CHATTERGRAMS

BY JEAN SUITS

Tell you it's devilish to try to write this column on Thursday while the cylinder press goes bang, clang right in my ear and the editor is nervous and up-set—in other words the whole situation is something I do not relish. But if there be paydays and Sundays there must be Thursdays. But be not perturbed if I get a little radical in the middle of this writing because my brain has been recording noisy revolutions of the press for the last half hour.

The fog here early Thursday morning, so I've been told, reminded one of dear old London, England. There was actually enough moisture to wet the walks and trickle down the window panes. This old earth is getting mighty tight with its rainy clouds here of late. I always thought that anything as old as this Universe just naturally leaked a little through the cracks, but I guess it must be made out of excellent staves and banded with super hoops. This would only bear out the Almighty's statement when he created the earth and said it was good!

Thanks R. B. Boyle for the good wishes and boost in The Briscoe County Times concerning my efforts in this community. Although I'm not personally acquainted with him, I read his Column, Bobbing 'Bout, every week and can truthfully say he is a man after me own heart.

It is really quite humorous and yet pathetic to see the shapes, sizes and conditions in which the exchange papers and magazines arrive on my desk. I get a big techie once every week from the disheveled unhappy lot thrown carelessly hither and yon by some recent visitor to the post office.

A few papers come attentively clad in a neatly printed wrapper and appear to have enjoyed their journey by looking as fresh as mountainside daisies following morning dew. But the majority look as if the trip via rail had about done them up for good. Their general appearance signifies of dissipation and the coats are often ripped at the side seam and sagging at the corners.

Some of the papers are not at all wrapped up in the manner they are printed, probably by some printer who knows nothing of it and fit a number of six page papers are wrapped about the size of a cigarette and appear to be suffering like a woman of 40 in a corset of 16! When I discover one of this variety I drop all connections and immediately proceed to relieve the tension by cutting the bodice. Then there are some who come to this office wearing a wrapper two sizes too large giving a lumpy outline.

It's an unhappy, discontented and brow-beaten mass of papers that congregate on my desk every week to be unwrapped and relieved of their misfortunes.

There are rings on her fingers and rings on her toes." Only this time it happens to be rings on the ground and floor galore. It's marble time that's what! Every little boy from 5 years old and up has a pocket full of marbles along with tops, strings, trinkets, nigger shooters and other obtainable articles carried by every lad.

THE LOCKNEY BEACON

Established 1902
Published Every Thursday
PUBLISHER: M. SUITS
EDITOR: J. SUITS
ASSOCIATE EDITOR: J. SUITS

Entered April 14, 1902, as second class matter at the postoffice at Lockney, Texas, by act of Congress, March 3, 1879.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Beacon will be corrected gladly upon its being brought to the attention of the publisher.

Two thousand business men gathered at Washington recently to have a few words with Chairman Clay Williams of the NRA. It seems that Clay had passed the word out that he was not going to stand for any more "Price Control." That was a big "fly in their ointment." They have been enjoying a guaranteed price for their products for a short time and they had begun to really like that kind of business. These business men found that a fixed price below which their competitors could not go left them more time for "play." Now that Mr. Williams is going to take that protection away from them, they are just a little bit peeved, for they dislike to wrack their brains for ways to hold their business. They sure have been riding the "gavy train."

Governor Jimmie Allred seems to be getting the co-operation of the Legislature at Austin. That is mighty fine. But we do not like one thing that Governor Jimmie is doing. He is giving all the political pie to the boys in East and South Texas. It looks as if he is going to forget his friends and supporters in West Texas. But then we are accustomed to getting what the "little shot at" so it won't make much difference. State candidates promise us everything before election time and then tell us to go to bed after election and I guess we will go. We always have.

Well, well, "Kangish" Long grabbed a train at Washington and stepped off in Louisiana and said "Scott" and the "Square Dealers" took to town. When it comes to being a "Dickey" the "Kangish" makes Missouri look like a piker. The Square Dealers were demanding that the governor call the legislature together and repeal all those special laws passed at the time of the late Governor. They were cutting up considerably. Hooie heard about it and things turned out as also stated. When the Big Tom C. is away, those little "mice" will play.

Oscar DePriest, the ex-con, who was up until last election, is congress man from Chicago. Remember him? Sure you do. Remember what a "risky" he was in Washington because his wife was not accepted by the "white folks" as their equal. Well, he is busted financially, and how glad we are. Never did fancy that black whelp anyway. He could not pay a \$38 judgment in a Chicago court, and said he was "penniless and looking for a job."

