Lee Highway Election Tuesday, December 18

County Will Vote on \$400,000 Bond Issue to Pave Transcontinental Highway

Next Tuesday, December 18th, is the date set to vote on the \$400,000 bond issue for Floyd County, with which to pay one-third of the cost of paving the Lee Highway across the county. All counties to the Oklahoma State line on the east have already this highway through these counties, Hale county on the west has voted their bonds, and have been allowed the two-thirds aid, and bringing the road up to grade for paving is now being started in that county, Floyd County is in the paving gap at this time, and there will be a paved road from the west line of Hale county to the Oklahoma line, and Fort Worth and Dallas if the bonds are voted in Floyd county at this election.

At this time the counties on our east and Hale county on the west are looking to us to vote bonds with which to pave in order to build the highway to the west line of Hale county, so that all travel will have good roads across the Plains country, and as soon as we have voted the bonds, a determined drive will be made to vote bonds in Lamb. Bailey and Parmer counties to the west of Hale county, so that the Lee Highway will be paved thru every county in the State of Texas.

By the time that the pavement is laid across the counties along the Lee Highway in Texas, all pavement from the Texas line to Washington City and New York will have been finished, and the greatest transcontinental highway in the world today will be paved every inch of the way from New York Cit, to San Francisco, and will direct travel over this line of any highway

Possibly the people of Floyd county have never realized just what the Lee Highway means to the counties that lay along its path. The counties through which the Lee Highway in the whole United States by reason nearer to the highway than the outsee the country and invest in this no paved roads. country, and in doing so all of them

and right that certain roads s

e built at one time, so it is a

Floyd county has payed out thousands of dollars every year, since the creation of the Highway Department, for the building of paved roads in the State of Texas, and they have reaped no benefit from these hard earned Thornton and Patterson to Retire dollars other than the maintenance of the Lee Highway across the county, and never will reap any other benefit, unless they vote bonds to pay onethird of the expense of paving Lee of this week, in which Artie Baker, will match that \$400,000 wih \$800,000, Patterson, Cashier and Vice-Presivoted the bonds necessary for paving and \$1,200,000 will be spent for the dent, respectfully, at this time. paving of the Lee Highway in Floyd amount will be spent within the lim- 1st, and Mr. Thornton will again enits of the county for labor and mater- gage in the grain business, having ial, which will mean more than \$600,- purchased the elevator and grain 000 will be turned loose in the chan- business of Messrs. WHY We Should Vote the Bonds at this time to Pave Highway No. 28 across Floyd County

West Texas Counties have for a number of years contributed to the building and maintaining of highways in East Texas. Floyd County last year sent, and will again this year send approximately \$75,000 to the highway department to be expended in the building of roads and highways in East Texas. The above amount represents the gasoline tax and the automobile tax paid in Floyd County. This condition will continue until such time as Floyd County meets the requirements of the highway department of Texas by voting bonds to pave highway Number 28 across the county. We have already builded and paid for the roads in East Texas by sending them our gas tax and automobile tax and have never got anything in return. Some of our friends say: "That we should wait and build our road out of the state bond issue that is being recommended and to pay for the same out of a gas tax to be levied by the next Legislature." Our answer is this, all members of the Legislature and the senate who favor the state bond issue and the gasoline tax, want the first money to be used to pay the counties that have voted bonds and built their roads. Again this will leave Floyd County out Because the first money will be used to pay back counties in East Texas that have voted bonds and again we will have to wait until all the East Texas counties have been paid back their money to go on neighborhood roads. Why not vote our bonds now and be ready to get our money back out of thefirst state bond money and gas tax that is available and let us be on a equal footing with East Texas. And then we can get all our bond money back to build our lateral or neighborhood roads and we will be several years ahead of any other county on the plains, except Hale County, and we will not have to wait until East Texas is paid back and for the first time in the history of our great state, West Texas counties will get in on the first pot and be on equal footing with other portions of the state and have money to build our neighborhood roads at once without another election. Mr. R. S. Sterling chairman of the highway commission says for the counties to go ahead and vote their bonds and build their roads and when the state wide bond issue has carried, based upon the gasoline tax, the money will be refunded to the counties to be used in building their lateral roads. Let's

Again Mr. Sterling said in his speech before the county judges and commissioners of Texas at Dallas a short time ago and which speech is being handed out in this county by those who oppose the bond issue and who are trying to befuddle the minds of the people. Let's quote Mr. Sterling (Page 5 and 6 of the pamphlet being handed out) as follows: "And, until the Plan is put into operation, there need be no confusion whatsoever on the part of counties that may be contemplating on voting or selling bond issues. Until supplanted, the present system will be continued in effect without change and without occasion for any interruption in the highway progress of the counties. If a county is considering a bond issue, it may go ahead with it, assured that it cannot lose, whether the system is changed or not."

