PHILIPPINE'S DEFENSE PUT UNDER U. S.

PARK, N. Y., July 26.—Roosevelt today ordered and navy in the Philippines to the command of the armed forces of the states for the duration of the emergency.

Under obviously was a new directed at Japan, following yesterday's act by the state and the British League of Nations, in the light of Japan's assets and declaring economic war against the empire.

Roosevelt's action will be virtually on a war and will integrate the defense forces of the United States set up an emergency developed by the east, making the Philippines the first Oriental out-let of America's defense line.

In the order, the organized forces of the Philippines placed under the command of the United States army to be designated by the War Henry L. Stimson.

Naval components of the United States army will be placed under the command of the United States Navy.

Military forces of the United States have been subject to intensive training in the Philippines since more than four years ago.

Philippine armed forces have been under the command of Gen. MacArthur, former chief of the United States Army and the American General who maintained close liaison with the Philippines.

Getting Sentry-Mental Over You

Except for trouble with a trip-hammer tapper and snarled nerves, Private Ronald Pollen has no complaints about the life of a soldier under stripes or bars. His was the task of serving as sentry during the visit of Earl Carroll's scanty-panty Vanities show to Camp Haan, Riverside, Calif.

JAPS TO MOVE TO INDO CHINA ON WEEK END

By KURT STEINER
United Press Correspondent
SAIGON, French Indo-China, July 26.—The Japanese military said today that their planes and warships will move into French Indo-China bases over the week end, and the local French press called on the public to remain calm in the face of "extremely grave" developments.

No mention of the Indo-Chinese crisis had been permitted in the press until today.

The Saigon newspapers today announced the imminent Japanese occupation and the conservative newspaper, L'Opinion, said that "again Indo-China is front page news but there is no reason to be particularly satisfied and we would rather be without such prominence because it means that there is danger ahead."

Troops are expected to arrive Wednesday.

Informants said that the Japanese air force would be limited in numbers for some time because of the lack of suitable air fields in southern Indo-China.

A small number of warships, possibly four destroyers for the Saigon area and a cruiser and three destroyers for the Camranh Naval Base, are due at any time, a Japanese naval informant said.

There are about thirty Americans, mostly oil men, still here. All women and children have left.

The United States oil interests in Indo-China are larger than those of the British but there are no stocks of American oil here at present. American oil companies have valuable installations in the colony.

It was expected that Japan would do her best to provide the goods Indo-China has been importing from the United States and Britain. One immediate effect of events, it was believed, was that American rubber purchases in Indo-China would end. They have amounted to about 25,000 tons annually.

Trucker Trapped

It took hacksaws, crowbars, 75 men, and plenty of advice from carb-stone kibitzers to rescue George Arden, trapped in the cab of his truck when it overturned on a Chicago street.

HUGE TAX BILL WILL ADD THREE BILLIONS TO FEDERAL TAX REVENUE

By James R. Shepley
United Press Staff Correspondent
WASHINGTON, July 26.—The House Ways and Means committee today reported the \$3,529,200,000 tax bill and said that while it is the largest in history there is "convincing evidence that this burden will be borne cheerfully."

The revenue which would be raised by the bill, added to present taxes which in fiscal 1941 yielded \$7,607,000,000, will enable the government to meet about 60 per cent of the nation's all-out defense expenditures from income, and raise the remaining 40 per cent by borrowing, the committee estimated.

The committee contrasted this with the financing system of the first World War, when, it said, only one-third of expenditures were met by taxation and two-thirds by borrowing.

The bill will go to the house floor for consideration on Tuesday, with a three-day limit on debate which is expected to assure passage by the end of the week. The Republican minority of the committee, while joining in reporting the bill, filed a statement criticizing administration spending.

The Republicans said they had no alternative but to support the measure "to bring revenues and expenditures closer together." But they charged that extravagance in construction of army cantonments has been "so rampant as to constitute a national scandal."

The full committee report stated that "the bill is unprecedented in the amount of revenue it is designed to provide," and that "it lays a substantially increased burden upon the American people."

"But there is convincing evidence that this burden will be borne cheerfully in the light of the overwhelming importance of national defense to the continued freedom and security of the United States," the report said.

"It is believed that the risk to life and property from an inadequate preparedness would make even a much heavier burden attractive by comparison."

