HOW ROAD CAME TO BE TRANS-FERRED TO THE YOAKUM-HAWLEY INTERESTS.

PEACEFUL

Joline Retired Voluntarily and Nothing Sepctacular Was Noted In the Transaction.

Formal announcement has been made of the transfer of control of the Missouri, Kansas and Texas Railway Company to Edwin Hawley, B. F. Yoakum and their associates, thus adding another road to the Hawley group of properties, which now includes the Chespeake and Ohio, the Missouri, Kansas and Texas, the Iowa Central, Minneapolis and St. Louis, Chicago and Alton, the Toledo, St. Louis and Western, and the Chicago, Cincinnati and Louisville. The transfer of the latter property has not been formally made yet to the Hawley syndicate, but negotiations for securing its control have been virtually completed. At the office of Edwin Hawley in

"A large interest in the Missouri, Kansas and Texas railway has been purchased by Edwin Hawley and B. F. Yoakum, which, in connection with that of Speyer and Company, gives them a predominating strength in the

New York the following statement was

'This adds another important territory friendly to the system which Mr. Hawley has, by the purchase of the Chespeake and Alton properties, created within the last few years, and is an important factor in the strengthening THE ALARMING INCREASE OF of all. Mr. Yoakum's lifetime work has been in building up and developing the Southwest. This road serves that territory and his connection with it will both aid in the development of the property and the building up of the country which it serves.

Mr. Hawley's and Mr. Yoakum's relations have always been friendly in railroad properties, and this only brings them together in a more concerted and effective way."

Yoakum's Participation.

It is learned from an authority close o the Rock Island interests that Mr. Yoakum's participation in the purchase of the Missouri, Kansas and Texas is of a personal nature, and does not involve the Rock Island system as Wichita's corporate entities. It is pointed out that, under the present laws, the Rock Island company as a corporation would not be permitted to exercise control, even jointly with the Hawley interests over the Missouri, Kansas and Texas, as the line of the latter company in some respects are parallel, competing A complete line of up to date with lines of the Rock Island system, Saddies and Harness made by notably the St. Louis and San Fran-

> The fact that Mr. Yoakum becomes an important factor in the Missouri, Kansas and Texas, however, is taken as indicating that close reciprocal relations will be established between that road and the Rock Island line. Both properties are in a position to benefit from interchange of traffic.

There is also reason to believe that so far Mr. Hawley's participation in the joint purchase of control of the for kidney trouble but did not improve Missouri, Kansas and Texas is also of a personal character and does not directly involve a merger or consolidation of that road with any of the other properties controlled by the Hawley take place in the future, however, is admitted to be a possibility, but so far I had to give up trying to work." as can be learned no plans with that object in view have yet been formulat-

Edwin Hawley, when asked how the Texas had been acquired, stated that the stock had been purchased both in the market and through outside negotiations. Asked if the Dutch holders of the stock had parted with any of it, he said: 'I imagine they did. A great deal of the stock was purchased on the other side."

President Joline Resigns. Adrian H. Joline, president of the Missouri, Kansas and Texas Railway Company, made public the following statement: 'It has been manifest for a long time that the Missouri, Kansas and Texas system must eventually be allied with strong railroad interests in order that the property might develop and its business be increased. have occupied the position of president for the last three years, in the expectation that some alliance beneficial to the property would be made. Messrs, Hawley and Yoakum, and also the Speyer brothers, who have been financial advisors of the road for some years, have acquired such an interest as, in my judgment, renders it desirable that they should assume charge of the acive management. Accordingly, I have resigned the chairmanship and presi-M. SIMS. PROP dency, and the members of the executive board, except Mr. Potter, who is abroad, and Mr. Wallace of the Cen- Quality Druggiets

tral Trust Comptny, who remain, are resigning. Mr. A. A. Allen, for many years the able general manager of the company, will succeed me as president, and Mr. Edwin Hawley will become chairman of the board."

The Missouri, Kansas and Texas, Hawley's latest acquisition, may be said to have been virtually the only railroad property of considerable size in the United States which had been operating entirely independent of all other systems.

The man who accepts a nomination at little letter to make "Harmony" the hands of his party, and rides into office on the party's platform, adopted in regular convention, owes it to those who voted theticket to carry out in so far as possible the demands of his party. When he fails to do this, in the humble judgment of this paper, he is the enemy and not the friend of the membership roll at the first opportunity.