Hold everything! You men folk! Things are coming to a pretty pass. Yes sires, our clothes designers for the men folks are going to try and hang a lot of colors on us that will make us look like a beautiful rainbow. We are again it, yes sires, we are protesting. Who in the heck wants to be wearing an Orange or Canary colored suit around. We look enough like a clown already without being caught with that kind of garb on. They may get the women folks to wear anything by telling them it is "Stylish and the very latest thing from Paris," but us men folks will stick to our blue serge.

Ferdinand Pecora, the little Sicilian-born shrimp that made millionaire sweat blood in the Senate Banking and Currency Investigating Committee. Or do remember him, we are sure you do. Remember how he called the big boys, one at a time, to Washington, and placed them on the carpet, and made them tell how they made all their money. Well his salary was only \$300 per month, but he got the job done, and now he has been appointed by Governor Lehman of the state of New York, to the New York Supreme Court and draw a salary of \$22,500. So the next time some one offers to hire you for a couple

"BRAIN JEWELS" FROM OUR EXCHANGES

It seems that a sales tax is inevitable. Within a very short time, the way it looks now, Texans will have to pay about 2 per cent on everything they buy. Lawmakers are promising relief on ad valorem taxes if the sales tax is enacted into a law. We don't pay enough taxes to keep the boys down at Austin in spending money and they figure a sales tax will be the best way to get it. All right, if they add the sales tax, right here I am going to suggest to them a way to raise a little money. If they put a sales tax, say the 2 per cent, on all retail sales, my suggestion to them is to double the sales tax on mail order houses. This would be only fair, because the local boys will have to pay the 2 per cent, then pay their ad valorem. To add an extra two per cent of the mail order houses would keep a good bit of money at home which, in turn, would help the local merchant pay his real estate taxes, and to complete the circle—make the gentlemen in Austin a little more spending money. Mr. Small and Mr. Tarwater, please take note.—The Quitaque Post.

It is not exaggeration to say that the average business man looks to a session of Congress with dread and uncertainty. That has been especially true during the past few years, in as much as Congress has had to do with our financial and social ills—remedies which, for the most part would have been worse than the disease.—The Lubbock County Herald.

If you could turn hell bottom side up you might find imprinted on the bottom those awful words "Made in Russia."—Bobbing Bout By Boyle.—The Briscoe County News.

George Mahon's opponents during the recent primaries accused him of being too young for the congressional job. The complimentary nature of his first committee assignments, and the fact that he was made secretary of the Texas delegation, add to the reputation of the 19th district voters. Congratulations to you, George!—The Weekly Dozen.—The Scurry County Times.

Announcement has been made that it has been decided to extend the shelter belt as far south as the south line of Hale county. It looks like us Lynn county Democrats are going to be compelled to struggle along as best we can without any tall timber to take to when the Republicans get back to normalcy and go out on the war path agin.—The Lynn county News.

To make friends always be friendly. To make enemies, just be cranky, cross, irritable, despicable, vicious, unreasonable, unjust, crooked, and see no good in any of the acts of those who would make a bigger and better Claude, and you will have the enemies, plenty of them. If you can't lead, try following awhile it will put you in line to be a lead, or when your friends have confidence in you and your propositions.—The Claude News.

Admiral Byrd has declared that the land around the South Pole which he is exploring now is a possession of the United States. I wonder if there is anything down there that Secretary Wallace can figure out for a plow-up campaign?

Should Americans model their government after China? Well, did anybody ever profit by waking up another man's bulldog?

What's the sense in teaching a boy good manners if he forgets them the moment he takes hold of a steering wheel.

Stanley Doss, county clerk, last week returned to the county treasurer of Lamb county in excess fees the tidy sum of \$1,308.85. This amount represents the profit to the county that Mr. Doss' office

has paid during the year 1934. In speaking of the remittance of the excess fees to the county Mr. Doss said, not boastfully, but with vident pride, that this is the first time since the county was organized and the office of county clerk was established that this office has "paid a profit."

The oldest important landmark in Tulia still standing on its original site, is being razed by workmen who will salvage all material that can be used, and will go into a building at Olton Texas. This building is the old White Hotel just north of the Tulia Bank & Trust Company building.

According to the old timers here, this building was erected in 1890, and for many years was the only hotel in Tulia.

Winners in the fifth annual Abernathy Poultry show were announced last Saturday by R. A. Box, vocational teacher in the high school after Olin Reed, superintendent, had tabulated the decision of C. (Pat) Murphrey, Lubbock, licensed A. P. A. judge who made the decisions.

There were 83 first place winners in all events; 46 second place winners and 25 third place winners.

Approximately \$85 in cash and merchandise, contributed by local business men, was divided among the winners.

