AQUELLA

The New Waterproofing Product

This new product was developed in France for the purpose of waterproofing the Maginot Line. It is now available in Cisco at Cisco Lumber & Supply Co.

WHAT AQUILLA IS-A white powder, composed of properly balanced inorganic ingredients - ground

finer than face powder. HOW IT WORKS-When spread on surface, a chemical reaction forms an insoluble compound. By penetrating the smallest pores, the compound becomes a microporic sealer - expanding to fill each pore when dry (instead of contracting as paints do) and thus providing an absolutely water-tight seal.

AQUELLIZING IS

WEATHERPROOFING INSURANCE Protects you from the discomforts and inconvenience of dampness, moisture and humidity. Protects your health by insuring drier, cleaner, brighter basement or living quarters. Protects your investment in your home and appliances - increases usefulness, life, value of property.

Our Policy on **NEW CAR ORDERS**

in accordance with fair procedure

We are now accepting orders for earliest possible delivery of new cars. However, as you know, there are not enough new cars for all who want them. Therefore, we want to make a clear statement of our policy . . . so that everyone will know exactly how we are handling orders for and delivery of new cars during the current shortage

1—We intend to fill orders for new cars in the order in which they are received. There are two exceptions to this basic rule—

2-We will definitely reserve a percentage of our cars for those who have served in the Armed Forces. We feel sure that all our customers will agree with the justice of this exception.

3—If definite need for a new car is a factor, we will, in the public interest, determine such cases on the basis of the now abolished, but publicly accepted, OPA priority lists.

This policy is in your interest. We are following it because we want to serve you fairly and well today as in the past. The Ford Motor Company and we ourselves are making every effort to deliver your new car promptly and honestly.
