Care in the Use of Glass Jars Jars are easily broken when hot and care must be taken when removing them from the cooker. Always let the pressure get to zero, by letting the cooker set, and then the contents of the jar will be hot and the air striking it will often break the jar and your trouble and products wasted. Another pre-

caution, when you take the jars out, set them on a cloth on the table and this will help to prevent breaking. Often you have left a drop or two of water around and when you set the hot jar on this you will have breakage. The table is sometimes very much cooler than the jar and this will cause the jar to break. Mrs. Floyd McCormick, farm food supply cooperator of the Bass Lake demonstration club gives this advice to help others when canning in the pressure cooker, using glass jars.

Made Over Garments Using Foundation Pattern

Attractive dress at little cost made from old linen duster using the foundation pattern (individually fitted pattern). Mrs. Louis Pitcock, clothing cooperator of the Ranger Co-Workers home demonstration club, says do not throw the old garments away and do not waste them by cutting into smaller garments. Mrs. Pitcock's mother straightened the attic, found the linen duster and sent to her to make a child's suit. The material looked good and the foundation pattern was brought out and placed on the material found to work out fine for a dress. The foundation patterns are made to fit and no extra material has to be used in allowing for seams, fit-

Use of Foundation Pattern To Fit Commercial Pattern to Individual

Mrs. J. C. Hudson, clothing cooperator of the Bass Lake Home Demonstration club says her foundation pattern made it possible for her to use a much smaller commercial pattern to work out a waist pattern for a dress. "I took the part of the waist of the commercial pattern I wanted, cut a pattern of it and fitted on the foundation pattern. I used a 36 commercial pattern to fit on my 42 foundation pattern. Without this individually fitted pattern I could not have made this adjustment." In cases like this the commercial pattern is of no use without the other. I have a dress I like and one that is a perfect fit. Could not get my sewing done without the foundation pattern.

Comfortable Sleeves and Sleeves Long Enough

The first time I have had a sleeve pattern long enough and sleeves long enough and comfortable in every way, since I made the foundation pattern, states Mrs. W. I. Dixon, clothing cooperator of the Bass Lake Home Demonstration club. The sleeve pattern alone has been worth the time and any trouble in the making.

Things To Do Now Along the Gardening Line

Take a hoe and cut all burned up vegetables from the garden, as diseases are harbored on these plants and are certain to cause trouble next year. Plow the garden shallow to prevent summer weed growth, then lay low and wait for the first fall rains for planting the late summer or fall garden.

If your tomatoes are producing well but the weather is still dry, build an artificial brush arbor over two dozen plants and keep them watered every other day. One of the leading gardeners in Brazos county put a shade over his tomato plants and it worked

satisfactorily. Simply drive down some stakes 4-5 feet in height, tack some poles across the top of the stakes, and lay brush, weeds, or any other type of material that will allow circulation of air but will provide shade from the extreme rays of the sun during July and August.

Hunting Stamp By 'Ding' Will Help to Restore Waterfowl

WASHINGTON—When hunters plank down a dollar for the new Federal hunting stamp at their nearest post office, they will receive no ordinary carrier of mulligan. Nearly twice the size of a special-delivery stamp, the hunting stamp shows a waterfowl scene which is the work of J. N. (Ding) Darling, who was a nationally known cartoonist long before he became chief, a few months ago, of the Biological Survey, U. S. Department of Agriculture.

"No one, however," says Mr. Darling, "is under any obligation to kill a duck just because he owns a Federal hunting stamp, nor is there any rule to prevent a man who wants to help restore the migratory waterfowl from purchasing several of these duck-saving stamps. Every dollar will be devoted to the cause of conservation."

Authorized by the recent Congress and to be issued shortly by the Post Office department, the new stamp will be on sale at post offices in all county seats, in all towns with populations of 2500 or more, and in certain waterfowl centers. The sale of stamps will provide funds to help conserve ducks and geese and other migratory waterfowl by the establishment of sanctuaries. Everyone over 16 years of age who hunts migratory waterfowl is required to have a Federal hunting stamp in his possession, affixed to the regular state hunting license or to a special certificate furnished by the postmaster if a hunting license is not required. The distinctive qualities of the stamp, it is believed, will also stimulate its sale among stamp collectors as well as sportsmen and conservationists.

