

Kiwanians In District Meet At Lubbock

LUBBOCK, Feb. 22.—Planning greater work for the area during the coming year and discussing problems which confront the clubs daily, approximately 100 Kiwanis club members from ten towns in division six of the Texas-Oklahoma district met here today.

E. Lon Mitchell of Clinton, Oklahoma, district governor, presided over the sessions during the day which opened at 10:30 and lasted until after 4 o'clock.

Forty-five out-of-town visitors were here for the conference, sessions of which were held at the Lubbock hotel, Amarillo, Sudan, Canadian, Childress, Plainview, Hahoka, Tulla, Vega and Wellington had representatives here.

Walter C. Humpton of Boston, Mass., field representative of Kiwanis International, was a special guest.

The morning session opened with an address of welcome to the visitors by Judge Clark M. Mulligan, president of the Lubbock club, and response was made by Frank B. Hill of the Childress club.

Greetings from the district were extended by District Governor Mitchell after which Lieutenant-Governor F. M. Braley, Jr., of Amarillo stated the purpose of the meeting. Erwin Ochener of Amarillo made a short talk on Kiwanis education preceding the luncheon.

In the noon luncheon program, service clubs of Lubbock also were present, Lions, Rotarians and American business members being guests of local Kiwanians. One hundred and fifteen were present.

Featuring the program was the presentation of a handsome traveling bag by Judge W. A. Palmer in behalf of Kiwanian friends to W. C. Rylander, past lieutenant-governor. Mr. Rylander was praised as a leader in Kiwanis, an example of the objectives of Kiwanis and a real man by Judge Palmer in his talk. Mr. Rylander made a short speech of acceptance.

In the afternoon program, talks were made by Dean A. H. Leidigh of Texas Tech, H. J. Buckner of Canadian; W. O. Allen and J. W. Collins of Amarillo; W. I. Wilkins of Sudan; A. C. Huff of Tulla; Governor Mitchell and Mr. Rylander.

Amarillo was represented by H. A. Ferguson, H. M. Luna, John Canterbury, J. C. Smyth, F. M. Braley, J. W. Collins, Frank Gillette, W. O. Allen, W. A. Palmer and E. C. Ochener.

Four Million to File Income Tax Returns

WASHINGTON, Feb. 22.—About one person in 30 throughout the United States is expected to file income tax returns for 1929 before March 15.

Uncle Sam looks for more than 4,000,000 reports from people in these classes: All single persons with a net income of \$1,500 or more for the year, or a gross income of \$5,000 or more; all married couples who had net incomes of \$3,500 or more, or gross incomes of \$5,000 or more.

All these must fill out special forms with collectors of internal revenue for districts in which they live.

On the first \$4,000 in excess of exemptions and credits there is a tax of one-half of one per cent normal tax. On the next \$4,000 there is a two per cent normal tax, with four per cent normal tax on the balance of net income. For net income exceeding \$10,000 there is a surtax.

All income from any source whatever, unless exempt from law, is classed as "gross income." "Net income" refers to gross income less deductions as specified by law.

A single person who is "head of a family" is allowed the same personal exemption granted a married person. Any taxpayer may claim \$400 exemption for each person dependent upon him for support, if the person is under 18 years of age or incapable of self-support.

When separate returns are made by husband and wife, living together, either may claim the \$350 exemption or they may divide it between them.

Salaries, persons, who are entitled to 25 per cent credit on net earned income, comprise the vast majority of taxpayers.

Is "Curse of Pharaohs" Operating Again?

Nine Persons Die in Horror Since
Egyptian Tomb Was Opened
Six Years Ago.

LONDON, Feb. 21.—The tragic death of Lord Westbury today added one more to the list of those whom the superstitious believe to be dominated by an ancient Egyptian curse—"death shall come on swift wings to him that toucheth the tomb of a Pharaoh."

Lord Westbury, 78, jumped or fell from his seventh floor apartment in St. James's court this morning. An inquest verdict said it was suicide. Lord Westbury left behind a letter including the words:

"I cannot really stand any more horrors."

The peer was known to have been worried over the unexpected death last November of his son, Richard Bethel, who was secretary to Howard Carter, famous Egyptologist.

Carter excavated the tomb of Tut-Ank-Amen in Egypt six years ago. He is alive, but among the persons more or less intimately connected with the work for six years, Lord Westbury's death is the ninth. It is pointed out, moreover, that the majority of them met sudden or violent death.

Lord Westbury, who was the third baron of his name, had been in ill health for some time. He lived alone in his flat under the care of a nurse. When the nurse was temporarily absent this morning he went into the bathroom and from there tumbled to his death. He crashed through a glass porch-roof 100 feet below and struck a woman. The woman was injured and taken to the hospital.

The first death among those who were in any way connected with the Tut-Ank-Amen expedition was that of Lord Carnarvon, the original discoverer of the tomb was opened Lord Carnarvon tom was opened Lord Carnarvon died in Cairo of a poisonous mosquito bite.

Lord Carnarvon's half-brother, Colonel Aubrey Herbert, died several months later. He also had entered the tomb.

Sir Archibald Douglas-Reid, radiologist who had agreed to make an x-ray examination of the dead Pharaoh, died in 1924.

A little later Professor Lafleur of McGill University, Canada, died at Luxor while on a visit to the tomb.

H. G. Evelyn-White, scholar and Egyptologist, committed suicide toward the end of the same year. He left a letter containing the words:

"I knew there was a curse on me."

In 1928 two sudden deaths connected with the tomb occurred. They were those of M. Beneditte, a French archaeologist, and M. Pasanova. Both had taken part in excavations in the Valley of the Kings.

PLAINVIEW WOMEN TO HAVE PURE FOOD SHOW

PLAINVIEW, Feb. 22.—For the purpose of furnishing entertainment for visiting ladies during the Third Annual Texas Panhandle-Plains Dairy Show here April 7, 8, 9 and 10, and to raise money for the erection of a woman's club building in Plainview, the City Federation has announced plans for the staging of a Pure Food Show at the city auditorium at that time. This announcement was made by Mrs. A. L. Putnam, president of the City Federation.

"By holding the Pure Food Show during the Dairy Show it will furnish entertainment for the ladies who accompany their husbands to the Dairy Show and at the same time give the advertisers a better advantage," Mrs. Putnam said.

NOTICE TO INCOME TAXPAYERS

For the convenience of those who are required by law to file Federal Income Tax Returns, a Deputy Collector of Internal Revenue will be at Littlefield, Texas, First National Bank Building, on March 10, 1930, to assist taxpayers in preparing their returns. No charge will be made for this service. The matter of filing income tax returns should be given immediate attention, in order to avoid penalty and interest.

West Texas Will Raise More Feed

(Fort Worth Star-Telegram.)

Varied reports come from West Texas counties regarding the probabilities of a reduction of cotton acreage in this area this year. With a potential cotton territory equal to the total of several cotton producing states, and with vast areas being placed in cultivation for the first time in 1930, the eyes of the cotton world are watching this section possibly closer than any other.

First estimates of the probable cotton acreage have been received by the Star-Telegram from several of the more important counties as well as from a number in which cotton is not the most important agricultural factor. Some of these seem to point to a general reduction in cotton acreage amounting to between 10 and 15 per cent. Other reports indicate that, due to the hard and prolonged freezing weather, which killed much of the small grain, the acreage in cotton will be fully equal to that of 1929. Others, because of the freeze and of other causes, show a probability of increases in cotton acreage running in individual counties as high as 15 per cent.

An encouraging feature of most reports thus far is the general agreement that more feed will be planted than last year and that most farmers will make a "living at home," no matter how much cotton they may plant.

FRIENDSHIP NEWS

Mr. Calvin and Miss Lurline Harvey entertained the young people Saturday night. All report a nice time.

Robert De Loach left Saturday for Los Angeles, Calif., to make his home.

Misses Warrenna Whitwell and Auda Faye Thompson spent Sunday with Miss Mildren Fowler.

Melvin Scogin and Billy Boyd were Amherst visitors Saturday.

Mrs. J. S. Hicks and brother, Ben Wilks, have returned from Dallas after two weeks' visit.

Mike Fowler of Tech spent the week-end with home folks.

The Friendship B. Y. P. U. carried their program to Sudan Sunday night.

Mrs. Lloyd Conatser spent the week-end with her parents, Mr. and Mrs. Sims.

Mr. and Mrs. E. W. Farmer spent the week-end in Clovis, N. M., visiting relatives.

Mr. and Mrs. H. L. Byrd were shopping in Littlefield Saturday. Grandpa Harvey is able to visit his son John of Sudan, after a long illness.

Ira Bussey and wife, E. N. Ray and wife attended the club banquet at Littlefield Friday night.

John A. Webb and wife, E. N. Ray and wife attended the funeral of Mrs. Hugh Aycock at Hereford. Mrs. Aycock will be remembered as Miss Marie Parrish.

Ray Turner, Alta Mae Hicks and Ida Rene Crain motored to Sudan Sunday on B. Y. P. U. work.

CARD OF THANKS.

The members of the Church of Christ take this method of thanking Misses Taylor and Oglesby, and pupils for cleaning the church house yard and for the care of same. Also thank Mrs. Liston for the kindness shown us last Tuesday night.

MRS. BECK ENTERTAINS.

Mrs. Beck was hostess to the members of the Church of Christ Ladies' Bible Class Monday afternoon at 3:00 o'clock. There were eleven present. A discussion of the Transfiguration and Crucifixion of Christ was studied. Plans for the future were discussed.

Our next meeting will be with Mrs. John Briscoe next Monday afternoon at 3:00 o'clock. Let each and every one make an effort to meet with us as we get much good from these lessons.

Mrs. James Courtney of Dimmitt spent the week-end with her parents, Mr. and Mrs. J. P. Earnest. Mr. Courtney came over Sunday and spent the day and both returned home Sunday evening.

