Ralph Perkins, Pastor

Hold on, mister. We say "can." We don't know your capacity-but why take chances?

This we do know: The law says that, if your ability to drive has been lessened in the slightest degree by the use of alcoholic beverages, you're what the law calls "under the influence."

That one more drink can make you take chances you wouldn't otherwise-can make you react more slowly to traffic conditions-pay less attention to other cars and pedestrians. Last year, 40,000 died in traffic accidents. Country-wide police records prove that drinking was a factor in 26 out of every 100 fatal accidents-in some areas,

even more.

**Outboards Don't** YOUNG IDEAS

Q" Is there any way 1 can get rid of my freckles?"

A Freckles tend to fade as you

get older-in the meantime, if you want them to be less

Use a liquid make-up and

**ROUND-UP** 

noticeable, here's a suggestion:

apply it over your entire face, blending it up to your hair-

line and down to your collarbone. Buff it with a tissue when you're

finished. The contrast between your

naturally pale skin and the dark freckles is what makes them stand out. A slightly tan make up will help hide theme.

If you have a problem-and

you'd like an answer to it write a note to Pond's Good Grooming Service, 420 Lexington Avenue.

RANGER TIMES, SUNDAY, APRIL 28, 1957

## Scare Fish, **Science Says**

## Outboards don't seare fish!

the Sport Fishing Institute, for its authenticity. Stroud's remarks

and views were aired over the NBC Monitor Evinrude Fishing Roundup this weekend (April 12). To a question, "Just what is the score in the business of motors and fishing ?" Stroud said :

"I think it is pretty clear that, based on scientific data available, there's absolutely no basic to it dicate that outboard motors any way harm our fish popula-tions or their tendency to fight or strike the angler's lure." When it came to the subject

of motors getting the blame for fishermen failing to come home with a mess of the finny friends, Stroud recalled his own experience n the TVA waters. "The only way we could catch

White Bass for tagging purpose was to dance spoons through the vake of the outboard motor when bubbled right behind the boat nd then we got 'em. If we didn't ise the trick we just didn't catch White Bass," Stroud pointed out Stroud then outlined the study by Dr. Karl Lagler, University o Michigan, on outboards and fish "The Michigan group took out boards, put them on the back o good boats, tied them by harness t posts in the middle of ponds and ircled them for hours and hours, ay after day. Then they checked he quality of fishing. At the same me, they had nearby ponds that had no motors on them at all, and they checked the fishing there and

could find absolutly no difference quality of fishing." The Texas Fish and Game Comission in connection with a federal-aid fishery study recently concluded additional tests which outtressed the Michigan studies

Skin-divers were used to make these Junderwater observations The Texas report from fishery ologist John E. Tilton stated:

of over 10 feet. A 10 horsepower outbard motor used frequently in the diving areas while observations are in

### What's Cooking-

(Continued from Page One) year alone will cost the average American family \$1,400, or \$427 per capita including every day-old baby in the land. The National Debt now stands

at \$274 billion, and the average family's share of this debt is \$7,000. The people can not stand this sort of spending. They just don't have the money.

The Federal Government seems to have forgot that the people also have other things to pay. They have municipal taxes, school taxes, county taxes and state taxes, in addition to taxes everything they touch including the water they drink. It is difficult for a person to spend dime on anything that is made without paying a tax on it. He is taxed when he stays at home, he is taxed when he travels, he is taxed when he makes a phone call, he is taxed to death. The people of America can't af

ford to be taxed any more. They can't afford to put up billions of dollars to be given away to foreign countries who only spit in their faces the first chance they get. They can't afford to keep building swank embassies a n swimming pools in all parts of the world for government diplomats They can't afford all the liquor funds for our world-wide round of entertainments. They can't afford to keep building bigger and bigger government buildings just because the old ones don't have parking ace and air conditioning. The Federal Budget can be

reduced, but the attitude of the administration has been, all right, YOU reduce it. The American people don't mind paying for protection. They don't mind paying for essentials. They don't mind paying for anything the country reasonably needs. But they are sick and tired of supporting the world, and they are sick and tired of keeping government blood-suckers on their payrolls, and they are nick and

tired of mis-management and bungling and government by blank check, brinks or war, postoffice blackmails and golf cronies. The spending must stop, and