Over-shooting and the effects of the prolonged drought, the Biological Survey explains, have seriously decreased the supply of waterfowl. Drainage operations in

past years have destroyed millions of acres of marsh and water areas formerly inhabited by waterfowl, fishes, and fur-bearing animals. Much of the land so drained has turned out to be practically useless for farming or for any other purpose. The money received from the sale of the new hunting stamp will be used to remedy these mistakes of the past by restoring some of this wasted land to the country's wild life and to purchase other marsh lands not yet destroyed.

Not all the money for this restoration program, the bureau points out, will come from the pockets of the sportsmen, however, for the President, recognizing that wildlife, like the forests, is a valuable national resource, is planning to devote additional sums, to extending the sanctuary system. The stamp sale will probably provide funds ranging between \$600,000 and \$1,000,000 annually, according to estimates by the Biological Survey.

NEGLECT OF COMMON CONSTIPATION IS A SERIOUS MATTER

Prevent This Condition with Kellogg's ALL-BRAN

The first question your doctor asks is whether you are constipated or not. He knows that this condition may cause headaches, loss of appetite and energy, sleeplessness. It is often the starting point of serious illness.

You can prevent and relieve common constipation so easily. Just eat a delicious cereal once a day. Laboratory tests show that Kellogg's ALL-BRAN provides "bulk" and vitamin B to aid regular habits. ALL-BRAN is also a rich source of blood-building iron.

The "bulk" in ALL-BRAN is much like that found in leafy vegetables. Within the body, it forms a soft mass. Gently, it clears out the intestinal wastes.

Isn't this "cereal way" safer and far more pleasant than taking patent medicines—so often harmful? Two tablespoonfuls of ALL-BRAN daily are usually sufficient. With each meal in chronic cases. If seriously ill, see your doctor—ALL-BRAN is not a "cure-all."

Enjoy ALL-BRAN as a cereal, or use in cooking. Get the red-and-green package at your grocer's. Made by Kellogg in Battle Creek.

REGULATION UPON COTTON ALLOTMENTS ARE POINTED OUT

By R. P. LAWRENCE, Administrative Assistant to County Agent

Under provisions of the Bankhead act each farmer who produced cotton before 1934 and has cotton growing on farm at present is entitled to exemption certificate on number of pounds of cotton allotted to his farm. This allotment is based on approximately 60 per cent of the five-year average from 1928 to 1932. If no cotton was grown on this farm during this period the 1933 acreage and production on this farm and community average is used in figuring his allotment. If no cotton was grown on farm during base period 1928 to 1932 and none in 1933 there will be no allotment made for farm by the county committee. Such applications will be sent direct to state board for action. If any allotment is made it will not be taken from county allotment.

Every cotton farmer that does not have a contract with government must, with aid of community committee, give his yearly production on each farm. He should have this information ready to list in application for allotment and tax exemption certificates, which statements will be under farm. Producers who have signed contracts will be under oath as to correctness of statements presented in the former contract; however, they have the privilege of correcting figures before taking oath. These applications will be in the hands of local committee in near future and will be filled out in community centers designated by committee. This application must be filled out in order to sell any cotton tax free.

If there is less cotton produced on farm than amount of tax exemption certificate issued to this farm, the holder of such certificate will be allowed to sell them through the county office at a price set by the government. The privilege of selling these certificates is equal to crop insurance. If there is more cotton produced on this farm than allotment given, the owner of said cotton must either buy exemption certificate of pay tax to government when cotton is sold. Regardless of how long cotton is held either as seed cotton or lint cotton, the U. S. government will still hold a lien on it to the amount of the tax at the time it was harvested or ginned. Any person attempting to evade this tax is liable to heavy penalty.

All allotments, contracts and exemption certificates are handled by U. S. agricultural department. Tax collections are handled by U. S. internal revenue department.

All farmers will be notified of

TEXAS TAX TOTAL TO U. S. DOUBLED

Texans are interested in tax payments to the federal government for the fiscal year 1934, ended June 30 as for the fiscal year 1933. According to figures made public by the bureau of internal revenue Texans paid the federal government almost twice as much in taxes as for the previous fiscal year. These are the figures: Texas totaled \$60,591,954 as compared with \$34,167,496 for 1933. According to the report a large part of the \$25,333,458 increase is attributed to better business generally but New Deal taxes collected during 1934 under the agricultural adjustment act accounted for \$10,070,720. Farmers in Texas, however, received about five times this amount in AAA rentals and benefit payments, the total being \$49,046,156 up to May 31. General increases in income tax receipts from Texas and other states reflected a much greater national income in 1934 than in 1933.

