## MAN BURNED TO DEATH WHEN YEGGMEN FAIL TO OPEN THE SALOON SAFE

Wharton, Tex., June 15.-News was received here this morning from Tiger Bend, Wharton county, that Winfield saloon of Joe Purgher destroyed by fire there early yesterday morning as the result of the futile attempt of burglars to crack the saloon safe. It is presumed the burglars gained admis sion to the saloon shortly after mid-night on Monday night, robbed the cash register of a small amount, took what they wanted from the bar stock and started to work on the large iron safe. A chisel was used to remove the combination handle and an effort made to break the floor of the safe was without avail, the strong box withstanding

RAISING FROGS FOR PROFIT.

Marine Hospital Offers Market for Any Number of Live Croakers. Lansdowne, Pa.—Frog farming has

been carried on to some extent on many Pennsylvania estates in a small way for several years past. In some nstances the presence of an inherited frog pond of goodly dimensions, where the croakers have heralded each spring for numberless years (and increased in numbers in the congenial quarters in marshy or swampy farm ponds) it has been difficult to establish a profitable industry by simply catching quantities of the old frogs each year and allowing the others to increase.

In other instances the industry is followed as a fashionable fad, and the owners of country seats have historic ponds and streams devoted to frog raising under the care of an expert, or new ponds are provided with this object in view. The principal hotels of our large cities have for some years past demanded a sufficient quantity of frogs to provide their guests with requent treats to the toothsome frogeg suppers and to keep up a sufficient lemand to make the industry profitable.

Now there is a new incentive to frog raising. Old Bre'r Bullfrog, sonorous musician of our ponds, is found to be of special use for government experiments and he will now be in greater demand than ever. The Marine Hospital is planning to spend considerable money this fiscal year for frogs for use in testing medicinal preparations this county last year and this and the at the hygenic laboratory of the in stitution.

Refused to Leave House Until Evicted

By Court. San Antonio, Tex., June 14.—Joseph Nolte, a striking foreman on the Southern Pacific was evicted today from the section house premises by an order of the court on a writ of se-questration, after he had held the fort against all comers since the walk-out was declared. The writ was granted by Judge Seeligson in the Fifty-seventh District Court on a petition of the railroad company. When the strike was declared Nolte declined to vacate and refused to permit representatives of the road to take charge of the property.

ABOLISH INTERIOR DEPARTMENT. HIS ORGAN PLAYING ASTOUNDS.

Luke J. Evers, pastor of St. Andrew's Farley is very much interested in the welfare of the unfortunates who are compelled to take refuge in institutions of this kind and delegated Father Evers to look after both the spiritual and temporal wants of some 200 regulars who present themselves there nightly.

The Holy Name Mission is nonsec tarian. No questions are asked any of the applicants as to whether he be Jew or Gentile, Catholic or Protestant. All that is expected is good behavior. Services are held every Sunday and Wednesday evenings, which consist of a short sermon and congregational singing.

Some time ago the Rev. Thomas Judge of the Vincentians and also vice president of St. John's College, Brookyn, asked permission to give a mission to the derelicts of New York and St. Andrew's was selected as the church best suited. Great was Father Judge's surprise when over 500 men presented themselves for the regular services, which were held last week. Father Judge, who is a very enthusiastic and zealous missionery, in speaking of his work expressed himself as much pleasrederal consolidation and centraliza ed that he had been able to brighten curred on Wednesday night of last

## WOMEN AS PHYSICIANS.

Have Won Their Way and the Old Prejudice Has Died Out.

The death in England of Dr. Elizabeth Blackwell is a reminder of the in direct around that they came the United States. Judge Foster took occasion to point progress made by women in a profe sion into which they had literally to

What a half century has done to change these conditions is indicated by the banquet of the flourishing asociation of alumnae of the New York Woman's Medical College, held in this city at almost the moment of this pioneer woman's physician's death Masculine opposition to women cal students once overcome their enrance into the profession has been greatly facilitated. Where, in 1870 there were 527 women physicians and surgeons in the United States, the number increased to 2332 in 1880, 4557 in 1890, and 7378 in 1900. It must now

be largely in excess of 10,000. Women physicians have shown their capacity in all fields of medical prac tice, not only in obstetrics and gynecology, but as general practitioners and specialists, as ambulance and railroad surgeons, and as house physicians in hospitals. The old social prejudice against them has died out; they are largely represented in the membership of medical associations and are now found in the van of public movements in which women take

But has the ancient professional prejudice been overcome? It has recently been alleged in London that they do not possess the full physical and mentqualifications for the profession, and the caustic criticism of Prof. von Bergmann of Berlin, to the same effect will be recalled. #### HE WAS UNLUCKY INFANT.