The committee added that in drafting the measure it sought to distribute the additional tax burden "as equitably as possible among the several classes of taxpayers."

The report reviewed the fiscal situation that prompted the administration to undertake the tax program, and pointed out that since April 24, when Secretary of the Treasury Henry Morgenthau, Jr., estimated defense expenditures at \$39,000,000,000, the estimate has been increased to \$50,000,000,000.

The huge tax program will assure payments of nearly \$2,500,000,000 on the earnings of individuals and corporations, and affect nearly every citizen through stiff levies on hundreds of goods and services, ranging from pleasure yachts to cigarettes.

The bill, product of three months of committee work, would provide funds for both ordinary and defense expenditures from the following sources:

Individual	Incomes	\$1,152,000,000
Corporation	Incomes	\$1,322,500,000
Estate and	Gifts	\$151,900,000
Excises		\$902,400,000

Individual incomes levies on married couples are to be computed on the joint earnings of husband and wife in a move designed to provide an additional \$300,000,000 in revenues. New surtaxes on individual incomes range from five per cent on the first taxable dollar to 75 per cent on earnings over \$2,000,000.

Corporation earnings, largest single source of government revenues, are subjected to a 10 per cent rise in excess profits taxes for each bracket and will range from 35 to 60 per cent.

In addition, excess profits levies will be computed before payment of normal income taxes rather than by the present method of computation on earnings, less normal taxes. Corporations also will be required to pay surtaxes of five per cent on their first \$25,000 earnings, six per cent thereafter.

The bill retains present normal tax rates of four per cent on personal incomes and 24 per cent on corporation earnings. A special defense levy of 10 per cent, the normal tax, imposed last year, is made permanent.

The committee justified computation of individual income taxes on the joint earnings of husband and wife as a means of obtaining "a more equitable distribution of the tax burden." The report said that joint returns would prevent unfair operation of the income tax law with respect to families where all income is received by one spouse, compared with families receiving incomes from both husband and wife and would prevent tax evasion through husband-wife transfers of property.

Five committee members filed a statement opposing the joint return feature, expressing "disagreement and dissent." They were Reps. Frank H. Buck, D., Calif.; Milton H. West, D., Tex.; Knute Hill, D., Wash.; Thomas A. Jenkins, R., O.; and Bertrand W. Gearhart, R., Calif.

British Studying Clothing Size To Set Up Standard

LONDON—Nearly 200 of London's poorest children are helping to produce clothes which will be a perfect fit for boys and girls all over the world. They stood patiently while experts measured hips, chests, arms, and height to obtain statistics which will enable millions of garments to be made to standard sizes.

When these standards are adopted mothers no longer will ask for a "dress for a girl of 4" or a "shirt for a 10-year-old boy."

They will be able to buy a definite coded size, scientifically calculated.

The British Standards Institute was asked by manufacturers to investigate the possibility of introducing standard sizes for children's clothes.

It was found that age was the commonest and also the least satisfactory method of calculating size.

American experts had measured 120,000 children in the United States, but the institute wanted to experiment with British boys and girls.

It found the models, 104 boys and 84 girls. They were healthy, well-nourished, perfect specimens of British childhood.

If manufacturers approve the idea, hundreds more British children will be measured. Finally, the standard sizes will be added to the 1,060 other standards which the institute has set up.

Fight Impending Over Election Of New Hobo King

By United Press
MINNEAPOLIS, Minn.—Dr. J. Leon Lazarowitz has opened his campaign here for re-election as president of the Hobo Fellowship.

Lazarowitz, claimant to the title of "King of the Hoboes" and holder of degrees from three universities, said he would seek re-election at the organization's national convention at Britt, Ia., Aug. 10.

His claim to the title is disputed by Jeff Davis, also prominent in migratory circles.

Concerning labor unrest in defense industries, Lazarowitz said: "The trouble with labor is there is too much of it."

He added, however, that "respectable members of the migratory profession believe in limited amounts of labor."

"They are migratory workers, who are not to be confused with huns, who are migratory non-workers," he said.

Lazarowitz says he holds degrees as Doctor of Migratory Literature (cum laude), Doctor of Migration and Doctor of Hobology from the Universities of Michigan, Nebraska and Penn State.

