VOLUME 3

WICHITA FALLS, TEXAS, WEDNESDAY AUGUST 11, 1909

NUMBER 77

FARMERSVILLE IS AGAIN DEFEATED

LOCALS' TIMELY HITTING WINS THIRD AND DECIDING GAME OF THE SERIES.

FAST FIELDING A FEATURE

Home Run Gave Visitors Their Only Score—Wright Was Strong in the Beginning.

Wichita Falls, 5; Farmersville, 1. By winning yesterday, the locals made it two out of three over the Collins county visitors and established their supremacy over one more nine. The game was won by timely hitting and superior fielding.

Things looked bad for Wichita at the start. "Lucky" Wright was in the box for the visitors and the first six Wichitans to face him, including even Guthrie, hit the wind, but that was all. He fanned seven out of the first nine that were up. After the third inning, however, the locals got wise to the swift little outshoot and business picked up.

Guthrie, first up in the fourth, reached first on the shortstop's slow work and Weber beat out a bunt when the first baseman loafed. Moore went out. Carson scopped out a long one over right field, clearing the two men ahead of him and reaching third himself, but was thrown out at home on Bates' infield hit and the side was soon retired.

In the fifth, Farmersville made her only score. A Nailor sending one over the right field fence for a homer. Never again did a visitor reach third.

Wichita clinched the game in the sixth. Guthrie hit, Weber sacrificed, Moore was safe on an error and stole second. Carson and Bates hit and the poor handling of a grounder by the first baseman allowed another score, making three in that inning.

Fast fielding characterized Wichita's playing. One little error by Moore in the first inning was the only blunder and whenever the visitors looked like scoring a fast double would generally retire the side.

Peaceful Harry held the visitors to two hits in the first seven innings and five for the entire game. In the eighth and ninth they managed to connect with three.

Carson was the particular star of the game. He fielded a fast game and his two hits scored three of the five runs that the locals made. The entire infield played like a well-balanced and well-oiled machine. The score: Farmersville... 000 010 000—1 5 4 Wichita Falls... 000 203 00x—5 6 1 Batteries—Wright and Nailor; Hotchkiss and Kellough.

CONFERENCE STILL ON.

T. and P. Firemen Still Seeking Equal Seniority Rights.

Texas News Service Special. Dallas, Tex., Aug. 11.—President Clark and Vice President Shea of the Firemen's and Enginemen's Brotherhood, are holding a conference behind closed doors with the Texas and Pacific railroad adjustment board today. The participants refuse to discuss the proceedings. The firemen are seeking the same seniority privileges that are granted engineers and a strike has been threatened for some time unless this is conceded.

COUNTY SCHOLASTICS.

County Judge Files Statistics With the Commissioners.

County Judge Yeager this morning had entered upon the minutes of the commissioners court the following scholastic population figures: Precinct No. 1, 1752; No. 2, 2,600; No. 3, 48; No. 4, 362; No. 5, 429.

Figuring at a ratio of six population to every child, the population of Wichita Falls is 7614, of Iowa Park 816, and of Burk Burnett 846.

NORTHWESTERN COUNTRY IS RICH, SAYS WICHITAN

Oaksdale, Wash., Aug. 6.—Well, we are still traveling, and are now within 55 miles of Spokane, in the hills. This land is very rich and rough. I don't see how the men can keep the binders and headers from turning over.

Wheat makes from twenty-five to fifty bushels an acre, and oats from seventy-five to a hundred and twenty-

five bushels. Oats seem to be the main crop. Not much grain is cut yet. I was at a farm yesterday that had two push binders going, cutting seventy acres a day.

We have been passing through potato fields. Produce brings about the same price here as in Wichita, except potatoes, which sell for fifty cents a bushel. There are plenty of orchards and fruit looks fine.

There are no houses on the hills here. They are all in the gullies. The valleys are just wide enough for the railroads to get through. Nearly every house has a grove of trees, poplar, box elder, pines and cedars. There was a thick white frost this morning and we have had to put on our winter clothes. The altitude is 2096 feet, and we are near the Steptoe mountain, which is six thousand feet high, but we haven't time to go up.

Wheat is fed to everything up here and alfalfa grows fine. The land is farmed every other year and plowed in the summer for the next year. Timothy and clover grow wild here all along the railroad tracks. Well improved places sell for sixty dollars an acre. This is the richest land I ever saw; not many weeds, no wild grasses, but plenty of sage brush and a few rocks. We are on our way to Canada. G. W. MUSGRAVE.

MOORS ARE GIVING AS GOOD AS THEY RECEIVE

By Associated Press. Madrid, Spain, Aug. 11.—Advises from Penon De la Gomera, Morocco, say the Moors are fiercely attacking the Spanish garrison there. Fighting began yesterday and at midnight the Spanish artillery seemed to have silenced the enemy, but the Moors dug trenches under cover of darkness and this morning reopened a heavy fire, bullets falling in the streets of the town.

NAVAL TUG CAPSIZES.

Several of the Passengers Drowned, Others Rescued.

By Associated Press. Rockport, Mass., Aug. 11.—The naval tug Nezicut, bound from Portsmouth to Boston, capsized off Cape Ann early today and several of her crew were drowned. The second officer, the captain's wife, little boy and four of the crew landed in the tug's boat. The captain, surgeon, engineer and three other members of the crew who took to the boats were blown off shore and were picked up by a life saving crew, with the exception of Surgeon Trotter, who was washed off and drowned.

IOWA PARK CELEBRATES.

Big Picnic There Today Attracts a Large Crowd.

Iowa Park is celebrating today with a large picnic, carnival and barbecue and the entire town has turned out to enjoy the occasion. A number went up from this city to take the fun in and reports from there say the occasion is a thoroughly enjoyable one.

HEARING IS POSTPONED UNTIL NEXT FEBRUARY

Texas News Service Special. Austin, Tex., Aug. 11.—The State railroad commission today postponed the hearing on the reduction of freight rates on cotton until the February session. The motion for postponement was made by Mayfield and endorsed by Colquitt, with Williams dissenting.

The greatest crowd attended the hearing today for many years and wild cheers followed the announcement of delay. Mayfield said when the commission met that at a previous conference it was decided to adjust cotton rates as soon as the railroads' revenues warranted, but that a recent tour through Central and Northeast Texas convinced him that such action was unjustified because of poor crops in those sections. He said that, if the railroads' revenues are now reduced they will be unable to make improvements. He also said they will ultimately reduce the rate on cotton.

GAINESVILLE'S FIRST.

Initial Bale of Season Arrived There This Morning.

