BACK TO FARM

America's farm population is growing. In spite of an agricultural depression that is both extensive and severe, the number of people who live on farms has increased by hundreds of thousands. Today, the Department of Agriculture believes, the total is not far below the record of 32,000,000 set away back in the palmy days of 1910.

This, of course, is due chiefly to the depression—the industrial depression, no the agricultural one. Young men and women who left their farm homes in the boom years of the '20s and went looking for jobs in the cities have been glad enough to get back home lately; men who had been city workers for years have taken over idle farm land in preference to staying in town and living on charity.

For the man on the farm has one huge advantage over the man in the city, when times are bad—he is right at the source of the food supply. As long as he has a few potatoes, a few vegetables, a few chickens, a few pigs and a cow or two he can keep on eating, even if his pocketbook is flat.

One wonders, though, how long this swing back to the farm will last. For the farmer has to pay taxes; he has to keep his land and equipment in shape; he has to buy stock, like; he has all too often, to feed, fertilizer, seed and the carry a mortgage; and to do all of these things he has to have a cash income. Living at the source of food supply does not help you much if a deputy sheriff comes along some day and puts you off because you can't pay what you owe.

Several years ago a New York business man found a way to make farm life pay. He bought a small farm and raised produce for his own consumption instead of for the market. He bought small mills for grinding grain, pressure cookers for canning vegetables, and so on; and presently he found that he was producing practically everything that his family ate, from green vegetables to wheat flour and corn meal; the income from his city job carried his farm's expenses, and he was about twice as well to do as he ever had been before.

Will we, some day, come to some such system as that for large numbers of the population theoretically, the plan is perfectly feasible. In a time like this it might be worth thinking about.

TO "A LOCAL DOCTOR"

It seems that there was a Doctor who was well versed in his line, more especially the price end of his line, who wished to expose himself to the general public through our local newspaper.

The story goes like this: There was an accident in which a boy got his arm broken near the shoulder. The patient was taken to "The Local Doctor" who with his assistant worked on the case for sometime trying to set the broken bone and finally after much effort gave up. They told the patient that he would have to have an operation, for they could not set the bone back in place and keep it there without an operation. Of course the patient was unable to pay for the operation and was sent home by "The Local Doctor" and his assistant to suffer until some one came to his relief.

The Local Commissioner upon being advised of this case immediately took the case up with the County Judge and told him that there must be something done. He then asked the "Local Doctor" what he would charge the county to take the case and was informed by them, "The Local Doctor" and his assistant, that the bill would be \$75.00. Knowing that their price was too high, suggested that due to the fact that it was a county case, they could do the work for \$50.00 but they would not take the case for that price. Then the patient was ordered taken to the Lubbock Sanitarium and left him for two days. The doctors in the sanitarium set the broken bone in place and kept it there without an operation and their total bill was \$13.00. This was a saving of \$62.00 over the "Local Doctor's" price to say nothing of the fact that the patient did not have to undergo an operation.

Now let the public be the judge and jury in this case. The above facts prove that your Commissioner wanted to keep the county money at home but was driven out of the county by the "Local Doctor." I believe that if the "Local Doctor" and his assistant in the above case would pay more attention to giving service to the public and be within the bounds of reason with their prices they would not be bothered with patients going out of the county for the treatment of their ailments.

It is true that I have some money in the bank at this time; but this money is for the benefit of our local roads and not our Local Doctors. If we keep up our roads during this year, and we intend to do that, we will not have much money left in the bank to take care of such cases as the one above described. This money belongs to taxpayers who are conservative and want their Commissioner to be very careful how he spends their money.

And to those who are uninformed I wish to say that all charity comes out of the general fund and not out of the precinct fund.—C. A. Daniel

The groom is the son of Mr. and Mrs. G. W. Chesher and one of our leading business men.

SHOULD ADVERTISE; IT ALWAYS PAYS!

