

CHATTERGRAMS
BY JEANE SUITS

It will surprise the whole office force if you don't find a couple of bushels of wheat in the chatter-boxed out of the adjoining columns of this harvest edition. We have all discussed, argued, and gossiped about wheat this week. I think of everything in wheat bushels and acres. When I quit threshing out and go home for a bushel of wheat. Then when I sit down at my typewriter I begin to try to figure out how much wheat was utilized in the making of the bread, kind of test it made, how the flour mills conveyed the wheat from the field, and the price paid. Every afternoon for five days I have been spending covering acres and acres of ground (some irrigated and some terribly boggy) in search of wheat material. If I had to help with an edition of this sort every week I would quit trying to make a go of it, and just fizzle out like some of our dry land wheat did around here.

Of course you girls want to know and I am going to tell you what Ruth Stapleton told me about Robert Taylor, the movie sensation, who appeared personally at Dallas last week-end while she was there. "He is actually as handsome off the screen as he is in the pictures," she reported. Now, all of us girls can go on living in make-believe since learning that our hero is really a "honey." Before there was always little doubt as to whether he actually possessed that high-voltage smile that has practically electrocuted many a girl's heart in the dark recesses of the theater.

This scene opens with me taking a humble bow before Editor E. I. Hill of the Lynn County News and Willard Bright, editor of the Gaines County News, who have been so gracious and generous to the point of extravagance with compliments concerning this column in their papers. Mr. Hill says he thinks this stuff is the best local column in all this section of the state. And Mr. Bright says Chattergrams is "tops" with him (of course he could mean onion tops but I'd like to assume he meant the top of the list.)

Mr. Bright, I thought that "scatter-brained treatise on gossip" looked pretty good with the Lockney Beacon label on it in the Brownfield Herald last week and I wasn't going to say anything about it. But since you brought up the fact that you were the author, I don't believe I did write that dissertation. A J. Stricklin of the Herald just got his credit pencil crossed. But it is liberal to happen to anybody. I noticed where you have divided the average woman columnist into three groups. I haven't found enough men columnist in the true sense of the word, to form a classification yet. (Saved again by the dropping of the screen.)

Why do you go to church? Because you think it will please your mother, wife, or husband; because you don't like work and the preaching hour is a good time to do nothing. You don't even have to listen much less sit up. Half reclining positions are quite common in such places; because you know you should but haven't figured out just why yet; maybe because the preacher bores you and you have heard that the tests for character is perseverance. Perhaps you go to "show off" or to see if Mr. Nervewater ever got that new frock she has been trying to buy for two weeks; of course there is a chance of your going because you have put some thing into the work of the church and you want to see its fruits; more than likely it is habit; all in all, maybe it is because you know your will power is weak and you wish to over throw it by letting determination rule for an hour.

I think it would be a grand idea some Sunday if the preacher would pass out slips of paper and pencil and ask each to write truthfully why he came to church that morning. Honestly speaking, what do you think would be the results? Would you be interested in truck farming who have signed soil contracts will not be on Back Page).

Panhandle Wheat Is King In A State Where Cotton Has Long Reigned Supreme

In a state where cotton has long ruled supreme and earned the title of king, there is one section that has established a kingdom of its own where wheat raises its bearded head and assumes its roll as despot. This section is no other than the Panhandle Plains area of Texas, where four fifths of the state's wheat crop is produced.

In a country where time is counted by a few score years, this section by comparison is merely infantile. Not our forefathers but our fathers pioneered this section when the country was dominated by the cattle industry. It was they whose vision and foresight has turned it into the agriculture area that it is today. And unlike most frontier countries a great number of these same fathers are living today to see the fulfillment of their dreams. So quickly has the country been developed.

These same men in their search of a crop for this high and region of climatic conditions, excellent to the growth of wheat. But it was the climatic conditions themselves that produced a wheat that was peculiar in its particular high quality which drew the eyes of the world to Texas as a wheat producing, as well as, a cotton producing state.

