United States would be in the most which their names appear, subject dangerous position possible, owing to the action of Democratic voters to its governmental structure, at the primaries to be held Saturwhich deprives it of the defense day, July 27 of surprise attack; its many large cities which are peculiarly vulnerable to air attack, and our tendency to quick return to peacetime complacency and national negligence, as at the present time.

Many will agree that it is a mistake for officials to withhold known facts of science's developing war weapons. For the same reason, there is much to be said for the plea of those UNO delegates who want devastated cities left for all to see. One good way to make mankind realize it cannot afford another holocaust is to truthfully advertise what one war has done to earth-dwellers, and what another can do.

# THE PRETTIEST KITCHEN

is only as good as its range

# and in Southwest 98% Prefer the GAS Range

There is no special and costly installation job to add to the price of an automatic gas range. It is as simple to install as it is to use.

Entirely new and possible only with the gas flame is a wonderful dual-purpose broiler which is a feature of many of the automatic gas ranges now coming off production lines. With this two-in-one innovation you not only can broil meat in the usual way, but for the first time in home-cooking history, you can actually barbecue or "flame roast" large cuts of meat

This innovation is made possible by a specially engineered "hi-lo" burner, which is adjustable to high regular broiling temperature . . . or slow-roast for large cuts under flame temperatures as low as 200 degrees. The cooking compartment is extra large with a number of rack positions for adjusting the broiler pan at various distances from the burner.

Being only one of many improvements, this innovation is another reason why Southwest homemakers prefer the magic of the gas flame for cooking.