Texas News Service Special. Gainesville, Tex., Aug. 11.—J. C. Winder of Collinsburg today marketed the first bale of cotton of the season. The bale weighed four hundred pounds and sold at 12 3/4 cents. Merchants paid a thirty dollar bonus.

WICHITA FALLS WILL BE IN AT THE CLOSE

Committee Presents This City's Claims and Returns Home Very Much Encouraged.

The local committee which went to Fort Worth Monday to present the claims of Wichita Falls for the West Texas State Normal to the committee appointed by the Thirty-First legislature, whose duty it is to select a location for that institution, completed its labors last night at 7 o'clock and arrived home about midnight.

Judge A. H. Carrigan, a member of the committee of citizens from this place, which was appointed at the mass meeting of citizens held at the Auditorium on Friday night of last week, was seen by a Times reporter early this morning and said:

"There were twenty-eight applicants for the school, the towns being scattered from San Saba to Dalhart. The State locating committee, composed of Judge Marshall of Grayson county, who is acting instead of Governor Campbell, Lieutenant Governor A. B. Davidson and State Superintendent of Public Instruction R. B. Cousins, met in Fort Worth on Monday morning and completed its work of hearing the claims of the different towns as presented by the various committees at 7 o'clock yesterday evening. The committees of each town were allotted twenty minutes each in which to set forth the claims for the school of their respective towns, the towns coming in alphabetical order, which caused Wichita Falls to be the last on the list. All bids were required to be in writing and sealed. After hearing all the applicants the locating committee is still in session today for the purpose of going

over the list of applicants and eliminating therefrom those towns which, in the judgment of the committee are impracticable for the location of a State educational institution. Within the next few days the locating committee will begin its itinerary and visit the different towns in the district. After it has accomplished this work its decision will be made known.

"The Wichita Falls committee presented every feature possible to the very best advantage which would be an inducement for the location of this school, besides offering the largest bonus ever offered for any public enterprise. The committee recognized the fact that Wichita Falls should have this school if within the range of possibilities, but no one can foretell the verdict of the locating committee, and a decision is not looked for before September.

"In hearing the claims of Wichita Falls as presented by our local committee, the State Locating Committee was seemingly very much impressed and asked many questions which were answered satisfactorily."

The same optimistic tone was voiced by the other members of the Wichita committee and there is no doubt that this city is in the race very strongly.

It is said that the other contestants, believing this city to be in the race merely for the advertising, were not only surprised, but badly scared when they saw that Wichita was a bona fide candidate.

To tell of the many incidents of the

THIRTY FIVE CENTS TAX RATE FOR 1909

COUNTY COMMISSIONERS MAKE INCREASE OVER FIGURES FOR 1908.

WILL INCREASE REVENUE

County's Income Will Now Be Thirteen Thousand Dollars Larger Than Last Year.

The county commissioners this morning fixed the county tax rate for the 1909 valuations, making it thirty-five cents per hundred dollars. Last year's rate was twenty-six cents per one hundred dollars of valuation, an increase for this year of nine cents. Of this thirty-five cents, twenty is for the road and bridge fund, twelve and one-half for the general fund and two and one-half for the court house fund. Last year the road and bridge tax was fifteen cents, the general tax ten cents and the court house tax one cent, all being increased this year.

The taxable values for this year total \$10,893,495 for the county and the total revenue from this would be, were all the taxes due collected, the sum of \$38,117.14.

The taxable values last year totaled \$9,782,000 and the total possible revenue from that, at 26 cents would have been \$25,433.22, or nearly thirteen thousand dollars less. This increase, it is believed, will enable the county to keep its finances in good condition this year.

THE WATER SUPPLY.

Ablene's Knock on Wichita Falls is Replied to.

Speaking before the locating committee at Fort Worth yesterday afternoon, R. E. Huff of this city called attention to the fact that Abilene had claimed to have a larger water supply than Wichita Falls. In reply he said: "You gentlemen can come up there and take a ride out on our lake. If you don't find it to be ten times as large as Abilene's, we will withdraw from the race."

NEW PARTY ASSUMES FORM IN THIS STATE

A TARRANT COUNTY FARMER FARMER BROACHES NOVEL POLITICAL PLAN.

FOR MEN AND MEASURES

Renounce Principles of Both the Old Parties—Meeting Near Fort Worth.

Texas News Service Special. Bransford, Tex., Aug. 11.—A new political party, renouncing democracy, republicanism, populism, prohibition and the rest, is to be launched at Pleasant Run, Tarrant county, on August 27th.

R. V. Glenn, a prominent farmer, heads the movement and is said to be receiving many pledges of support and assistance. The motto of the new organization will be "Men and Measures" rather than party loyalty.

A number of public men have been invited to speak at the opening meeting and office holders of the county, State and nation will be discussed. Other meetings are to be held at various North Texas points and it is planned to spread the new political gospel over the entire State and country. The organizers expect to nominate gubernatorial candidates.

DESTROY PLANTS.

This is Louisiana's Method of Fighting the Boll Weevil.

By Associated Press. Baton Rouge, La., Aug. 11.—An interesting bulletin on the fight against the cotton boll weevil has been issued today by the Louisiana crop pest commission. The bulletin urges farmers to destroy cotton plants by October 15 or November 1, showing that where plants have been destroyed before October 15th experiments with the weevil indicated that only three per cent of the pests survived the winter to infest the succeeding year's crop.

Johnsing Signs Up.

Chicago, Ill., Aug. 11.—Jack Johnson signed articles of agreement for a fight with James Jeffries today.

meeting and of the methods resorted to by some of the competing towns would take up more space than the Times can give. The committee returns confident of success and with the assurance of the committee that Wichita will at least be in at the finish. R. E. Huff, Judge Carrigan and J. T. Montgomery were the speakers for Wichita and their oratorical efforts would do credit to a Demosthenes. Their remarks were illustrated by a large bird's eye view of this city in which the committee manifested great interest.

In giving an account of the proceedings at Fort Worth, the Dallas News account says in part:

Wichita Falls was the last town on the list, and after its representatives had spoken the hearing was completed at 7 p. m. and the committee closed its session. As it is not known what offer is contained in Wichita Falls' sealed bid, but its delegation made an exceedingly favorable impression on the committee. It offered everything that was required, including abundant and pure water, ample transportation facilities, cheap natural gas, cheap building material at home, sidewalks, electric lights, a sewerage system and a healthful location near a lake covering four sections of land that is being converted into a pleasure resort. The committee made many specific inquiries of the representatives of Wichita Falls and were invited to come and see.

