9.

IT COSTS MORE to furnish Telephone Service today than it did a few years ago.

THE COST OF ALL MATERIALS AND LABOR has increased in the past few years, but telephone rates have remained fixed. It is now imperative that telephone rates be slightly increased in order to meet the changed conditions.

We have not been earning anything like a reasonable return and we must increase the rate to our patrons to a point where we can earn a small return on the investment.

The new rate will not yield a reasonable return, but it is imperative that we increase the rate to a point where we will not suffer a loss. The readjustment of telephone rates, however, is nothing like that in other lines, proportionately, but they will enable us to survive and properly fulfill our obligations to the public.

The News would rather see the addition made to the handle and West Texas to be without the benefits of agricultural courses, but consider it a last resort. Fact is school fund will not stand additional expenditures when state schools are already suffering until additional ources of revenue have been made operative. The question until that is omplished is largely academic, and what engages our attention most at present is that every member of the Panhandle Press Association, every member of the Texas Press Associaciation should stand ready to put their influence emphatically against any resolution which partakes of political significance. Such things destroy the harmony which ought always to exist imong the members and will, if per of the organization. We resent the idea that we took snap judgement on the convention when these resolutions were offered. As to the political feature of the resolution we can not see it the way our friend Braswell does. As an educational matter we feel we had a Normal expansion. As to the division the resolution met with it is rather a difference of opinion as affecting the location of the proposed West Texas A. & M. school. We do not see where any violance has been done the Panhandle Press Association in offering these resolutions. The National Democratic Administration was endorsed in last Saturday's primary conventions in Texas by a vote of 5 to 1. Senator Bailey led the opposition in Texas to President Wilson and for the past two months his campaign has been a bitter attack on President Wilson and the democratic party. He was running for governor as side line. His main fight was against President Wilson and the democratic party. He came back to Texas for this express purpose. He has avowed that he will continue the race for governor regradless of which way the presidential primaries went, but it is the belief of many that he will now get out of the race. Bailey does not care anything about being governor of Texas. A governor's salary of \$4000 year evidently will not appeal to him. Regardless of whether he will resign from the governor's race as a result of last Saturday's primary results is an indication of how the people feel or else he will change his tactics. He and more popular issues if he expets to become governor of Texas.

WE'RE FOR IT

The Big idea back of the overall club is economy

THE desire for economy in clothes seems to be widespread. We are for it. It is something we have been trying to encourage in our advertising We consistently urge economy. We believe that people who do not need clothes should not buy them. There have not been enough clothes in the country to go around and anyone who can get along with the clothes he has, is rendering a pub-

We have also said that if you do buy clothes for reasons of selg-respect or other aesthetic feelings you should buy the kind of clothes that will be the least wasteful.

Economy in clothes is not simply in paying a low price for them; it is not getting a certain amount of cloth and tailoring, for clothes are something more than a mere covering for the

You'll find here economy in Hart Schaffner & Marx clothes; we guarantee that they'll give all the value, wear and style you expect to get in any clothes.
