Six Phases of the President, on His 52nd Anniversary

HAPPY BOYHOOD

A serious lad, appeared Franklin Delano Roosevelt at 12, but there's a twinkle in his eye as he poses, all dressed up in his party clothes in the style of 1894.

NEARING MANHOOD

This garb might look odd today, but it was the mode for recreation when Franklin D. Roosevelt wore it at the family summer home in Campobello, in 1899.

POWER IN NAVY

Mr. Roosevelt became assistant secretary of the U. S. navy in 1913, serving through the World War, showing great executive ability and a capacity for hard work.

TEMPORARY SETBACK

The Democratic presidential ticket of Cox and Roosevelt was beaten badly in the 1920 election, when Warren G. Harding and Calvin Coolidge won.

NEW YORK'S GOVERNOR

Recovering from infantile paralysis, Mr. Roosevelt again entered public life. Elected governor of New York in 1928, he was re-elected in 1930.

PRESIDENT OF THE U. S.

Carrying the Democratic party's standard in 1932, Mr. Roosevelt was elected president of the United States—and today leads the nation to recovery.

He'll Know Better The Next Time

SALT LAKE CITY, Utah.—A friendly "holdup" turned from a "prank" to realistic gunplay when John Winters, 26, was forced to include two policemen, including the department's champion marksman, in the game.

Winters entered a lunch stand and, with one hand in his coat pocket shouted "Stick 'em up."

A BIBLE THOUGHT FOR TODAY

LOVE DEFRAUDS NOT: Owe no man any thing, but to love one another. Thou shalt not steal. Thou shalt not covet. Thou shalt love thy neighbor as thyself.—Romans 13: 8, 9.

"TO SURVIVE THEY MUST EXPLOIT THEIR WORKERS"

Facing a huge audience in the city of Worcester, Mass., Gen. Hugh S. Johnson charged that 90 per cent of the complaints that small business concerns were on may be oppressed by large ones "came from establishments which to survive said they must exploit their workers."

Like him or dislike him, praise him or scorch him, Administrator Johnson has the tenacity of a bulldog, the fighting courage of a warrior, the patriotism of a red-blooded son of the West, and he is the target for the missiles of all those who are opposed to the success of the recovery act.

Sen. L. J. Dickinson of Iowa, for years a famous republican spellbinder, for the first time in his political life is clamoring for justice for "the victims of monopolistic tyranny." He has discovered another set-up of forgotten men, Iowa in 1932 witnessed a revolt of republican farmers. They tossed all the republican nominees in the ditch and they served warning on Spellbinder Dickinson that they had a sufficiency of "the Grand Old Party and its legislation for the privileged few."

It should not be necessary to remind the Hawkeye spellbinder that the farmers of the West were responsible for the third revolution at the polls in the history of this republic. All the states, agricultural and otherwise, west of the Allegheny mountains and on and on to the Pacific coast banished the elephant and its trainers. There is no telling what they will do next time. They may be more vociferous in their demands than they were in the campaign of 1932.

WHY A REPEAL OF THE POLL TAX LAW?

Why a repeal of the state poll tax law? Why rob the public school fund? Why shouldn't a voter (or an adult of voting age) be willing to contribute to the education of the children of Texas? All the children are given free school houses. They are given free instructions. They are given free textbooks. Thousands are carried from their homes to school houses in conveyances paid for by the taxpayers of the state. Hundreds of millions of dollars have been advanced to the people of Texas by the federal government in less than a year. Why shouldn't all Texans be willing to arm themselves with piad poll tax receipts in order that the public school funds should be kept intact and used for "the education of all the children of all the people."

DID YOU EVER STOP TO THINK

By EDSON R. WAITE, Shawnee, Oklahoma

THAT people are interested in reading the ads when their pockets are bulging with money to spend.

They are INTENSELY interested in reading the ads when what they spend must be carefully spent. Then they buy what they can afford and the ads tell them where to find the bargains.

When business is lagging is the time to spend more money for advertising. The business man who do so feel a depression much less than those who cut down expenses by cutting down their advertising.

To curtail advertising cuts down sales. Cutting down sales cuts down production.

Cutting down production cuts down employment. When employment is cut down it leaves a whole lot of people with no money to spend.

You should keep up your advertising so you can keep up your sales. It will increase production and that will increase employment.