ECHOES FROM SCHOOL PLATEAU

To the Public

We are in sore straits in our school. As every taxpayer knows, we are financially pressed and the future will be worse from that view than the present. Asking our school board for money is merely asking them to contribute what the taxpayer must put into their hands. There is no other alternative. January 24 we had a library evaluated at almost \$2,000. That is all destroyed. A few volumes have come into the school since that time. The school board has granted a fund of \$400 with which to begin the rehabilitation of the school library, but that will be little more than a drop in the bucket of expense that confronts us today. Here is something that may interest all of you: Sets, or single copies of Shakespeare, Dickens, Hawthorne, O'Henry, Poe, Whitman, and dozens of others of our famous authors might be contributed by any one of our people who have no longer any use of them. The Harvard Classics and the Harvard Junior Classics are much needed texts at present. Any set of Ancient History references, and American Nation Series, Channing in Six Volumes, or single texts to be used as references in any of our histories, all these are needed. Mr. Wilkins and Mr. Herron have ordered dictionaries for use of the two departments of the school, so they are not so badly needed as present. Encyclopedias are a great need today and will be for some time to come. A few copies of fiction or plays from some of our noted modern authors would be very acceptable. Should a book be offered for which we have no use Mr. Wilkins will gladly inform the giver. That will not mean that the book is not good. It will simply mean that it may not be needed in our scheme. Let us boys and girls of the high school ask this: If you have volumes you do not care to keep any longer, or volumes you prefer the school to have, please confer with Mr. Talbot, Mr. Herron or Mr. Wilkins, tell them what you have and if you are too busy to bring them in some of us will gladly come out to your home and get them. Do not forget this plea or fail to heed it. If you have one thing that we need and you do not need let us know immediately, either in person or drop us a card. That is all that will be needed.

County Interscholastic Meet.

This is possibly the most important of all the school year in standpoint of all the school year. It is an event that is held annually in every county in Texas. This year the Lamb county meet will be held in Sudan. The dates of this very important event are March 21 and 22. On these two days, Friday and Saturday school buses will run as usual in order that every pupil from this school may attend the meet. Contests in athletic events, in spelling, declamation, debating, essay writing, and many others will be held in the two days. There will be one feature of the meet that will be a little unusual for the Plains, that being a school exhibit. Each school of the county is expected to enter its exhibit. Let us all, teachers and pupils strive to make the exhibit of our school the best that can be put out this year.

Senior Class.

We have survived to the present 32 strong. We are holding together the largest senior class the school has ever known and one of the largest in the county, one class having a greater number than that of many schools whose enrollment far outruns ours. Our diplomas have been ordered, our invitations have been contracted, our caps and gowns have been promised. We feel that we are almost ready to graduate. The same three pupils are leading in the contest for class honors who were leading at last report. The contest is increasing in interest as this question must be settled after the next report goes out at the end of seven and one-half months. These pupils are Nannie Lee, Neal Wilkins and Irene Cooke. The leading boy has not yet been designated. Some boy, the one who leads in his class for honors, will be given a scholarship in some college; therefore it is worth working for just to be the honor boy, in addition to the name of being the honor pupil. The same offer is extended to a boy and a girl.

Junior Class.

We are looking forward to furnishing the school next year a larger group than the seniors of today are furnishing. There is a chance that our group next year may number considerably more than 40. Arthur Shuttlesworth has been absent from our class several days. He had an attack of smallpox. Of course, we juniors think if he had been in the lineup we should have won the basketball tournament. When the heat of that conflict had died away we shall find that we had the best team from a mathematical standpoint of any team in the

county. We had three men on the all-county five. This is not a Sudan statement. It was made by coaches and officials of the tournament. We expect to furnish to the team next year several stars, among them Rex Hammock, Donald Robertson, Coy Ford, and others. Our junior girls have done as well. Next year the girls' basketball team will have from our class Leona Slaughter, Arta B. West and Anna Jewell Shuttlesworth and others from our class. Those three, however, lettered this year. The seniors of '31 will be known in school circles next year.

Freshmen.

We are not to have our class play this year. It is too much to ask Mr. Chesher to give another night. One a month is enough to ask him to give in engagements for the school; hence we shall await the opening of the new auditorium next fall.

Durs is the largest class in high school in numbers, and we hope to make it the strongest next year. We shall have an important place next year in all school functions. We shall have some good athletes and hope to see them in use. Even this year nearly all the junior high school teams will come from us. Wayne Wilkins is the only member of the junior class who will not come from the freshman class. He and Ann King hope to represent us in junior spelling, but otherwise and with Wayne's help we shall carry the burden of the juniors in the County meet. Next year we shall help to carry senior burdens.

The Grammar School.

We are scattered out until at times it appears that we have several grammar schools instead of one, but we are still one in spirit and strength. Next year we hope to reassemble a real grammar school. We are looking forward to giving the school the "greatest class to go across the Divide to high school this spring. There will probably be about 60 pupils who will enter high school next September from our grammar school ranks. Some of them will be mature enough in years and training to help the high school "to register."

We have had over 20 additions to our student roll since our fire, and already we are crowded. We grammar school folks feel that some addition of room should be at our building next summer. Keep us together, is our plea.

JACK ADAMS REARRESTED AND RETURNED TO OLTON

Sheriff Len Irvin went to El Centro, Calif., last week after Jack Adams, who was arrested in that city and held for the Texas authorities. Mr. Irvin had arrested Adams several months ago and placed him under bond. This bond was forfeited, and he again arrested him and placed him again under bond, which was again forfeited.

Sheriff Irvin when he first arrested Adams found a 100-gallon copper still, 68 half-gallons of whiskey and about 600 gallons of mash.

Sheriff Irvin arrived in Olton with his prisoner Tuesday, and the elusive gentleman will have a third shot at the game of justice.

Len says the S. P. Railroad runs for about 300 miles through Old Mexico, but didn't say whether or not he left the train during this run.

WOULD DISCREDIT THE FARM BOARD

WASHINGTON.—Charges of a "propaganda barrage" intended to discredit the Federal Farm Board were voiced by Senator Arthur Capper, in a formal statement here last night.

"Pamphlets, speeches, market manipulations, inspired stories—these are coming to us in a flood," he said. "All are directed toward one end—to discredit the board and to prevent its using its powers for the benefit of agriculture."

Capper said the board had been attacked as socialistic, paternalistic, and malignant. He cited speeches that had been made and pamphlets which had been circulated, directed against the board.

Baby Beef Show For Lamb County

On Tuesday of next week, March 4, there will be held at Amherst the first exclusive baby beef show ever attempted in Lamb county.

There are now being fed in Lamb county, the property of 4-H club members, 29 baby beefs, and all of these animals will be on exhibition on that day.

The production of baby beef is fast solving the problems of Plains farmers. The old belief that beef animals must be carried over several winters to get the maximum of growth is being fast exploded. Growers are now adopting the idea of the "ton litter" as applied to hogs, wherein the most rapid growth possible is obtained and the animal marketed or slaughtered young. For this innovation the Extension Service, aided by the efforts of the 4-H club members, is largely responsible.

Every citizen at all interested in the production of beef should be out Tuesday and see this exhibit.

It is planned to select the five best animals of this exhibit to represent Lamb county in the coming Stock Show at Fort Worth, and this will be a splendid advertisement of Lamb county and the Plains country, as an example of what can be done in the matter of feeding out Plains cattle on Plains farms with Plains-grown feeds.

KIWANIS NOTES

Fellow Kiwanians: Here are four important topics for discussion this week—
Lon Slate will give us a report on the rural telephone question.
We will also have a report on the meeting at Lubbock.
We will have a short discussion in regard to our yard and garden contest.
The Boy Scout question is still an important issue. Let's have a report on this.
Think these things over.
Come out today at 12:15 at the old H-B office building.
F. E. MILLER, Secretary.

MEETING OF THE LAMB COUNTY FAIR ASSOCIATION

At a meeting of the Amherst Chamber of Commerce, Oct. 28, 1929, the Lamb County Fair Association was organized, a non-profit corporation, organized, and duly chartered under the laws of Texas for the purpose of promoting greater interest in the agriculture and live stock industry of our county. A temporary organization was effected at that time.

Monday evening, February 17, 1930, at the call of the temporary chairman, the original stock holders assembled in a very enthusiastic meeting and elected five directors: Church Edgin, C. A. Duffy, C. V. Harmon, J. H. Bradley and R. L. May. These directors elected C. V. Harmon, president; C. A. Duffy, treasurer; R. L. May, secretary; Frank Rogers, assistant secretary for the current year. Other officials and directors representing the other communities of the county will be elected later.

A committee, J. T. Harmon, C. A. Speight and W. R. Cole, was appointed to solicit membership throughout the county.

We certainly request the cooperation of every community and individual in the county in making the fair a success.

Land will be secured and adequate buildings provided and other arrangements made at an early date in order that everything may be in readiness for the fair in the fall, dates to be decided on later.

REDEPOSITS AT FORT WORTH BANKS COME WITH RUSH

FORT WORTH, Feb. 20.—The First National Bank lobby was as well crowded Wednesday with customers putting their money back into the bank as it was on the day previous during a run that ended with a dance and hot dog party.

Assured of the bank's solvency when the Federal Reserve Bank of Dallas poured several million dollars in cash into its vaults, the depositors who made the run went home Tuesday night with the bank still open and the paying tellers on the job.

With business normal, Assistant District Attorney Elbert Hooper Wednesday continued his investigation of rumors which caused the incident. The grand jury also has been charged to investigate. The penalty for circulating a false rumor about a bank's condition in Texas is two years in prison or a fine of \$2,500, or both.

The First National is one of Fort Worth's leading banks, having deposits exceeding \$24,000,000.

Mrs. R. A. Kay of Lubbock visited her brother, C. L. McKinley and family Thursday.

Mr. and Mrs. Ralph Davis spent Sunday in Clovis, New Mexico, as guests of Mr. and Mrs. Sparks.

South Plains Music Festival to Meet

LUBBOCK, Feb. 24.—Friday and Saturday, February 28 and March 1st, 175 music pupils between the ages of eleven and fifteen years will compete in piano contests in the annual South Plains music festival here.

The contests are sponsored by the South Plains Music Teachers Association.

Next week, March 8th, piano contests for pupils sixteen years and over will be held. Almost as many have enrolled for this contest as for the one this week.

On March 15th the youngsters between the ages of five and ten years will compete in piano contests.

The festival will officially close March 22nd after contests for students of voice and violin and piano ensemble have been held.