Figures tell the story. As for the farmer, he has ceased to be "the forgotten man"—since the coming of the New Deal civilization.

GRAIN CROPS HIT A NEW LOW LEVEL

Wheat farmers of the United States will harvest only 483,662,000 bushels this year. Last year's crop totaled 527,413,000 bushels, and was the smallest since 1894. Corn crop for this year will approximate 2,138,137,000 bushels, compared to 2,330,237,000 bushels in 1933. An oat crop of 567,839,000 bushels is indicated by the July 1 condition of the crop. It would be smallest since 1893. Approximately 7,900,000 tons of sugar beets will be harvested, compared with 11,085,000 tons in 1933. The department of agriculture predicted a tobacco crop of 1,140,000,000 pounds compared with 1,396,000,000 last year.

Drouths are expensive, to say the least. There is a way to guard against them. Storage of flood waters in vast reservoirs or lakes will come some day. And in their coming the blight caused by the drouth will be banished. Now Washington predicts that some farm land that was taken out of production by the AAA is going back to work again when another planting season rolls around again. There is a reason why. First, the report predicting one of the smallest wheat crops on record and correspondingly small fed crops. Another report showing the smallest cultivated acreage of cotton since 1905.

Read an advertisement in a Brazilian newspaper today headed, "When it's hot, keep cool." From various advertisements I notice there are many ways to keep cool in hot weather, both inside and outside. Certain clothes, drinks and air-conditioning being the principal ways.

Everything that Science really knows about making cigarettes is used in making CHESTERFIELDS

LIGGETT & MYERS TOBACCO Co.

the cigarette that's Milder
the cigarette that TASTES BETTER

NO PRODUCT YOU CAN BUY is made under more sanitary conditions than you will find in the modern Chesterfield factories.

Everything used in making Chesterfield Cigarettes is scientifically tested for cleanliness and purity—and so ingenious is the machinery that the cigarette is hardly ever touched by hand.

EVEN THE AIR IN THE CHESTERFIELD FACTORIES IS CHANGED EVERY 4 1/2 MINUTES

Every time you start to smoke a Chesterfield, remember this statement by a well-known physician:

"I have been something of a student of Cigarettes and it is my belief that they offer the mildest and purest form in which tobacco is used."

TOAD WIDELY TRAVELED

ASHTABULA, O.—A horned toad, widely traveled, is the pet of Edward Quirk, 19, civilian conservationist, just returned. Young Quirk carried the toad with him in glass jars and tobacco cans for nine months, while serving in CCC camps of three western states, California, Washington and Idaho.

CATFISH HAD APPETITE

LITTLE ROCK, Ark.—This catfish believed in heavy diets. While cleaning the 15-pound fish at his home here, Corley found two pairs of pliers in the fish's stomach. Both were heavy mechanic's pliers. He caught the fish at the mouth of the St. Francis river.

MARRIAGE LICENSE RECORD

ALLENTOWN, Pa.—Add Love's paradoxes: Vital statistics figures for Lehigh county reveal that an all-time record number of 873 marriage licenses were applied for during the first six months of 1934. But, for the same period, 58 couples filed libels for divorce.

TYPHOID CLOSED BEACHES

TOLEDO, O.—Several bathing places in and around the city have been condemned by Dr. Basil Brim, city health commissioner, following the finding of typhoid germs in their waters.

Groves' Home Run

Smith struck out and Kindred grounded out from Dan Long to Bob Reese. Anderson golfed one almost off the plate to get a single to right field and Groves walked to the plate. Unlike Casey of the famous Mudville team in the poem, "Casey at the Bat," Groves swung hard after two balls were called and knocked the ball into the cars at the far corner of the field in deep center, slightly to the right of center field, and circled the bases with Anderson scoring ahead of him.

Hectic Days Sleepless Nights

IF YOU are nervous today, you probably will not sleep well tonight. If you don't sleep well tonight, you will probably be nervous tomorrow.

Don't allow yourself to become nervous. Take Dr. Miles Nervine. It will relax your tense nerves and let you get a good night's sleep.

Irritability, Restlessness, Sleeplessness, often lead to Nervous Headache, Nervous Indigestion, Hysteria—sometimes to a nervous breakdown and organic trouble.

Some of the people, whose letters are printed below, were as nervous as you are—possibly more so—yet they have found relief.