Governor Harmon of Ohio, has demonstrated to the satisfaction of most democrats that he is the man for them to tie into and make their standard bearer for president in 1912. He is the one man who can harmonize the democratic forces and receive their undivided support, and the one manthe one leading democrat who can carry a sufficient number of the so-called doubtful states to elect him president, if such a thing as electing a democrat to the presidency is possible. That he is a candidate for the democratic presidential nomination, there seems no longer a doubt. He is the choice of Mr. Bryan, and with Bryan's influence he can secure the nomina-

FOR COMMISSION FORM.

Mayor of Spokane Wants Special Called For It.

Spokane, Wash., Oct. 19 .- Tired of the bickering among the members of his party, and should be dropped from the city council and the board of public works which controls the street, bridge, park, water, sewerage, police, fire and other departments, Nelson S. Pratt, mayor of Spokane, will issue a statement to the electors in a few days, declaring himself in favor of the commission form of government, also offering to shorten his term, which expires in May, 1911, by stepping out of office following a special election.

'It will be squarely up to the people," Mayor Pratt said in an interview 'as they have it in their power to bring the matter to an issue at a special election, which could be called for next May. Mayor Pratt, democrat, was elected last May to succeed C. Herbert Moore, republican, who is now touring the United States with the honorary commercial commissioners of Japan, and has been active in carrying out a reform platform. However, he has been handicapped by the opposition encountered in the council, which ousted several of his appointees to responsible positions and also hampered the various departments, thus delaying several million dollars' worth of street bridge and other public work.

Takes Bran's Side in the Tariff Controversy.

Cameron, Tex., Oct. 19.-Congressman Rufus Hardy yesterday delivered a speech on the tariff, taking as his text the tariff controversy between Bryan and Bailey. He took the Bryan side of it all the way through. He criticised Senator Bailey for his socalled attack on the Denver platform.

Enthusiasts here in Texas say this state's cotton fields will make at leats 2,500,00 bales this year. The best official reporters are unable to see more than 2.500,000 bales, and some of them say the total may stop as low as 2,000,000. Arkansas, Oklahoma and Louisiana, like Texas, have suffered heavily by reason of

As To Cotton and Wheat,

That state, according to official estimates received in Texas very recently interest you. Call on Edgar Rye, at the is likely to make 2,000,000 bales this 131-tfc year, pressing Texas closely for first place among the cotton states. The total American crop may go as high as 12,000,000 bales; it is more likely to be in the near neighborhood of

11,000,000.

That looks like cotton ought to go to or above 15 cents on its merits. But it seems there is no price limit above which spinners can't afford to go. That they have pretty nearly reached this limit is evidenced by their decision to shorten sail, in the Carolinas, Georgia, Rhode Island and Massachusetts. Liverpool not only set the price of the staple, but it also sets the example for American spinners, to a considerable extent.

American wheat growers are make ing a mistake, too, holding their cereal for higher prices when they can get a dollar a bushel. Europe has put aside the idea of eating much wheat bread for awhile and is grinding its rye and barley. Foreign exporters do not want American wheat at its present price, and with good reason. A good many, probably a majority of the men that are holding their wheat for prices higher than present quotations. will evtnually sell for lower. The farmer that sells his crop promptly, for fair to middling prices, pays his debts and stops interest, then puts the balance of the money in the bank and begins drawing interest, is the man that most often makes farming a profitable business. The farmer is a constant gambler with the weather; when he begins gambling with the market also he takes on more than he can carry. as the rule. Texas cotton ought to bring the farmer 15 cents a pound, it will bring that, here in the local markets, when Texas growers, co-operating with expert Eastern cotton cloth manufacturers, help to finance cotton cloth manufacories situated close to the cotton fields. And the carriage of raw cotton to New England or old England, and back to Texas in the manufactured form involves a large and costly waste of time, labor and money. The farm crop holding campaigns now in progress are pinching the shipping interests. Our export trade in cotton and food stuffs is at a low ebb. There is at all our great ports, Galveston included, a distressing surplus of idle shipping. Cotton is now being carried from Galveston to Bremen at 8 cents a hundred pounds, net-scarcely more than the cots of barging it down the 50-mile stretch of inland water between Houston and Galveston. LORAL HEIGHTS

Wake Up and Buy Some Lots In Floral Heights

Can't you see that delay means a loss to you. Don't you know that lots in Floral heights will soon be higher? Why not? They are certainly the cheapest and best located lots in and about Wichita Falls. They have the highest elevation, the purest atmosphere, the most picturesque view. They have the city water, graded streets, five cent car fare and, in fact, will soon have every modern convenience out to the bend of the car line. Wide concrete sidewalks are now being put down and several nice residences are under construction.