As the outstanding feature of the contest this year the Music Teachers Association is bringing to South Plains music lovers Mrs. H. D. Carners, member of the American Guild of Organists, who will give a free organ recital at the First Methodist church here on the evening of February 28th.

More interest is being displayed this year than ever before, according to Mrs. Lillian Butler of Slaton, president of the Music Teachers Association, and a greater number of contestants are expected in each of the contests, and more people are expected to hear the contestants as they compete.

Can't Talk to Wife, Too Cross and Nervous

"Even my husband couldn't talk to me. I was so cross and nervous. Vinol has made me a different and happy woman."—Mrs. N. McCall.

Vinol is a compound of iron, phosphates, cod liver peptone, etc. The very FIRST bottle makes you sleep better and have a BIG appetite. Nervous, easily tired people are surprised how QUICK the iron, phosphates, etc., give new life and pep. Vinol tastes delicious.—H. G. Ramby, Druggist.

FARM NOTES

D. A. ADAM, County Agent

The first annual Baby Beef Show for Lamb county will be held in Amherst, March 4, and at this time 4-H club boys from over Lamb county will bring together 28 baby beefs that they have been feeding for the past 150 days on home grown feeds, and some wonderful results have been attained by these boys. The entire populace of the county is invited to see this spectacle. Prizes are being offered to the boys by the Chambers of Commerce, banks, and individuals. The competition will be hot, and the boys will appreciate your attendance. The five best of these calves are to be shown at the Fort Worth Stock Show, and it is hoped to make a fair showing.

Five pruning demonstrations were held under the supervision of the county agent with an attendance of 15 people.

During the month of February 2,000 acres of land were terraced under the supervision of the county agent.

A. Tomes reports that his sweet clover is up and doing fine.

Plan for your dairy pasture now—several acres of sweet clover, one acre of Sudan per cow, and some good winter pasture such as rye, barley or wheat.

Glycerin Mix Removes Cause of Stomach Gas

Simple glycerin, buckthorn bark, saline, etc., as mixed in Adierka, acts on BOTH upper and lower bowel, removing poisons you never thought were there and which caused gas and other stomach troubles. JUST ONE spoonful relieves GAS, sour stomach, sick headache and constipation. Don't take medicine which cleans only PART of bowels, but let Adierka give you a REAL cleaning and see how good you feel! It will surprise you!—H. G. Ramby, Druggist.

One of the strangest things in this world is why Santa Claus gives presents so liberally, but would see you dead before he paid your bills.—Dallas News.

TRENCH MOUTH HEALED.
Your friends dare not say so but your sore gums and foul breath don't make folks like you any better. Let's the Fyrrhea Remedy heal worst cases if used as directed. It is not a mouth wash or paste, and is sold on a money back guarantee.—H. G. Ramby Drug Store.

THE AMERICAN CREED

"I believe in the United States of America and the principles of freedom, justice, equality and humanity upon which it was founded and for which American Patriots have given their lives and fortunes.

"I believe it is my duty towards my country to love it; to support its constitution; to obey its laws; and to defend it against all enemies."

Any erroneous reflection upon the character or reputation of any person, company or corporation which may appear in these columns will be gladly corrected upon its being brought to the attention of the management.

"BOOST OR MOVE"

MOODY INSISTS.

On Tuesday of last week the fourth special session of the Texas legislature adjourned, a disgruntled, grouchy crowd of legislators, many convinced their time during one regular and four extra sessions had been an almost total loss, insofar as real service to the state is concerned. But Mr. Moody, determined something should be done or the loss made greater, at once ordered the body reconvened on Wednesday for the fifth extra session.

Mr. Moody is insistent. Mr. Moody is persistent. Mr. Moody is determined that something be done. And that "something" is the scrapping of Texas' present prison system and the building on its ruins a "modern" penal institution near Austin that would cost the state of Texas around \$12,000,000.

Notwithstanding the opposition to Mr. Moody's pet legislation was pronounced during the regular session, Mr. Moody at once grasped the big stick and proceeded to wield it. Session after session groaned its way to adjournment with Mr. Moody's ambition no nearer realization. These four sessions have already cost Texas \$600,000, and the fifth added, the state faces a bill of three-quarters of a million. All for what? To gratify the Moody ambition—and to h—l with expenses.

But why Mr. Moody's insistence in the face of repeated defeats? Some uncharitable persons might attribute his strenuous persistence to material interest, but we would scorn the insinuation. What

hen remains, save the glory of redeeming Texas from the odium of an out-grown and odious prison system? But Mr. Moody should realize that Texas has several millions of citizens who must each share individually in whatever odium may attach to her because of her penal system, and the infinitesimal particle which in the division would adhere to Mr. Moody's white robes would require a microscopic search.

So we are left to wonder: Why the insistent persistence, or the persistent insistence? Meantime, the legislature stands pat—and Texas pays the bill.

AT LEAST HE'S HONEST ABOUT IT.

The Fort Worth Star-Telegram waxes facetious over the plank in J. M. Ferguson's platform wherein he declares for "liberal issuance of pardons for meritorious prisoners."

But it will take more than sarcastic references to "emptying our prisons through pardons" to shake the foundations of Ferguson's platform. Not all Texans are devoid of fairness—no, not a majority. The common sense and observation of our people inform them that justice is tricky—not only do many guilty escape, but many innocent suffer. Moreover, many guilty of but slight offenses are made to suffer out of all proportion to the offense. It is this class that Ferguson has in mind, and he is right—dead right.

When Bob Taylor of blessed memory was governor of Tennessee his big, kind heart earned for him the sobriquet of the "pardoning governor." A noted evangelist, now dead, scored him from the pulpit. His only resort was that "but for the pardoning power of Almighty God the reverend gentleman would then be blazing in hell." Jim Ferguson might say the same of many of his detractors.

- March will blow in Saturday.
- Business is beginning to perk up.
- Getting around time for the spring tonic.
- The spring poets are now on the job.
- The rumble seat cramps a fat girl's style.
- The best way to find business is to advertise.
- The house fly will soon be seen on the screen.
- Very often an idiot can out-argue a smart man.
- Luck is merely something the other fellow gets.
- And now Babe Ruth threatens to retire. What will we do for our home runs?
- Probably the skirts and the days will be longer in June.
- Don't blame a condition—try to improve it.
- Flattery tastes good when one swallows it.
- The law of the land—the mother-in-law.
- One fault can hide a hundred virtues.

Husband and Wife Both Notice Big Change in Health

Wichita Falls Woman Gains in Strength and Husband Now Feels Fine Since Taking Orgatone. Think It Is a Great Medicine.

"We think Orgatone is a great medicine, for it has helped us both, and saved us years of suffering," said Mrs. A. E. Humphrey wife of a refinery worker living on Rural Route 1, Wichita Falls, Tex. "For about ten years I have suffered from kidney trouble, and always felt tired and worn out, and didn't have any pep and energy. My husband suffered from a severe case of stomach and digestive troubles. He had to be very careful of what he ate, for the least thing would cause bilious and dizzy spells, and gas would form on his stomach until he would suffer for hours. His appetite was poor and he was restless at night and didn't get the proper amount of sleep.

"Orgatone was recommended to us by a friend, and we both began taking it. We began to feel better right from the start. My kidney trouble has disappeared and I'm feeling simply fine. My husband hasn't been bothered with indigestion since. He eats anything he wants now, and doesn't have those gas and bilious spells. We both have received great benefits, and I am glad to give this statement so that others may be benefited."

Genuine Orgatone may be bought in Sudan at H. G. Ramby's Drug Store.

SURVEY SHOWS LESS DRINKING BY STUDENTS UNDER PROHIBITION

WASHINGTON, Feb. 16.—Statistics that there has been less drinking among high school students under the prohibition law than there was prior to their enactment were described Sunday as being reflected in reports of a survey being made at the request of the Law Enforcement Commission.

J. W. Crabtree, secretary of the National Education Association, said that his organization had been asked by the commission to aid it in making contact with sources of information and that early reports that he had seen indicated that there was less drinking by students under the dry laws than there had been before.

Mr. Crabtree said that while he did not feel at liberty to make public the reports, his familiarity with school conditions had led him to anticipate such a result. He added that he expected the findings of the survey to be made public soon.

His organization, Mr. Crabtree said, had been called upon by the commission to furnish the names of high school principals over the country, who in turn were requested for information upon the subject. Thousands of principals already have complied with the request, he added.

Mr. Crabtree, in a speech Saturday night at a dinner given by the Educational Association of the District of Columbia in honor of Miss E. Ruth Pyrtle of Lincoln, head of the national organization, said that in addition to cooperating with the Law Enforcement Commission, the national association was lending its hand to further various other Federal projects.

Among these, he said, was an effort to speed up school construction in accordance with the recent request of President Hoover that building work be accelerated to relieve financial depression.

Do Your Duty Have Money

STOP and think what would happen to your family if you were taken suddenly away from them. You may reason that you have some life insurance and other assets. But . . . what would happen if you became sick? READY MONEY in our bank is the answer.

ORDINANCE NO. 21

An Ordinance Entitled An Ordinance Regulating Gas Piping Appliances, Fixtures and Apparatus in All Buildings and Structures of Gas Consumers in the City of Sudan, Texas, and the Installation, Construction, Reconstruction, Adjustment and Repair Thereof, Provided for Bonds to Be Given by Those Who Do So Work, Providing for Permits and Providing Penalties and Declaring an Emergency.

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF SUDAN, TEXAS:

Section 1. That the City Plumbing Inspector and his assistants be and they are hereby authorized, empowered and directed to supervise all gas piping, appliances, fixtures and apparatus whether now or hereafter existing, placed in or in any manner connected in any building or tent, or structure of any character, whether used for business or residence purposes, in the City of Sudan, and the installation, construction, reconstruction, adjustment and repair thereof and to see that all the rules, and regulations of said City of Sudan with respect thereto are properly complied with and to inspect all such gas piping, appliances, fixtures and apparatus and the installation, construction, reconstruction, adjustment or repair thereof whenever and so often as they deem it desirable or necessary, and to do so in order to prevent fires, accidents or injuries to persons or property, and the said City Plumbing Inspector and his assistants be and they are hereby authorized, empowered and directed to cause all such gas piping, appliances, fixtures and apparatus and the installation, construction, reconstruction, adjustment and repair thereof to be such as not to cause fire or accident or injury to life or property and any and all such gas piping, fixtures and apparatus now existing as well as the installation, construction, reconstruction, adjustment and repair thereof shall be subject to the foregoing inspection and supervision.