LICENSE IS REFUSED TO LIEGOIS ESTABLISHMENT

County Judge Yeager has refused to renew the saloon license of A. E. Holly, for the place managed by Joe Legois, and unless the courts provide some remedy, that establishment will have to cease to do business. Judge Yeager refused the application on two grounds: First, that the character of the place was not, in his judgment, sufficiently vouched for to justify the issuance of the license. Second, that this city already has the full number of saloons prorated to her under the Fitzhugh-Robertson law. It is understood that the applicants will endeavor to mandamus the judge.

WET WEATHER LASTS.

City Doesn't Get Much, But the Valley Does.

A nominal shower, lasting about ten minutes, was Wichita's share of the rain in the past twenty-four hours, but at other points in the county and up and down the Wichita Valley there are reports of light but helpful rains. It is cloudy this afternoon and the weather prediction points to further precipitation.

WASHOUT NEAR MEMPHIS.

Fort Worth and Denver Trains Were Delayed This Afternoon.

A washout on the Fort Worth and Denver near Memphis yesterday morning caused some delay in the traffic over the line, but it is stated that the damage has been repaired this morning and that traffic is now unimpeded. The washout was a serious one, but was quickly repaired.

GRASSHOPPERS INVADED THIS CITY LAST NIGHT

Grasshoppers—grasshoppers of every size, color, sex, creed, politics and nationality, infested Wichita Falls last night and stayed over until this morning. They swarmed around every light in the city and gathered on the sidewalks so thick that one left a pasty streak of them behind as he walked. Some of them had decidedly peevish dispositions and applied themselves to parts of one's clothing whenever opportunity offered.

This is one of the "grasshopper" waves that appear every once in a while, disappearing almost as suddenly as they came. Where they remain in any locality for any length of time crops are apt to suffer. It will be remembered that Kansas suffered heavy losses for year after year from these pests.

WASHOUT IN MEXICO.

Serious Wreck on the Mexican National Narrowly Averted.

Texas News Service Special. Laredo, Tex., Aug. 11.—A washout on the Mexican National railroad between Monterey and Salinas tied up traffic today. It was discovered in time to prevent a serious wreck. The morning train for Mexico City left this morning, but got no further than Salinas. The extent of the damage is not known.

TWO COMMITTEES TO PLACE INSTITUTIONS

NORMAL LOCATORS OPENED BIDS THIS MORNING AND ARE HARD AT WORK.

STATE FEEDING STATION

It is to Be Located Shortly Also and the Committee is in Session Today.

Texas News Service Special. Fort Worth, Tex., Aug. 22.—The commission to select a site for the West Texas Normal this morning is opening the sealed bids presented by the twenty-eight towns seeking the location. The bids and accompanying statistics will be tabulated, after which the commission will select about ten or more available towns for the site and will make personal visits to those towns. The remainder will be occupied in tabulating the statistics and the bids, which will not be made public for some time.

Texas News Service Special. Fort Worth, Tex., Aug. 11.—The commission to select a location for the livestock experiment feeding station held a session this morning and adjourned until 5 o'clock this afternoon to await a definite proposition from Fort Worth, Stamford and Amarillo are also seeking the location, but the commission favors Fort Worth and will probably select this place if a suitable proposition is presented.

RUNAWAY BOY CAUGHT.

Had Come Here From Baird, Texas. Got Loose Again.

The young son of M. E. Faust of a Baird, Texas, was captured by the officers here this morning and turned over to his father, being taken home without delay. He left Baird about eight days ago and is believed to have come here over the Wichita Valley from Abilene. Mr. Faust paid the officers the fifty dollar reward he had offered and took the boy in charge, only to have him break away again later on and it was necessary to pay the officers another twenty-five dollars for his second capture.

Neither the boy or his father appear to be very much in love with each other, although the young one accepted the situation philosophically when captured; not so philosophically, however, that he neglected to get away again at the first opportunity, after his father had given him a bath and attired him in clean clothes. The cause of the boy's troubles is not known.

OFFER BY IOWA PARK.

Said to Have Bid Forty Thousand for the Normal.

The little town of Iowa Park in this county was among the contestants for the West Texas Normal and is said to have bid forty thousand dollars for the institution. Iowa Park has only about eight hundred population, but her bid was more substantial than those of many larger and richer West Texas cities.

County Commissioner McCleskey said this morning that if Iowa Park couldn't land it, she hoped Wichita Falls would.

SENATOR BAILEY COMING?

Letter Addressed to Him is Received This Morning.

A letter addressed to Senator J. W. Bailey was received at the postoffice this morning, leading to the belief that it is the senator's plan to pay this city a visit shortly after his return to Texas. None of his friends here are aware of any such plan, however, and it is probable that the writer made a mistake, believing Wichita Falls to be the only city in Texas worthy of producing a United States senator.

"MAY THE BEST MAN WIN" SAYS PRES. TAFT

Texas News Service Special. Beverly, Mass., Aug. 11.—President Taft today took delight in discussing his proposed Texas visit. When told he would meet Texas' champion golfers, he said: "Let them all come and may the best man win." He said he will do more golf playing than hunting and expects to make few, if any, expeditions from the ranch.

Smoke Sensibly

The all-Havana cigar is intended for your after-dinner hours. For your business hours, the only safe smoke is a mild, delightful blend of Havana and domestic leaf.

R. V. GWINN,
Chief of Police

Tammany Hall is on the anxious seat these days in view of the near approach of the New York city primaries and the election of a mayor and other city officials. The famous political organization not only has a hard fight on hand in the municipal election, but also has to contend with several threatening revolts in its own ranks. At the primaries to be held next month a number of the best known leaders in Tammany will have hard fights to retain their leadership against the democratic anti-Tammany organizations.

AN IMPRACTICAL JOKER.

He Thought It Was Very Funny to Fire the Hayrick.

Practical joking, "the meanest form of wit," is common in Hungary. Formerly the pranks used to be coarse, if not dangerous, but that is changing now. The only saving grace of the Magyar practical jokes, says W. B. F. Bovill in "Hungary and the Hungarians," is that they are not perpetrated in a spirit of bitterness.

One of the most famous jokers of the old school was Jozsa Gyuri. Exiled in one of the most inaccessible parts of the great plain, he lived and died "a prodigal and a buffoon."

A story is told of Jozsa going to spend a night with a Count Keglevich. Wishing to be impressive, he journeyed thither in a beautiful new coach, of which he was very proud. On being shown over the grounds by the count his attention was directed to a remarkably fine hayrick. Hay was then standing at a good price. After supper Jozsa drew together some friends, and the rick was soon nothing but a heap of ashes.

The next morning when Jozsa wanted to continue his journey his wonderful carriage was not to be seen anywhere.

"Why, my friend," said the count, "you yourself burnt it last night. The fact is my coach house wants repairing, and as the evening threatened to be wet we put your carriage under the rick to keep it dry."

A MAN OF LUCK.