This is the only way the town can grow and the only way we will have street car service for several years. The Floral Heights addition is not a real estate man's proposition, but is an addition backed by over fifty of the leading citizens of Wichita County, who have the interest of Wichita Falls at heart and who are determined to make Floral Heights the swellest residence section of the city. Floral Heights is spending more money to boost Wichita Falls than all the concerns in the city put together, with the exception of the Chamber of Commerce.

Any agent in the city will be glad to give you prices and assist you in selecting your lots. Make your purchase today before the good lots are all sold. Cars leave the corner of 8th St. and Indiana Avenue every ten minutes for Floral Heights. Lots are sold on terms of one-third cash, balance in one and two years, 8 per cent interest.

If you have friends and acquaintances who would like to know more about Wichita Falls, call at our office, 6178th Street, for nice literature to mail them.

A wise man is one who knows what not to do and refrains from doing it.

You'd be surprised if we'd tell you the number of men in this city who come to us, quite worried because of the fear that they can not obtain a suit of exceptional attractiveness, and one not having that flippant "air" which characterizes so many makes of clothes. We quiet their fears in a moment and do it very easily, too. In our long experience we have found that freakishness is not style, nor are the clamorous patterns. Acting upon our real knowledge of a gentleman's needs we are always prepared to exhibit rare styles and fasci-nating patterns; BUT NOT boisterous clothes. The Seabright Sack, made by Alfred Benjamin & Co., in New York, is a remarkable style, which is so "up-to-the-minute" that it fairly sparkles. The fabrics are soft and rich; the tailoring is of the kind which only expert workers can give. It is a clean, good, "Made in New York" style which men of taste

w Bank Guarantee Worked. P. C. Dings, president of the Guaryat State bank of this city, has returned from Oklahoma City, where he went upon invitation of the Governor to become a member of the committee of business men who were appointed to examine the securities and equities offered by President Norton of the Columbia Bank and Trust Company of Oklahoma City. Other members of this committee are M. L. Lockwood of Tulsa, George C. Priestly of Bartlesville and Homer M. Preston of Bar-

Mr. Dings says the collapse of the bank was handled in a manner that will convert every unprejudiced mind to the idea of guaranteeing bank deposits. There was no excitement, no other bank was affected, the large depositors made no effort to withdraw their funds and the money that was withdrawn was that used in the ordinary course of business. The State guaranty gave the people confidence in the final outcome that kept the fever of excitement down that would have occurred with the failure of a bang under the old school of banking.

The Ardmore banker returned from his visit thoroughly imbued with the idea that the guarantee of bank deposits is an improvement over the old system of banking, that the Governor the Bank Commissioner and the banking Board are doing everything in their power to enforce the law in a manner that will furnish ample protection to the people and to the State banks.-Ardmorite.

Big Values In New Dress Goods

Everything in our dress goods department is now ready for what we believe is going to be the biggest winter's business we ever did.

We have two reasons for thinking

1st. Money is easy and people are already buying very treely.

2nd. We never before had such wonderful values to offer as we have this year,

Our prices are not much, if any, lower than other stores, but the value we give for those prices will surprise you -we couldn't do it if it were not for our exceptional buying facilities.

Our buyer is a wizard at dry goods buying and has gathered together some of the biggest values that ever came to the city. 1 1 1-1

Our Poplins and Soisettes in all colors, at 50c to 35c per yard, are just two hints of the immense lines we can and want to show you.

'The Girl From Rector's."

only,, enjoyed the longest run of any roduction in New York last season. The piece originally opened for a limited engagement at Weber's Music Hall simply for a 'try out.' It was he intention of the producer, after its success had been established, to 'The Girl' at the commencement of he next theatrical year. The offering sensation that it continued its run for seven months and was still doing capacity business when it was necessary to end the engagement in order the close of the first act. to fill out of town contracts.

