for a Lifetime

Is all you will need to buy if you select with care. The Auto-Oiled Aermotor is made to

last a lifetime. It oils itself, adjusts itself to

the strong winds, and works quietly and efficiently in

any wind. Day after day, year after year, you will depend on it to pump the water which you are constantly using.

If you choose an Aermotor of the right

size for your well, and a tower high enough to get the wind from all sides, the Aermotor

will do the rest. One oiling a year is all that it needs. The gears run in oil in a tightly enclosed gear case,

The improved Auto-Oiled Aermotor is stronger and better than ever. It is so skillfully designed and

so well made that there is nothing to get out of

order. Turn it loose and let it run, and you will

always have fresh water when you want it.