Men More Useful In Defense Work Not To Be Called

General J. Watt Page, State Director of Selective Service, today again urged Texas, local boards to make certain that no man is called for direct military training who is more useful to the national defense program in his civilian occupation.

Stressing the need for this careful selection and the necessity for maintaining an adequate reservoir of professional and technical specialists, General Page said:

"While the selection of men for service in the armed forces is essential to the national defense, it is equally important that there be no interference with the production of defense supplies and materials. We must feed and clothe the military forces, as well as preserve the morale of the civilian population by protecting public health and general welfare."

"There are hundreds of places where the hand of man is needed to produce arms, munitions, tanks, trucks and airplanes. Vitrally important is the fact that from our mines we must produce the minerals from which a mechanical army fashions its weapons. According to a recent survey made by the Office of Production Management, the supply of manpower in the field of engineering, including trained technicians and specialists in mining and metallurgy, is at a 'dangerously low' level."

"We must take a careful and intelligent investigation of every registrant to be sure in each case that a call to military training will not interfere with equally important civilian work for national defense. Local boards must give full weight to the provisions of the Selective Service Regulations dealing with the claims for occupational deferment of 'necessary men' engaged in activities necessary to the national defense, including those necessary to defense production."

Stone Village In East Is Ancient

By United Press
NORTH SALEM, N. H.—There are indications that Irish monks lived here as early as 800 A. D. Several archeologists believe a "stone village," recently excavated, was built more than 1,000 years ago by Culdee monks who came from Ireland to escape the persecution of Norsemen.

Archeologist William B. Goodwin of Hartford, Conn. is convinced of the Irish origin of the ruins. They consist of a cluster of stone houses, altars and walls built around a central plaza.

Bands of Culdees first appeared on Iceland in 795. They built their stone houses on Papey Island where ruins similar to those of this community still stand.

According to historians, the migration from Ireland to New England shores via Iceland and Greenland is logical since both Irish and Welsh have legends of the discovery of a continent far to the westward.

So far no human skeletons, tools or weapons have been found. There is no clue as to what became of the builders if they were Culdee monks. They may have been wiped out by Indians or sailed back to their native land. Meanwhile, the stone village attracts school classes and archeology students.

Crude Production Increases Sharply During Past Week

HOUSTON, July 26.—Because Texas fields returned to a more normal week containing only two shutdowns, after having been shut in for three days the week before, United States crude production increased sharply, to 3,869,300 barrels daily, in the 7-day period ending today, the Oil Weekly Magazine reported.

The new rate was 182,200 barrels above that in the previous week and 22,200 barrels in excess of the indicated daily market demand for domestic crude in July, as estimated by the Federal Bureau of Mines.

A rise in Texas production to 1,431,600 barrels daily, from 1,234,100 barrels the preceding week, was accompanied by smaller increases in several other states.

The production trend showed: Texas 1,431,600 barrels, up 197,500; California 639,500, off 2,400; Oklahoma 415,450, off 6,300; Illinois 332,300, off 11,200; Louisiana 313,900, off 4,400; Kansas 241,950, up 2,900; New Mexico 108,000, up 500; Eastern States 91,100, up 400; Mountain States 107,550, up 1,000; Michigan 39,100, off 300; Indiana 21,100, off 200; Arkansas 72,650, off 550; Mississippi 49,800, up 4,300; Nebraska 5,300, up 50 barrels.

Psychiatrist Calls Jitters Nationwide

By United Press
PITTSBURGH.—The world crisis is producing a war of nerves in the United States and has induced a nationwide state of "jitters," a psychiatric specialist declared here.

Miss Sybil H. Pease, consultant in mental hygiene for the Public Health Nursing Association of Pittsburgh, said the growing conditions instability have created a demand for nurses with training in the psychiatric field.

"The present situation has added to the mental hazards of life," Miss Pease said. "We are all jittery today. Things look large that otherwise we could take in our normal stride."

The specialist pointed out that the psychiatric problems arising from the "jitters" should be handled by trained nurses, with understanding of mental diseases and knowledge of the possibilities of their prevention.

"There always was a need for nurses with this experience," she said, "but the more wars there are, the greater the threat to people's equilibrium."

Complete List Of Newspapers Compiled By WPA

ANTONIO, Tex.—Publication of the most complete list of newspapers ever compiled announced today by Mrs. Taylor, state director of city service programs for Texas.