The Story of the Test by the Eastern King's Minister.

A king once said to a minister, "Do you believe in luck?"

"I do," said the minister. "Can you prove it?" asked the king. "Yes, I can."

So one night he tied up to the ceiling of a room a bag containing peas mixed with diamonds and let in two men, one of whom believed in luck and the other in human effort alone. The one who believed in luck quietly laid himself down on the ground on his blanket; the other after a time found the bag and, feeling in the dark the peas and stones, ate the peas and threw the diamonds to his companion, saying, "There are the stones for your idleness."

The man below received them in his blanket.

In the morning the king and the minister came and told each man to keep what he had found. The man who believed in trying got the peas which he had eaten; the other got the diamonds.

The minister then said, "Sire, there may, you see, be luck, but it is as rare as peas mixed with diamonds, so let none hope to live by luck."—An Eastern Fable.

Teaching Him a Lesson.

The new mail carrier on the rural free delivery route glanced at the name on the letter box by the roadside, stopped his horse and spoke to the roughly attired farmer with the old slouch hat who was resting his sun browned arms on the gate and looking at him.

"I see," he said, "your name is Holmes."

"Yes."

"Beverly G.?"

"Yes, I'm the man that lives here."

"Any relation of Sherlock Holmes?"

gravely asked the carrier.

"No, sir," answered the farmer, "but I'm detective enough to know that you're not a very good judge of human nature. You took me for an ignoramus because I've got my old working duds on. I'm Sherlock Holmes enough to look at a man's face and eyes before I size him up as a— Some mail for me? Thanks."—Youth's Companion.

Men and Their Feet.

The Frenchman's foot is long, narrow and well proportioned. The Scotchman's foot, according to anthropologists, is high and thick, strong, muscular and capable of hard work. The Russian's foot possesses one peculiarity, the toes being generally "webbed" to the first joint. The Tartar's foot is short and heavy, the foot of a certain type of savage, and the toes are the same length. The Spaniard's foot is generally small, but finely curved. The Englishman's foot is in most cases short and rather fleshy and not, as a rule, as strong proportionally as it should be.—Argonaut.

Javelle Water.

Wherever water is used in preparing bleaches it should be soft. The alkali in hard water affects all chemical substances. Javelle water is a standard preparation for bleaching white things and removing spots and stains, but it must not touch colored surfaces. To make it dissolve half a pound of washing soda in a pint of boiling water and mix it with a quarter pound of chloride of lime dissolved in a quart of boiling water. Stir well, let settle, pour off the clear liquid and keep closely corked in a dark place.

A Nose For the Truth.

Exact truthfulness, according to a writer in the London Sketch, had its proper reward in the following instance:

Teacher—Now, can you tell me what the olfactory organ is? Boy—Please, sir, no, sir. Teacher—Quite right.

Tough Skin.

Gunner—And now comes a professor who declares that fruit is just as healthy with the skin on as it is peeled. Guyer—"H'm! I'd like to see somebody start him on a diet of pineapple."—Chicago News.

Great thoughts reduced to practice become great acts.—Hazlitt.

-- THE CLOTHIERS --

THE DIAMOND CUTTER.

His Skill Has Much to Do With the Brilliancy of the Gem.

When the expert looks at a diamond he can tell you in a moment where it came from and even whether it was cut lately or some years ago. He knows by its color whence it comes, for the color of the Brazilian diamond differs from that of the South African, and even in South Africa different colors are found in different mines.

In the rough the diamond has little brilliancy, for there is a crust that must be cut away before it can properly refract the light, and it is this power of refraction which makes the brilliancy of a diamond and has everything to do with its value in the market. The skill of the diamond cutter has much to do with bringing out this brilliancy. He must do the most he can with the rough stone before him and lose as little as possible of the precious weight in the stone.

Diamonds are found in all kinds of queer shapes, for the carbon may be in any position while being crystallized, and the act of crystallization may affect only parts of that carbon. When the expert cutter has a rough diamond before him he judges almost instantly how it will cut to the greatest advantage. If it inclines to the pear shape he will make a pear shaped diamond of it. If it be square or round the cutting will follow the natural lines as closely as possible, so that the loss may be reduced to a minimum.

To make the stone as brilliant as possible the diamond cutter cuts many facets so as to refract the light from as many points as he can. A full cut brilliant has at least forty-eight facets, and so expert are the cutters that they often cut diamonds so small that it requires a hundred to weigh a carat. Each has forty-eight facets.—Cleveland Plain Dealer.

SARATOGA'S SPRINGS.

The Water Was First Used by the Indians as a "Cure."

The Saratoga Springs "cure" antedated the settlement of this community by the white man, when the High Rock spring was only a bubbling springlet, drunk at first by the Indians as a fresh water spring. Finding that their health was improved by the water, they bethought them that it must have medicinal qualities, and from that time all sick Indians were brought to High Rock spring for the healing of their ills. The "outward and visible sign" that impressed the red men was the deposit of the salts of the water about the spring in the form of a cone, called tufa, which still exists and from which it received its name and through and over which the water bubbles to this day.

In 1800 the Congress spring was discovered and became renowned the world over as a saline cathartic. This, combined with the sulphurous iron water of the Putnam spring, made Saratoga Springs famous as the leading health resort of the United States. The remainder of the thirty-five mineral springs were discovered from time to time, and all have a wide therapeutic application in the treatment of almost all chronic diseases and are divided into four groups according to their component parts. These groups are: First, sodic, muriated, alkaline, saline, cathartic; second, sodic, calcic, muriated, alkaline saline; third, chalybeate; fourth, sulphur.—National Magazine.

Living Over Catacombs.

Paris, in many of its districts, is built over the catacombs, says Harper's Weekly. These vast subterranean chambers and galleries produce that peculiar cavernous sound which is heard in the Luxembourg, Montparnasse, Vaugirard, Montrouge and Montsouris quarters when heavy carts pass rapidly along the coarsely metalled roads. The streets are then like monstrous drums beating funeral marches to the grave over that vast common grave of ten centuries of Parisians with its millions of skeleton dead. That quaint little Gothic house at the corner of the Boulevard Raspail, which many an American artist must remember from his student days, actually has a private staircase leading to the catacombs from beneath a hermetically closed stone slab just in front of the doorstep.

Lincoln as He Knew Him.

Asked under the civil service rules to write what he knew about Abraham Lincoln, an applicant for the police force of New York wrote: "Abraham Lincoln was born in Kentucky at a very early age. His father moved the family to Ohio, floating down the Mississippi. If he had not been killed by a murderer he might be living today. He was an intelligent man and could easily have been president of New York city."—Ladies' Home Journal.

Needed Airing.

