There Is No Returning

"Turn Back the Universe," mooed the balladist, "and the sky. Give Me Yesterday."

That was in the sentimental days B. C. (Before Croon- "Nothing matters now. Peace's ers). But there are almost as many people yearning today for the "good old days" as there were then.

After the World War, we yearned for the happy and the work have to be told anything to worry her. I'm thank- acage for his pet turtle," Carole went on. "Only Peace decided with word wi for the "good old days" as there were then. After the World War, we yearned for the happy and

simple days before the war when a dollar was a dollar, What I don't see is why youand you could travel the world without a passport. But that world was gone.

Since 1932 we have been yearning for the flush days when anybody could turn a nice profit in Goldman-Sachs from you and Tex Guinan honored by the endearing term "sucker" those who were making her rich.

Now, as the new European war enters its decisive last phase, there are still some who look back to a resumption of world trade on a comparatively free, private basis, just as it was before the invasion of Poland.

It is more than possible that this fond, sentimental backward gaze was one of the factors in the undoing of France. The conquered republic was constantly looking it back to her triumph in the World War, and to the system of trade, political, and military alliances it had made then. They were gone, but France looked back.

The United States is fortunate in that it can look thead, if it will, unafraid into this strange new world. But unfortunately nostalgia and the compelling remembrance of things past is also strong among us.

Should Germany emerge from the war as economic spokesman for 400,000,000 people in Europe, Japan control the economic activities of another 400,000,000 in Asia, and Russia another 200,000,00, foreign trade is going to be something the like of which the world never saw.

Gigantic pressures will be able to be directed in turn and at will on one small independent country after another. Their only chance to avoid complete economic dependence will be to combine.

There Is No Returning

"Turn Back the Universe," mooed the balladist, "and the sky. Give Me Yesterday."

That was in the sentimental days B. C. (Before Crooners). But there are almost as many people yearning today grandmother won't have to be told for the "good old days" as there were then.

After the World War, we yearned for the happy and simple days before the war when a dollar was a dollar. What I don't see is why youand you could travel the world without a passport. But What did you mean about Ogden's Ogden that world was gone.

Since 1932 we have been yearning for the flush days when anybody could turn a nice profit in Goldman-Sachs from you?" and Tex Guinan honored by the endearing term "sucker" those who were making her rich.

Now, as the new European war enters its decisive last phase, there are still some who look back to a resumption of world trade on a comparatively free, private basis, just as it was before the invasion of Poland.

It is more than possible that this fond, sentimental backward gaze was one of the factors in the undoing of France. The conquered republic was constantly looking back to her triumph in the World War, and to the system of trade, political, and military alliances it had made then. They were gone, but France looked back.

The United States is fortunate in that it can look shead, if it will, unafraid into this strange new world. But unfortunately nostalgia and the compelling remembrance of things past is also strong among us.

Should Germany emerge from the war as economic spokesman for 400,000,000 people in Europe, Japan control the economic activities of another 400,000,000 in Asia, and Russia another 200,000,00, foreign trade is going to be something the like of which the world never saw.

Gigantic pressures will be able to be directed in turn and at will on one small independent country after another. Their only chance to avoid complete economic dependence will be to combine.