The Panhandle is the wheat pioneer of Texas, and time will (Continued on Back Page)

Off To Palestine
Mr and Mrs Gordon Crocker and son, Russell, left Sunday for Palestine on a two weeks' vacation. They will visit with Mr Crocker's parents in Palestine and before returning will attend the Centennial in Dallas.

If This Example Is True In All Cases, Irrigated Crop Triples Dry Land Wheat

One Ten Acre Plot Yields 42 1-4 Bushels Reaching The Highest Amount On Small Plot

Almost a triple yield is the results of irrigated wheat in this section over the dry land crops in the north half of Floyd County this year if one specific example is true in all cases.

One ten acre plot, measured within the fence, is said to have made 42 1-4 bushels per acre by the owner, Marvin Shurbet, who lives 14 miles south west of town. This is the highest yield made on any one small irrigated plot as far as can be ascertained to date.

History in Short
"I planted that ten acre patch Aug. 10, 1935, pastured pigs, goats, sheep, horses and cows during the winter, and watered it three times," Mr Shurbet said in giving a resume of its history.

Hold on here! Last minute reports from the Aiken elevator calls attention to the fact that E. C. Pile, who lives two miles south of Cereal, produced 40 1-2 bushels of wheat per acre on a 20 acre irrigated plot. Mr. Pile is entitled to share the lime-light with Mr Shurbet.

Average yield on 600 bushels of wheat on 22 1-2 acres (Continued on Back Page)

Mr. B. Martin, county agent for Floyd County, pointed out that those interested in truck farming who have signed soil contracts will not be on Back Page).

WHEAT PRICE EXCEEDED JULY

One Dollar and This Weeks As Compared With Last Year's Price
1636 MARKET GOOD
Same Time July 6 to 11th Last Year Market 88c As Compared to \$1.04

The price of number one wheat this year has already exceeded the highest market paid at anytime during the month of July last year. The dollar level was not reached in 1935 until Aug. 20.

Ninety-eight and one dollar per bushel is being paid here this week and the highest level ever reached during the month of July in 1935 was 94c. Wheat was worth around \$1.04 all last week, dropping to \$1.00 Monday morning. Tuesday morning the market was changed to 98c and Wednesday it was expected to go back to the dollar mark.

At the same time July the 6th to the 11th last year, the market was 88c and 87c as compared to \$1.04 paid this season.

In 1935 the price went to 94c the latter part of July and then dropped again to 87c the first two weeks in August. It did not change until about Aug. 20 when it hit a \$1.00.

Seventy-six cents started the market off this year in June.

816 ACTIVE CROP LOANS IN FLOYD COUNTY THIS YEAR

To-Date There has Only Been 38 Wheat Loans Made In The County

LOANS TO BE SMALLER

105 Row Crop Loans for 1936 Amount to \$13,500.00 With Each Averaging \$130

"Active crop loans amount to 816 in Floyd County," C. C. Gibson, field supervisor of the Farm Loan Administration, said here Wednesday afternoon in scanning his records of row crop and wheat loans for this section.

"So far there has only been 38 1936 wheat loans made for this county since the beginning of applications June 20," Mr Gibson stated.

He expressed the belief that the reason no more wheat loans have been made is because the farmer is waiting to see how his crop turns out before borrowing.

Applications may be filed with Mildred Rives at Frank Perkins' office for wheat loans any time, the closing date to be announced by the supervisor in ample time for all to be taken care of.

"Row crop loans in this county for 1936 total 105 with each averaging \$130, with not any one going below \$50 nor above \$200. The total amount made runs approximately \$13,500.00," Mr Gibson reported, applications for this loan closed June 10.

Last year 286 wheat loans were made in the county amounting to \$57,060.00, but Mr Gibson said he believed the amount would be much smaller this year. Wheat loans so far this year are averaging \$175, ranging from \$50 to \$200.