Even the records established by Weber and Fields when their productions were the rage of New York, were broken by 'The Girl from Rector's.' The work is from the pen of Paul M. Potter, who won world-wide fame

as the author of 'Trilby.'' Rennold Wolf, the well-known dramatic authority, of the New York Morning Telegraph, declared "The Morning Telegraph, declared Girl from Rector's" the most entertaining production he had ever witnessed. In his review of the piece the morning following its premiere at Weber's Hall, in New York, he said: "I have seen it once-only once, naturally-but I shall see it many times before it quits New York.

should have a record run." Mr. Wolf's prophecy came true, for 'The Girl from Rector's' remained at Weber's for exactly seven months,

"The Land of Nod."

All existing advance sale records are likely to be smashed at the Wichita Theatre tomorrow morning at 8:30, when the seat sale opens at Bean & Huey's office for the famous musical extravaganze success, 'The Land of Nod," which comes to the Wichita Theatre Friday night.

The large number of regular treatregoers of Wichita Falls who keep in 134-tf touch with affairs of the playhouse, apparently know all about his extraordinary production, a fact clearly indicated by the unusually numerous requests which have been received at Coney Island Cafe. the box office that seats be laid aside before the hour for the opening of the sale. Of course, these requests have not been complied with, in fairness to those who will appear in the line tomorrow morning. But this fact is significant of the widespread interest which is manifest in the event, that it denotes the approach of one of those famous shows which come along now and then in the course of a season and which everybody appear to be determined to witness. "The Land of Nod" will be seen here with all of the mansive and beautiful scenic and electrical effects which were used during the recent run of the extravaganza at the New York Theatre and presented by the same enormous company which has been identified with the remarkable uccess of the piece from the beginning

of its career. Prominent in the cast are Knox Wilson, Nell McNell and Anna McNabb. In view of this, there is warrant for the expectation of an advance sale which, as stated before, begins tomorrow morning.

Owing to the length of this production and the fact that during the prologue the house is in darkness, the one will be admitted after that hour Arrive Newcastle ... until the beginning of the first act. Leave Newcastle Patrens will confer a favor by being Arrive Wichita Falls in their seats by that time.

Two Ways of Looking At It.

After buying that bill of lumber you are going to need, and using it, you may be either glad or mad. It depends on whether you buy good, dry lumber from us, or carelessly accept lumber that's only half seasoned, from somebody who's not so particular about the quality of their stock as we are.

There are no two ways about it: You can buy any kind of lumber or building material to better advantage right here than you can anywhere else in this part of the country. Let us make you an estimate on what you want.

"Some people think mules haven't such intelligence, but I know they have," was the way a commercial traveler interrupted a story teller. "Now, take the town I come from. While I was home on a visit last year the place was all wrought up over the systematic stealing of flowers from the graves in our leading cemetery. The thing had been going on some time, and the people were shocked, of course. Finally a guard was posted and the thief captured, and the thief was a mule.

"It didn't take long to get at all the facts. It seems that a certain woman living near the cemetery had held up the mule's owner, who was beating the animal, prosecuted him for cruelty, then bought the mule and turned it out to pasture. The mule was so grateful to the woman that every night it would jump the pasture fence, go into the cemetery, pick up the freshest bunch of flowers it could find, carry them to the woman's house and deposit them on the front stoop, where she would find them in the morning. Now, when you talk of intelligence in

The Top Hat.

Tall hats, "pearkin up like the spire of a steeple a quarter of a yard above the crowne," as a sixteenth century writer describes them, were known in the time of Elizabeth, and the Puritans affected them until they merged into the old fashioned beavers of our great-grandfathers' days. Top hats of silk appeared first in Florence about 1800, and twenty years later silk hats with felt bodies were introduced into England. About 1840 the French silk hat was placed on the market and at once adopted in the familiar "chimney pot" shape. There were several varieties of it, such as the Wellington hat, with the yooman crown; the Anglesea hat, bell shaped at the top, and the D'Orsay hat, with ribbed silk binding and a big bow. The color also varied. Thus the Fart of Harrington started a craze for green top hats by wearing one in his garden with the idea of not frightening the birds. He also tested his silk hats by standing upon them. The top hat, however, was never so favored by any great personage as to account for its general adoption.-London Answers.