With increased employment, people will have money to spend.

You should keep up your advertising so you can keep up your sales. It will increase production and that will increase employment.

With increased employment, people will have money to spend.

"Business as usual" is the slogan to use. Advertise.

at the moment upon the Lorenzen No. 1 deep test on the Dr. F. E. Clark ranch near Putnam which has been slowly drilling itself in over the holiday period.

Gas pressure in the well has increased from 100 pounds to 750 pounds while the well is making considerable free oil without having been shot or treated in any way.

Depth of the well is 3,317 feet, 111 feet in the Caddo lime. The drill has still 154 feet of this lime to penetrate. Underneath it is the Marble Falls which showed the greatest gas in a test drilled in the area in 1919 by the Humble Oil and Refining company.

The well is making about a quarter of a million feet of gas daily. Further drilling is contemplated within the next few days.

The test is located in the southeast corner of section 304 of the S. P. R. R. survey, one and a half miles west of south of Putnam.

Silver Purchase Program One of Outstanding Financial Developments Of the Month, Professor Declares

AUSTIN.—The outstanding financial developments of the month have been the Roosevelt silver purchase program, the actual birth of the Federal Deposit Insurance Corporation, and the president's two latest messages to Congress, one outlining the federal budget to June 30, 1935, and the other requesting monetary legislation.

Dr. J. C. Dolley of The University of Texas said in his monthly article on the financial situation published by the University Bureau of Business Research. Of these events, the latter two have much the greatest current importance, he added.

"Briefly, the silver purchase program provides that, for a period of four years from Dec. 21, 1933, the mint will buy all newly mined American silver at a price of \$1.29 per ounce, the mint retaining 50 per cent of this price as a seigniorage charge," Dr. Dolley explained. "The mining companies thus will receive 64 1/2 cents per ounce for such silver as is produced after Dec. 22 last. As the market price of silver has recently

ranged in the neighborhood of 44 cents, it can be seen that the program provides a government subsidy of some 20 cents per ounce for the silver mining industry, an industry which in 1933 produced 22,141,130 ounces of silver with a total value of \$7,838,690.

"It is claimed that this silver purchasing will tend to raise prices and benefit our export trade to China. It is difficult to see how some \$15,000,000 a year to be paid for the new silver can have any appreciable effect on the price level and yet more difficult to see how Chinese purchasing power can be increased without raising the world price of silver and without increased foreign purchasing from China. The silver subsidy will, however, tend to appease and conciliate the powerful silver bloc in the Senate.

"The Deposit Insurance Corporation began to operate on the first of January, thus guaranteeing up to \$2,500 the deposits of each individual in every stock holding bank. The vast majority of the commercial banks have bought stock in the corporation and the pro-

LET'S HOPE IT WON'T BE NEEDED IN TEXAS

1933

CODES . . . 250 thousand jobless boys marching off to the field and forest camps of the CCC . . . 22 million people who "saw the Fair" . . . wheat and cotton doing better . . . millions of wage earners back at work.

What a year that was! It left history behind it.

In the telephone business, things went from bad to worse through almost all the first seven months of the year. In that time we lost about 16,000 telephones in Texas. Long distance calls were at a low ebb. On our ledgers, columns of red figures grew longer and longer.

And then . . . came a turn!

For us, the most hopeful thing that happened in 1933 was the fact that in August we stopped losing telephones. In the last months of the year we gained telephones. And while the gain was hardly a bare fraction of the tens of thousands lost during the depression, it was good to know that the long decline apparently was ended.

1934

No one can say what 1934 may hold. But

it is hopeful to know that some wages have been raised . . . that better prices for wheat and cotton and oil have brought millions of dollars into Texas . . . that, almost as a unit, the nation's industry has settled itself for the long pull back.

One thing we know: In the year ahead, 6,700 seasoned telephone employees in Texas will be working with a new enthusiasm, anxious and eager to serve. Their goal will be to give you good telephone service at an honest cost.

Good . . . because no retreat in standards will satisfy the demands you have learned to make of your telephone.

Fair in cost . . . because there is no room for excess earnings in an undertaking planned, like the telephone service, for the long pull. Charges based solely upon the cost of rendering service . . . a service that must be continuous and stable . . . must in the long run bring the soundest, most substantial measure of success.

What is fairest for you becomes, in the long run, the policy that is best for us.