\$1,560,050 PAID ON FARM LAND

\$1-106,065 Paid Farmers of This County For Rental Benefit Payments

In a report from Washington, D C on the nineteenth Congressional District, statistics show that Floyd County received a total of 585 Federal Land Bank and Land Bank Commissioner loans amounting to \$1,560,050.

Of these loans 285 were made through the Federal Land Bank to the amount \$936,300, and the 327 Land Bank Commissioner Loans totaled \$623,750. These loans saved many farms in this county from foreclosure at the lowest rate of interest ever known to the farmer.

The record also shows that more than \$1,106,065.20 have been expended in Floyd County on rental and benefit payments made in connection with the commodity program from the beginning of the programs through February 29, 1936.

Floyd County has received \$427,280.92 as rental and benefit payments on cotton options. \$510,936.09 was received in the county for wheat payments, and \$48,381.16 was allotted the county on the corn hog program.

Congressman George Mahon of the nineteenth district in compiling these figures stated that "Had it not been for the federal loans, production loans through the Farm Credit Administration, and the A A A benefits and its new policies during this administration, hundreds of West Texas farmers who are now doing quite well would be totally ruined financially."

Wrecks Dodge Pick-Up Monday

Faulty headlights is said to have been the cause of Burton Thornton driving his Dodge pick up into the end of a bridge between here and South Plains Monday night while returning from his elevator there. His son Herman, who was with him, received a cut on the head, Mr Thornton was uninjured.

The pick-up received considerable damage, wrecking the front of it. The headlights were said to have gone out a few minutes before the accident.

Dry Land Wheat Considering D...

8 Bushels General Average Per Acre On Dry Land Wheat In This County

The harvesting of wheat in the Lockney territory has brought out the fact that the total production on dry land farms is exceptionally high considering the adverse conditions brought about by the drought in the winter months when the wheat needs the moisture most and the toll taken by the hail storms in the east and south east part of the territory.

The general average of wheat per acre on dry land farms is about eight bushels with different sections showing a fluctuation of from five to twenty bushels per acre.

WHEAT GOES OUT IN TRUCKS

Estimated Figures Include That Trucked Out and That In Carloads

APPROXIMATELY 266,000 BU.

From 40 to 50 Per Cent of Wheat Farmer Are Holding In Elevators

Approximately 190 carloads of wheat have already been received in the north half of Floyd county by elevators, with more coming in every day, as compared to around 100 carloads during the entire season last year.

A large quantity of the wheat this year, as well as last, has gone out in truck to wheat terminals in this section of the state. The above estimate includes that hauled by trucks and railroads and now in storage in elevators.

The approximations were received from the managers of the Patterson Grain Company, South Plains Grain Co., Farmers Wheat Growers Elevator, Muncy Elevator, Aiken and Cereal Elevators, Sterley, South Plains and Whitley elevators.

Each carload, according to grain authorities, may be estimated at 1-400 bushels per car, making a total of 266,000 bushels received in this section up until Wednesday of this week. The (Continued On Back Page)

FUNERAL SERVICES HELD FOR CHILD

Little Girl Died at Malone In Olton After Long Illness

Funeral services were held Sunday afternoon for the young daughter of Mr. and Mrs. C. E. Olton, The Rev. A. L. ... of the First Baptist Church officiated.

She is survived by her parents and four sisters, Ima Dean, 7 Mae, Marie Lee, and Lula Jean, and three brothers, Johnny, Jack and L. D.

She died at the home of her father in Olton after a long spell of sickness.

Interment was in the ... Cemetery.

FLOYD COUNTY ABSTRACT CO.

Let us show you that we can save you money on your Land Bank or any other Abstract work. 30 years experience in a big way. It is a cotton crop to really make things lively. The money is distributed among more people. The wheat that is now being harvested will put quite a bit of money in circulation as we have a large acreage in wheat, but field after field will never be harvested, in fact it has already been plowed under in preparation for another crop. We have no depression in Floyd County, it is short crops and failures that have held us back the past three years.
If you cannot refrain from betting you should go over to England. Those old slow thinking boys of that country will bet you on anything. From where a fly will light on up and down both ways. They are thinking seriously of passing laws to keep people from betting on things that are

Hitler has been busy improving the Bible and making it fit reading for his Nazis. Another case of "Mineself und Gott."—Quasah Tribune-Chief.

