Cooked In The Caloric

Come to the Demonstration all this week

The "Caloric" does better cooking and baking than is possible by any other methods.

That may sound like a strong statement to you who do not know the possibilities of this wonderful time and labor saving stove; but it is founded upon absolute results. Foods cooked in the "Caloric" are far more nutritious and palatable. The delicate, delicious, flavor of meats are far nore savory when cooked the "Caloric" way of the wholesomeness is lost by evaporation.

The "Caloric" roasts and bakes food in its raw state without first partially cooking it in an ordinary stove of reheating it before serving.

If you have never tasted food cooked in the "Caloric" Cookstove you cannot realize the vast difference in flavor.

.Come to our store and let us demonstrate to you how you can reduce your meat and grocery bills with a "Calorc" Fireless Cookstove. Come and bring your friends.