The list, which includes the name, dates and location of every newspaper published in Texas between 1813 and 1940, is included in the 293-page volume which was published under the sponsorship of the San Antonio Museum of History Association.

Copies of the book have been deposited in 300 of the outstanding libraries and a number of copies are being distributed to the institutions by the director of the San Antonio Museum, who represented the publication of the volume.

It is hoped that publication of this guide to historical newspapers will emphasize the importance of preserving such daily publications in the future, commented Mrs. Taylor.

Of the files recorded in the past, particularly those published during the civil war. Those published during the war between Texas and the rest of the United States are largely in public collections and in the collections of individuals.

Eastland Girl Is Winner of Medal

HUNT, Tex.—An enthusiastic camper was Mary Katherine Hoffmann, daughter of Mr. and Mrs. C. W. Hoffmann, who last week returned to her home from Camp Waldemar, a charming camp in the hill country near Kerrville, where she participated in horseback riding, swimming, boating, dramatics, and numerous activities that the camp offered.

At the final banquet, a gala affair honoring the campers and four hundred guests, she was awarded a bronze medal for outstanding work during the term, for making the required number of teams, and for holding aloft the ideals of Waldemar.

Hitching Posts Of Town Disappear

By United Press
MILFORD, Ind.—It wasn't of much practical use any more. Oh, the children found that it made a good "swing" to while away a few hours, but that's about all. Used to be when farmers drove their teams to town on a Saturday afternoon to do the week's buying there was hardly room to tie their horses. Then it was a sign of the times. But that's all changed now—autos and trucks bring in the farmers and haul their grain into town. Like anything else, it has outlived its usefulness. Hardly a one left in the Middle West any more and now Milford has taken it down. Sort of marks the end of the beginning of another time.

It wasn't of much practical use any more, that last hitching post.

Grand Jury Makes Its Final Report

The 91st district court grand jury for the June term completed its work and adjourned Friday.

The final report made to Judge Geo. L. Davenport shows that the grand jury was in session a total of 14 days during which time 142 witnesses were examined and 44 indictments returned, 19 of which were felonies and 25 misdemeanors.

The report was signed by H. L. Baskin as foreman.

Ask Texas Local Boards for 1,221 White Trainees

State Selective Service Headquarters announced the Army's twenty-second call on Texas' local boards for 1,221 white trainees to be delivered for induction August 12, 13, 14 and 15.

A call has already been issued for 446 negro selectees for induction on August 4th and 28th. Headquarters officials stated.

Waffle Plant Now Makes Gun Parts

By United Press
HONEY BROOK, Pa.—The national defense drive has altered the type of products made by many factories, but Alfred Stauffer believes the conversion of his plant is one of the most unusual.

Stauffer operated a small business in the form of a waffle-making plant known as "bean-waffles"—waffles stuffed with baked beans. Now the huge barn is a machine shop, employing 38 men and turning out torpedo heads, Diesel engines, and parts for big guns.

London Man To Fly Chinese Plane

By United Press
LONDON, July 26.—Paul helped train numerous Army pilots, but he for more active service. Randolph Field instructor and what he sought. He has the far East to fly for her battle against Japan. London for a brief farewell with his parents, Mr. and Mrs. Bill Greene, the youth said he would go first to Burma, where many flyers are being schooled. He was transferred to Randolph, Army Air base, after graduated from a private school at San Diego, Calif., released from his Army because of America's commitment to all out for China.

Four Couples Get Marriage Licenses

The following marriage license have been issued by the Eastland County Clerk:

Billie Ray Lyeria, Eastland, and Miss Oma Crenshaw, Eastland.

Blair R. Clark, Cisco, and Mrs. Cordie Lee Norvell, Cisco.

B. E. Dalton, Merkel, and Mrs. Josephine Thompson.

William D. Adams, 729 W. 7th street, Dallas, and Miss Melba Nadine Thompson, Scranton.

Revival At Union Being Conducted

What is described as an "old fashioned" revival is in progress at Union, southeast of Eastland a few miles. It began last Friday and is being conducted by Rev. Walter Nowlin of Carbon.

Services are being held in the open air each evening at 8:30 and the public is cordially invited to attend.