"What's the matter with you?" demanded Borem hotly. "I've got a right to air my opinions, haven't I?" "Oh, of course," replied Brightly. "They're so stale and musty they certainly need something of that sort."—Philadelphia Press.

Suspended.

"I have decided to suspend your sentence," the judge began. "For the Lord's sake, judge, you don't mean to say lifting a few chickens is a hanging matter?"—New York Herald.

Rare Exception.

"I rather pride myself on one thing," said the young father. "Although I have the brightest, smartest, cutest, best youngster I ever saw, I never brag about him."—Kansas City Times.

CARRIER'S FRIEND CITY MAIL BOXES

Protect your mail when delivered by the carrier and no one at home. This box is provided with lock and key and is water and fire proof. Samples on display at

NOT ALWAYS CHEAP, BUT ALWAYS BEST. WE CAN PROVE IT TO YOU

The cheapest electric work is very often expensive. Your lights get poor and you finally have to fix. Get it right. The cheap fan is troublesome. The poor grade of irons soon scale off and cost more in the end to buy current than a good one will to start with. Remember one thing—we absolutely guarantee anything from this office.

Wichita Falls, Texas, August 11, 1932.

WEATHER FORECAST.

For Wichita Falls and Vicinity
—Tonight and Thursday, partly cloudy weather.

Senator Stone has been criticised for hitting the dining car waiter. If the latter specimen of Ethiopian insolence compares with his associate, the Pullman porter, slapping is justified under all conditions, on general principles.

Seeing that Wichita's location is almost ideal and knowing that the donations would be magnificent, the other normal contestants grabbed at a straw and commenced talking about "Wicked Wichita."

The normal committee managed to convince the locaters that oil, not beer, was used to sprinkle Wichita's streets; also that we rarely had more than three or four murders a night.

As we write, the melodious clink of steel on steel by the street car gang in front of the office sounds sweeter than almost any other clinking sound we have ever heard.

"How It Feels to Be Shot" is the title of a recent magazine article. There are a great many who could tell how it feels to be half shot.

There is considerable discussion over the effects of the tariff bill. We hope to see some very lasting effects of it in November, 1932.

The Wichita team demonstrated to Farmersville what would happen if an irresistible force meets an immovable object.

What's the matter with getting a strangle hold on one of those experiment stations while the committee is in Fort Worth?

Lodge No. 635 A. F. & A. M. of the Wichita Falls

WISCONSIN CELEBRATES

275th Anniversary of Discovery Appropriately Observed.

Green Bay, Wis., Aug. 11.—This city is crowded with visitors from all parts of the State and from the surrounding States, who gathered here to attend the celebration arranged by the State Historical Society and the Green Bay Historical Society, to mark the 275th anniversary of the discovery of Wisconsin by Jean Nicolet. The celebration, which was informally opened yesterday, will close tomorrow and is attracting considerable attention among those interested in the history of this State and of the Lake Region in general. The main features of the exercises are the unveiling of a bronze tablet at Red Banks, where Nicolet first met the Winnebago, tribe of Indians, and of another tablet at the site of the old French Fort St. Francis and the English Fort Edward Augustus and the opening as a public museum of the Tank cottage, the oldest building now existing in Wisconsin, which was erected in 1766.

The Plymouth colony was but fourteen years old when, in 1634, Samuel de Champlain, then Governor of New France, as Canada was called under the old French regime, sent Jean Nicolet, a trader, who had lived in Quebec many years, to explore the region of the upper Great Lakes. Champlain had been given by a chief of the Ottawa tribe, who was then visiting the fur market in Quebec, a large piece of copper, which, he told his French host, was from the shores of a great Lake in the West. In later years it was ascertained that the copper came from near Ontonagon, in the upper peninsula of Michigan, on the shores of Lake Michigan. Champlain had also heard that in the region of the upper lakes there dwelt a curious tribe of men, who had come from a great salt water still further west. Champlain was anxious to find the copper mine from which the piece of metal given to him had come and was also interested in the mysterious tribe, which he believed to be Chinese. His belief was due to the fact that he was under the impression that the American continent was either a part of Asia or connected with it by land.

Taking with him several Huron Indians to paddle his canoe, Nicolet passed through Mackinac Straits and reached the shores of Green Bay, where the strange tribe was reported to live. Nicolet, who was an experienced woodsman and well versed in the habits, customs and languages of the Indians, expected to find Chinese and was greatly disappointed when he found that the mysterious tribe, which lived near Red Banks, a high cliff on the eastern shore of Green Bay, were Winnebago Indians, an offshoot of the Dakota tribe. It was later ascertained that the report of their coming from a great salt water in the far west had originated from the fact that the tribe had once lived near some salt springs in the Winnipeg country, from which they derived their name.

After visiting Green Bay Nicolet ascended the Fox river to a point beyond its passage through Lake Winnebago and then turned southward, probably passing the present site of Chicago, and returned east by way of Lake Michigan. His stories on his return to Quebec to the effect that he had been on a river that would have taken him to the sea had he kept on it three days longer, led the Jesuits to believe themselves on the eve of discovering the long-sought outlet to India.

OCCASION OBSERVED.

St. Louis Centennial Celebration is a Center of Attraction.

St. Louis, Mo., Aug. 11.—Preparations are rapidly progressing for the coming centennial of this city, and the event is arousing great interest throughout the country, especially in the middle west. The program for the centennial celebration, which will be held here during the week from October 3 to 9 of this year, to commemorate the one hundredth anniversary of the incorporation of St. Louis, has just been issued and gives interesting information concerning the numerous features of interest which promise to make centennial week the most remarkable period in the history of the city since the close of the Louisiana Purchase exposition.

Balloon, airship and aeroplane races, under the auspices of the Aero Club of St. Louis, host of the Gordon Bennett International Balloon Race of 1907, will be among the most spectacular features of the celebration. Valuable prizes will be contested for at each one of the races. Another interesting feature will be the various pageants by which the history and progress of the city since its foundation will be incorporated. There will be a water pageant, a municipal pageant in honor of the laying of cornerstones for municipal buildings to cost \$1,500,000, an educational, historical and military pageant, culminating in the cornerstone laying of the city's new \$1,000,000 public library, an industrial parade, the Velled Prophet annual pageant with special centennial features and a centennial carnival in the downtown streets.

Thick Rich Soups

To Your Order

Perhaps you are one of the few people who still have a little suspicion about canned soups. It is a good idea to be very careful what you eat, in fact, you can't be too careful, but you know from long experience that canned fruits and vegetables are not only perfectly safe, but the best brands are of much better quality than most of the fresh material you can get and what is more the cost is really less for canned goods. This is also true of Heinz's canned soups. You will find it quite difficult to duplicate the wholesomeness and excellent flavor of these soups, of which we have Heinz's Tomato Soup at 12 1/2c, and Campbell's assorted soups at 12 1/2c. They come in about 14 ounce cans and if too thick can be thinned by adding a little water. Better get a half dozen assorted cans.

helps to build another city in-
stead of your own."
"Why not help build your
home city with home money?"