IF YOUR BREATH HAS A SMELL YOU CAN'T FEEL WELL

When we eat too much, our food decays in our bowels. Our friends smell this decay coming out of our mouth and call it bad breath. We feel the poison of this decay all over our body. It makes us gloomy, grouchy and too good for anything. What makes the food decay in the bowels? Well, when we eat too much, our big juice can't digest it. What is the big juice? It is the most vital digestive juice in our body. Unless it gets it see flowing from our liver into our bowels every day, our movements get hard and constipated and our food decays in our 25 feet of bowels. This decay sends poisons all over our body every six minutes. When our friends smell our bad breath, they don't use a mouthwash or take a laxative. Get at the cause. Take Carter's Little Liver Pills which gently start the flow of your big juice. But if "something better" is offered you, don't buy it, for it won't be a natural (liver) pill, which loosens bowels, gripes and sends the poisons in many people. Ask for Carter's Little Liver Pills by name and get what you want. See—25¢. O.1324, C.M.C.

WEST TEXAS MOHAIR MARKET IS REVIVED

Wool Is Being Moved To Boston And Other Eastern Markets

The mohair market in the West Texas range country almost stagnant for the last 18 months, has been revived with a number of sales recently and wools moved to Boston and other eastern and northern points on consignment are now selling at firm prices.

Prices of 16 cents for the grown mohair and 26 cents a pound for the kid hair were paid late last week for more than 1,000,000 pounds. The largest sale was the 90,000-pound accumulation of Shreiner Wool & Mohair Commission Co., Kerville, to Collins & Aikman of Bristol, R. I.

Consigned wools to Boston sold at 25 cents net to the grower for 12 months and 20 cents net on 8-months. This was an in-

crease over prevailing prices in the country. Advances of 20 cents had been made on the long wools.

Few sales of sheep and goat have been made in the ranch country but aged ewes commanded in excess of \$2.20 per head with 900 head of four-and-five year-olds moving at \$2.25 in the Junction country. They were taken to Menard.

Kids are commanding \$1 a head and nannies are bringing \$1.50 to \$1.75.

DATES OF AMARILLO FAT STOCK SHOW CHANGED

Old Dates Conflicted With The Southwestern Show At Houston

Dates for the Amarillo Fat Stock Show have been changed from March 12, 13, 14 and 15th, to March 4, 5, 6, and 7 Grover C Hill, president, has announced. This is made necessary because of the conflict in the original date with the meeting of the Texas Southwestern Cattle Raisers Association at Houston, he said.

Mr. Hill reports great interest in the meeting of the Panhandle Live Stock Association which will be held in conjunction with the Amarillo Fat Stock Show and the Hereford Breeder's Show and Sale. Entries are being received by Mr. Hill and Mr. W. M. Gould, secretary, for the bull sale daily and it is expected that this will be one of the largest held during the past several years.

U. S. CIVIL SERVICE COMMISSION WARNS AGAINST CORRESPONDENCE SCHOOLS

The United States Civil Service Commission says that numerous letters received at the office from different parts of the country indicate that misleading information is being given to the public by agents of some of the correspondence schools which give instruction in preparation for civil service examinations.

To guard against the loss of money for tuition at this kind of the Civil Service Commission informs the public as follows:

No one can promise appointments for which the United States Civil Service Commission holds examinations. The claim that such assurance can be given brands the person making it as a fraud.

Information regarding examinations for the United States Civil Service may be obtained from the boards of United States Civil Service Examiners. There is such a board in each community which has a post office of the first or the second class. In nearly all cities the civil service board is located at the post office.

Before paying money for tuition, or signing a contract, it is advisable to make inquiry concerning the prospect of examinations. There is reason to believe that agents of some schools deceive the public as to the probability of early examinations.

No school has advance information regarding the need for employees or the probability of examinations.

CIVIL SERVICE EXAMINATION

The United States Civil Service Commission has announced open competitive examinations as follows:

Engineering draftsman (highway), \$1,800 a year, Bureau of Public Roads.

Junior medical officer (interne) St. Elizabeths Hospital, Washington, D. C.

Associate supervisor of elementary education, \$3,200 a year Indiana Field Service.

The closing date for receipt of applications for these examinations is February 18, 1935.

The salaries named are subject to a deduction of not to exceed 5 per cent during the fiscal year ending June 30, 1935, as a measure of economy, and also to a deduction of 1.2 percent toward a retirement annuity.

All states except Virginia, Maryland and District of Columbia are required to make appointments in the apportionment of federal services in Washington, D. C. Of the positions named, only engineering draftsman is subject to the State apportionment law. Full information may be obtained from the Civil Service Commission, Washington, D. C.

