# YOU HAVE READ ABOUT **HUNT'S CANNED FRUITS**

You have undoubtedly read in the magazines about Hunt's canned fruits and have been impressed with the quality talk which these people have put up about their products. using Apricots, Peaches, Pears and Cherries put up under this brand. The fruits are peeled by hand and not by lye, the lye process is bound to leave some of its effects on the fruit on which it is used, while in the Hunt process you get the fruit just as it comes from the tree minus the skin, and an extra fine quality of fruit at Tree ripened fruits are always bet-

For that reason you will find that the Hunt quality of fruits is better than most any others that you can possibly get, and the price is not so much higher than you would think for the quality of the goods. 40c for their very best brands, or 2 cans for 75c. \$4.25 per dozen for either straight or assorted variety, and this compares so well with home put up goods that you will not make any mistake in getting a stock of these as soon as your own give out.