Alfonso XIII of Spain Was Pupil of King Edward.

It was on May 17, 1886 that Alfonso XIII, the posthumous son of the consumptive Alfonso XII was born in the Palacio eal, Madrid. Sixteen years later, on May 17 1902, Alfonso XIII attained his legal majority, and with stately dignified ceremonial assumed the heavy responsibilities of the throne. Today, his twenty-fourth birthday, marks another epoch of his reign. It finds him arriving in London to pay the last tribute of admiration aud resepct to the great King to whose shining example and wise counsel he had looked for guidance in the superlatively difficult life-work that con-

fronte him. Of the visiting kings and royal repesentatives who will attend the good King Edward to his tomb there is who will feel a sorrow deeper and more sincere or a keener sense of an irreparable personal loss. To whom else can he look so surers for the sound advice, the sympathetic encouragement, the helping hand, the ripe wisdom and mature judgment that were his for the asking while the

TIMELY SUCCOR.

............

From Norman E. Mack's National

Monthly. An itinerant Methodist minister in the Tennessee mountains was beloved by his people, and they decided to make him a gift of money. The deacons collecting reported on the Saturday before the Sunday on which the gift was to be presented that they had \$50 for the pastor, a munificent sum in that poor community. They were congratulating each other when up came another deacon and announced that the preacher's wife had present ed him with a fine baby boy. They were all rejoiced, and one of the deacons wagered that the minister would speak of the baby first in his sermon the next day. There was an immediate division in the forces, one faction maintaining that he would speak of the great gift first, and the other that it would be the boy.

The controversy took the form of a wager and they lined up the next morning on the front seats waiting anxiously for the minister to speak. The preacher came out upon the platform and at once began to pray, saying: "O Lord, we thank Thee for this

## Pro-Roosevelt Feeling Strong at Little DEAL FOR PACKING PLANT NOW DEFINITELY CLOSED

Cost Will Be Much Larger Than Was at First Planned-Work Will Be Started on August 15th.

The deal for the packing house here has been closed. It's capital stock will be one million dollars, instead of \$350,000 as originally planned. It will have a capacity of one thousand head of cattle and twenty-five hundred hogs per day.

Work will start not later than August 15, and the plant will be completed within eight months thereafter.

Local capitalists will be associated with Mr. Emerson in the construction of the plant and it will be in a large measure a Wichita Falls enterprise. The location has been determined, but for obvious reasons has not been announced, further than to state that it will be within one mile of the freight depots.

From Friday's Daily.
"You can say that the deal for the packing plant here has been closed between myself and some local gentlemen. We have changed the original plans and now propose to erect a much larger plant that was at first proposed. The capital necessary for construction and operation will be one million dollars. We will erect a plant similar to the one nearing completion at Detroit, but we will be able to kill more beeves in ours. Our capacity will be one thousand head of cattle and twenty-five hundred head of hogs per day. The plans will be ready within thirty days and work will be started thereafter, which is later than we had hoped, but the change in plans will give us more work to do."

President H. A. Emerson of the United States Packing Company gave the above interview to a Times reporter at 2 o'clock this afternoon. It speaks for itself. The deal has been closed and all doubt of the outcome of the packing house movement is now cleared away. Mr. Emerson left over ing with Messrs. McBeth and Garner, who are packing house men of twentyfive years' experience. He leaves Fort Worth tonight for Chicago.

Before leaving this afternoon Mr. Washington, D. C., June 13.—Gordon Emerson gave a brief description of OFFICERS GUARD STATE Russell of Tyler, today telegraphed his the plant to be erected here. ## STAY IN YOUR OWN BACKYARD.

While Senator Bascom Thomas has been waging relentless war against corruption and graft in the legislative department of the state government and crying the slogan of civic righteosupess and state purity in all of the hills and valleys and out-of-way places of Texas-he has just left the bars down in one place. But that one place was sufficiently large for the smooth pass through. Bascom was fighting the grafters of the senate and intent only on saving the state from the balehe forgot all about the prohibition question, and that was Hawkins' opportunity. And while Hawkins has been known to miss a train, leave his umbrella on the car or even neglect an invitation to dinner, he has never yet been the man to allow opportunity to go away from his door with her feeling hurt because he failed to respond to her faintest knock.