Neapaperman To Head Commission

AUSTIN, July 26.—George W. Cottingham, Houston newspaper editor, today was chairman of the Texas Public Safety Commission. He was elected yesterday to succeed W. H. Richardson Jr. of Austin, at a meeting attended also by George Pengelgrass, new member from Marshall.

Motorcyclist Hurt In An Accident In Outskirts Of Ranger

John Elmore Vereen of San Diego, Cal., was painfully injured in a motorcycle accident on the outskirts of Ranger when, according to reports of the accident, his motorcycle went off of control.

He was taken to the West Texas Hospital for treatment.

Stevenson Reviews Soldiers At Bowie

AUSTIN, July 26.—Lieut.-Gov. Coke R. Stevenson, who likely will become governor within two weeks, was at Camp Bowie today to review troops of the 36th Division, composed of Texas National Guardsmen.

Italians Lose 12 of Mosquito Fleet In Malta Attack

LONDON, July 26.—At least 12 of the famous Italian motor torpedo boats were sunk today when a mosquito fleet attacked Valetta Harbor, capital of the Island of Malta, the armed British services said in a joint communique. The E-boat attack was said to have been repulsed and a number of prisoners were taken.

Maltese coastal defenses and Royal Air Force planes beat off the first surface attack made on the British Mediterranean fortress since the start of the war, a joint admiralty, air ministry and war office communique disclosed.

"An attack by E-boats was made on the harbor at Valetta, Malta, early this morning," the joint communique said.

"It was repulsed with heavy losses for the enemy. Full details are not yet available but already it is known that about a dozen of the attacking E-boats were sunk by coast defenses and aircraft of the RAF. A number of prisoners were taken and bodies were recovered."

Crude Production Increases Sharply During Past Week

HOUSTON, July 26.—Because Texas fields returned to a more normal week containing only two shutdowns, after having been shut in for three days the week before, United States crude production increased sharply, to 3,869,300 barrels daily, in the 7-day period ending today, the Oil Weekly Magazine reported.

The new rate was 182,200 barrels above that in the previous week and 22,200 barrels in excess of the indicated daily market demand for domestic crude in July, as estimated by the Federal Bureau of Mines.

A rise in Texas production to 1,431,600 barrels daily, from 1,234,100 barrels the preceding week, was accompanied by smaller increases in several other states.

Army Projects Southwest Started Now

San Antonio, Tex.—The Army will begin immediately now Army projects in the Southwest which to cost over \$12,000,000 announced by the Zone Quartermaster at Houston today.

San Antonio Construction Co. has been awarded a contract for construction of repair facilities at the Quartermaster Depot, San Antonio. There will be about 1,000 men assigned to the project. The project includes barracks, mess hall buildings, storage buildings, store buildings, shop buildings, theater and several other buildings.

San Antonio Construction Co. is negotiating with the Army for additions to the depot costing some 272,000 square feet of additional storage space for the San Antonio Depot where ten buildings with 1,044,000 square feet of storage space are now under construction.

The Grimshaw Company has started work at Fort Bliss on maintenance shops, and necessary utilities and a school motor room. They will cost \$1,000,000.

San Antonio Construction Co. is also working on additions to the depot costing some 272,000 square feet of additional storage space for the San Antonio Depot where ten buildings with 1,044,000 square feet of storage space are now under construction.

ALLEY OOP

"EAGLE" OF R. A. F. PICTURES DAWN PATROL, 1941 STYLE

DAYTONA BEACH, Fla.—Bob Mannix, 22, who loitered around the airport here a year ago begging rides and learning to fly, today is a member of the American Eagle squadron of the R. A. F.

In between, he spent an exciting year. He sought admittance into the army air corps and was rejected. Then he went to Canada and applied for training and was accepted.

After several months of intensive schooling, he crossed the Atlantic with a group of other American and Canadian trainees.

In England he was assigned to a shuttle service, flying supplies from termini in Scotland. After months of seasoning, he was transferred to the Eagles, a combat squadron made up of American volunteers.

Day Begins Early
Writing his mother, Mrs. Emma B. Mannix, Daytona Beach, Bob described a typical day with his outfit. Here's his letter in part:
"At 3:30 A. M. a sleepy batman whacks the bedpost, shoves a cup of tea in my face and allows as how I should get up. When I arrive at the office the planes are warming up and the other boys straggling in, wisecracking and grumbling. A few minutes are spent getting the planes ready for a quick takeoff, or what is called a 'scramble.' Parachutes are placed in the cockpits of the Hurricanes, with harness straps ready to buckle on, the flying helmet with oxygen mask and radio set is slung on and made ready to slip on. Machine gun sights are

checked and then we go back to the hut to wait for action, which by the way usually is not a long wait.