DEBATE TRY OUTS HELD LAST WEEK FOR LEAGUE

Debate try outs were held at the high school last week to determine the two teams who will represent Lockney in the Interscholastic League Meet this year at Floydada March 29 and 30.

The three judges, J. W. Jones, G. D. Tate, and Delmar Ashworth, decided that Chester Carthel and Hall Nall were more efficient than their three opponents and should represent the school. Mary Alice Baker and Mary Margaret Ridings were chosen as the best out of four who tried out for the girls debate team.

The question to be debated this year in the Interscholastic work is to Resolve that the Government should Own and Operate All Electric Light and Power Utilities.

Chester Carthel debated last year for the school and has had quite a lot of experience. Mary Alice Baker and Mary Margaret Ridings are freshmen in high school and have never debated before as well as Hall Nall, but the coach, G. D. Tate, believes that they are the most promising teams that Lockney has ever had.

J. W. Jones, superintendent, is reported to have said that the best group trying out were the best he had heard in several years. The two teams plan to debate Ralls at Ralls next week.

Other students trying out for the teams were Robert Lee Smith, Billy Ed Whitfill, Frank McReynolds, Helen Callahan, and Glenna Whitfill.

They contended that by this plan the buying public had contracted heavier obligations than they could meet, and that the crash was bound to come.

Now comes interesting proof of their mistake. Business reports for the past year show that installment buying reached the record total of 1929, when the volume amounted to more than six billion dollars. Evidently the buying public is still satisfied with the plan, else they would not have returned to it the moment money commenced to flow again and they found themselves again able to buy. In a canvass of Lockney you can find some condemn installment buying, but you will also find just as many to endorse it. That the great majority of people can be depended upon to buy only what they need, and what they can pay for, is a recognized fact. This fact, and the system which sellers have for safeguarding credit accounts, seems to give assurance of the dependability and service of installment buying.

If you cannot pay spot cash for that which you need for your comfort and convenience, then you certainly are justified in buying it on terms you know you can and will meet. Doing without when there is a way to have the things you actually need, and a clear way to pay for them, is not justified. So long as your credit is good, and you do not buy unwisely, it makes little difference how you pay for it.

Hit by Ickes Order

NEW YORK ... to be on the job. No one seems to know when or how this old weather-prediction custom originated. No one seems to care. All anyone knows is that for long years the ground hog has been America's best-known weather prophet, and many cusses and discusses than any other. If Feb. 2 is bright enough for him to see his shadow, he returns to his underground den for six more weeks of winter. Failing to see his shadow he prepares to come from his long winter hibernation—for winter is about over.

That is the old belief, and you are at liberty to take it or leave it. The paid weather man will laugh if you mention "Ground Hog Day" to him—and so will a lot of your acquaintances. But if you are a believer in the ground hog's ability to forecast the weather, don't let that shake your faith. Ask the disbeliever this: if he can't see anything to ground hog why didn't people quit watching the skies on the second of February years and years ago?

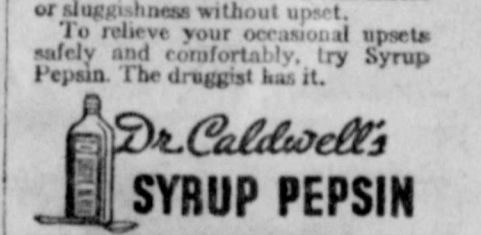

Doctors Know!

... and they use liquid laxatives

You'd use a liquid, too, if you knew how much better it makes you feel. A liquid laxative can always be taken in the right amount. You can gradually reduce the dose. Reduced dosage is the secret of real and safe relief from constipation.

Just ask your own doctor about this. Ask your druggist how popular the liquid laxatives have become. The right liquid laxative gives the right kind of help—and the right amount of help. When the dose is repeated instead of more each time, you take less. Until the bowels are moving regularly and thoroughly without any effort, people who have experienced this comfort, never return to any form of help that can't be regulated! The liquid laxative generally used is Dr. Caldwell's Syrup Pepsin. It contains senna and cascara, and these are natural laxatives that form no habit. It relieves a condition of biliousness or sluggishness without upset.

To relieve your occasional upsets safely and comfortably, try Syrup Pepsin. The druggist has it.

Therefore it might be a good idea to have us check up on your battery and see if it is capable of spinning the motor in your car fast enough to start it on a cold morning. It is a lot of grief to go out to the garage to start your car and the battery is so weak that it will just barely turn the engine over and not enough speed to start it. OFFICIALS OF FIVE COUNTIES DISCUSS PLANS

Resolutions on relief, auto license fees and taxes were directed to the Texas Legislature by county judges and commissioners of Floyd, Castro, Swisher, Lamb and Hale counties meeting at Plainview Friday afternoon.