And further, in this connection, let us remind you of the fact that if we do not vote the road bonds that we will again have to wait and repay East Texas out of the state bond issue and the gas tax before we get anything. When will West Texas quit falling into the clutches of East Texas, and look out for their own interest?

After a careful examination of the tax rolls of Floyd County we find that seventy per cent of the road bond tax in Floyd County will be paid by the towns, railroads and other corporations of Floyd County and the non-resident land owners leaving only 30 per cent tobe paid by the resident farm owners of Floyd County. And further in this connection when the \$800,000 given us by the highway department of Texas, by and through state and federal aid, this being double the amount that we will pay, and in the end only ten per cent of cost of the road will be paid by the resident farm land and 23 per cent will be paid by the towns, railroads and other corporations and non-resident land owners, the state and federal governments paying the balance. Let's get our part and quit helping East Texas. As shown by statement on this page by the County Judge the average tax per quarter section of land will only be \$3.74 per year. One bundle of kaffir corn per acre will pay this when sold at a little less than three cents per bundle. Who can not afford to do this when the roads will help everyone in this county in markets, selling power, school and churches. It is a common thing to hear people say that Floyd County has more and better schools than any other county in West Texas, more and better churches and the best farm land in the world but that their roads are the unspeakable. Let's now do away with this road business while we have a chance to do it at so small a cost and we further have the chance of getting the money back if the state bond issue and the gas tax passes the next Legislature. Again we wish to quote Mr. Sterling, when a few days ago he was speaking before the committee of 31 who are planning the state bond issue and gas tax, sitting at Austin in the senate chamber of this state, addressing a member of the legislature who complained about his county not getting any aid, Mr. Sterling said: "Your County has never done anything by voting bonds and it may be a long time before your county gets anything if the state bond issue and gas tax passes." Are we going to be left in this condition and be looked on with scorn by the state highway department and not get anything even if the state gas tax does pass? Stop and think before it is too late.

Facts and Figures About the Road Bond Issue

If proposed road paving bond issue of \$400,000.00 is authorized at election to be held on December 18th bonds and interest will be paid and bonds retired on dates and in amounts as per attached list.

Floyd County has an assessed valuation 1928 of \$11,439,764.00.

Taking into consideration the large amount of Railroad mileage and other improvements I estimate that the assessed valuation of 1929 will be in excess of \$13,000,000,00.

The first tax collected to pay interest and retire proposed bonds will be based on the 1929 approved tax rolls.

For the benefit of those that desire to estimate tax rates required to take care of proposed bond issue I will add that I have carefully examined old tax rolls and find that the average increase in tax values for the past thirty years has been approximately \$250,000.04 per year.

March 1st	1957	4,100.00	26,000.00	30,100.00
March 1st	1958	2,800.00	27,000.00	29,800.00
March 1st	1959	1,450.00	29,000.00	30,450.00

The above is figured on a 5% interest rate, however this may be changed when bonds are sold and a more desirable rate adopted which would amount to a saving of many thousands of dollars interest.

I estimate from the above interest and principal payments and 1929 estimated valuation that if Floyd County never increased one dollar in valuation in the next thirty years that an average rate of 21 cents on the \$100.00 would pay interest and retire bonds as they mature.

If the past history of Floyd County is any indication of its future the tax rate to meet all obligations on above bonds will not average as much as 17 cents on the \$100.00 assessed valuation for the thirty years the bonds are to run.

If we were to figure a tax rate for the first payments of principal and interest due in 1930 on present valuation it would require a rate of approximately 1934 cents on the \$100.00 assessed valuation.

Our tax rate would however be figured on the 1929 assessed valuation which we can only estimate and I believe from my knowledge of improvements and other property subject to taxation in 1929 that my estimate of \$13,000,000.00 is a very conservative estimate, taking this estimate as a basis for taxation, and considering the amount to be raised for 1930 which would be \$22,000.00 I find that a tax rate of 17 cents would provide the required amount.

As to the amount of bond taxes each land owner would be required to pay on an average quarter section of land on present valuations in Floyd County based on an average of \$2,200.00 which is an average valuation at the present time of the quarter section in this County, multiplied by the rate required the first year 17 cents would be \$3.74 road bond tax on each quarter section the first year.

In further explanation of the above if we figure the maximum average rate of 21 cents the amount of tax per average quarter section would only be \$4.62, as a matter of fact our assessed valuation will undoubtedly increase in the future, but when such increase occurs the rate of taxation would be lowered proportionately as only a given amount of taxes would have to be collected each year as shown by the above table of the dates of payment which will be written into the bond order exactly as written above.