Outside the Big Fence.

Manager McCloskey of Milwaukee has signed Jack Warner, the old New York catcher.

Eddie Karger, the old Cardinal pitcher, is making a nice showing with the Boston Americans.

Pitcher Durham, who was given a trial by the Giants, has been turned back to Toronto by the Columbus club.

It begins to look as though the Detroit Tigers will have the fight of their lives to cop the American league pennant.

Frank Allen, the Southern college pitcher secured by Detroit, struck out eighteen men in a recent game at Memphis.

It is now said that both Cleveland and Pittsburg will be invaded by the American association next year.

The Denver team of the Western league recently made twenty-five hits in one game and scored ten runs in one inning.

Jack Dunn and his Baltimore team are leading a dog's life in the Eastern league. Every team in the league is putting it over the Orioles.

Roger Bresnahan is able to sleep like a kid now that his St. Louis Cardinals are winning their share of the games.

The New York Americans have taken quite a brace since their return home. Taking a brace helps, but taking games is a pie a la mode.

There was a time when major league clubs carried but one pitcher. Now-a-days one can see three or four flingers used by a team in one afternoon.

Christy Mathewson was lucky in the opening game of the last series at Cincinnati. The Reds secured 15 hits off the Giant star, but lost the game 7 to 6.

Rumor has it that a big shakeup is due in Washington. It seems they have a baseball team in the national capital managed by one Cantillon, Sir Joseph Cantillon to be exact, but the fans of Washington are not sure.

Umpire McLaughlin, who was chased six or nine miles by Lynn, Mass., fans the other day, has a voice that gets 'em going and coming. With a crash that sounds like the drum, cymbals and heavy brass you hear the word "ball" followed soon afterward by a roar that is intended for "strike," but more resembles the old rusty hinges on the back gate.

Notice.

Merchants and shopkeepers are hereby notified not to sell my boys anything and have charged to my account without a written order from me, as I shall, in the future, refuse to pay accounts made by my boys without authority from
F. A. SMITH.

Card of Thanks.

Plumbing

I have had 17 years practical experience in the plumbing business and am the only practical man in the plumbing and heating business in this city. Will be glad to figure with you on anything in my line. Will give a strict guarantee, if necessary, on all work. We can furnish you with goods made by any of the leading manufacturers of the United States.

Am now making a special price of \$22.50 on Porcelain Bath Tubs, which can't be bought for the money by any of my competitors.

Will open up for the present at Abbott Paint Co., corner of Eighth street and Ohio avenue.

W. W. Coleman.

Pickles that Always Taste Good

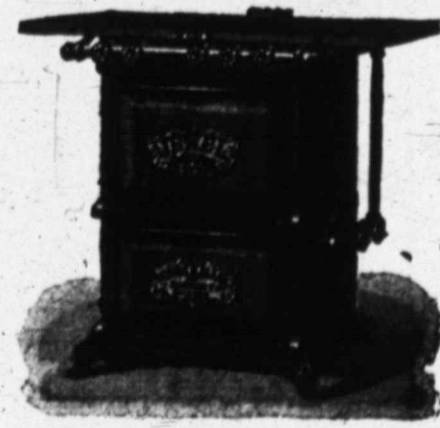

One reason that you lose your taste for certain articles of diet is that you get the wrong brand. It doesn't eat good and you don't care for any more. This is true of some pickles, but not of the "Heinz-Made" variety. Heinz pickles always meet your expectations because they are made of only the most carefully selected vegetables, seasoned to a queen's taste and packed with painstaking care. They are uniform in size and color. They are spicy, crisp and appetizing. You buy them first because they look so good; you buy them afterward because they taste so much better than others. We have both sweet and sour in bulk or bottles to suit your needs.

THE SAFFRON PLANT.

It is Among the Very Oldest of the
Vegetable Products.
The particular species of crocus that
has from time immemorial been cul-
tivated for its dried stigmas, a product
known under the name of saffron, is
Crocus sativus, which is wild from
Italy to Kurdistan. Saffron may be
reckoned among the very oldest of
vegetable products, being alluded to in
the Song of Solomon among other
spices of Lebanon. The name crocus
is Chaldean or Greek and was first
used by Theophrastus of Eresus about
350 B. C. and that it was a well
known and admired flower in Greece
soon afterward is shown by Sophocles,
who mentions the "crocus of golden
beam" in his "Cedipus at Colonus."
The word saffron seems to be a cor-
ruption of the Arabic name "al zahafa-
ran," and the product itself was first
imported into England as a spice or
condiment, being also used as a color
or dye for silks and other fabrics of
the eastern looms.
At a later date, exactly when is not
known, the plant itself was cultivated
in England, more especially in Essex,
in which county the name of Saffron
Walden remains in evidence of the
fact. Again, we have in London Saffron
hill, which formerly was a site
included in the bishop of Ely's garden
at Holborn, once famous for its saf-
fron beds as well as for its strawber-
ries. Today, however, saffron is but
little used.—London Chronicle.

The Key Under the Door.
"It is customary for the back door
key to be put halfway under the door
so that I can reach it when coming
off duty late at night," remarked an
artist to a London Tit-Bits writer.
"The other morning at breakfast my
landlady said to me, 'Do you know, I
had an awful fright last night. I put
the key halfway under the door, as
usual, when, to my horror, I saw it
drawn slowly out of sight. I of course
thought some one had got the key and
would unlock the door and come in,
so I quickly bolted it and shouted
through the keyhole, 'My word, if you
don't bring that key back!' Not daring
to retire to rest, I sat quietly listening
for a time. Then I got a table knife
and pushed it under the door to see if
the key had really been taken right
away and to my surprise drew the key
back again. So, very cautiously, I un-
locked and unbolted the door, looked
out and found not a burglar, but our
own wicked cat, who, while sitting on
the doorstep and seeing the key pushed
under the door, must have drawn the
key out of sight with her paws, think-
ing I was playing with her."

An American Joke From England.
The typical American, says a con-
tributor to the English Illustrated
Magazine, although partial to making
jokes, is often quick tempered and un-
able to recognize a joke made by an-
other, with results that are sometimes
unpleasant.
Thus, a senator was once at a fash-
ionable dinner party at Washington
when he was asked what fish he would
take.