Following a general discussion of relief problems the county officials drew up a resolution opposing any change in the present requirement that a relief applicant must be a resident of the county six months before he is entitled to receive relief in that county.

The resolution also opposed the proposal to have commissioners court responsible for care of unemployables suffering mental or physical disabilities. Counties have all the relief clients they can care for at present, the officials here maintained.

The Legislature was requested in another resolution to allow auto license fees to be distributed as they now are. The officials claimed that counties have debts contracted on a basis of collection of auto taxes and would be handicapped if changes were made in the manner of distributing fees.

A third resolution opposed placing upon commissioners court the responsibility of collection of delinquent taxes and opposed levy of any new taxes unless the object was to reduce the present levy on land and other tangible property.

It's a lot of applesauce, but you will like it this new glorified way! Strain and drain four cups of slightly sweetened apple sauce and add to it a cup of shredded pineapple, well drained. Steam a halfcup of pasturized dates (pitted and chopped) to the consistency of marmalade. Fold into first mixture and flavor with two tablespoons finely chopped preserved ginger. INTERNATIONALISM

In Sweden it's "smorgasbord"; in Italy it's "antipasta"; in France it's "hors d'oeuvres" and over here they are "appetizers" or "relishes." Which proves the first course tidbits are popular everywhere. New this season are the boxes of assorted pastes and spreads featuring those made from bloated sardine, anchovy and ham, and also new, to accompany the dish of "spread," are dainty toasted wafers known as mullia crisps, which are crisp and crunchy and, if your first course features a beverage, too are found to be the ideal accompaniment to a cup that cheers.

The bolero itself, which gives the frock its dashing air, is removable and the frock is complete without the bolero; sleeves, collar, tie, sash and all. The soft collar and bow are most becoming and puff sleeves

bring into a slight flare at the lower edge. A plain taffeta in tones of blue, red and gray would be very pretty in this style with sash, collar and in matching

plain collar. Light weight woolen could be used combined with velveteen. For PATTERN, send 15 cents coin (for each pattern desired), your NAME, STYLE NUMBER and SIZE to Patricia Dow, (LOCKNEY BEACON) Pattern Dept., 115 Fifth Avenue, Brooklyn, N. Y.

For long it has been the thought that women choose their foods for nutritive value rather better than men. But a recent study at a coeducational college points out the actual fact that meats and vegetables and milk appear most frequently on the trays of the men, and the desserts and sandwiches go to the women. It would seem that the women still need some education in choice of their own foods—if not for their future families.

popular as it was last season, but it is infinitely finer. Designers have remembered to make velvet frocks romantic and beautiful, as well as luxurious. The new uncrushable weave is a boon as we can now wear a velvet frock ever so often without tell tale creases and wrinkles. An exquisite frock is of black velvet, with a collar of Irish crochet. The slim, fitted bodice contrasts with the wide, gathered skirt.

Let's Be Thinkers!
From my limited observation of life I have somehow come to the realization that the most valuable person in the world is the one who thinks—the one who is willing to exercise his mental faculties. The accepted habit of the majority is to follow the thoughts of others rather than allowing themselves to have a share in the thinking and judgment. A very fine thing it is to be able to do a job of manual labor skillfully, but often there is a great deal more dependent upon efficient mental labor. The person who can perform both types of work well is worth a great price, not only to himself but also to civilization. Why should a person say to himself, "That person is capable of sound thought. I am willing to follow his suggestions." Of course this certain person could be such as described, and it is advisable to accept sound advice, but the man with this attitude is completely robbing himself of every opportunity to be his own master and own guide. He is nothing more than a parasite, existing up on the mental activities of others, never contributing to the world any worth while ideas or examples.

The average person is afraid of his own ideas. He doesn't give himself credit for being as capable or intelligent as his neighbor and absolutely refuses to accept any ideas of his own. He habitually regards thoughts of others, especially of some renowned man, so far above his own that he is sure it is unwise to accept any either. Consequently he closes the door to any original thinking. It has been said that "the educated man isn't the man who knows but the man who thinks." The educated man isn't the only one who is capable of exercising his mind, but perhaps he has learned that the world needs real thinkers instead of more people who are satisfied to depend on others for guidances.

Let's be thinkers ourselves! Accept the thoughts of others and instead of following them without any consideration what ever mingle them with our own. Let's do our share in solving life's problems and make the world happier by our having lived in it.