In preparing the above statement of facts I am prompted only by the desire that the citizens of Floyd County know the facts and I believe that it is my duty to give these facts and figures so that any one desiring to vote in the bond election can vote intelligently on the bond proposition.

I have carefully figured all of the above and had expert accountants verify each item and I believe same is absolutely correct, in fact I believe it strong enough that I have arranged with the First National Bank of Floydada to pay \$20.00 in gold to the first person that can show any gross misrepresentations or material error in the above statement between now and the election date Dec. 18th.

If any one desires to claim the above amount and can show the Bank officials my error or erroneous statement they are authorized to pay without consulting me in the mat-

Respectfully Submitted, Wm. McGEHEE

Endorsed by the Floyd County Highway Committee

The Hon. Wm. McGehee our County Judge and others have been before the highway dpartment to get a state highway designated through Floyd County and the last time they were before the commission, they were informed that "Floyd County had never done anything to improve highway 28 already designated and state maintained, for them to go home and vote bonds and improve the highway already designated and then come back and we would get other designations. So let's vote thebonds, build this road, get the money back if the gas tax bond issue passes, to build lateral roads and then get other highways designated and built by the state gas tax if the same carries. Then every portion of Floyd County will be in reach of a designated highway and connected with all parts of the state by paved roads, which will give us improved conditions in every way. All to gain and

Are we going to wait five or ten years and lose all improvements and that would come from better roads, and speculate on a gambling proposition that is just being discussed? Have you stopped to think that it will require several years to vote on a constitutional amendment if the legislature orders it before the gas tax and state bond issue can be put over?

A Merry Christmas

Whatever of good cheer there may come to us at Yuletide is derived almost solely from thrift.

It is very true that charity must account for a Merry Christmascharity of the heart as well as of the purse-but in such instances, after all, THRIFT did it.

Why not, with plenty of time ahead, lay your plan for a Merry Christmas every year-starting now!

Saving does it-and we can help you save. With all these thoughts useful in mind, we wish you the heartiest goodwill of this Christmas season-and may your next year be your best-until the next.

The utilities of a city are combined in your motor car

YOUR automobile is something like a miniature city. There is an electric light and power system, a water system, a fuel system.

In the new Ford, you will find each of these systems of the latest design and best materials. Every part has been made to serve you faithfully and well at a minimum of trouble and expense.

Take, for example, the generator—one of the most important parts of the electrical system which supplies the current for lighting and for engine ignition.

In the new Ford, the generator is of the power-house type and is distinctive in many features. It has been specially designed to prevent most forms of trouble. Oiling is necessary only once a year. About the only thing you need do is to have the charging rate changed as the seasons change.

Closely allied to the electrical system is the ignition system. It, too, is of new mechanical design in the new Ford. There is but one high tension cable and that connects the coil with the distributor. Even cables from the distributor to the spark plugs have been eliminated.

ecial care has also

been taken to make the distributor water-proof, thus preventing short circuits from rain, etc.

The entire electrical and ignition systems of the new Ford are so simple in design and so carefully made that they will give you surprisingly little trouble. Yet that doesn't mean they should be neglected. Certain little attentions are needed from time to time.

The storage battery should be given water and the connections kept clean. The generator charging rate should be changed as indicated. Spark plugs should be cleaned at regular intervals. Distributor points should also be kept clean and the distributor cam given a light film of vaseline every 2000 miles.

These are just little things, but they mean a great deal to your car. You can have them looked after at very small cost by the Ford dealer when you take the car in for oiling and greasing.

A thorough checking-up at regular intervals will lengthen the life of your car and give you many thou-

sands of miles of carefree, economical motoring.

GAS HAS BEEN INSTALLED

Is it easier to heat by gas or by morning. go back to using coal or wood. Most ber "the Seniors of 1929 and 1930." of them will say no! Why is this the usual answer? Because gas is HIGH SCHOOL PUPIL'S RECITAL so much cleaner and it is so much

If one would ask the men who are is cordially invited to attend. employed to heat our school whether Nocturne in C Major they would rather use gas or coal the Waltz in E Minor answer would be much the same as Chanson Triste that of the housewife. There is no fire to build in the morning; just the Estude in D match to strike and touch to the gas. Minuet in G Then there is as hot a blaze as if you had built it an hour before. In the process of striking a match there is no need in getting the clothes dirty with soot or coal dust. Since gas has been installed in the furnace in Lockney High School, it requires less attention on the part of the men Legenede who are operating it than when it Simple Confession had to be heated by coal. It keeps steady steam in the boiler, and in this Climbing way the school is never cold as it had been several times before the gas Phantoms Passing By was installed. Then when the fire is In Hanging Gardens to be put out out it simply requires a "twist of the wrist" to extinguish the First Loss gas blaze and it is ready to be left Hunting Song alone. For these reasons everyone is well pleased with the heating im- Adajo Cantabile from Sonata Path- Doyle Pennington has been absent work.

