US. Indicts Makers of Artificial Limbs for Veterans

Keefe Stands Pat on His Pearl Harbor Allegations

(By United Press)

WASHINGTON, Nov. 14. — Widespread conspiracy among artificial limb manufacturers to fix "high, artificial and unreasonable prices" was charged in an indictment returned today by a federal grand jury here.

The indictment charged that unlawful price-fixing hampered the Veterans' Administration in providing veterans with artificial limbs.

The indictment named a trade association, 45 corporations and 34 individuals who manufacture approximately 75 per cent of the limbs and 90 per cent of the parts and accessories; used in this country's \$10,000,000 a year artificial limb business.

Attorney General Tom Clark, announcing the indictment, said the effect of the alleged conspiracy was to "deprive the U. S. Veterans' Administration of the opportunity to make artificial limbs for war veterans and to force payment of non-competitive prices for artificial limbs."

House Bill Would Strip OPA of All Power Over Prices

WASHINGTON, Nov. 14. — Criticism of OPA automobile pricing policies was punctuated in the House today by introduction of a bill under which the agency would be stripped of all power over prices in any field.

Under the bill, introduced by Rep. Henry Larcade, D. La., President Truman would be compelled to delegate the government's emergency price control authority to some other agency.

The National Auto Dealers' Association has been attacking in hearings before a House committee the OPA plan to make car dealers absorb some of the increased costs of manufacturing autos.

Former Cisco Man Talks to Baptists on Racial Problem

FT. WORTH, Nov. 14. — Racial issues no longer can be ignored, Texas Baptists were warned today in Will Rogers Memorial Auditorium.

"The ominous movements among the racial minorities within our country and throughout the world threaten the peace of the world and lay a road-block across the path of our missionaries," declared Rev. Ocker C. Miller state director of inter-racial co-operation.

Racial supremacy, by whatever race it may be attained, only increases the responsibility to serve those people less advanced in their development, asserted the minister.

"Each race should be grateful for its own heritage and should cultivate in its people an appreciation for the divine endowments of other groups," he set forth. "To this end, each race should strive to preserve its own identity that it may better fulfill its racial mission."

Miller said responsible leaders among people of other races do not chiefly desire the "questionable prestige" of social intermingling, but each race desires and has a right to expect "recognition of its dignity within the family of mankind with opportunities for the development of its people in education, vocation and religion."

LOAN TO BRITAIN. WASHINGTON, Nov. 14. — It was said here today that President Truman will soon recommend to congress that the United States make a loan of five billion dollars to England, at 2 percent interest, payments to extend over a period of 50 years.

Marine Vet Got Gardenhire and President's Name Nance Move Up in Unusual Way in Bowling League

AUSTIN, Nov. 14. (U.P.)—Probably the only man in United States history to be given the name of a president 21 years before the president took office is ex-Marine Corporal Harry Truman Crozier.

A veteran of Bougainville and Guam campaigns, young Crozier was tagged "Kelly" while an infant by his father, Harry Benge Crozier, chairman-director of the Texas Unemployment Compensation commission.

And by "Kelly" the ex-Marine has gone most of his life. Selection of his name and nickname came about through unusual family channels.

Both mother and father were opposed to "Junior" as a name when the young man was born in Dallas 21 years ago. Neither had heard of Harry S. Truman of Missouri. The mother wanted one name; the father another.

By compromise they chose Harry from the father's name and Truman, the mother's middle name. Six months later, Mrs. Crozier was crooning that old song which went "Has Anybody here seen Kelly?"

That's when the father tacked Kelly on the blue-eyed baby and it stuck.

Young Crozier, now a University of Texas student, was graduated in 1942 from Highland Park high school, Dallas, and attended Texas A. & M. one semester before enlisting in the Marines. He was wounded in the Guam campaign and for 15 months received treatment in navy hospitals before being discharged.

JEWES GO ON STRIKE. JERUSALEM, Nov. 14. — A 12-hour general Jewish strike in protest to new British proposals for settling the Palestine problem started at noon today without incident. All Jewish shops, restaurants, work shops and factories were closed and Jewish-operated buses and taxis stopped.