Hence Hawkins is the state-wide -candidate per se for lieutenant govermor and in spite of Bascom's frantic efforts to butt in and lead the processiion, he is no tin it for Hawkins says: "Vence your doubs, Bas. One of these processions is about as much as any one man can lead and two banners would tire your little arms out before you got half across your old senatorial district."

So those who regard prohibition as the paramount issue in this race must follow the white gonfalcon of the opor tunist Hawkins to state-wide, nationwide and world-wide aridity, while those who wish to purge Texas of graft and protect the poor weak legislators and senators from deadly influences by killing the lobbyists, must grab their guns, fill up their magazines and follow the militant Bascom to glory or the grave. But you can not follow both baners nor can Bascom, the strenuous, lead both hosts. And the town which is enabled before request to furnish incontrovertible figures is the town which is entitled to the fullest consideration at the hands of the prospective investor and home-builder.

There is no more reliable barometer of a city's growing commercial import ance than the growth of its postal re ceipts, and a recently published an nouncement of changes in salaries, to be made on July 1, shows a steady increase for Amarillo that is not only highly convincing, but speaks volume for the future of this good city. And it should put to rest the claims of certain aspiring young Texas cities which deeem themselves rivals of Amarillo. A few comparative figures will suffice. The announced increase in postmasters' salaries for certain cities of

The democratic party is the dom inant party in Texas, and it should see to it that when the people of Texas want to vote on any question that their wishes should be gratified. Two years ago a majority of the votes cast in the democratic party ordered that the matter of statewide prohibition be submitted to a vote of the people. Act ing on this authority, the democratic State Convention made it a plat form demand. This demand of the party necessitated a change or an amendment to the Constitution. The resolution providing for an election on and supple figure of A. S. Hawkins to statewide prohibition was passed by House of Representatives, but failed to pass in the Senate. By a vote of ful inluence of the devilish lobbyist, 19 to 10, the State Democratic Committee, at its meeting held at Dallas on Monday, has, for the second time, decided that it was the plain duty of the democratic party to have the matter of statewide prohibition submitted ment on foot in Wichita county to to a vote of the people of Texas, and on have the offices of sheriff and tax July 23, the date set for the holding of the state primary election, every demacratic voter will again be given will also apply to the office of county an opportunity to express himself on and district clerk. ## A BUTTERFLY FARM.

#### England Has One With Nursery of Forty Thousand Caterpillars.

The prosperous butterfly and moth farm, not only breeding those insects by the tens of thousands, but also raising a large proportion of its own fodder plants and issuing its periodical price lists of eggs, larvae, pupae and perfect insects, is the natural outcome of the popular turning to nature study and the increasing numbers of col-

Such a farm was inaugurated a few years ago at Bexley, Kent, by L. W. Newman, F. E. S., and the venture has proven a great success. The farm consists of three-quarters of an acre of garden and allotment around his house and half an acre in a secluded corner of a wood, inclosed with wire netting. It was in the wood I found him, busily engaged with one of his two assistants in the task of spring cleaning.

Here was a cage of wood and perforated zinc built around a growing tree, which, Mr. Newman informed me, contained five hundred specimens of the red-belted clearwing caterpillar; and close by was another cage a huge structure, inclosing no fewer than seven birch trees and measuring 11 feet by 11 feet round the sides and 12 feet high-in which were about one thousand insects of different kinds. Other trees bore smaller cages of different sizes and shapes, each holding a swarm of precious stock, and so contrived that they could be fitted on to any branch, thus enabling them to be moved about the woodlands as the caterpillars eat the foliage.

Around his house Mr. Newman grows a motley crop of fodder plants for his nungry stock, and he has three glass s, two of which are unheated. In one of the latter were, I was informed, about ten thousand caterpillars of the silver-washed fritillary. The larvae were in cages planted with violets just coming into flower. In the same house were four more cages planted with dead nettle, and containing more than three thousand caterpillars of the handsome scarlet tiger, and other cages, also, in which were about five thousand dark green and high brown fritillaries.