A business man of a town never loses a penny when he pays for advertisements in the local newspaper. It is the best investment he can make. Yet, some are too narrow to see it. Then too, some see it alright, but are too hoggish to assume their place along with other merchants who are supporting the newspaper. They are just spurning off their fellowman. They know a newspaper is our greatest asset as a community builder, they assume the same attitude toward the newspaper they have toward all community projects. Unless they are assured huge profits they do not make a move for the good of the town in any respect. Look through the columns of the News and see just who the merchants are who are supporting this newspaper to advance the interests of our little city. Some will holler hard times. Are times any harder for the non-advertiser than for the man who gives us at least a little ad each week?

ALL-DAY QUILTING AT HOME OF MRS. H. B. TEAL

Wednesday, March 15, fifteen ladies of Sudan Home Demonstration Club met at the home of Mrs. H. B. Teal's for the day. The day was spent piecing quilts. These quilts are for sale, or they will quilt for anyone wanting such work done. Everyone carried a covered dish for lunch, which was enjoyed by all.

LARGE CROWD VISIT SUDAN SATURDAY

Despite the disagreeable weather Saturday there was a large crowd in town to attend the free show, put on by the Chamber of Commerce.

The business men of Sudan are making every effort to supply this trade territory with high class amusement and the best quality of merchandise at all times.

Cash prizes will be given again Saturday and will continue to be given every Saturday until further notice.

A COMMUNITY AFFAIR

A mistaken idea with some people is that the newspaper is an individual proposition. If they don't like the editor, they feel they must knock the paper and stand in the way of its success whenever possible. They do not realize that the local paper is just as much a part of a community as the schools, churches, or anything else. The newspaper is different from any other business. It is a community affair. It is service to the people and not for any individual.

You may not like the editor and the editor may not love you any too well—but the paper he is responsible for does just as much for you as the service rendered others. There's nothing personal with it; it is here for a purpose and that purpose is to do what good it can in every way it can and the greater the support of those it undertakes to serve the better service it can render. It takes the people to make a good newspaper and without the help of the people no one can run a successful paper. It requires money to operate any kind of business—even the churches, and the papers are no exception, and for this reason, they must have the financial support of the business interests as well as the good will.

Few newspaper publishers make more than a comfortable living and scarcely one is reported wealthy from money made in the newspaper business. They deserve to be trusted and to be understood by the people—it is the editor and not the plant that makes a newspaper useful in a community, though a liberal patronage is necessary if the paper is to be a credit to the town.

EXPRESSING OUR APPRECIATION

We would be very ungrateful if we did not express our sincere appreciation for the splendid "Expression of Confidence" our friends and customers extended to the officers of this bank.

Among the assets of this institution that we like to list are two that money cannot buy, namely: confidence and cooperation.

We appreciate, beyond expression, the confidence and co-operation our friends and customers have extended us during the bank holiday, and it is with pleasure that we are able to announce to the public that we have resumed our normal business transactions.

TEXAS MOTOR AND FUEL COMPANY SUPPLIES LARGE TERRITORY

With offices and distributing quarters in Littlefield Phone 133. Are large distributors of quality gasoline, motor oils, and lubricants.

With the rise of the automobile industry to first place among the industries of the nation, and automobiles by far the predominating means of transportation, there has arisen an entirely new business of oil refining and distribution, a business which has made itself an indispensable factor in every

community.

There are visible evidences of this on every hand. One apostle of the days gone by recently said in a mournful tone: "Whenever there used to be a saloon in the old days there's nothing but an oil station now." But seriously speaking, no business is more essential and valued than gas and oil distribution, and we know of no better representative of this business than the Texas Motor & Fuel Company.

With its products available at many of the more prominent service stations throughout the district, this company is pre-

pared to serve the motorists in a most capable manner. Their business has grown by strides and carries prestige for no other reason than high quality of its efficient service to the public.

Their gasoline needs no coaxing to keep the motor running. Its full free vaporization is natural under all conditions, taking the scientifically correct proportion of the air that means the clean, dry, all burning explosion of true economy. Its ideal starting mixture ready for the hint of the firing spark or the heaviest pull of traffic emergency.

The Guiding Hand

She is my teacher, I shall not want (for an education)

She maketh me stand in the corner when I miss my lesson

She leadeth me through the dark ages of history.

She restoreth my chewing gum and rick-rack for my own sake.

Yea, though I sit up all night to prepare my lessons

I shall fear bad grades for she is with me

Her tongue and ruler the lash eth me.