"When the alarm rings we tuck out to our planes and are usually in the air in two minutes, taking off the most convenient way regardless of the wind. We climb and listen for orders on our radio. Most of our fighting is done above 30,000 feet over the Channel.

No Time for Fright
"When the enemy is sighted we prepare for action, getting guns etc., all set, and then we sail into him. There's not much time to be scared although I admit the first time I saw all those Germans coming at me I jumped 200 feet.

"Hitler's bad boys never seem to attack unless they outnumber us 20 to 1. But that's fair enough because there's more to shoot at.

"When the fight is over, we come back, refuel, etc., and wait for the next one. At meals half of us eat while the other half stays in readiness. This goes on till dark, which believes me, comes about 11 p. m.

"It's not such a bad life, not very romantic I'll admit, but exciting and it has its moments. We're supposed to have 48 hours

OPM Tells Newly Weds To Expect Fewer Thrills In Home Furnishings

WASHINGTON.—With national unity a prevalent topic of conversation, the Office of Production Management tells how a patriotic young bride who might go about furnishing her home without interfering with the government's needs for national defense.

Aluminum no longer is available for domestic use, they said, so her pots and pans will have to be made of something else. They explained, however, that she should not worry because many good substitutes are available.

Less durable and maybe a little off a week but, we're pretty busy and it's hard to get. I'm due for a leave soon because I haven't had one since I came in. England. Maybe I can get over and see a little of Ireland. You told me my grandparents came from there, and maybe I can find out why."

harder to scour when dish-washing time comes, are the porcelain enameled variety that mother seemed able to get along with.

If she wants to buy a refrigerator she will get a product that hasn't as many fancy trimmings on the outside, but it will be just as efficient. The inside will be different, too. The freezing compartment probably will be of enameled steel instead of stainless steel. Chrome, which makes steel stainless, is a vital ingredient for defense.

Tableware, always the pride of the young bride if it is a highly polished silver set, won't be quite as cherished, and certainly, will never be singled as a valuable heirloom. Plastics to some extent, low chromium steel, steel, glass and wood will have to suffice, the OPM pointed out.

Toasters will operate electrically, but different designs will permit their successful use without mica. And the young bride may

may have to get along as best she can with a gas stove instead of an electric range. OPM officials explained that power units in electric stoves require nickel, chrome, and some tungsten, all critical materials already in great demand.

Finally they said that young brides and housewives should not feel that they could get any better utensils if they paid a higher price because both rich and poor alike will be facing the same shortage.

They reported that many luxuries and common items purchasable in normal times just won't be on retailers' shelves. Many are gone now.

Smelly Cargo Is Refused By Workers

BOSTON.—This port has lost \$100,000 in annual business because longshoremen refused to handle strong-smelling soap stock.

"Money isn't everything," they said when shippers offered to pay an additional 15 cents an hour.

The Urge To Federate

Federation is in the air these days. The world is gradually realizing that a Europe cut into little chip-on-the-shoulder political subdivisions, a Balkanized Europe in short, was not good for Europe and not good for the world.

The number of such countries was increased by the World War. For instance, the old Austro-Hungarian Empire, political monstrosity though it was, had a certain amount of justification as an economic free trade area. Splitting it into tiny divisions made each of those divisions an economic torso unable to survive.

Hitler had something in his plan for economic unification of Europe. What Europe and the world cannot permit is that this unification be achieved by force and solely for the benefit and aggrandizement of the German Reich. It must be done voluntarily and without sacrificing local free self-government. Hitler is utterly incapable of accomplishing it on any such decent basis.

The world has got to stop believing that political freedom and local self-government necessarily mean economic isolationism. The day is past when the two must necessarily go together. It is possible—it must be possible in future—for countries to maintain complete internal political independence, and yet give up some previously sacred rights to set up the kind of trade barriers that insure their own strangulation and that of their neighbors.