Throughout the establishment there are at the present time more than forty thousand living caterpillars, about 120 newly emerged moths and butterflies, and as it is now the season for pupae, only about seven thousand crysalides In June there will be three times the present quantity of living stock,

The dead stock numbers about 100,-000 set insects, every one of which has its price, ranging from 1d to £5, £7 and even more for rare varities. In same manner as orchid growers. Mr. Newman sends his assistants far away on speculative forays, though never outside Britain. Backaches, Headaches, Painful Mensturation, Leuccorrhoea and Discharges of all kinds are permanently and quickly cured. Don't consent to that operation until you have investigated this method.

## A Liberal Offer

The Specialist has decided to give his services entirely FREE for three months (medicine excepted) to all invalids who call upon him for treatment. The object in pursuing this course is to become rapidly and permanently acquainted with the sick and afflicted, and to show their extraordinary skill in curing the worst and most persistent forms of Chronic Diseases, and no charge whatever will be made for any services rendered for three months to all who begin treatment before June 27.

## EIGHTEEN HUNDRED SCHOOL CHILDREN

THE COMPLETED CENSUS SHOWS SLIGHTLY LESS THAN HAD BEEN EXPECTED.

## TOTAL IN CITY IS 1670

Former Figures Found to be Erroneous on Account of Several Duplicates.

The taking of the school census for the Wichita Falls Independent School District has been completed by V. G. COUNTY SCHOOL CENSUS Skeen and the total is less than was at first anticipated, owing to the fact that a number of the children were inadvertently counted twice. The total for the district is 1820, an increase of nearly five hundred-496 to be exact -over last year's showing.

Of this number 1670 reside in the city limits and 150 in the "shoestring." The children are divided as follows: Americans, 1623; Germans, 72; Bohemians, 5, and negroes, 111.

Estimating the population of this city on the basis adopted by the state -that is, six inhabitants to every on the same basis last year was less than eight thousand.

Of the 1820 children of scholastic age in this district, it is thought that all, save about one hundred, attend school. About sixteen hundred are enrolled in the city's public schools and fifty or sixty more attend St. Mary's Academy, in addition to those whose homes are here, but who attend out-of-town institutions.

## IS NOW COMPLETE-TOTAL SHOWS HEAVY INCREASE

The county school census has now been completed, the returns from the Howard district having been brought in by John Hursh with a total of 97. As stated in the Times heretofore the city enumeration shows a total of 1820. As far as corrected, the completed count now shows a total of 3718 for the county, of which 1898 are outside the Wichita Falls district and 1820 inside of it. Last year the county total was 3191 of which 1422 were in Wichita Falls. This is a tochild, Wichita Falls has a population tal gain for the county over 1909 of of 10,020. Her population estimated 527, of which 398 is in Wichita Falls and 129 outside. The figures may be slightly changed by the superintendent n checking them, but are substantially

Cone Johnson of Tyler, candidate for governor, will address the voters of Wichita Falls on Saturday, June 25, at 2 p. m. Mr. Johnson will arrive here from Stamford and will speak in this city before leaving on his trip up into the Panhandle. This candidate spoke here earlier in the year, when the campaign was hardly in its incipiency and was accorded a cordial reception by the local voters. Efforts will be made to have a large crowd present when he speaks again here two weeks from tomorrow and a later announcement will state where the speech will be delivered.

A Plea For the Southwestern Univer- York until the following morning.

Editor Times: I have read with regret the question of moving the Southwestern University

from Georgetown Why move it after so many years of satisfactory work? In the opinion of many, it is most favorably situated. It's proximity to the capital of our great state, with its now famed university, and with the wide-stretch of West and Southwestern Texas to patronize its halls, think of the loss its removal would be to that part of Texas; what a cry would go up from its patrons, and what a void would be

The section until recently my home in this empire state, liberally patronized this university and the students, one and all, spoke affectionately of their Alma Mater. Bishop Seth Ward, shining light in the pulpit of the M. E. Church, South, was a graduate of this institution.

In its present locality it fills a position to meet the educational wants of the people to a greater extent than it shared your bed with these permanent would either in Dallas or Fort Worth. These points are already provided with fine educational institutions; then why rob the west and southwest of this oldtime (for Texas) institution?