And it is further ordained that no gas appliance, fixture or apparatus, either for heating, illuminating or hot water heating, be installed until type of said gas appliance, apparatus or fixture has been approved by the City Plumbing Inspector or his assistant.

Section 2. That the said City Plumbing Inspector and his assistants shall be subject to order and direction of the Mayor and City Commission of the City of Sudan and they are hereby vested with full authority to enter any building or premises or structure, subways, or other places, either public or private, at any time in the discharge of their duties, and to pass upon and decide upon questions arising under the provisions of this ordinance or any ordinance hereafter passed or any rules and regulations already adopted or hereafter adopted by the Mayor and City Commission relative to any such gas piping, appliances, fixtures or apparatus or the installation, construction, reconstruction, adjustment and repair thereof or relative to the materials used therein, whether the same be the original construction and erection or in any alterations or repairs thereof.

Section 3. No person, firm or corporation shall enter upon the installation, construction, reconstruction or repair of such gas piping appliances, fixtures or apparatus or any change thereof, (nor shall any such person, firm or corporation undertake for any other person, firm or corporation, the adjustment thereof) until the said individual, firm or corporation shall have secured a license as hereinafter provided and shall have executed and delivered to the City of Sudan a good and sufficient bond in the sum of Two Thousand Five Hundred (\$2500.00) Dollars having thereon two or more sureties approved by the Mayor and City Commission of the City of Sudan, one of which said sureties shall be a surety company duly authorized to do business in the State of Texas, conditioned for the faithful performance of all such work entered upon or contracted for in strict accordance and compliance with the terms, requirements and provisions of this ordinance and such further and future ordinances of the City of Sudan as may be hereafter passed. Said bond shall be further conditioned that such person, firm or corporation shall without additional cost to the person for whom the work is done, remedy any defect therein due to faulty workmanship or incorrect construction or due to the faulty material furnished or used by such person, firm or corporation, and that such person, firm or corporation shall reconstruct or repair such work to the satisfaction of the City Plumbing Inspector of the City of Sudan at any time within one year after the construction, repair or installation thereof, and after forty-eight (48) hours notice from the City Plumbing Inspector to reconstruct or repair the same. In the case of gas leaks of any nature, upon order of said City Plumbing Inspector or any of his assistants, the gas shall be cut off immediately from the premises forthwith without notice and likewise the said City Plumbing Inspector or any of his assistants may in the interest of public safety order the gas supplied to any customer shut

off immediately without notice. The said bond shall for all the foregoing purposes be in force for one year after any such work in the installation, construction, reconstruction or repair of such gas piping is done and one recovery shall not exhaust said bond but said bond shall be a continuing obligation against the sureties thereon until the entire amount thereof shall have been exhausted. In case the bond therein provided for shall be decreased on account of any recovery which may be obtained or arising out of the violation of any condition of the same, the Mayor and City Commission shall require, upon notice of such fact, an additional bond to be given by such person, firm or corporation in accordance with this ordinance in any amount sufficient when added to the unexpired amount of original bond to be at all times equal to the sum of \$2500.00. The City of Sudan may, for itself or for the use and benefit of any person injured or damaged by reason of failure to repair any defective gas piping or any defective installation, construction, reconstruction or repair thereof or for the failure or refusal by any person, firm or corporation to pay any of the fees required by this ordinance, maintain suit on said bond in any court having jurisdiction thereof or suit may be maintained thereon by any person injured or damaged by reason of any breach of any of the conditions of said bond. The bond herein required shall expire on the first day of January, next following the date of approval of such bond by the Mayor and City Commission and thereafter on the first day of January of a new bond in form and substance as herein required shall be given by such person, firm or corporation to cover all such work as shall be done during the year beginning on such January 1st.

That upon approval of said bond by the Mayor and City Commission the individual, firm or corporation desiring to do such work shall secure from the City Secretary of the City of Sudan a license which shall run until the first day of January next succeeding its issuance unless sooner revoked and shall not be transferable. In the event of the dissolution of any company or partnership holding such license, the member retaining such license shall be required to renew the bond herein provided for before doing any such work provided herein. That the names of each and every member or representative of any firm or corporation obtaining the license shall be given to the Secretary of the City of Sudan and all such names shall be inserted in said license. The person, firm or corporation obtaining such license shall pay to the City Secretary of the City of Sudan the sum of Twenty-five (\$25.00) Dollars as an annual license fee therefor, provided that if said license is issued after January of any year the license fee shall be the proportionate remaining part of such year computed from the first day of the month in which the same is issued.

Section 4. The size of the pipes shall not be less than called for in the following tables:

- For Gas Lighting
3-8 in. pipe, not more than 26 ft. for 3 lights.
1-2 in. pipe, not more than 30 ft. for 4 lights.
3-4 in. pipe, not more than 50 ft. for 20 lights.
1 in. pipe, not more than 70 ft. for 35 lights.
1 1-4 in. pipe, not more than 100 ft. for 60 lights.
1 1-2 in. pipe, not more than 150 ft. for 100 lights.
2 in. pipe, not more than 200 ft. for 200 lights.

For Gas Ranges
1 in. pipe not to exceed 70 ft. to point of opening.

Automatic Water Heaters
No. 3 water heater, 1 in. pipe, not to exceed 70 ft. to point of opening.

No. 4 water heater, 1 1-4 in. pipe, not to exceed 100 feet to point of opening.

No. 6 water heater, 1 1-2 in. pipe, not to exceed 100 ft. to point of opening.

No. 8 water heater, 2 in. pipe, not to exceed 125 ft. to point of opening.

For Instantaneous Water Heaters
1 in. pipe, not to exceed 70 ft. to point of opening.

1 1-4 in. pipe, not to exceed 100 ft. to point of opening.

The following specifications must be strictly adhered to in piping houses:

For 1 fire or opening, 1 1-4 in. pipe from main to point of opening.

For 2 fires or openings, 1 1-4 in. pipe to first opening, and 1 in. to second opening.

For 3 fires or openings, 1 1-4 in. pipe to first opening, 1 in. pipe to second and third and fourth openings.

For 4 fires or openings, 1 1-4 in. pipe to first opening, and 1 in. pipe to second and third and fourth openings.

For 5 fires or openings, 1 1-4 in. pipe to first and second opening, and 1 in. to the third, fourth and fifth opening.

For 6 fires or openings, 1 1-4 in. pipe to first, second and third openings, and 1 in. pipe to the fourth, fifth and sixth openings.

For 7 fires or openings, 1 1-4 in. pipe to first, second, third and fourth openings, and 1 in. to fifth, sixth and seventh openings.

For 8 fires or openings, 1 1-2 in. pipe to first opening, 1 1-4 in.

pipe to the second, third, fourth and fifth openings, and 1 in. pipe to the sixth, seventh and eighth openings.

For hot air furnaces, boilers, etc., using burners having two or three air mixers, 1 1-4 in. pipe.

The same with four or five mixers, 1 1-2 in. pipe; for larger installations, approval of size shall be secured from City Plumbing Inspector.

Air mixers must not be placed in air-tight ash boxes, but where a free flow of air can reach them at all times.

By the term "Opening" as used in this ordinance, is meant the point where the pipe comes through the floor or baseboard to the appliance.

Service pipe from main to building must be 1 1-4 inch inside diameter or larger, no pipe less than 1 inch inside diameter will be permitted on horizontal run.

Vertical pipes or risers in two and three-story buildings must be 1 inch inside diameter or larger, depending on the number of fires or openings.

The use of bushings or plugs is prohibited. Use as few elbows as possible, elbows not absolutely necessary will be condemned. When impossible to get through an obstruction such as a beam offset the pipe rather than use elbows.

For large buildings the plans for piping shall be taken up directly with the City Plumbing Inspector before any pipe is installed. All piping for fixtures with a great number of burners on them will have to be made larger accordingly.

Gas is never supplied from a smaller pipe to a larger one. Pipe must be free from obstructions.

White lead or other joining material should be used sparingly as not to clog the pipe and only the male threads doped.

The riser must be extended to a point within 18 inches of the proposed location of the meter, and to right of same at least 20 inches above floor.

Meter should not be located near furnaces or ovens; locked in compartments or placed in any other position where they will be accessible or liable to injury. Under no circumstances will a fitter or plumber or other person disconnect any meter connect to or disturb piping between main and meter.

When, to accommodate different tenants, one or more meters are desired in a given building, the gas supplying company will set as many meters as there are separate customers but unless for specific reasons and where special permission is granted by the Plumbing Inspector a separate service line must be laid from the property line to each meter.

Unions and valves must not be used in concealed work, but long threads, if necessary, should be used.

Long runs of horizontal pipe shall be firmly supported at short intervals by metal fasteners to prevent sagging.

All branch outlet pipes shall be taken from the sides or tops of running lines, never from below. Bracket pipes shall be run from below when practicable. Drop extensions must be supported with at least three supports, one under pipe at drop, one across between cap and ell or bend and one half-way between drop and main pipe.

All supports are to be 2 x 4 or larger lumber. Two supports must be used for all bracket extensions, one directly under riser ell and one half-way between ell and main supply pipe.

House pipes must be so run and covered as to be readily accessible. No cast iron fittings smaller than 3 inches are to be used.

No individual, firm or corporation shall enter upon the installation, construction or reconstruction of any work provided for herein until a permit has been issued by the Plumbing Inspector covering the installation or addition to be made, and when required by said City Plumbing Inspector plans and specifications for the proposed work must be filed with him before the permit is granted or during the progress of said work; provided, however, the City Plumbing Inspector may issue a general permit to any individual, firm or corporation owning or controlling any building for a term not exceeding three (3) months from the date thereof, authorizing minor alterations or changes, but such permit shall be revocable. No permits will be required for the repair or adjustment of gas piping appliances, fixtures and apparatus.