She prepareth a detention slip for me in the presence of mine classmates.

She annointeth my report card with red ink

My eyes runneth over with tears

Surely girls and ignorance shall follow me all the days of my life

And I shall dwell in S. H. S. forever!

FOUND! *the hidden quart* **CONOCO**

...Mechanic Elder Schaffner Found the Hidden Quart... Also that Without it, Motors Show 50% to 60% Greater Wear ...So He Switched to Conoco

THAT STAYS UP IN YOUR MOTOR AND NEVER DRAINS AWAY

* The Germ Process (exclusive Conoco patent) imparts to this motor oil that peculiar ability to penetrate and combine with metal surfaces. Of the first filling about one quart will "hide" itself up in your motor's precious working parts. This hidden quart never drains away. It becomes a part of the motor itself, worth its weight in gold.

MECHANIC SCHAFFNER REPORTS ON DISCOVERY:

"I never did believe what Conoco Germ Processed oil would do; not until an Essex owner, with 25,000 miles on his speedometer, asked me to check his motor and put in new parts where necessary. It surely surprised me; clearance of pistons was only four 1-thousandths; of bearings only three 1-thousandths of an inch.

"This owner said he had used Conoco Germ Processed oil since the car was new. I have overhauled many another Essex at 25,000 miles, which has not used this oil, and found the wear 50% to 60% greater. Now I recommend Conoco Germ Processed Oil to my friends, and have changed to it in my own car."—Elder Schaffner, Highland, Ill.

Stop Cruel Motor Wear . . . Escape its Painful Cost Don't Wait Another Day to Drain and Refill With Conoco Germ Processed Motor Oil

To a motor, lack of lubrication is cruelty indeed. You are too "humane" to permit it, if only you knew the truth. But motors suffer in silence till costly damage is done. Then you pay . . . and pay . . . and pay.

50% of motor wear occurs in the moments following a cold start. Ordinary oil drains back into the crankcase and leaves the motor dry, till it is pumped back up again. Not so, with Conoco's hidden quart. It stays up in the motor and never drains away.

This is proved. Even with the crankcase empty, due to accident, users of this oil have driven many miles, without damage, on the "hidden quart alone.

Isn't it smart and thrifty to have a "hidden quart up in the parts of your motor, where you are sure it cannot fail? It is so simple to be safe! so foolhardy to be in doubt. Tend to it today. Go now, drain and refill with the "hidden-quart oil. Do it for safety's sake.

BACK TO FARM

America's farm population is growing. In spite of an agricultural depression that is both extensive and severe, the number of people who live on farms has increased by hundreds of thousands. Today, the Department of Agriculture believes, the total is not far below the record of 32,000,000 set away back in the palmy days of 1910.

This, of course, is due chiefly to the depression—the industrial depression, no the agricultural one. Young men and women who left their farm homes in the boom years of the '20s and went looking for jobs in the cities have been glad enough to get back home lately; men who had been city workers for years have taken over idle farm in preference to staying down and living on charity.

One wonders, though, how long this swing back to the farm will last. For the farmer has to pay taxes; he has to keep his land and equipment in shape; he has to buy stock, like; he has all too often, to feed, fertilizer, seed and the carry a mortgage; and to do all of these things he has to have a cash income. Living at the source of food supply does not help you much if a deputy sheriff comes along some day and puts you off because you can't pay what you owe.

Several years ago a New York business man found a way to make farm life pay. He bought a small farm and raised produce for his own consumption instead of for the market. He bought small mills for grinding grain, pressure cookers for canning vegetables, and so on; and presently he found that he was producing practically everything that his family ate, from green vegetables to wheat flour and corn meal; the income from his city job carried his farm's expenses, and he was about twice as well to do as he ever had been before.

Will we, some day, come to some such system as that for large numbers of the population? Theoretically, the plan is perfectly feasible. In a time like this it might be worth thinking about.

Mrs. J. P. Earnest has been confined to her home for the past few days with a cold.

TO "A LOCAL DOCTOR"

It seems that there was a Doctor who was well versed in his line, more especially the price end of his line, who wished to expose himself to the general public through our local newspaper.

