LABORATORIES TO FIND USES FOR PRODUCTS

By United Press
WASHINGTON, Dec. 14.—Secretary of Agriculture Wallace announced today that the four federal agricultural research laboratories will be located in Peoria, New Orleans, La., The Philadelphia area and the San Francisco Bay area.

The New Orleans laboratory will be the southern region, including Texas.

Congress authorized construction of the four laboratories to \$1,000,000 each in the 1938 act. The plants will seek to develop new uses for agricultural products, of which there are surplus.

The New Orleans laboratory will develop new uses for cotton, sweet potatoes and peanuts.

By United Press
NEW ORLEANS, Dec. 14.—John Bankhead of Alabama outlined a legislative program designed to aid the cotton farmer and reduce the loan surpluses.

Bankhead told the annual convention of the American Farm Bureau Federation that he would recommend that congress create a cotton commissioner to look after problems of that crop.

His plan called for sale of four to five million bales of the present 10,000,000 bale surplus held by the government.

District 5-AA Will Meet In Cisco to Organize for 1939

Representatives of schools in the new district 5-AA are to meet in Cisco Thursday afternoon at 2 o'clock for organization of the circuit and arrangement of the 1939 football schedules. The meeting was called by L. E. Dudley, chairman of the Oil Belt section.

New officers will be elected at the meeting.

Schools designated as 5-AA members by the state interscholastic league are Abilene, Breckenridge, Brownwood, Cisco and Mineral Wells. Ranger officials state that their school also qualifies with the required 500 enrollment but that the school was left off the list through error.

San Angelo school officials indicated they were dissatisfied with the set-up in the new district 5-AA and may seek to be transferred to the old Oil Belt alignment. Stephenville also is expected to apply for a place in the 5-AA district. Stephenville's enrollment is under the 500 figure, which automatically places a school in Class AA.

Eastland, a member of the Oil Belt loop in 1938, will not play in the faster company next year.

ALLRED ASKS NEW LAWS ON SCHOOL FUNDS

By United Press
AUSTIN, Dec. 14.—Gov. Allred called on the state legislature today for a new law on state aid to public schools in the third installment of his farewell message.

The installment dealt only with schools. Allred concluded that since the legislature must make appropriations to provide school funds it also should control the amount of state aid.

The per capita apportionment was \$16.50 a year when Allred became governor. It has been advanced to \$22 and aid goes to all schools alike.

Allred said that present confusing laws contemplate that the automatic tax board shall first determine the amount of ad valorem tax and certify to the board of education what revenue will be available. He contended that it is a purely ministerial duty for the board of education to divide the total by the number of pupils, not to set the per capita apportionment.

Deer In Eastern Part of County Will Be Protected

C. F. Jones has been elected president of the organization and Mrs. Walter Mitchell the secretary-treasurer.

Some of the rules promulgated by members in the organization is that there is to be no hunting with hounds, deer will be protected and hunting and trapping furbearing animals will only be allowed those of the area.

TWO SPIES HELD, ONE CONVICTED OF ESPIONAGE

By United Press
LOS ANGELES, Dec. 14.—Federal agents today held two native Russians, one a Soviet agent, on suspicion that they stole information on the military strength of Japan and turned it over to the Soviet government.

Federal Bureau of Investigation men indicated the secret information obtained by the two Russians concerned Japan entirely.

An FBI spokesman said, "what these men did was to steal the secret information we had obtained on the Japanese military and converted it to us (Russia's) own use. They let us do all the work and they hoped to get all the benefits."

The men arrested were Mikhail Gorin, 34, a Russian citizen and local manager of a Soviet agency, and Halif Salich, 35, a naturalized American, who once was a policeman.

They were arrested Sunday and held incommunicado at the Los Angeles county jail in lieu of \$25,000 bond.

O'Daniel May Name Safety Commission

By United Press
Two members of the State Safety Commission may be named by Governor-elect W. Lee O'Daniel. Generally a new governor has but one place to fill on a three-member commission. The situation this time is slightly different.

The regular term of Commissioner Albert Sidney Johnston of Dallas expires. Commissioners George Cottingham of Houston and W. H. Richardson of Austin were confirmed by the Senate on original appointment, but since then the terms have been switched and Chairman Richardson never has been confirmed for his long term appointment. Should the Senate withhold confirmation Gov. O'Daniel could name two commissioners.