Section 5. When the plumber or fitter has completed the system of piping and has full drop and bracket extensions and heat-er openings firmly and permanently fastened, he shall test the piping and if found tight, file a written application for tests with the City Plumbing Inspector, and the City Plumbing Inspector or one of his assistants will call and inspect the piping and witness the test, and if the City Plumbing Inspector or such assistant finds the piping tight and sizes and work in accordance with the provisions of this ordinance, the City Plumbing Inspector or such assistant will issue and deliver proper certificate to such effect.

The piping must be tight under a pressure of ten inches of mercury column or fifteen pounds air pressure. This test will be made before the fixtures are hung and appliances connected and before the piping closed in. The use

of gas fitter's cement for re-pairing leaks is strictly prohibited. All gas using appliances shall be connected up solid. No rubber or metal tubing will be permitted.

An additional piping or outlets installed after a certificate is granted must be reported for inspection and tests.

No gas fitter, plumber or other person doing work in any house or structure shall conceal any of said gas piping until certificate of inspection is issued and inspection card attached to said piping.

Running service lines under buildings between curb and meter location is prohibited.

Gas service lines shall not be laid in the same ditch with water or sewer lines.

No riser or elbow will be permitted on any yard service line. Trench must be dug on level with curb stop or main except in case of high terraces. In which case special permission may be granted by Plumbing Inspector to make offset bends.

All yard service pipes must be 1 1/2 inches under surface of ground.

Section 6. If any person, firm or corporation shall fail or refuse to remedy any defects found by the City Plumbing Inspector or his assistants in any work, provided herein, within seventy-two hours after notice to do so, the City Plumbing Inspector shall not issue any further permits to such person, firm or corporation until said defects are remedied; or if it is shown that said person, firm or corporation is incompetent to do such work, then the license of such person, firm or corporation shall be subject to forfeiture by the Mayor and City Commission. The Mayor and City Commission may forfeit the license of any person, firm or corporation for violation of any of the provisions of this ordinance or such future ordinance of the City of Sudan as may hereafter be passed; provided, that the forfeiture of any such license shall not in manner affect the liability of the principal or sureties on the bond of any person, firm or corporation for any work herein provided for previously done by any such person, firm or corporation; also, provided that in the event that the license of any person, firm or corporation issued under the terms of this ordinance is forfeited for any violation of this ordinance or other ordinances of the City of Sudan, pertaining thereto, said person, firm or corporation shall not be granted another license for the period of one year after the date of the cancellation of previous license.

Section 7. Any and all gas piping, fixtures and apparatus or material, which may at any time become defective and in the opinion of the City Plumbing Inspector or his assistants likely to cause leaks, fires or accidents or to endanger persons or property, shall be condemned by the said City Plumbing Inspector or his assistants and when, in his opinion, it is deemed necessary in order to prevent such accident or danger, said City Plumbing Inspector, or his assistants, is hereby authorized to disconnect such gas piping, appliances, fixtures and apparatus or to cause the service of gas to such consumers to be discontinued until the person or persons owning or using such gas piping, appliances, fixtures, apparatus or material shall have been in any manner disconnected and rendered inoperative by the City Plumbing Inspector or the service discontinued, as set forth in the foregoing provisions, it shall be unlawful for any person or persons to in any manner reconnect the same or cause the same to be reconnected to any supply of gas or to use the same as a part of any gas piping system until they have been put in safe condition and a certificate of acceptance has been issued by the City Plumbing Inspector.

Section 8. In every gas installation all piping and attachments must be of at least such capacity as will supply gas up to the full maximum requirements of all appliances contemplated to be connected thereon according to the requirements of this ordinance.

No gas piping, appliances, fixtures or apparatus, or the installation, construction, reconstruction or repair thereof, for which a permit is issued shall be put to use or connected to any supply of gas until inspected and accepted by the City Plumbing Inspector.

All applications for inspections will be held at least twenty-four hours after the same are filed. It is required that said individual, firm or corporation or his or its representatives shall personally inspect every installation before a card for inspection is filed and that all work for which the inspection is asked shall be complete.

Application for reinspection must be made out on new cards the same as the original application, stating whether the first, second or third inspection. Telephone or verbal request will not be considered.

When any gas piping, appliances, fixtures or apparatus is found to have been installed without a proper permit or not in accordance with the provisions of this ordinance, the City Plumbing Inspector, or his assistants is hereby authorized and empowered to

prevent any supply of gas thereto or to the consumer until such permit has been secured from the said City Plumbing Inspector and such work inspected, and approved.

Application for inspection shall be filed with the said City Plumbing Inspector and recorded in a book kept in the office for that purpose. A fee of One Dollar and Fifty Cents (\$1.50) shall be charged for the first inspection and one (\$1.00) Dollar each for the second and third inspections on condemned installations.

Before any such gas piping, appliances, fixtures or apparatus constructed or furnished under permits hereafter granted shall be approved, or any certificate of acceptance of the same be granted, the said work must be complete, and in compliance with the provisions of this ordinance.

Plumbers and gas fitters shall consult gas company for the location of meter before starting job. The plumbers or gas fitters shall be held responsible for any changes in meter risers installed in locations not authorized by gas company.

Section 9. Any gas installation not especially covered by this ordinance must be approved by the City Plumbing Inspector.

Section 10. All powers conferred by this ordinance upon the City Plumbing Inspector are hereby likewise conferred upon his assistants and such assistants and each of them may likewise exercise all such powers.

Section 11. That any person, firm or corporation who shall violate any of the provisions of this ordinance, or who shall fail to comply with the requirements of this ordinance, shall be fined in any sum not exceeding from one to one hundred (\$1.00 to \$100.00) Dollars, and each and every day's continuance of any violation of the provisions of this ordinance shall constitute and be deemed a separate offense. That in case of any such violation of the terms

SUDAN TEXAS

ORDINANCE NO. 20.

An Ordinance Fixing and Regulating the Use of Sewers by Private Individuals and Corporations in the City of Sudan, Texas.

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF SUDAN, TEXAS:

Section 1. The sanitary sewer system of the City of Sudan consists of main and lateral conduits of salt-glazed, vitrified earthenware with necessary accessories. They are designed to carry off all liquid house wastes, and are known herein as sanitary sewers. The sewers in the streets or alleys passing in front and rear of various lots are called main or lateral sewers. The sewers leading from the main or lateral sewers to the property are herein called house sewers.

Section 2. All connections of house sewers, drains or plumbing work with the sewer system of the City of Sudan shall be made in accordance with the rules and regulations herein contained.

Section 3. No person, firm or corporation shall lay, alter or repair any house drain, sewer or plumbing work, or make any connections with any sewer or drain belonging to the sanitary sewer system, or do any kind of work connected with the laying of house drain, or house sewers, or plumbing, or make any repairs, additions to, or alterations of an drain, sewer or plumbing connected or designed to be connected with the sanitary sewer system, unless regularly licensed by the City of Sudan as herein provided.

Section 4. Any person desiring to do business as a plumber in connection with the sanitary sewer system, shall file in the office of the City Clerk, a petition giving the name of the individual or firm, and place of business, and asking to be licensed as a plumber. Said petition must be signed by two responsible citizens of the City of Sudan vouching for the business capacity and reputation of the applicant, and said petition shall state that the applicant will abide by all the rules and regulations which may be adopted by the City of Sudan. Each applicant for a license shall execute and deposit with the City Clerk with his application a bond with a responsible, reliable and solvent surety company, to be approved by the City Commission, in the sum of \$2,500.00, conditioned that he will indemnify and save harmless the City of Sudan from all accidents and damages caused by any negligence in protecting his work or inadequate work done by virtue of his license, and that he will also place and restore sidewalks, pavement or street surface, or any alley surface, over any opening he may have made to a good state and condition as he found it, and keep and maintain the same in good order to the satisfaction of the City for the period of six months thereafter and that he will pay all fines imposed upon him for a violation of these rules and regulations. On receiving his license he shall have recorded in the office of the City Clerk his actual place of business, and shall immediately notify the City Clerk of any change of location, and shall also furnish to the City Clerk with the name under which his business is transacted. No license shall be granted for more than one year, and all licenses shall be granted to expire November 1st of each year. Before any license is issued the applicant shall pay to the City Clerk a fee of \$10.00. The City shall have the right at any time for or cause to be determined by the City to demand a new bond of applicant, and failure to produce and file such new bond to be approved by the City within ten days from date of demand, shall cause his license to be revoked.

Section 5. Applicants for permits to connect with the sewer system or to do plumbing work in connection therewith must be made by the owner of the property to be drained or his authorized agent or plumber in charge of the work. Such application shall give the precise location of the property, the name of the owner and the name of the person employed to do the work. No permit shall be deemed to authorize anything not stated in the application, and for any misrepresentation in such application the plumber shall be suspended; and if such misrepresentation appears to be willful his license shall be revoked. Permits to make connections with the sewer system will be issued only when the plumbing in the house or building to be connected is in accordance with the rules for plumbing hereinafter prescribed, and has been inspected and approved by the City Sewer and Plumbing Inspector, or in case of new buildings when a proper plan for the plumbing has been approved by the City Inspector of the sewer system. Plans for every work shall be prepared and furnished to the inspector as well as plans of the new work to be placed. All connections made with the sanitary sewers or drains and all plumbing connections therewith, shall be made under the direction of the Sewer and Plumbing Inspector.

Section 6. Before a permit will be issued for doing plumbing work in a building or in any closet not connected with a building, or before any additions are made, excepting necessary repairs, a description of the work to be done, and of the old work already installed, signed by a licensed plumber shall be filed in the office of the City Clerk and no such work shall be commenced until such plans have been approved by the City Inspector. Every plan shall contain a full and clear description of the plumbing work, showing the position, size and kind and weight of all pipes, and the position and kinds of traps, closets and other fixtures. All work done under such plans shall be subject to the inspection and approval of the Inspector, and no alteration shall be made in any plans or in the work without a special permit from the Inspector.

Section 7. The plumber shall, on the completion of the work, file in the office of the City Clerk, a correct statement of the work done under the permit.

Section 8. No open gutter, cesspool or privy vaults shall be connected with any sewer drain.