The story goes like this: There was an accident in which a boy got his arm broken near the shoulder. The patient was taken to "The Local Doctor" who with his assistant worked on the case for sometime trying to set the broken bone and finally after much effort gave up. They told the patient that he would have to have an operation, for they could not set the bone back in place and keep it there without an operation. Of course the patient was unable to pay for the operation and was sent home by "The Local Doctor" and his assistant to suffer until some one came to his relief.

The Local Commissioner upon being advised of this case immediately took the case up with the County Judge and told him that there must be something done. He then asked the "Local Doctor" what he would charge the county to take the case and was informed by them, "The Local Doctor" and his assistant, that the bill would be \$75.00. Knowing that their price was too high, suggested that due to the fact that it was a county case, they could do the work for \$50.00 but they would not take the case for that price. Then the patient was ordered taken to the Lubbock Sanitarium and left him for two days. The doctors in the sanitarium set the broken bone in place and kept it there without an operation and their total bill was \$13.00. This was a saving of \$62.00 over the "Local Doctor's" price to say nothing of the fact that the patient did not have to under-go an operation.

Now let the public be the judge and jury in this case. The above facts prove that your Commissioner wanted to keep the county money at home but was driven out of the county by the "Local Doctor." I believe that if the "Local Doctor" and his assistant in the above case would pay more attention to giving service to the public and be within the bounds of reason with their prices they would not be bothered with patients going out of the county for the treatment of their ailments.

It is true that I have some money in the bank at this time; but this money is for the benefit of our local roads and not our Local Doctors. If we keep up our roads during this year, and we intend to do that, we will not have much money left in the bank to take care of such cases as the one above described. This money belongs to taxpayers who are conservative and want their Commissioner to be very careful how he spends their money.

And to those who are uninformed I wish to say that all charity comes out of the general fund and not out of the precinct fund.—C. A. Daniel

SCHOOL ELECTION APRIL 1

MISS LILLY MAE CARRUTH WEDS LOYD CHESHER

Tuesday evening, March 21, at 7:30 o'clock Miss Lilly Mae Carruth became the bride of Loyd Chesher, at the Baptist church, in the presence of many friends whom had gathered to witness the ceremony, solemnized by the Rev. Joe Grizzle, pastor of the Baptist church at Littlefield.

The bride is a daughter of J. M. Carruth, one of the pioneers of Sudan. She is a graduate of the Sudan high school.

The groom is the son of Mr. and Mrs. G. W. Chesher and one of our leading business men.

Following the wedding, a reception was held at the home of the brides' father, J. M. Carruth. The young couple left for a short trip in parts of Mexico. They will make their home in Sudan.

SHOULD ADVERTISE; IT ALWAYS PAYS!

A business man of a town never loses a penny when he pays for advertisements in the local newspaper. It is the best investment he can make. Yet, some are too narrow to see it. Then too, some see it alright, but are too hoggish to assume their place along with other merchants who are supporting the newspaper. They are just spunging off their fellowman. They know a newspaper is our greatest asset as a community builder, they assume the same attitude toward the newspaper they have toward all community projects. Unless they are assured huge profits they do not make a move for the good of the town in any respect. Look through the columns of the News and see just who the merchants are who are supporting this newspaper to advance the interests of our little city. Some will holler hard times. Are times any harder for the non-advertiser than for the man who gives us at least a little ad each week?

ALL-DAY QUILTING AT HOME OF MRS. H. B. TEAL

Wednesday, March 15, fifteen ladies of Sudan Home Demonstration Club met at the home of Mrs. H. B. Teal for the day. The day was spent piecing quilts. These quilts are for sale, or they will quilt for anyone wanting such work done. Everyone carried a covered dish for lunch, which was enjoyed by all.

LARGE CROWD VISIT SUDAN SATURDAY

Despite the disagreeable weather Saturday there was a large crowd in town to attend the free show, put on by the Chamber of Commerce.

The business men of Sudan are making every effort to supply this trade territory with high class amusement and the best quality of merchandise at all times.

Cash prizes will be given again Saturday and will continue to be given every Saturday until further notice.