Three years ago I was so nervous I could not bear to go out in company and could not sleep nights. A friend recommended Dr. Miles Nervine. I now enjoy myself thoroughly and sleep every night. *Miss Julietta Currier, New Market, N. H.*

I have used Dr. Miles Nervine in liquid form and find it the best medicine for the nerves I have ever used. *Christiane Lanier, Middletown, Tennessee*

Whenever I have over-indulged and feel restless I take one or two Nervine Tablets just before I retire. In the morning when I awake I feel like a new person and can go about my work as usual. Dr. Miles Nervine Tablets quiet your nerves, brace you up and are the simplest, most convenient tablets to take I have ever found. *Miss Grace Lockman, St. James, Mich.*

Before using your Nervine I was very nervous and irritable. Since I have started to take it I feel so much better that my family notices the difference. I still take it from time to time and the good result is wonderful. *J. H. Hedding, 1027 19th Ave., Rock Island, Ill.*

Coaching School Is Held in Austin

AUSTIN—A class in theory and practices in modern methods of coaching basketball and baseball players is being conducted at the University of Texas during the second term of its summer session.

Figuratively, a "Men Only" sign hangs outside the classroom. Martin G. Karow, head basketball coach, is instructing his matured pupils in fundamental skills, team play, defense and offense, organization of practice periods, selection and handling of players, and game rules.

Prospective coaches of baseball are being taught the play of individual positions, team plays, defensive strategy, organization of practice periods, and rules.

Bringing the program to a close Mrs. S. P. Boon will present the Bible drill, a regular feature of each lesson. All members are asked to be present for this study.

Judge and Mrs. L. R. Pearson Announce Arrival of Son

Judge and Mrs. L. R. Pearson announce the arrival of a seven and a half pound son, who arrived at home, Summitt street, last night, July 19, at 11 o'clock. Mrs. Pearson and son are resting nicely.

De Venter Resting Well After Accident

Mrs. Harry A. Logsdon and sister, Mrs. M. C. Van De Venter, who were seriously injured yesterday morning in an automobile accident near Breckenridge, en route to Graham for a visit with their mother, are reported by Dr. Logsdon, husband of the former victim, as resting as well as could be expected. It will be several days before the extent of their internal injuries may be determined.

They are patients at the City-County hospital, where brief visits are permitted friends. Their host of Ranger friends hope for a rapid recovery.

One Dillinger Gang Girl Free

Only one of the girls who played prominent roles in the Dillinger gang terror reign to remain free, Mary Kinder is shown here with her pet dog, at the Indianapolis home of her mother and sister. She disclaims knowledge of Dillinger's whereabouts or his plans and has given up hope that Harry Pierpont, her gangster husband, will escape death in the Ohio electric chair.

DICK POWELL WITH GINGER ROGERS NEW FILM LOVERS TEAM

A brand new romantic team comes to the screen in the persons of Dick Powell and Ginger Rogers in "Twenty Million Sweethearts" the first National picture which opens at the Arcadia Theatre beginning Monday.

No more popular couple could appear together than these two, who are said to be not only admirably suited to each other temperamentally and physically, but to work in perfect harmony. Both have won their spurs as popular screen players as well as singers of exceptional ability.

Triumvirate

Let's start from the bottom and go up this time. We find Ginger Rogers, Dick Powell and way on top Pat O'Brien. They're all in "Twenty Million Sweethearts," coming to the Arcadia Monday.

ACE DETECTIVE BECOMES AUTHOR OF BEST-SELLER

Dashiell Hammett, author of "The Thin Man" which comes to the Arcadia Theatre Sunday, spent many years as a private detective for the Pinkerton Detective Agency.

"I was a pretty good sleuth," he admits, "but possibly a bit over-rated because of the plausibility with which I could explain away my failures, proving them inevitable and no fault of my own."

Hammett was born in Mary's County, Maryland, and grew up in Philadelphia and Baltimore. At the age of fourteen he left school and engaged in all sorts of work—as newsboy, messenger boy, clerk, timekeeper, yardman, machine operator and stevedore—before he decided to become a detective and, later, America's foremost author of detective novels.

The picture, adapted from his latest and best book, was directed by Col. W. S. Van Dyke with a cast including William Powell, Myrna Loy, Maureen O'Sullivan, Nat Pendleton and Minna Gombell.

A Toast to the Crime Detector

William Powell, Myrna Loy, Henry Wadsworth in "The Thin Man." The film comes to the Arcadia Sunday for a day only.