Section 9. No person, firm or corporation shall injure, break or remove any portion of the manhole, lamb pole flush tank, catch basin or part of the sewer system, or throw, deposit, or cause to be thrown or deposited in any sewer system, opening or receptacle connected with the sewer system, any garbage, offal, ashes, animal, vegetable parings, cinders, rags, or any other matter or thing whatsoever, except faeces, urine, the necessary water closet paper, liquid house and mill slops.

Water and Gas Pipe.

Section 10. Any person or corporation desiring to lay pipes for water, gas, steam, or for any purpose, in any street or alley upon which sewers are laid, shall give at least twenty-four hours' notice to the City Inspector before opening the streets, and the manner of excavating for laying and backfilling over such pipes shall be subject to approval of the Inspector. All such work shall be planned and executed so that no injury shall occur to any sewer drain or to any house sewer or drain connected therewith. Glauber or Mueller Corporation corks or other of like grade are to be used in the water main, and stopcocks shall be used at the curb. All water pipes shall be about 18 inches under the ground, and in the streets the pipes shall not be less than 3-4 inches in diameter. These pipes, when laid, shall not be covered until they have been inspected and approved by the Inspector.

Obstructions.

Section 11. The City Inspector of Sewer System shall have the power to stop and prevent from discharging into the sewer system any private sewer or drain through which substances are discharged which are liable to injure the sewers, or obstruct the flow of the sewage.

Drains.

Section 12. Before any old private drain shall be connected with the sewer system, the owner of the private drain shall provide to the satisfaction of the Inspector that it is clean and conform to the rules and regulations in very respect.

Trenching.

Section 13. The house sewer trench shall be dug so as to meet the (Y) branch as located by the City Inspector. The materials thrown from the trench shall be placed so as not to obstruct and so as not to cause the least inconvenience to the public. Proper barriers and lights must be maintained on the banks of the trench during the night to guard against accidents during the progress of the work. In trenching, the earth shall be carefully rammed or tamped so as to keep the pipe in proper position and avoid settling and no stone shall be used in filling until there has been a depth of one foot of fine earth or gravel placed over the pipe, after which fill the trench up to the grade of the street or alley.

Materials for Sewer Drains.

Section 14. The house sewer from a point five feet outside the house to the street or alley line shall be of first quality glazed sewer pipe (standard) and 4 inches in diameter on the inside. On all 12 inch, 10 inch, and 8 inch sewer lines the pipe shall be 6 inch vitrified pipe from the (Y) branch to the street or alley line. The earthenware pipe must not be laid less than one foot deep at the starting point from the house drain which is five feet from the building.

Section 15. The cover of the (Y) branch on the sewer shall be carefully removed, so as not to injure the socket. The first length of pipe attached to the (Y) branch shall be curved and set so as to give a good fall into the sewer. The pipe shall be laid on an even grade of not less than one-fourth of an inch to the foot, unless by special permission of the Inspector, in which case provisions must be for regular and efficient flushing. Curved pipe shall be used for every connection from a straight line of more than six inches in two feet. The joints of earthenware pipe shall be made with best quality of Portland cement, mixed equal parts of good clean sand, and a swab of proper size shall be passed through the entire length of the pipe cemented; the joints of the cast iron pipe shall be of oakum and lead. The ends of all private sewers not immediately connected with the plumbing fixtures shall be securely closed by water tight, imperishable materials. If lead pipe the end must be soldered; if cast

iron pipe, a cast plug must be caulked in with lead. Cellars shall be drained when possible by means of suitable, properly laid earthenware pipes. They shall not communicate directly with any drain pipe carrying foul sewerage, or with a sewer or cesspool, unless properly trapped to prevent back-gasses. The house drains must be properly supported in the most substantial manner, the use of pipe hooks for supporting drainage pipes is prohibited.

No steam exhaust, boiler blow-off or drip pipe shall be connected with the house drain or sewer. Such pipes must first discharge into proper condensing tank, and from this a proper outlet to the house sewer outside of the building must be provided.

Plumbing Rules.

Section 16. All materials used must be of good quality and free from defects; the work must be executed in a thorough and workmanlike manner. From a point five feet outside the foundation wall of a building no material shall be used within the building and connected with the sewer for soil, or waste pipes, other than cast iron pipes with securely leaded joints or lead pipes with wiped joints or nickel plated brass pipes. Cement or putty joints, tin or sheet iron pipes, whether galvanized or not, shall not be used. Galvanized wrought iron may be used for vents. No soil or waste pipe shall have a fall of less than one inch in ten feet. Full size (Y) branch fittings for hand hole, clean outs, must be provided where required on house drain and its branches. Sleeves are prohibited.

Section 17. All cast iron pipes must be sound, free from holes or cracks, and of the grade known in commerce as standard, coated with tar or asphaltum. All fittings used in connections with such pipes shall correspond with it in weight and quality, where lead pipe is used to connect fixtures with vertical soil or waste pipes, or to connect traps with vertical vent pipes it must not be lighter than extra light pipe.

The arrangement of soil and waste pipes must be as direct as possible. The drain, soil and waste traps should if practicable be exposed at all times for ready inspection, and for convenience in repairing. When necessarily placed within partitions or in recesses of wall, soil and waste pipes should be covered with woodwork so fastened with screws as to be readily removed. All connections to horizontal pipes to be made with (S) and one-eighth bends.

Main Soil and Waste Pipes.

Section 18. A main waste pipe into which sinks, bath tubs or kitchen waste discharge must be at least two inches in diameter. Wrought iron pipe shall not be used as waste pipe for any fixture. The main vent pipe from the sewer connection to the house top must be cast iron at least four inches in diameter and not reduced at any point. No traps or any manner of obstruction to the free flow of air through the whole course of the main house sewer or soil pipe will be untrapped main house sewer and soil allowed. This may be secured by a pipe or if a trap is placed in the main soil pipe a ventilating cast iron pipe leading to the roof from the lower side of the trap and a fresh air inlet connected with the foot of the main soil pipe just above the trap, the fresh air inlet to be a four-inch cast iron pipe, connected to a running trap and extending up on the outside of wall of building, to a point above any window or door opening, and to finish at top with a ventilating cap. The running trap to be provided with a hand hole with a screw for cleaning. All four-inch stacks are to be provided with a cleanout at base of stack with a screw cap over hand hole.

Every vertical soil and waste pipe must be extended at least two feet above roofing or coping it must be undiminished in size, without return bend, and with wire basket end if necessary. It must not open near a window nor an air shaft which ventilates living rooms. Soil, waste and vent pipes in an extension must be extended above the roof of the main building, when they would open within twenty feet of the windows of main house of the adjoining house.

When a stack or vent extended through or above a roof is within a distance of twenty feet from an opening above said stack or pipe, the said stack or pipe must be extended at least two feet above the top of opening.

Flat roof vents must be extended at least six inches above the roof. No caps, cowls or bends shall be affixed to the top of any stack or vent, but wire baskets may be used. Bent pipes must run as direct as possible, and 45 degrees (45) or eight bends to be used at all times when practicable.

Joints.

Section 19. All joints in iron drain pipes, soil pipes and waste pipes, except where screws and nuts are used, must be so filled with oakum and lead and hand caulked so as to make them gas tight. All connections of lead pipes with iron pipes must be made with brass or lead ferrules of the same size of the lead pipe put in the hub of the branch of the iron pipe, caulked with lead. The pipe must be attached to the ferrule by a wiped joint. Wrought iron and lead pipes must be connected by means of a brass soldering

nipple, wiped to the lead pipes. Soldering unions are prohibited. No gasket unions shall be allowed in any vent pipes. All connections of lead waste and vent pipes shall be made by means of wiped joints, except vent tail pieces, screws and connections to house side of the trap.

Inspection.

Section 20. The City Inspector representing the City Commissioners shall be given notice when any work is ready for his inspection, and all work must be left uncovered and convenient for examination until inspected and approved. Such notice shall be given in advance and the inspection shall be made within 24 hours after the notification or as soon after as practicable.

The plumber doing the work shall in the presence and under the direction of the Inspector apply either the ether, peppermint, water or smoke test and the plumber shall remove or repair any defective material or work when so ordered by the Inspector.

Section 21. During progress of the work the Inspector shall make as many inspections as he might see proper and expedient, and defective pipes and fixtures when discovered must be removed and replaced by sound ones, and all defective joints made tight, and every part of the work made to conform to this ordinance and good sanitary plumbing subject to the approval of the Inspector.

Section 22. In cases where plumbing work has been completed in a building before these rules and regulations come into force if the plumbing has been done in accordance with these rules and regulations, permits will be granted after proper inspection, and above provided, to make connections with the sewer as in new work. In case the plumbing is not in accordance with terms and conditions of this ordinance, the Inspector shall prescribe the necessary alterations to make same conform as near as may be to the rules and regulations herein, so as to make the plumbing safe to the persons residing in the house. In all cases the vent pipe shall pass through and above the roof, and be at least four inches in diameter. All fixtures and traps are to be ventilated and traps clean and waste and soil pipes to have sufficient fall, all soil pipes to have the necessary cleanouts or the line of the purpose of cleaning out.

Section 23. No person shall make connection with any sewer main in the city without permission from the City Authorities, or without the inspection of the work by the Inspector, and for each and every connection with one of the City sewer mains a fee shall be paid to the City monthly in advance as follows:

For each private residence occupied by owner and family or by tenant and his family.....\$1.00

For each business house factory or establishment, except as hereinafter provided, employing five persons or less.....\$1.00

For each business house, factory or establishment, except as hereinafter provided, employing more than five persons and less than twenty persons.....\$2.00

For each business house, factory or establishment, except as hereinafter provided, employing more than twenty persons.....\$3.00

For each rooming house, hotel or boarding house having less than ten rooms.....\$2.00

For each rooming house, hotel or boarding house having ten rooms or more.....\$3.00

For each office building having more than ten rooms of offices.....\$3.00

For each laundry.....\$3.00

For each restaurant or cafe, whether connected with a rooming house or not.....\$2.00

Ord. 20-Galley 5.....\$2.00

For each opera house, lodge room, public hall, or show building of any kind.....\$1.00

For each barber shop with one chair, \$1.00, and 50 cents for each additional chair.....25c

For each bath tub.....\$3.00

For each wash rack.....\$2.00

For each church and church property, no charge.