A COMMUNITY AFFAIR

A mistaken idea with some people is that the newspaper is an individual proposition. If they don't like the editor, they feel they must knock the paper and stand in the way of its success whenever possible. They do not realize that the local paper is just as much a part of a community as the schools, churches, or anything else. The newspaper is different from any other business. It is a community affair. It is service to the people and not for any individual.

You may not like the editor and the editor may not love you any too well—but the paper he is responsible for does just as much for you as the service rendered others. There's nothing personal with it; it is here for a purpose and that purpose is to do what good it can in every way it can and the greater the support of those it undertakes to serve the better service it can render. It takes the people to make a good newspaper and without the help of the people no one can run a successful paper. It requires money to operate any kind of business—even the churches, and the papers are no exception, and for this reason, they must have the financial support of the business interests as well as the good will.

Few newspaper publishers make more than a comfortable living and scarcely one is reported wealthy from money made in the newspaper business. They deserve to be trusted and to be understood by the people—it is the editor and not the plant that makes a newspaper useful in a community, though a liberal patronage is necessary if the paper is to be a credit to the town.

J. R. Moore and family spent Sunday with relatives in Pampa.

EXPRESSING OUR APPRECIATION

We would be very ungrateful if we did not express our sincere appreciation for the splendid "Expression of Confidence" our friends and customers extended to the officers of this bank.

Among the assets of this institution that we like to list are two that money cannot buy, namely: confidence and cooperation.

We appreciate, beyond expression, the confidence and co-operation our friends and customers have extended us during the bank holiday, and it is with pleasure that we are able to announce to the public that we have resumed our normal business transactions.

In Littlefield, Is Where every want of the motorest is supplied by this house of service.

In this age, when one person out of seven owns an automobile the business of the Garland-White Auto Supply is one of the most flourishing. Competition is keen and the firm which succeeds must offer unusually attractive bargains and a service that is unexcelled.

This company in a comparatively short time, has built up an enviable reputation among the thousands of motorists in this community, a reputation that is worth many times the actual inventory of the stock.

The manager of the company realizes the importance of carrying every accessory that the motorest needs. He knows that if a driver once calls for an item which is not in stock and has to go elsewhere to have his order filled, that he will soon get the habit of shunning the place where he could not find what he wanted, and patronizing the "house of service."

In addition to the thousand and one accessories the store carries an imposing array of automobile parts which have become recognized as the best and most satisfactory on the market. Service and wear are guaranteed by unusual liberal replacement offers.

There is nothing so impor-

tant to the commercial development of the smaller city as an up-to-date establishment where the people of the community can satisfy their demands for clothing and furnishings. This is the day and age when every one both old and young must be neatly attired in clothes of distinction and quality. If they have to do their shopping along these lines in some distant city, the home community suffers accordingly. In this part of the state the needs, desires and demands of the population are more than satisfied at this

well known store. In the selection of merchandise which is offered, they never lose sight of the fact that their customers come to look upon the label as the fullest guarantee of quality, a dependability which must prevail whether the merchandise is offered at special sale or in the regular course of business.

PEOPLE DRIVE MANY MILES TO TRADE AT RENFRO BROS' GROCERY

Located in Littlefield, offers everything in High quality groceries, feed, and seed.

Lucky indeed are the people of Littlefield and the surrounding country to have in their midst and at their beck and call the very extensive and efficient establishment of Renfro Bros' Grocery. Space limitation at this time prevents even a short review of the large, varied stock of this concern, but such detailed reference is not necessary. The reputation of this store for goods of quality, extent of stock and reasonableness of prices draws trade not only

from the city but from all the territory from miles around.

The Manager is an excellent judge of provisions and only selects the very best grades to offer the public. He specializes in the very finest of goods and as a consequence has a patronage from discriminating people, ones that will go many miles to secure choice products, whatever it is in fresh vegetables, canned goods and staple and fancy groceries of all descriptions that you desire, see them. It is one of the most important mercantile institutions in this section of the state and brings to town every year thousands of dollars that otherwise might be diverted to

other trade centers. It is safe to say their name and business is today as well known among the people of this part of the state as any of the institutions of like character in nearby towns. It merits your confidence as well as the most liberal patronage from the people all over this section.

