Greater Output of New Tool of Medical Science

PHILADELPHIA, Pa., Jan. 2.—Expanded production of carbon 13, which recent experiments in biochemical research indicates gives promise of ranking in importance with X-ray as a tool of medical science, was announced here by Sun Oil company, and Houdry Process corporation.

The isotope, so rare that current production has been at the rate of less than one-half ounce per year, may be compared to a chemical microscope that makes it possible for the chemist to see and follow chemical reactions in the body not possible with the X-ray, a joint statement declared.

Carbon 13 can be used to produce any of the compounds normally composed of carbon, such as sugar, alcohol, the hydrocarbons of gasoline and thousands of others, including synthetic rubber. Or, the statement continued, carbon 13 can be used to grow vegetables which have some or all carbon atoms with atomic mass equaling 13. These compounds and vegetables, injected into or eaten by living organisms, including humans, contain the necessary tracers by which their effect on body functions can be discovered.

WILMINGTON, Cal., Jan. 2.—"A year ago exactly," read the note Mrs. Mildred Johnson tore open, "I made this sort of agreement, or bargain, with God, or fate—or something. "I agreed that if something did not happen in 1945 to make life worth living, that at the end of the year I'd quit living. That was not asking too much, but I did not get it. I can't see any happiness ahead for me so I'm hoping and praying that I succeed tonight."

In the garage, Mrs. Johnson found the body of her daughter, Wanda Williams, 18, a telephone operator, hanging from a rafter.

LEADERSHIP.

Good leadership is needed in peaceful industry as much as it is in war, says Frederick C. Crawford, a Cleveland business man.

The nation stands at the threshold of an era of great abundance. How soon we may cross this threshold depends primarily upon how speedily the industry gets relief from crushing war time price restrictions, and upon the return of industrial peace.

"There can be no prosperity in America without such peace, and there can be no lasting peace until American men and management learn the priceless secret of teamwork and intelligent regard for each other's problems."

A WAITING DOG.

What is news? The question can never be answered to everybody's satisfaction. But perhaps as good a definition as any, for general purposes, is that news is information which interests people. And from this start, it may be assumed that the most important news is the information which, at a given time or place, attracts the most attention.

It may be an earthquake. It may be a great battle. Or it may be only a dog. But obviously such

an expression as "only a dog" requires an apology, when considered with regard to Queenie, a combination of great Dane and brindle bulldog, who has been waiting patiently at the gate of the Denver railroad station for her master who went to the war and has not returned. Days pass into weeks, and weeks into months, and months into years, and still the master is absent. But the sorrowing and ever-hopeful Queenie, like the dog of famous Ulysses in the

MANY NEVER SUSPECT CAUSE OF BACKACHES.

This Old Treatment Often Brings Rapid Relief
Many sufferers relieve nagging backache quickly, once they discover the real cause of their trouble. It is found in the kidneys. The kidneys are Nature's chief way of taking the waste material out of the blood. When unwise use of kidney function permits poisonous matter to remain in your blood, it causes rheumatism, rheumatic pains, leg pains, loss of pep and energy, get-up-to-night, grinding, puffiness under the eyes, headaches and dizziness. Frequent or chronic uric acid deposits and burning sometimes slow down the excretion of uric acid with your kidneys or bladder. Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully by millions for over 40 years. Doan's give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

"Every housewife can help prevent soap shortages by turning in used fats!"

says CLINTON P. ANDERSON
Secretary of Agriculture

It is just as important now as when fats and oils were rationed to save and turn in every bit of used kitchen fat. Used fats continue to be one of our most important sources of supply for the manufacture of soap and for other industrial uses. It may be many months before we can obtain adequate supplies of imported fats and oils for these uses. Meanwhile, housewives can help prevent soap shortages by turning in used fats, and dealers can help by continuing collections."

SORRY, MRS. BROWN, MY SUPPLY'S SO LOW, I CAN GIVE ONLY ONE BAR OF SOAP TO A CUSTOMER

SAVING USED FATS IS JUST AS IMPORTANT NOW AS DURING THE WAR. FATS ARE NEEDED TO MAKE MORE SOAPS!

WE'RE STILL far below the minimum requirements in our supply of industrial fats. Any letup in saving used fats will lower this supply... may mean less soap, for your used fats are needed to help make soap. Here's what you as a housewife can do!

EVERY DROP of used fats you save helps the soap supply... helps bring back more soap to your dealer's shelves sooner. So keep on your fat-salvage job—help yourself get more soaps. And remember, you get 4c a pound when you turn in used fat to your butcher.

Where there's fat, there's soap