"Waal," he said, "I reckon I'll take
plaice."
A wit who chanced to be present re-
marked, with a twinkle in his eye,
"Ah, senator, still a plaice seeker?"
"Yaas," answered the senator, at the
same time whipping out a revolver
and shooting the wit dead, "but what's
that to you, you dern'd stranger?"
Afterward, when the joke was ex-
plained to him, the senator confessed
that he had acted rather hastily, and
to show that he bore no grudge he
went to the funeral of the inopportune
wit.

A Queen Elizabeth Joke.
Queen Elizabeth liked her jokes, and,
although her pleasantries were of a
less sanguinary turn than her father's,
she must have been even more for-
midable than usual when disposed to
be frolicsome. A tale may be found
in one of Lord Essex's letters with
regard to a new dress belonging to one
of her maids of honor, over the pos-
session of which the owner had been
rash enough to exhibit some elation.
The young lady, it seems, was several
inches taller than her majesty, hardly
perhaps quite a nice or loyal thing to
be. Having desired that the dress
should be made over to her custody,
the queen, first carefully selecting an
extremely wet day, was pleased to put
it on and trail it for yards behind her
in the mud, the owner of the humil-
iated garment having to appear as
delighted with the royal fun and con-
descension as the rest of the lookers-
on.—London Tatler.

And All With Company There.
"Now, children," said the mother as
a whole roomful of company had come
in, "suppose you run off and play by
yourselves."
"All right, mother," replied Edith.
"Can we go up and play Hamlet and
Ophelia?"
"Certainly," smiled the mother, while
her guests looked on at the tableau.
"Goody," replied Edith. Then, turn-
ing to her sister, she said, "Now,
Maude, you run up to mamma's room
and get all her false hair that you can
and"—Ladies' Home Journal.

ENCAMPMENT CONTINUES.

**G. A. R. Veterans March Again at Salt
Lake City.**
Salt Lake City, Utah, Aug. 11.—The
largest crowd ever assembled in Salt
Lake City thronged the downtown
streets this morning and witnessed the
great parade of veterans, the specta-
cular feature of the Grand Army na-
tional encampment. With flags flying
bands playing and crowds cheering,
the thousands of survivors of the army
in blue took part in their forty-third
encampment parade. Offices, stores
and factories throughout the city were
closed and the people made the occa-
sion a holiday.
The column started shortly after 10
o'clock. Along Main street for the dis-
tance of a mile the parade counter-
marched and was reviewed by the of-
ficials of the State and city and many
distinguished guests representing all
sections of the country. First in line
came a squad of mounted police, fol-
lowed by the grand marshal and his
staff. Commander in Chief Nevius
and invited guests followed in carri-
ages.

You Had Better Not Risk It.

If you're figuring on buying a bill of lumber, and you think
that the quality of lumber, and the prices, are all about the
same, and that it won't make any difference whether you get our
prices or not, just take this tip and don't risk it. We've got
the best stock of lumber in these parts and we're making some
mighty attractive prices. So you'd better get an estimate from
us before you buy elsewhere.
No matter what you want, we will be pleased to quote you
our best prices, and serve you promptly and satisfactorily.

Drew's Famous Discovery & Invention

The Acme Lamp Radiator

WITH GAS JET AND ELECTRIC ATTACHMENT

Patented in the U. S. March 30, '09, patents pending in Foreign Countries. \$5 to \$8 per day for those who work. \$12 to \$15 per day for extra hard workers and extra good salesmen. An honest, pleasant and exceedingly profitable business can be done at home or traveling

Price, plain . . . 50c each

Nickel plated . \$1.00 each

Some of the purposes for which it may be used.

- Makes a Stove of the Lamp or Gas Jet.
- Warms the Bath Room, Hall or Bed Room.
- Heats Water in 5 minutes 175° F.
- Bolts Water in 7 minutes.
- Indispensable in Sick Room for Warming Liquids, Diets, and Medicines.
- Roomers, boarders and light housekeepers will find it most convenient for cooking small meals in the room, making Tea, Coffee, etc.
- A necessity and luxury for men who shave themselves to get hot water quickly.
- Students at boarding schools and colleges will find in it a pleasure and convenience, as it meets all the requirements of the Chafing Dish.
- With the Electric Attachment, it can be used for heating the Iron for pressing purposes, thereby saving the expense of purchasing an Electric Iron.

It is the most remarkable invention ever put on the market considering its great simplicity, and fills a long felt want for all general household purposes requiring a small, convenient and effective heating apparatus. It is easy to apply, fits all sizes of Lamp Chimneys. Fits Gas Jet with mantle burner. Fits ordinary Gas Jet (with the extra attachment.)

Guaranteed to produce no smell or odor, and will not smoke. Practical, economical, durable, simple in construction and will last for years. No one can afford to be without it; especially

Individual Responsibility of the Company Over \$100,000.00.

those who use Coal Oil Lamps, as it not only costs absolutely nothing to operate it, but actually increase the value of the oil consumed ten fold, and does not interfere with the light furnished by the lamp. It is a well known scientific fact that but a small portion of the oil consumed by an ordinary lamp actually goes to furnish light, the major portion, 87 to 90 per cent, being dissipated in the form of heat. This Radiator, being made in the shape of a heating drum, concentrates and conserves all the heat generated by a lamp, so that it may be employed to aid in warming a room, heating water, cooking, etc. To produce the greatest amount of heat use the Round Wick Lamp. We guarantee it to boil a pint of water in seven minutes on Round Wick Lamp.

We want agents--MEN OR WOMEN

In all parts of the United States. We want agents, both men and women, to make a house to house canvass, selling Drew's Acme Lamp Radiators. No housekeeper will turn it down, if its great advantages are properly presented. Any man or woman with ordinary ability and intelligence can sell them--previous experience is not required.

Agents require no license

Justice Bradley of the United States Supreme Court, decides the license tax on agents unconstitutional. No agent therefore, is subject to any license for taking orders for our goods. In some cities, however, if you sell, collect and deliver at the same time, you would be subject to a small tax, usually called "peddlers' tax." In such cases we advise you to take orders as our agent, and make your deliveries

at another time, unless you prefer to pay the peddlers tax, and think it would facilitate your business to do so. This however, is not necessary, as no tax can be imposed upon an agent in any state, besides it is frequently best to take orders for several days and then take a day for delivering and collecting.

Agents' profits

How much money can you make? This we cannot tell until you try. We do not claim that every man or woman can make a fortune in the business, but we do know that any one who will make an effort can make from \$5.00 to \$8.00 per day. This can be done working half the time. Hard workers and energetic salesmen who canvass closely and work early and late can positively earn \$12.00 to \$15.00 per day. We allow a good margin of profits for agents. See our special wholesale price list for wholesale dealers and agents only, and figure it out for yourself. Also get a list of our testimonials and read them.