Hollywood Sends Regards to Adolf and Benito

It is useless for America to try to let the people of Germany and Italy know how the actions of their governments are regarded on this side of the Atlantic, because those people aren't allowed to get any news that the men on top don't want them to get.

Nor would it make very much difference if that news did get to them, because they don't have anything to say about governmental policies anyway. So all the American government can do is make its protests to the head men in Berlin and Rome and hope that some day a change will be made.

And in this job a good deal of efficient help is being provided by Hollywood—of all places.

Hollywood does it deftly, quietly, and where it hurts.

A little more than a year ago Vittorio Mussolini, son of Il Duce, went to Hollywood with some grand plans. He was going to make a thorough study of American film methods, so as to improve Italian film production on his return. He was going to negotiate with an American film magnate to produce films of Italian grand opera. He was going to do divers big things and make a profound impression on the whole movie colony.

But the whole business quickly turned out to be a flop. The movie colony resented the presence of Il Duce's son and was pretty blunt in letting him know about it. After a series of snubs, climaxed by the appearance in a trade paper of a full-page ad attacking him, Vittorio shook the dust of California from his shoes and departed for the homeland, unswayed.

Now another drama of the same sort has been enacted, this time with Leni Riefenstahl in the leading role.

This German actress seems to be a talented and pleasing young woman (but she came here—unfortunately—trade-marked as Hitler's girl friend). So Hollywood warmed up to her no more than it did to Vittorio. Most of the studios refused to let her in. A night club refused to sell reservations to her. The chill was put on in a big way, and her visit turned out to be quite as unhappy an affair as did Mussolini's.

All of this is considerably less than important, except for one thing.

It happens to be about as direct and effective a way as can be imagined to let the two great dictators know just how their policies are regarded in America.

There is an ironic justice in having the message delivered by Hollywood. For those dictators are actors—first, last and all the time. More than any other men alive, they ought to be sensitive to the reactions of the world's capital of drama.

World opinion beats in vain upon the closed gates of Rome and Berlin. If any group can get a message inside the walls it ought to be Hollywood. And Hollywood—be it remembered in its favor!—is in there trying.

Mitchells Make It Hard for Company to Keep Stewardess

By United Press

FORT WORTH, Tex.—The Mitchell "boys," all trained in Texas at San Antonio flying fields, are causing constant turnover of stewardesses for American Airlines.

The three American Airlines pilots named Mitchell—but unrelated—all have married the stewardesses on their passenger transport ships within a year, and each marriage meant that the company was forced to find and train a new stewardess.

C. C. Mitchell, Jr., graduate of Randolph Field and pilot on the Chicago-New York run, married Miss Adelaide McHenry last fall. They live in Chicago.

H. F. Mitchell, pilot on the Fort Worth-Los Angeles run who was trained at Kelly Field, married Miss Marguerite Renshaw in Los Angeles last spring. They live at Glendale, Cal.

During the Thanksgiving holidays, W. W. Mitchell, Randolph Field graduate, married Miss Nell Mitcham in Fort Worth. He is pilot on the Fort Worth-Chicago route.

Sun Bowl Stadium Is Being Enlarged

By United Press

EL PASO, Tex.—Permanent concrete boxes now under construction will increase the seating capacity of Kidd Field, scene of the annual Sun Bowl game, to 13,000.

With Utah University selected to meet the University of New Mexico in the gridiron finale of the annual Southwestern Sun Bowl, plans are underway to handle the crowd which last year overflowed Kidd Field, at the College of Mines.

Eighty boxes, with seats for 960 spectators, are being added. Other improvements provide for easier entrance and exit for fans. Receipts from the Sun Bowl game finance the Sun Carnival, staged by a non-profit organization of 26 representative men of five El Paso service clubs.

After deduction of expenses incidental to bringing the football teams to meet in the Sun Bowl, the remainder of receipts from the ticket sales is diverted to advertising, float, band and other contest prizes and staging of the coronation of the Sun Queen.

Miss Schwartz said that her profession—instead of being overcrowded—offers many opportunities for alert women. As to future fields to be newly or further developed in the export line, she thinks that parts of the British Empire and the Netherlands' colonies are outstanding possibilities.

Woman Directs a Combination Sales Company

By United Press

CLEVELAND, O.—Miss Blanche G. Schwartz serves the world as the country's only known combination export manager.