For each school building while being used.....\$3.00

And for inspection made by the City Inspector a fee of \$1.00 for the first inspection and each subsequent additional inspection. If a seventy-five cents (75c) shall be paid to the Inspector by the plumber doing the work.

Section 24. Every water closet, sink, urinary, wash tray, bath tub, or every tub or set of fixture, must be separately and effectually trapped. Traps for water closets must not be less than three and one-quarter inches in diameter. Slop sinks not less than 1 1/2 inches. Traps for kitchen sinks and urinals shall not be less than one and one-half inches in diameter; wash basins one and one-fourth inches in diameter. And traps from any other fixture, must not be less than one and one-half inches in diameter. All traps must have a water seal of at least one and one-half inches. Fixtures shall be placed as near the traps as practicable, not over two feet. In no case shall water from bath tub or other fixtures be

connected with water closet trap. All sinks in packing houses, butcher shops, lard rendering establishments, hotels, restaurants, boarding houses and laundries shall be provided with a suitable and approved grease trap, of sufficient size for the use for which it is intended, governed by the size and nature of the building, and in no case less than ten inches in diameter and twelve inches in height.

Wash rooms for carriages or automobiles must be provided with proper means for intercepting mud. Waste from bath tubs shall be connected to a lead or brass drum trap with a trap screw not less than three inches in diameter.

Vent Pipes.

Section 25. Traps must be protected from siphonage. The waste pipe leading from them ventilated by a special air pipe taken out of the crown or trap or other part of waste pipe as the Inspector may direct, in no case less than two inches in diameter for water closet traps, and one and one-quarter inches for other traps. The vertical vent pipe for traps of water closets in buildings more than four stories in height must be at least four inches in diameter with two inch branches to each trap, and for traps of other fixtures not less than two inches in diameter. Where three or more water closets are arranged in one on one floor a circuit vent may be used as a substitute for individual trap vents, by which the siphonage or back pressure on the soil of the traps is prevented by extending the branch soil or waste pipe and connecting them with a main or an auxiliary vent stack. Vent pipes must extend two feet above the roof or coping, or soil pipe not less than twelve inches above the top of the highest fixture on the line. They may be combined by branching together, those which serve several traps. These air pipes must always have continuous slope to avoid collecting water by concentration. No trap vent shall be used as a waste or soil pipe. No brick, sheet metal, earthenware or chimney flue shall be used as a sewer ventilator, nor to ventilate and trap drain, soil or waste pipe. Fixtures can be vented into flues that are used for air vents in brick walls, but the vent pipe must be of galvanized iron and to be carried up to the inside of vent flues or brick work. Wet vents will not be permitted.

Refrigerators.

Section 26. Soda fountains, refrigerators, and like concerns must connect with the sewer system as now provided by law, without the use of an open trap, but the connection shall be made with a trap of such size, and under conditions as shall be prescribed by the Inspector.

Overflow from Fixtures.

Section 27. Overflows from fixtures must in each case be connected with the inlet side of the trap.

Water Closets.

Section 28. Water closets must be of an approved pattern and perfectly sanitary (pan and long hopper closets are absolutely prohibited within any building), closets to be supplied from special tank placed over them, in which case the waste or overflow from the tank must discharge into the open air of the basin of the closet and not into the soil pipe directly. Direct service of a water closet is prohibited. Every water closet in a living compartment or bathroom in both rooms hereafter erected, shall be ventilated by a window opening to admit a free circulation of pure air. Closets more than ten feet from main soil pipe to have separate two inch bank vent. No rubber couplings to be used for vents in any case.

Strainers.

Section 29. Exit pipes to all fixtures except water closets shall be furnished with suitable permanently attached strainers.

Section 30. No person shall place or suffer to be placed any bulky substance in any sewer opening, or in the house connections or private drain connections, with any public main or lateral sewer, or of any substance having a tendency to obstruct the free flow of said sewer or to damage them in any way.

Section 31. All sewers to the streets and alleys must have at least one four inch stack or soil pipe to extend to a point two feet above the roof.

Closets for Out Houses.

Section 32. For closets other than those in buildings, and where they are placed in out houses the Vogel Frost Proof Closets can be installed or other frost proof closets that may be approved by the City authorities. These closets are not to be flushed from the mains, but are to be provided with tanks for flushing purposes. All are to be installed in the best workmanlike manner and left in a sanitary condition and the installation is covered in every particular by the same ordinance governing other installations of like nature.

Section 33. All disagreements between the plumber and the City Inspector as to the construction, or application of any clause of section of this ordinance is to be referred to the City Commissioner, at its regular meeting and the decision of the City Commissioner, shall be final, provided that nothing in this section shall be construed to bar or interfere with the prosecution and conviction of the

plumber or any other person violating any section of this ordinance.

Section 34. It shall be unlawful for any person to make or have made any connection with the sewer system of the City of Sudan that will permit any surface or main water from the ground or from the roofs of houses, or the overflow of cisterns or cess pool to enter said sewers, either directly or indirectly; provided, however, that the drainage of cellar may be connected with said sewer system when made in accordance with the regulations, plan and specifications of the Inspector, and under his direct supervision.

Section 35. It shall be unlawful for any person, firm or corporation to injure, break or remove any portion of a manhole, lamp hole, flush tank or any part of the sewer system; or throw or deposit in any sewer opening or receptacle or connection with the sewer system, ashes, cinders, rags, or any other matter or thing whatsoever except faeces and liquid house waste.

Section 36. The use of any paper or substance other than toilet paper that is suitable for passing through the sanitary sewers is hereby prohibited.

Section 37. It shall be the duty of the Inspector of Plumbing when granting permits for connection to the sewer system to issue with said permit a copy of these rules and regulations in printed form, and it shall be the duty of the plumber making said connection to deliver said rules and regulations to the party having the work done for his guidance and instruction in the use of the sewers and maintenance of public health.

Section 38. Every person who shall omit or refuse to comply with, or who willfully violates any section of this ordinance shall be deemed guilty of a misdemeanor, and upon conviction be fined no more than one hundred dollar for each offense.

Section 39. Any plumber licensed under and by virtue of this ordinance who shall violate any of the rules and regulations contained in said ordinance shall be deemed guilty of a misdemeanor, and upon conviction shall be fined in any sum not less than five nor more than one hundred dollars. In addition to a criminal prosecution for a violation of said rules and regulations, the City Commissioners may hear evidence of such violations of said rules and regulations and if the said City Commissioners are satisfied that any plumber is guilty of violation of the same the said City Commission may by a majority vote revoke the license of any person thus offending.

Section 40. Any plumber working or attempting to work upon said sewer system of the City of Sudan after his license has been revoked, shall be deemed guilty of a misdemeanor and upon conviction shall be fined in any sum not less than five nor more than one hundred dollars.

Section 41. Any person who shall work or attempt to work upon any sewer system of the City of Sudan or make any connections therewith before he shall have first obtained a permit to do said work as prescribed in the rules and regulations governing the use of said sewer system (unless such person is in the employ of some other person or firm having such license), shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be fined in any sum not less than five dollars nor more than one hundred dollars.

Section 42. That this ordinance take effect and be in force from and after the day of its passage and legal publication in The Sudan News.

Section 43. It is further required, that before the City Clerk will issue license to any applicant, he must first present to said City Clerk a certificate showing he has

passed the examination of some Plumbing Examining Board in the State of Texas.

Section 44. There being no ordinance in effect adequate to cover the sewerage, cesspool or septic tank creates an emergency it being understood that Sudan does not now have a sewerage system, this ordinance applies to cesspools, septic tanks and disposal, and is imperative necessity requiring all ordinances to be read on three several meetings is hereby suspended, and that this ordinance take effect immediately after its passage and publication, and it is so ordered.

Adopted and approved this 10th day of February, 1930.

I. G. MORROW, Mayor.

F. Z. PAYNE, Clerk.

AMENDMENT TO ORDINANCE NO. 10.

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF SUDAN, TEXAS: Amending to an Ordinance Granting a Franchise and Certain Privileges to the WEST TEXAS GAS COMPANY (a corporation, with its principal office in the city of Amarillo, Potter County, Texas), and Establishing Rules and Regulations for the Use of Natural Gas for Light, Heat, and Power, and Establishing a Maximum Limit for Price to be Charged for such Gas.

WHEREAS, The West Texas Gas Company (a corporation) has been granted the right to lay, maintain and operate a gas plant in the City of Sudan, Texas, and

WHEREAS, It is now desired to change the commencement date of the franchise and the life of said franchise.

NOW, THEREFORE, Section No. 1 of the franchise ordinance is hereby amended to read as follows:

Section 1. The right to furnish, distribute and sell natural gas for light, heat and power, for all such other purposes for which gas may be used within the City of Sudan, Texas for a period of Thirty (30) years is hereby granted to the West Texas Gas Company (a corporation), its successors and assigns, hereinafter called the grantee, subject, however, to the provisions hereinafter incorporated in this ordinance and for such additional period or addition of time as may at the expiration of the said term of years, and upon conditions then found to be satisfactory to the officials of the City of Sudan, and to this grantee, and provided that this ordinance and franchise is to be in effect and begin to run as specified in amended Section 13 of the franchise ordinance.

NOW, THEREFORE, Section 13 is hereby amended to read as follows:

Section 13. This ordinance shall take effect and be in force from and after the 11th day of February, 1930.

Passed and approved this 11th day of February, A. D. 1930.

I. G. MORROW, Mayor, City of Sudan, Texas.

Attest: F. Z. Payne, City Secretary, City of Sudan, Texas.

STATE OF TEXAS, COUNTY OF LAMB, CITY OF SUDAN--ss.

We, the undersigned Mayor and City Secretary of Sudan, in Lamb County, Texas, do hereby certify that the within and foregoing is a true and correct copy of the Amendment to Section No. 1 and Section No. 13 to an ordinance and franchise approved and passed granting to the West Texas Gas Company the right and privilege to use the streets and alleys and other public grounds of the City of Sudan for the purpose of laying and maintaining gas lines for the purpose of distribution of natural gas to the City of Sudan and the inhabitants thereof, and that such amendment was duly read, approved and passed as required by the City Charter of said City and duly signed by the undersigned Mayor and attested by the undersigned City Secretary this 11th day of February, 1930.