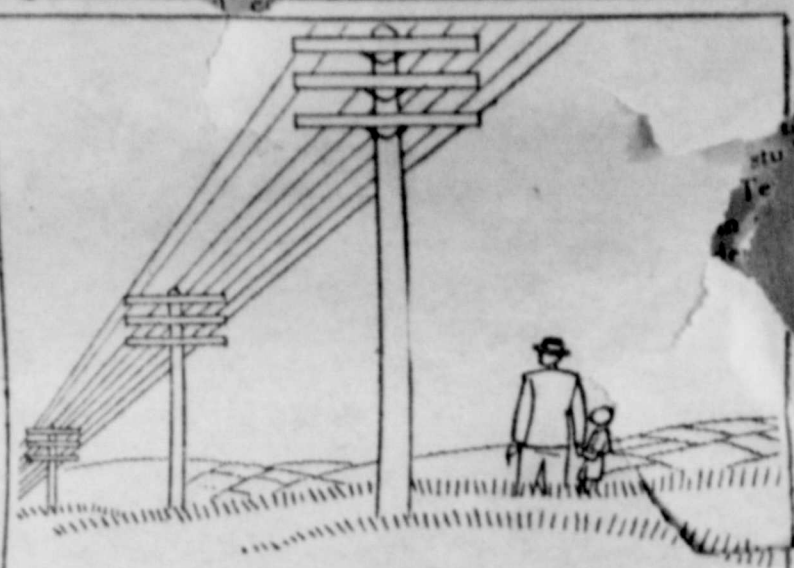

Less Than 40 Years! President Roosevelt has accomplished what it took Moses forty years to do, according to the Farmersville Times editorial reproduced here.

"It took Moses forty years to lead the Israelites out of the wilderness after he had delivered them from Egyptian bondage. The delay was caused by the obstinacy of the Jews who lost faith in their leader and were ungrateful for his services. There is now an analogy between that incident in Jewish history and our own nation. Roosevelt delivered the nation from the slavery and despair under Republican rule—and now that he is needing the full co-operation of all the people, the big business men—the very ones he helped at a very critical moment—are now howling and snapping at his heels with criticism and condemnation. The great trouble with the big boys is that they are going to have to divy up on their earnings to pay the expenses of the recovery. Nothing more.—Dickens County Times.

There is a certain charm about a liar that attracts listeners as a thistle bloom nodding in the sunshine to welcome bees. There is perhaps a restful reaction in hearing thought to determine which side is something that requires no of the fence of truth it belongs. It is only when a liar attempts to prove his statements that he comes borsome artistic spell. Dust—Dor Trib:

Outward to the world goes your voice

Sidewalks end at the edge of town. Lawns give way to the open fields. But the telephone lines go on and on—gleaming threads of copper stretching out through the valleys and over the hills. They carry your voice to the world. This sweeping away of the old-time barriers of time and silence is one result of the staff work of American Telephone & Telegraph Co., the researches of Ecl Laboratories, the skillful buying and manufacturing of Western Electric. Without the developments and improvements these Bell System organizations have given the men and women who furnish telephone service here, your voice could hardly go as far, and as fast, for so little.

Prayer meeting at 8:15 Wednesday evening.

Revival July 26

The Rev. and Mrs R L Flowers to conduct Services

The Rev. H H Hamilton, past or of the Methodist church, announced this week that the Methodist summer revival will start Sunday, July 26, and continue through Aug. 9th with the Rev. and Mrs R L Flowers, general evangelists of Gainesville, in charge of all services.

Mr and Mrs Flowers have held a meeting here before for the church. Mrs Flowers helps her husband by preaching a number of the sermons. Plans are being made for an out door meeting. You are invited to come.