Letters From Little iots To Santa Claus

Lockney, Texas,

pair of house shoes, apples, oranges, Christmas tree and all the boys and

With love. Dorothy Bennett.

> Aiken, Texas, Dec. 6th, 1928.

Please bring me some fruit, please

From your friend, Hugh McReynolds.

> Lockney, Texas, Dec. 7th, 1928

Dear Santa Claus:

I will write you a letter and tell you what I want for Christmas. I am a little boy 6 years old and am in the first grade. I am going to school at Pleasant Valley. For Christmas I suit case and tricycle, and lots of me candy, oranges, and nuts.

Your little friend, Jack Craft.

> Aiken, Texas Dec. 6th, 1928.

Dear Santa Claus: I am a little boy eight years old. I want you to bring me a little truck with candy in it. I want a little gun and some fruit and nuts. And don't forget my baby sister.

Jeff De Rusha.

Floydada, Texas, Dec. 4th, 1928,

Dear Santa Claus: I want you to bring me a big doll that will walk, go to sleep, say mamma, and with black curly hair, also a doll buggy to ride her in. Bring my little brothers, Luther, John and Jack, a pedal bike and ball, and bring Luther Jorn a doll so he won't take mine, toy and lots of good things to eat. Odessa Lov Kuydendal

Dec. 7th, 1928, er, Fred.

Dear Santa Claus: As Christmas is so near, I will tell you to be sure and come to see me. am a little girl eight years old, and want a sleepy doll and a vanity. I I am a little girl 9 years old. What go to school at Pleasant Valley. We Dear Santa Claus: want for Christmas is a doll and are going to have a Christmas tree. I I want a train and a tool box, and

From Nita Lue Craft.

Lockney, Texas,

Dear Santa Claus:

Your friend. Ruby Williams.

Lockney, Texas, Dec. 8th, 1928,

Dear Santa Claus I have been a good little girl this year and if you have them to spare I would like to have a little doll and ant a tractor and a harp. I want forget my little sister, she wants a doll and kiddle car.

With lots of love. Hellen Ruth Bennett

> Lockney, Texas, Dec. 7th, 1928

Dear Santa Claus: I want a table and two chairs, doll

The House that Grew ...

Sometimes the old house just naturally has to expand. You can make the extra rooms at low cost by partitioning with Sheetrock, the fireproof wallboard.

Sheetrock, which we sell and recommend most heartily, is made of pure gypsum rock, in great, broad sheets. Saws and nails like lumber. Decorates perfectly (all joints concealed). Let us show you a sample and estimate for you.

South Plains Lumber Company

bed and a bye-lo-doll, fruits, nuts and Lockney, Texas, candy. Don't forget my little broth-

Your friend, Mary Jewell Huggins. Lockney, Texas,

Dec. 7th, 1928,

J. E. Huggins.

Lockney, Texas, Dec. 7th, 1928,

Dec. 6th, 1928. Dear Santa Claus: I want some house shoes, sweater I want you to bring me a stocking and a big doll, fruits, nuts, and candy. Your friend. Emma Lois Huggins.

How Many Bargain Tires Are Real Bargains?

Isn't it better to pay a little more for a tire you know than to ride in fear and trem bling on a "bargain" tire?

"Bargain" tires are short lived, and in the end you've lost everything including your temper-and nothing to show for it.

Buy United States tires from us-ride comfortably and save money.

ew Features o The Outstanding Chevrolet of Chevrolet History

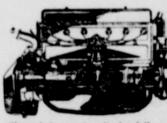

- a Six in the price range of the four!

The Outstanding Chevrolet has a marvelous new sixcylinder, valve-in-head engine whose perfected design represents over four years of development and testing on the part of Chevrolet and General Motors engineers. It has numerous advancements typified by a nondetonating, high-compression cylinder head - gasoline pump with filter, and automatic rocker arm lubrication. It provides performance the like of which was never before available in the low-price field-marvelous smoothness, tremendous reserve power, and sensationally swift acceleration-all with an economy averaging better than 20 miles to the gallon of gasoline!

lts marvelous new Fisher bodies display a new order of beauty, smartness and luxury.

Additional new features by the score-each an impressive example of automotive progress-contribute to outstanding performance, quiet operation, long life, ease of control and economical ownership.