And, as the M. E. Church, boasts of leading the United States numer for himself the host chose for him. ically, financially and socially, why take the ewe lamb from a more sparsely settled section of Texas to augment and aggrandize "Imperial Dallas" in 'Imperial North Texas?'

If your church, which, next to my own, I regard with affection and ven-eration, makes this boast, let her sustain herself in the statement by letting Southwestern University of Georgetown still go on in its work of uplifting with its refining intellectual, religious influence the youth from Southwest and West Texas and build another university commensurate with its ideas o a great central instutution for Methodism in this great Southwest-

Texas is large and broad enough to accommodate our Southwestern University at Georgetown and a central Southwestern University located either room and to spare for a great centlar school and our present Southwestern University at Georgetown within the boundary lines of Texas, and may the people and the church rise to an ap preciation of the vastness of our do minion and fully recognize the importance of meeting and providing for the intellectual, as well as the religious, needs of the youth of the land, by building up, and not tearing down, structures and honored institutions cessfully, is the prayer of the many friends of the Southwestern University at Georgetown and every true Texan. -A TEXAN.

CHAIR SHEETS WERE RARE.

But Sixteenth Century Inn Had Numerous Touts.

Often before the inn came in sight the traveler would see his Italian host. Sometimes, the host would have touts as far away as seven or eight leagues to buttonhole foreigners, carry their luggage, promise anything and behave with the utmost servility -till the morning of departure. But with all this, to expect them to provide clean sheets was to expect too much, and as the nation was grievously afflicted with the itch it was desirable for the visitor to carry his own bedding. In many cases we find the tourist sleeping on a table in his clothes to avoid the dirtiness or the vermin of the bed. Still, in Italy, as a rule, you occupants only. In Spain you were sure to do so; one man, one bed, was the custom there. In Germany the custom was just the reverse; in fact, if the tourist did not find a companion and his bed-fellow might be a gentleman or he might be a carter; all that could safely be probpesied about him was that when he came to bed he would be drunk. The bed would be one of several in a room; the covering a quilt warm enough to be too worm for summer and narrow enough to leave one side of each person exposed in winter. That is, supposing there were beds .- E. S. Bates, in June At-1 -

From Saturday's Daily.
As the end of the Texas gubernator. ial campaign draws near, straw votes are being taken in numerous parts of the state and the results are widely varied. A vote of this kind was taken on the southbound Fort Worth and Denver passenger train Thursday afternoon by some of the passengers and resulted as follows:

Poindexter

Fourteen of the passengers declined to express any preference. A straw vote was taken on the same train ar the lieutenant governor's race and resulted as follows:

Davidson Thomas

The efficiency of the straw ballot in determining what the real vote will be is doubtful, especially when taken on passenger trains. During the Clark-Hogg campaign, hundreds of straw ballots gave Clark a majority for the simple reason that the farmer vote, which was almost solid for Hogg, was not usually represented on these ballots. Many straw ballots, two years ago, gave R. R. Williams a lead over Campbell, which the primaries failed to sustain. The figures of the Denver train ballot are practically reversed by the straw vote taken by the grand jury as

indicated below. Yesterday afternoon the grand jury, including the district attorney and the doorkeeper, took a straw vote on the governor's race, there being a total of 14 votes, with the following

Hotels as Boosters of Towns Christian Science Monitor.

Give a town a good hotel and it will give the town a good name. As a booster of a place a first class hotel is a success. It goes without saying that a hotel of the first rank must have a capable landlord, fine cuisine and excellent service. Not only are the needs of the public attended to makes friends of its patrons and they near East Robart, N. M., by a lone become friends of the town. The commercial traveler delights to reach that point on his route where there is an up-to-date hostelry; he continually sings praise of the place. The genuine both add to the fame and also to the prosperity of the town. A wide-awake landlord can do more for the advance ment of a town than half a dozen of

What is true of a small place is equally true in a larger degree of the city. Take the landlords of the leading hotels the country over, and note how they have brought their cities into prominence. Where are the best hotels, there you will see associations flocking for their conventions and annual gatherings. Their members bring money and business. It is claimed that there is no publicity more general or more widespread, more effective than that which is the result of hotel corridor conversations. Hotel men themselves are becoming great trav elers in their annual tours across the country for their reunions, and whatver city they visit gets a big advertising boom. Our landlords must be enterprising; that they are also broad minded and generous is shown continually by the public spirit they manifest in behalf of the communities in which they are located.