FEPC FUNDS SHORT. SAN ANTONIO, Nov. 14. — San Antonio's Fair Employment Practice committee office, which has handled between 500 and 600 job discrimination cases in a three-state area since it moved here from Dallas in March, will close Dec. 15, for lack of funds.

Powerful OPA to Raise Clothing Prices Tomorrow

WASHINGTON, Nov. 14. (U.P.)—The Office of Price Administration announced today that it is authorizing ceiling price increases for certain lower-priced clothing articles in an effort to stimulate production.

The OPA order, effective tomorrow, will mean higher prices to the consumer for lower quality men's shirts, men's and women's underwear and nightwear, cotton hosiery, boys' woven dress shirts, men's handkerchiefs, infants' knit vests and children's and infants' anklets.

However the OPA believes it will make more of the lower-priced articles available and free consumers from the need to buy high-priced clothes which are much more plentiful.

Manufacturers will be permitted a ceiling price boost of about 15 per cent and the retail ceilings will vary according to the article.

Men's shorts now selling at a ceiling price of \$1.35 will have a ceiling of \$1.70 under the new ruling. Men's pajamas with a ceiling of \$1.35 will go up to \$1.65.

Men's shirts with a 40-cent ceiling will go up to 50 cents. Price increases on other items will not be so high. They will be less on knit than woven goods.

HUMAN DESTINY.

An American newspaper correspondent in Berlin, among the many shocks of degradation he finds there, tells how the citizens of Europe's once proudest city now spend a large part of their time ransacking garbage cans for scraps of food. There we have one of the most vivid pictures yet presented, of the low estate to which Germany and its people have fallen because of war.

It might also be regarded as a picture of what all of Europe is

destined to become if another major war is allowed to develop on that historic continent.

It might even be taken as a possible picture of the world into which we and mankind in general are now entering. Look at China! It is a world strangely combining the utmost culture, invention and opportunity with the utmost human ferocity and degeneracy that the new weapons and processes now make possible. And there arises more persistently than ever

the tragic question whether our alleged civilization will rise to heights of supreme achievement or destroy itself.

All the world armed to the teeth, with the young men serving a year in the army as they become 18, will not prevent a third war.

There must be real friendship and good feeling between the leaders in this country, Britain and Russia.

But before we really become friends, there must be trust and confidence, which is sadly lacking at this time. There is no question but what most Americans and Britons feel that Russia will bear watching, at all times.

The kidneys are Nature's chief way of taking the excess acids and waste out of the blood. They help most people about 3 pints a day. When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with smarting and burning sometimes shows there is something wrong with your kidneys or bladder. Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully by millions for over 40 years. Doan's give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

Offers 350,000 Wage Hike

(By United Press.)

General Motors late today offered 350,000 employees a flat 10 percent increase in hourly pay.

The offer came as the Ford Motor company told the CIO United Auto Workers that this was not the time to settle the wage issue.

The offer was made by General Motors Vice President H. W. Anderson as the company and union resumed their wage talk.

Anderson said the offer was based on the company's intention to work production employees 45 hours weekly, assuring them of minimum overtime of five hours a week.

The proposed boost would give workers six per cent more take home pay for 45 hours than they received during the war for 48 hours work.

WASHINGTON, Nov. 15. — Gen. Dwight D. Eisenhower today made a personal plea to Congress for the adoption of a postwar universal military training program.

"The greatest single motivating force for world peace today is the organized military potential of the United States," Eisenhower declared.

In testimony prepared for an appearance before the House military committee, Eisenhower cautioned that the development of war techniques would give the United States no time to prepare if it were attacked again.

HUMAN DESTINY.

An American newspaper correspondent in Berlin, among the many shocks of degradation he finds there, tells how the citizens of Europe's once proudest city now spend a large part of their time ransacking garbage cans for scraps of food. There we have one of the most vivid pictures yet presented, of the low estate to which Germany and its people have fallen because of war.

It might also be regarded as a picture of what all of Europe is

destined to become if another major war is allowed to develop on that historic continent.

It might even be taken as a possible picture of the world into which we and mankind in general are now entering. Look at China! It is a world strangely combining the utmost culture, invention and opportunity with the utmost human ferocity and degeneracy that the new weapons and processes now make possible. And there arises more persistently than ever
