FOR LIVING AND DINING

The latest design for dining rooms (above) ealls for a well lighted room of many functions. Because the average dining room is used only a few hours a day, a recent issue of Better Homes & Gardens Magazine presented this plan for more economical use of household space. Built-in furniture and cabinets add modern decor and provide work and recreation space. Cheerful daylight is supplied by a panel combination of windows and lustrous glass block. Glass block diffuses the light over the desk and sewing area (right), yet insures privacy because it is not trans-parent. A play desk for children is included in the room's added func-tional section which takes in only one wall. Such a room can either be built into a new house or re-modeled into an old one to achieve extra return and pleasure from the investment in a dining room.

Learning It The Hard Way---

. is not always a virtue, neither is it advisable. Letting Johnnie do it may be just as bad ,but not so personal. The man who buys a home or other real estate without first getting an abstract is a good example of learning a lesson the hard way. He will learn better later, but too late for his own good. Anything that is worth buying is worth the time it takes to find out what it is worth.

DON'T LET SOAP SHORTAGES GET WORSE You can help!

Keep saving used fats to help prevent further cuts in your soap supply

As long as our country's supply of industrial fats is so low, the government must determine how much fat can be released to make soap and other peacetime goods

Any let-down in your saving of used kitchen fats will make our fat supply even less...and the amount allowed for soap manufacture may have to be cut accordingly. The end of rationing of food fats doesn't change the picture. Industrial fats are still very short. So keep turning in your used fats, won't you? . . . and speed the return of more soaps to your dealer's shelves.

Where there's fat, there's soap

Keep Saving Used Fats — Help Prevent Soap Shortages

VICKS VA-TRO-NOL

NOTHING BUT THE FINEST-Blended with Skill, Honesty and Experience

The test of a coffee's freshness can be made in that first whiff of aroma you get on opening the package. If it's room-filling in its fragrance, as it is with every pound of Admiration, it's really fresh. That's why we emphasize aroma in our blend. We put the distinctive aroma into Admiration first through scientific selection of coffees for blending and secondly through special roasting. Once there it's there to stay until released into your cup. Small wonder then that a freshly brewed cup of better-tasting Admiration puts you in a celebrating mood. It's the coffee thrill of thousands.