I. G. MORROW, Mayor, City of Sudan, Texas.

Attest: F. Z. Payne, City Secretary, City of Sudan, Texas.

SOMETHING NEW IN COTTON PLANTING!

Sudan Mercantile Company Announces Display of Avery "Hill-Drop" Planters—a Startling Improvement.

Cotton farmers this past season have been trying out a new development in cotton planting which promises substantial savings in labor and seed. Chopping cotton has always been an expensive operation. Now it can be eliminated from 50 to 100 per cent, according to farmers who have used the new method. Savings in seed also run from 50 to 75 per cent, a very worthwhile saving, with improved cotton seed costing as much as \$3 a bushel. Even if crop seed is used for replanting, less is needed and greater profits made at the mill. These savings alone would justify "Hill-Drop" planting. But farmers also report getting better stands and yields, in most cases. No matter what cotton brings, the "Hill-Drop" farmer is due for greater profits on his crop, because he cuts his cost of production.

The "Hill-Drop" feature as perfected by Avery of Louisville is now incorporated in seven of their planters. This feature enables the farmer to plant as many seeds as desired in hills only, spaced as far apart as conditions require. The planting mechanism is a clever device which operates automatically for single or double row planting. Seed is seldom scattered between hills, hence most chopping is eliminated. When you consider that one man can chop only an acre of cotton a day, on an average, it is evident that labor costs are considerably reduced. That's over three months' work eliminated on a plantation of 80 to 100 acres!

If the lowest estimate of savings in seed is taken—50 per cent—that will amount to 50 bushels per 10 acres. Avery of Louisville has letters and telegrams from cotton farmers stating that savings in seed and chopping have run much higher. All of the farmers using the new Avery "Hill-Drop" planters this past season are enthusiastic—seldom has a new development been received with such universal approval as this "Hill-Drop" feature. It has proved itself in the field, so there can be no question but that cotton farmers can now make bigger cotton profits even without bigger cotton crops. We are watching this development with great interest and will continue to have further information to report after the present season.

Sedalia Man Finds Health in New Konjola

Stomach and Kidney Ills of Long Standing No Problem For New Medicine.

MR. I. H. GIBSON

"I eat, sleep and feel like a different man since taking this great medicine, Konjola," said Mr. I. H. Gibson, 206 South Ohio street, Sedalia. "I suffered for years with stomach and kidney trouble. No thing I ate agreed with me and I bloated terribly after every meal. This gas pressure made me short of breath and nauseated. My kidneys were weak and bladder actions were frequent. Splitting headaches often lasted for days."

"My kidneys were first to respond to the action of Konjola. My bladder now functions properly and I suffer no back pains and headaches. I have not enjoyed my meals in years as I do today. I never bloat after meals and my appetite is excellent. My entire system has been aided by this great medicine and I am in excellent health for the first time in many years. I enthusiastically recommend Konjola to all men and women who suffer as I did."

Konjola is sold in Sudan at H. G. Ramby Drug Store, and by all the best druggists in all towns throughout this entire section.—Adv.

DOWNY LITTLE THINGS... not long out of their shells... how much they must depend on you for the things they need to live and get big. They need a feed filled with nourishment. A feed which will build bones quickly... building muscles strong... change fuzz to feathers in a hurry... all this they demand... and yet their little crops can handle only one tiny thimbleful of feed a day! What a job for feed!

Consider Purina Chick Startena (mash) for this job! In every thimbleful are twelve ingredients! Cod-liver oil... dried buttermilk... alfalfa flour... granulated meat... these and eight others are there... each one with a real job to do. Purina Startena is mixed over and over again... 960 times just to be thorough! And you will find the same care taken with Baby Chick Chow (scratch)... to be fed with Startena.

Your chicks... what they do for themselves... what they do for you... is entirely in your hands. They eat so little... yet it counts so much... that you can afford to do only one thing... feed Purina Chick Startena!

Bring Up Your Chicks In The Way They Should Go

Chicks, Like Children, Require Careful Training if They Are to Grow Up Into Strong, Useful Members of Their Community. A Little Extra Attention During the Early Stages of Development Will Be Rewarded With Extra Profits Later.

Chicks are a good bit like children in a great many ways. With proper training, both will develop into valuable members of their respective branches of society. Much has already been said in this series of articles on the subject of environment. I have stressed the need for clean, comfortable quarters, sanitation and other phases of that subject. Heretofore, however, I have had no opportunity to mention one very important matter which is the training of young chicks in what a friend of mine has humorously called barn-yard etiquette.

I begin training my chicks the moment I transfer them to the brooder room. As soon as possible I begin scattering their grain ration in litter so they will have to scratch for it thus giving healthful exercise. I also watch them carefully and guide them into the heated area of the hover whenever they need such direction. Whenever I find chicks huddled together, I place them under the hover. It may be necessary to do this quite often during the first week.

Crowding is another danger that can be greatly lessened by early training. I prevent huddling in corners by placing chick wire or boards diagonally across them. They must be watched carefully, however, for if they cannot crowd into the corners they will often pile together in football scrimmage style right in the middle of the floor. Watch your chicks at all times, but especially at evening and gently force them apart if they show any tendency toward crowding. There will always be need for watchfulness in this respect until they are actually roosting.

Crowding is only one of many bad habits chicks will develop if not watched carefully or if not given proper feed, exercise and space. All these habits may be overcome if proper action is taken the moment they show up.

One very serious habit, Toe Picking or Cannibalism, usually results from lack of protein in the feed or sufficient exercising room. If they have plenty of room to scratch and exercise naturally, there is less danger. If too closely confined they will seek other forms of activity one of which is picking at one another's toes. Sometimes a chick's toes will be injured and the sight of blood attracts others. Once they taste blood, the picking may become general, causing serious injury and even death to considerable numbers.

Whenever this habit is noticed, take steps to enlarge the quarters or divide the chicks into smaller groups so they have more room. It is also a good idea to add meat scraps to their mash or milk to drink. You will also probably find that there are one or two ring-leaders causing most of the trouble and teaching the others bad habits. If so, take them out of the pen and keep them out until the injured toes have healed. Paint the injuries with tar, which has a disagreeable taste and discourages toe picking.

Feather eating or pulling is another habit that often leads to chicks literally pulling all the young feathers from each other and eating them, or to eating one another up, starting usually at the tail. It is due to much the same causes as toe picking and should be overcome in the same way. Remove the injured chicks and apply tar as for toe picking. Do not put them back until they are thoroughly healed.

One very important phase of a chick's early training is teaching them to roost. This can be quite easily done if started before the chicks are too old. By putting them on the roost a time or two at night, they will take to the roosts nicely.

Build temporary roosts 12 to 18 inches from the floor, with an inclined runway to the first roost, all the roosts being on the same level, the same as for other roosts. Build it so that the chicks cannot drop between the roosts and the walls, and cover the under side of it with 1-inch netting. This prevents the chicks dropping from the roosts to the floor and also keeps them out of the droppings. The chicks will in all probability take to these roosts naturally and quickly without crowding, but they should be watched for a few nights to prevent crowding. These roosts should be from 2 to 3 inches wide, which will help prevent crooked breast bones in both chicks and poult.

The Price of Every Article Is Plainly Marked— at the 'M' SYSTEM STORE

We cater only to those good, progressive and thrifty people who deem it a privilege to personally select their groceries, pay cash and save the rest.

Specials for Saturday

Matches	CRESCENT—Per Carton	19c

TO PREVENT SOIL BLOWING.

Several wheat farmers have reported that the winds of the past few days have done considerable damage to wheat. The light snows and recent freezing weather left the soil in a pulverized state, which makes it very susceptible to the winds and unless something is done immediately to forestall blowing before the usual spring winds begin, wheat will suffer serious damage.

This hazard can be greatly reduced by taking the proper precautions now. One of the best methods of meeting this situation, as suggested by County Agent R. O. Dunkle, is to run a furrow with a lister 50 to 100 yards apart, according to the looseness of the soil, cross-wise to the direction the hardest winds usually come from. This will not only save many acres of wheat, but will conserve the soil which in itself is worth many times the trouble of running the furrows.

The expense, time and energy it takes to put in a wheat crop would, it seems, be ample incentive for any farmer to try to save every grain of wheat planted until it is up, grown, matured and harvested, for the farmer cannot collect the reward of his labors until that has been accomplished. So if he planted 200 acres of wheat and 100 acres of it blew away, the other 100 acres would have to bear the expense of the whole and naturally he will realize a big loss.

The object of this article is to urge everyone who has wheat sown in soil that is likely to blow to take the necessary precaution to prevent this, otherwise probable disaster—Hereford Brand.

A Brand New General Purpose Tractor

That's far ahead of anything you've ever seen

NOW you can get the tractor you've always wanted—a powerful, light weight, fast moving and easy to handle tractor that is as practical for planting and cultivating row crops as it is for plowing, threshing and the usual run of tractor jobs. It's the new Model "CC" Case—a real general purpose tractor.

The rear wheels can be quickly and easily set wider apart to fit the rows when cultivating, and just as easily changed back to plowing and disking width.

Two foot brakes that work on the differential,

independent of the steering device, aid in handling the tractor on slopes and over rough land. You can hold either of the rear wheels and pivot on it when you want to make a short turn.

You can sit down, stand up or change about as you choose. The controls are conveniently placed, the steering gear is very fast... the front wheels respond quickly to the slightest turn... all in all the tractor is remarkably easy to operate.

You will be as enthusiastic about this tractor as we are. Come in and let us tell you more about it.

SUDAN, TEXAS

Full Line of Quality Farm Machines

It Used To Be Drudgery—

To do the housework, and to keep everything clean and bright. The lamp chimneys were smoked, and the kitchen was dingy from the smoke of the coal stove, but it's

Different Now

Electricity has taken the drudgery all out of house-keeping. The electric lights, sweepers, irons, curlers, stoves, washing machines, and everything around the house can be easily kept going with electricity, and no smoke or fumes. It's the clean, quick and practical way to heat, light and do the work about the house, the office and the shop. Our big plant is at your service.
