

As I See Ranger

By Gene Townsend

Gene Babb, former Ranger College Coach, has returned to the professional football game. He is at present playing in the number one fullback spot for the Dallas Cowboys, a member team of the National Football League.

Babb, who was formerly with the San Francisco 49'ers of the NFL, left the 49'ers in 1959 to take the assistant coaching job at Ranger College, signed a contract earlier this year with the Houston Oilers, a member of the new American Football League. The 49'ers would not give Babb a release from his contract with them to play with Houston, thereby giving the Cowboys the rights to Babb's services.

Babb was under option to the 49'ers and his contract with the Houston club was invalid.

"Pop" Boone is catching those big bass at Lake Leon again. He rises early in the morning, before most of us even think about getting up, and goes out with his fly rod. His latest catch was Monday morning when he brought in three that would weigh from four and one-half to five and one-half pounds.

A fellow recently walked into the White Elephant cafe in Eastland and said "Bring me an elephant steak."

Those of you who do not receive a copy of the Blue Blaze, a Lone Star Company paper, don't know what you have been missing.

"Sallor" Byas, a retired Lone Star employee, writes a column for the Blue Blaze. He is quite frequent in coming up with some story of local interest of which it takes a vivid imagination to visualize.

In a recent issue of the magazine he was speaking of new area Lone Star employees who had been transferred here from East Texas. Byas had this to say in his column, "Back to the East Texas folks that have come to the land of plenty. They all arrived at about the same time and there had not been more than a sprinkle of rain in six months. They settled in three corners of the town and when the dampness started drying from their clothes and furniture we had some of the finest morning dew seen here in years. The poor old rain clouds all started yelling their heads off, thinking it was about to rain. In fact, if any more East Texas come up we don't know what the poor old rain clouds will do as they hollered until they are so hoarse they can only hiss and, boy, what a mess they would be in if it actually started to rain."

I don't think that Byas will have to worry about the Rain Clouds. I understand that Mother Nature has transferred them to the High Plains area around Slaton.

Buddy Hamrick, son of Mrs. Mamie Ruth Hamrick, noticed a statement in a recent issue of the Ranger Times saying that this season would be the first time for the Ranger College Rangers to meet Del Mar College. He informed us through Mrs. Hamrick that the 1951 Rangers, which he quarterbacked, played Del Mar at Corpus Christi.

Just in case you want to read what you wrote with that underwater pen, they've invented a match that strikes when wet.

One of the first things that a lad learns from a home chemistry set is that he'll never get another one.

One trouble with growing older, it becomes more and more difficult to find a hero of world history who amounted to something when he was your age.

Despite all advertising to the contrary, Alcatraz is still the only pen with a lifetime guarantee.

Do your lights dim when major appliances start operating? YES NO

Does your television picture shrink when other appliances are in use? YES NO

Do you have to replace fuses frequently? YES NO

Do you have to unplug one appliance so you can plug in another? YES NO

IF YOU CHECKED "YES" one or more times, it's an indication of low HOUSEPOWER. You may need larger wire, additional circuits and more outlets to get the most efficient and convenient service from your electric appliances.

Home wiring designed for the appliances used by the average family only a few years ago may be inadequate for the many additional electrical conveniences you enjoy today. As a result, lights may dim, appliances may operate sluggishly and fuses may blow frequently due to overloads. These symptoms are usually more noticeable during hot weather when electricity does so many more jobs for you.

Your electrical contractor will gladly check the wiring in your home and suggest the additional wiring you may need. Call him about it soon. Live better electrically with FULL HOUSEPOWER.

We Like To Talk About Abstracts... because making abstracts has been our job for many years. And it's an interesting subject. Every day people come to us with their title problems. Some cases are tragic. Take the example of the couple who have spent their all for a home to find out later they have no title. Most title problems are simple and the abstract helps to make them simple. So before buying real estate better talk to us about the title.

Increase In City-Dwelling Farmers Seen

What is happening in the purchase of farm and ranch lands by city dwellers in Texas has been amply demonstrated in a study made not long ago in Dallas. It is figured that more than 25,000 Dallas County families now own farm and ranch lands adding up to some 3,000,000 acres, and most of this acreage is located outside of Dallas County. The holdings include wheat farms in the Panhandle, irrigated cotton fields out on the South Plains and elsewhere in West Texas, citrus groves in the Rio Grande Valley, pastures and grazing land in all sections of the State.
The vast majority of these land-owners are week-end farmers and ranchers, maintaining their homes in Dallas and its suburbs where they make their living. Real estate dealers agree that the growing systems of super-highways and excellent roads out of Dallas have brought about definite changes in the demands of these city-dwelling farmers and ranchers.
It used to be that a radius of about 40 miles outside of the city limits of Dallas was far as buyers wanted to go to maintain their rural retreats. But the vast development of the highways system has changed all this. The circle has been greatly expanded, moving out to a 100-mile radius and now spreading out still further to 150 and 200 miles.
