size and speed. Prophecies along this line seem always to be getting broken, and it seems likely that we shall yet have ships 1,000 feet long, or more.

Such vessels, however, will require tremendous power, and it will be questioned whether such an expenditure of energy is justified. In the case of the S. S. America, the primary considerations were military. If it were merely a question of ferrying people across the pond in peace time, it might not be worth while, and two or three ships might be better than one.

## Back in the Good Old Days—

... the most of the lawyers compiled their own abstracts. The records were simple and few. But how times have changed! Today, the modern abstract office is a mass of indices, field notes, files, plats, tracings and copy taken from hundreds of records at the Court House — all co-ordinated, assembled and classified in systematic order by trained personnel with years of experience in title work. The abstract has become absolutely essential in every real estate transaction.