A combination export manager handles exports for a number of companies. Miss Schwartz represents local companies and also one each in New York, Detroit and Louisville.

"To be a success in export work, a person always must remember that other cultures are not necessarily inferior to ours, just because they are different," she said.

"Without a broad tolerance we cannot have happy deals." She said that an undue assurance of American superiority prevents success in her field of work.

Miss Schwartz is the first woman in Cleveland to enter the export business. She opened her own office in 1924. She also teaches a class in foreign trade at Fenn College.

"The effect of the present unsettled international situation on exports? In many ways it is a handicap, but it also is causing a large number of buyers to look from a troubled area to an assured source of supply—which can be found here," Miss Schwartz said.

"Some buyers are offering to pay more for goods to replace Japanese and German merchandise, because of their unpopularity." She said that many Dutch East Indies firms are Chinese and so refuse to buy any Japanese goods.

The new nationalism, now prevailing in various nations, has caused new trade barriers, she added. These barriers include increased tariffs, quotas and currency control.

"Nowadays, before an order is sent out, the restrictions are checked and if they are too strict the order is not sent," Miss Schwartz said.

"The growing use of the airplane, however, is making possible the development of a new technique in export work. Orders are moved a lot faster than formerly, because of the plane.

SERIAL STORY SKI'S THE LIMIT BY ADELAIDE HUMPHRIES

Yesterday Sally and Dan... skiing... she feels a bit ashamed when she realizes she is "using" him to win her date.

CHAPTER IV AS Corey had predicted, Dan Reynolds came off with most of the honors, and won most of the points for his college, the final day of the meet.

Sally thought she had never seen a more magnificent, or impressive sight than the thousands of enthusiastic spectators, surrounding the course with its backdrop of high hills, sheer cliffs, dark pines and bright sunshine.

The most beautiful and impressive event of all was the slalom race, set through its intricate patterns of flags, that required all the agility and skill of which the runners were capable.

None of the other of the Big Six, for there were representatives from Harvard, Princeton, Cornell, Yale, and Brown had any runner to match Reynolds. No other man came off with as many points as Dan, for Dan excelled, not only in slalom, but in jumping and downhill.

"He ought to be in the Olympics," Sally said to Corey. "He could go professional. I've never seen anything like him, Corey, and I've seen some of the best."

THIS was after the meet, back in the fraternity house where dinner-dance was in progress in honor of the visiting girls. For tomorrow the house parties would be over, the to-eds would pack their fluff dance frocks and silver slippers, ski togs and clumsy boots; the men would settle down to cram for mid-term exams.

"Look here," Corey said, his eyes narrowing. "I'm getting a bit fed up, hearing you sing Reynolds' praises day and night, night and day. Don't forget you're still a girl—tonight, anyway!"

He scowled so fiercely at another brother who gave evidence of intentions of cutting in that the stag line took note and gave a clear field this evening.

"That reminds me," he held Sally a little closer, gave her an unexpected whirl that nearly lifted her silver slippers from the floor, "we've a special date later on."

"Why the big sigh?" Corey asked, bending closer. They sat close together in the old-fashioned cutter, under the big robe. The sleigh bells jingled pleasantly in the crisp night air, the horse trotted lightly on the hard-packed snow.

There was a moon, as Corey had promised. A big round silver one shimmering over this silvery, eerie, magical world.

Automobile Sales In November Up

AUSTIN, Tex.—Sales of new automobiles in Texas during November rose sharply over the preceding month and substantially over the corresponding month last year, according to the Bureau of Business Research of The University of Texas.

Reports from seventeen representative Texas counties show an increase in sales of 88.1 per cent over October and 17.9 per cent over November last year.

Aggregate sales in these counties during the entire eleven months of the year, however, were still 32.4 per cent below the corresponding period last year.

Marked increases occurred over October and over November last year in all price groups, the Bureau's report said.

OUT of the hedge-podge of routine business and bartering for talent at the Minor League meeting in New Orleans, there'll be one item over which, sooner or later, everyone will be very much interested.

Baseball men will want to know what's to become of 19-year-old Freddie Hutchinson, the kid pitcher who won 25 games for the Seattle Rainiers.

The time is ripe for Hutchinson to be sold up to the majors and which is what the coast star will be snapped up this winter.