How to get started--Only a few dollars required

It is not necessary for agents to purchase a large quantity of the Radiators at first; they may order only one dozen, or even a half dozen to begin with. We think it advisable, however, to order at least one dozen--half plain and half nickel plated--which can be shipped by express for a small sum, and then place a large order to come by freight. There need not be an outlay of over \$5.00 to \$10.00 to start you in the business, and then you run no risk, as we absolutely guarantee the sale of the goods, or money refunded. See guarantee on price list.

PILGRIM MEMORIAL.
Erection of Giant Cross at Marshfield Hills, Mass., Proposed.
GREATEST OF MONUMENTS.

Striking Feature Suggested For Celebration of Three Hundredth Anniversary of Landing of the Pilgrims. Grand Electric Display and Searchlight Planned.

A "historical and moral celebration" of the three hundredth anniversary of the landing of the pilgrims is proposed for 1920 by Alvin A. Vinal, who is a descendant of the pilgrims, a member of the Pilgrim society and a former member of the Society of Mayflower Descendants. In plans which he has prepared for the event Mr. Vinal suggests the heights of Marshfield hills, Massachusetts, where he is a resident, for the celebration, which he thinks would be good for Boston as well as Plymouth, since it would attract visitors from all over the world. "Trinity hills," he says, "are the highest land in Plymouth county, overlooking all the pilgrim land and bay from Cape Cod to Boston. Miles out at sea and inland the exposition buildings would show to enticing advantage, especially to shipping passing in and out of Boston. An electrical display is one of the great charms of modern expositions; and buildings on these great elevations in one blaze of glory at night would be one of the greatest sights ever witnessed. On the bay itself the navies of the world could meet and view the whole exhibition. Here are great springs, guaranteeing the purest water supply, with ample river power for the electric display and power for the exposition. Two great lakes can easily be made, and there are wooded groves for park purposes. "Among other features in commemoration of this great anniversary celebration I propose a great monumental permanent cross of stone and steel, the tallest in the world, to stand for all time and be the great feature of the exhibition. From the top and arms will be the grand lookout over the pilgrim land and water of Massachusetts bay, to which the people will come for all time. The cross will be one blaze of electricity, making at night the most sublime display ever witnessed. When surmounted by the largest searchlight its beauty and meaning would be impressed forever on passengers on the foreign steamships passing to and from Boston.

The grounds of the exhibition are to be laid out in the form of a cross. Mr. Vinal also suggests the erection on one of the hills by the churches of the world of a permanent church of stone containing the largest meeting room in the world to be devoted to "historical meetings and addresses by the great revivalists, preachers and lecturers of the world," with "great chime bells pealing from its tower the anthems of the pilgrims. A great white stone, the only one of its kind known, typical of the event, should be the pulpit on which will rest the baptismal basin, to be the baptismal tank, for here thousands will desire to be baptized into the larger life.

"On another hill will be the greatest wireless station and a water tower supplying the exhibition. On the plateau will rise the great hotel and roof garden built by gifts from the hotels of the world, the Puritan building donated by New England families and containing their exhibits, a great religious museum contributed to by all the world and built by the county of Plymouth, a great electrical plant built so as to make a great lake, damming North river and giving great water power such as such an exhibition will require. On the lake will be enacted daily the parting, sailing and landing of the pilgrims in a ship representing the Mayflower."

It is proposed by Mr. Vinal that the cross, to cost \$1,000,000 or more, according to the response, be built by contributions of \$5 each from the churches of the world, a souvenir gold cross being issued to each contributor. To enliven a cross with a diamond in the center at \$25 each will be issued. For contributions to the ex-

OFFICIAL ON TRIAL

Commissioner Shively of Washington Faces a Serious Charge.

Olympia, Wash., Aug. 11.—The Washington legislature met in special session today to sit as a court of impeachment for the trial of State Insurance Commissioner John H. Shively, against whom charges were filed last June following a sensational investigation of the affairs of the State Insurance department by a committee appointed by the legislature. The case against Commissioner Shively is the outgrowth of political scandals which have stirred the State of Washington for many months past and in which charges of alleged mismanagement and dishonesty in the conduct of various departments of the State government have been freely made.

The articles of impeachment against the State insurance commissioner contain nearly thirty counts in all. First and foremost among the charges is that of perjury, alleged to have been committed before the Spokane county grand jury in connection with the financial status of the Pacific Livestock Association. In the most of the other counts the insurance commissioner is accused of having conducted himself in an arbitrary way and of being guilty of extortion. Under the head of extortion he is charged with having on various occasions accepted money to permit insurance companies to do business in the State.

Georgia Agricultural Society.
 Quitman, Ga., Aug. 11.—In point of attendance the annual meeting of the Georgia State Agricultural Society, which assembled here today, is one of the most notable gatherings of its kind ever held in Georgia. Delegates from every county faced President J. J. Connor, when he called the convention to order this morning. Reports from the various committees, including that on the revision of the constitution, were presented and discussed. The program prepared for the subsequent sessions, which will continue through tomorrow, provides for papers, addresses and discussions covering a wide range of subjects of interest to the agriculturalists.

Ankle Fractured.
 In stepping from the front porch at the home of Judge Carrigan last night, Mrs. W. Y. McCune, a neighbor, fell and sustained a severe fracture of one of her ankles. Dr. Burnside was called to attend her injuries.

Galveston Demands Player.
 Galveston, Tex., Aug. 11.—The manager of the Galveston team demands the return of Right Fielder Corkhill, traded to Houston for Pitcher Blakeney and a hundred dollars, because Blakeney refuses to play with Galveston.

That mixed tea sold by D. B. King makes delightful iced tea. Phone 261.

Quick, Cheap and Easy Gas Cooking

You can't appreciate the saving in time, temper, and money effected by a **FAVORITE GAS STOVE** until you have used one. It is as great an improvement on a coal stove as the latter is on the old fashioned fire place. At the touch of a match it gives an intense heat just when you want it. Instantly controllable. No smoke, no smell, no coal to bring up, no ashes to carry out, no uneven temperature, no fallen cakes or pies, no delayed meal. Not necessary to change your nice dress; everything clean and tidy. We sometimes take in your old stove as part payment.

CALL AND SEE US

Wilson Hardware Company

Cor. 8th St. and Ohio Ave. "HARDWARE OF QUALITY" Wichita Falls, Texas

We Are Roasting Something Extra Fine In a 35c Blend

It's composed of 60 per cent fine, Old Government Java—
 20 per cent Bogota and 20 per cent Maracaibo—
 These goods are roasted separately and blended while hot.
 This is the correct way to blend, but very few blenders do it that way.