The manager is one of the community's progressive business men and the success he has attained is not a result of luck, but of the service he has rendered the people by giving them the best at very reasonable prices and making most of the profit off the principle of buying in large quantities and saving the discount.

TEXAS MOTOR AND FUEL COMPANY SUPPLIES LARGE TERRITORY

With offices and distributing quarters in Littlefield Phone 133. Are large distributors of quality gasoline, motor oils, and lubricants.

With the rise of the automobile industry to first place among the industries of the nation, and automobiles by far the predominating means of transportation, there has arisen an entirely new business of oil refining and distribution, a business which has made itself an indispensable factor in every

community. There are visible evidences of this on every hand. One apostle of the days gone by recently said in a mournful tone: "Whenever there used to be a saloon in the old days there's nothing but an oil station now." But seriously speaking, no business is more essential and valued than gas and oil distribution, and we know of no better representative of this business than the Texas Motor & Fuel Company.

With its products available at many of the more prominent service stations throughout the district, this company is pre-

pared to serve the motorists in a most capable manner. Their business has grown by strides and carries prestige for no other reason than high quality of its efficient service to the public.

Their gasoline needs no coaxing to keep the motor running. Its full free vaporization is natural under all conditions, taking the scientifically correct proportion of the air that means the clean, dry, all burning explosion of true economy. Its ideal starting mixture ready for the hint of the firing spark or the heaviest pull of traffic emergency.

I AM EDUCATION

I bear the touch that enlightens the world, fires the imagination of man, feeds the flame of genius! I give wings to dreams and might to hand and grain!

From out of the deep shadows of the past I come, wearing the scars of struggle and the stripes of toil, but bearing aloft in triumph the wisdom of all the ages.

Man, because of me, holds dominion over earth, air and sea. It is for him I least the lightning, Plumb the deep and shackle the ether.

I am the parent of progress,

creator of culture, molder of destiny. Philosophy, science and art are the works of my hand. I banish ignorance, discourage vice and disarm anarchy.

Thus have I become freedom's citadel, the arm of democracy, the hope of youth, the pride of adolescence the joy of age. Fortunate the nations and happy the homes that welcome me.

The school is my workshop; here I stir ambition, stimulate ideals, forge the keys that open the door of opportunity. I am the source of inspiration—the aid of aspiration.

...The Germ Process (exclusive Conoco patent) imparts to this motor oil that peculiar ability to penetrate and combine with metal surfaces. Of the first filling about one quart will "hide" itself up in your motor's precious working parts. This hidden quart never drains away. It becomes a part of the motor itself, worth its weight in gold.

MECHANIC SCHAFFNER REPORTS ON DISCOVERY:
"I never did believe what Conoco Germ Processed oil would do; not until an Essex owner, with 25,000 miles on his speedometer, asked me to check his motor and put in new parts where necessary. It surely surprised me; clearance of pistons was only four 1-thousandths; of bearings only three 1-thousandths of an inch."
"This owner said he had used Conoco Germ Processed oil since the car was new. I have overhauled many another Essex at 25,000 miles, which has not used this oil, and found the wear 50% to 60% greater. Now I recommend Conoco Germ Processed Oil to my friends, and have changed to it in my own car."—Elder Schaffner, Highland, Ill.

Don't Wait Another Day to Drain and Refill With Conoco Germ Processed Motor Oil

To a motor, lack of lubrication is cruelty indeed. You are too "humane" to permit it, if only you knew the truth. But motors suffer in silence till costly damage is done. Then you pay . . . and pay . . . and pay . . .

50% of motor wear occurs in the moments following a cold start. Ordinary oil drains back into the crankcase and leaves the motor dry, fill it is pumped back up again. Not so, with Conoco's hidden quart. It stays up in the motor and never drains away.

This is proved. Even with the crankcase empty, due to accident, users of this oil have driven many miles, without damage, on the "hidden quart" alone.

Isn't it smart and thrifty to have a "hidden quart" up in the parts of your motor, where you are sure it cannot fail? It is so simple to be safe so foolhardy to be in doubt. Tend to it today. Go now, drain and refill with the "hidden-quart" oil. Do it for safety's sake.