Seattle, an independently-owned club, has no big league entanglements. The Rainier management has set a price of \$100,000 on Hutchinson and baseball men consider it likely that one of the major league clubs will barge in to the New Orleans meeting ready to pay the price—or one not too far removed from that figure.

Hutchinson is the greatest box office attraction the Coast League has ever had. Last season—his first in organized baseball—he was named the loop's most valuable player. No other rookie has been honored that way before.

The biggest worry in the American League at present is that the Yankees will get their hooks on him. As if they didn't have enough already.

It wouldn't at all be a gross exaggeration to call Ace Parker the nation's top-ranking major sports athlete. How many others could you name who put in six months with a big league baseball team and then immediately jump to a starring role with one of the pro football outfits?

Unique Display In Post Office To Aid Patrons

A unique plan for explaining to the public how to wrap and address Christmas packages to be sent through the mail has been inaugurated by A. E. Crawley, acting postmaster of Ranger, so many packages which go astray or which are late being delivered may be handled with greater facility and post office patrons be given better service this year.

Employees of the local post office have installed and decorated a Christmas tree in one corner of the post office, where dummy packages are to be placed.

Packages of various sizes, properly wrapped, to give the post office patrons an idea about how to insure their packages being delivered promptly, without damage being done to the contents, are to be placed about the tree, Crawley stated today.

"It is surprising," Crawley said today in explaining the plan, "how many people bring in packages that are improperly wrapped, and which could reach their destinations only through a miracle. And many people, too, bring in packages unwrapped and ask us to wrap them. Of course we would like to render this service, but it is impossible to do so and carry on the regular functions of the post office."

Everyone who patronizes the post office and who will be having Christmas packages to mail can see the tree, with its properly-prepared "gifts" at the post office at any time, and thereby gain useful information as to how a package should be prepared for shipment by mail. Information can also be obtained from any of the window clerks, too.

During the holiday time the volume of mail increases approximately 200 per cent, it has been pointed out in literature prepared by the post office department. It is a physical impossibility to handle this great mass of mail matter efficiently and promptly within a few days.

Therefore to assure delivery of their Christmas presents, cards and letters by Christmas day, the public has been urged by the department to shop and mail early.

Other instructions state that all parcels must be securely packed and wrapped, using strong paper and heavy twine. Special care should be taken in wrapping umbrellas, canes, golf sticks, hats, shoes, candles, drawings, paintings, sharp-pointed instruments or tools, glassware, cigars and other fragile merchandise.

Addresses should be complete, with house number and name of the street, post office box or rural route number, and typed and plainly written in ink. A return card should be placed in the upper left corner of every piece of mail. If a tag is used the address and return card should also be written on the wrapper for use if tag is lost and a copy of the address should be sent by first class mail.

Postage must be fully prepaid on all mail and greeting cards should be sent by first class mail for best results.

No parcel may be more than 100 inches in length and girth combined nor exceed 70 pounds in weight.

SEES MOVIE 144 TIMES

CAMBRIDGE, Mass.—A Theodore Held of Columbus, Ohio, a Harvard college sophomore, is so crazy about Deanna Durbin that he visits all neighborhood movies where the film, "Mad About Music" is shown. By his own compilation, Held has spent \$45 and seen the picture 144 times.

In the above scenes from "Thanks for the Memory" comedian Bob Hope evidently has strayed far away from "Rainy afternoons" and "Swinging Harlem Tunes." In the upper panel he is shown with lovely Shirley Ross while he is knitting one and purling two; while at the upper right Bob resorts to the cook book to prepare his own meal. In the lower left Charlie Butterworth and Roscoe Karnes are amazed at the little things that they have in their hands; while at the lower right Shirley and Bob are shown in a typical newlywed pose. "Thanks For the Memory" will be shown at the Arcadia theatre starting today.

leave the ground, momentarily nullifying this self-steering effect.

"At such times the driver has to supply all the steering by turning the wheel himself. When complicated by gusts of wind from the side or by a puncture or blow-out, this manual control of direction is sometimes not fast enough to prevent a swerve which might be dangerous.

"An exclusive Hudson development never before utilized in the industry, auto-poise control consists of a spring steel leverage device with the ends angled back, form shock-cushioned mechanism 'arms', connected directly to the wheel spring forging. These mechanical 'arms' tend to resist the forces which turn the wheels from their true course whether it be wind, road shock, puncture or blow-out."