The United States is taking the lead in some such plan for the small islands of the Caribbean. Most of these islands, chronically poor, depend for such wealth as they have on exports of agricultural products. The war has cut them off from Europe's markets. They are in a desperate plight. Plans are in the making for setting up a customs union between all these islands, the United States, and Britain.

Meanwhile, more and more weight is being placed behind the proposal to lower and gradually eliminate tariff barriers between the United States and Canada, looking toward some day perhaps enlarging the already vast free trade area of the United States. Canada's currency is already closely aligned to that of the United States. Why not a common currency, suggest some. It would not necessarily involve political union.

The World War resulted in breaking up Europe into small, warring, antagonistic national fragments which succeeded in damming up and ruining the free flow of trade that might have meant prosperity for all.

This war must result in the breaking down of economic barriers by realization that political independence maintained at the expense of economic suicide is a deadly delusion.

Ranger Fireman Finds That New Types of Incendiary Bombs Would Prove Quite a Problem In a Raid

Charles Isbell, member of the Ranger Fire Department, returned Friday night from a firemen's short course, held at Texas A. & M. College, and brought back with him some interesting information about incendiary bombs, as now used in the European war, which will, no doubt, be somewhat startling to people who read about them.

Items, taken at random from a bulletin furnished each fireman taking the course, reveal: "That a plane carrying 12,000 incendiary bombs could of itself start 1,000 fires on one trip, and there is no fire department in the United States today that could handle that number of fires at one time."

"There are two types of incendiary bombs, the intensive type and the scatter type. In the intensive type the heat and flames are concentrated in a limited space, and in the scatter type the incendiary materials are scattered in a number of small burning masses."

"The Magnesium-Electric Bomb (intensive type) weighs about two and a half pounds, is nine inches long and two inches in diameter. When ignited the priming charge of thermit burns with a terrific heat, reaching temperatures up to 5,000 degrees Fahrenheit, and remains active for about 50 seconds. Its greatest heat serves to melt and ignite an incendiary material which is the actual casing of the bomb. When ignited this molten magnesium may burn for 15 or 20 minutes at temperatures up to 2,500 degrees Fahrenheit and will certainly set fire to anything combustible within a few feet."

"During the first 50 seconds, while the priming charge is burning the bomb looks very violent, jets of flame are emitted from vent holes in the side of the bomb and pieces of molten metal may be thrown as far as 50 feet. After the first minute the bomb becomes less active and the magnesium casing melts and the pressure from within is released."

"How to extinguish: There is only one known substance that will do the trick, and that is a composition of zinc chloride and sodium chloride, but this is rather expensive. Fine, dry sand or powder such as talc have been found reasonably successful."

Probably the worst type of incendiary, however is the Thermit Bomb (intensive type). Of this the bulletin says: "Thermit is the proprietary name for a mixture of iron oxide and aluminum powder, which on burning liberates masses of molten iron."

This bomb is particularly deadly, according to the bulletin, which says that "of all the extinguishing agents used by fire departments, not one is capable of extinguishing this type of bomb."

For the general information of the public, in case of air raids, one general rule could probably be followed: "Don't try to put out an incendiary bomb with a bucket of water, or even a garden hose," because most of them burn all the more when water is used on them.

Several of these incendiary bombs were demonstrated at the firemen's short course, Isbell stated Saturday, some of which were set off in order that the firemen could see the intensity with which they burn, and the care needed in trying to put them out.

By PETER EDSON

There'll Be No More Leering at General Lear, Girl Golfers in Shorts or Army Discipline

Edson

WASHINGTON—The Case of Lieut.-Gen. Ben Lear and his disciplining of 350 soldiers by making them do a 15-mile march because one detachment yoo-hoed at girls in shorts on a Memphis golf course is settled as far as General Lear is concerned. Although the War Department has asked for a report and is investigating, nothing much will come of it.

The talk of a congressional investigation of the incident is merely evidence that the silly season is here, and if Rep. Paul Kilday of San Antonio carries his demands any further he is probably leading with his neck.

The good gentleman from Texas worked his way through college and law school and is serving his second term in Congress though he has just turned 41. He is considered an asset to the House Military Affairs Committee, but he never served a day of his life in military service, not even in an R. O. T. C. unit in high school or college, and all he knows about the Army he has learned from the upholstered and air-conditioned halls and offices of Congress.

GENERAL LEAR, on the other hand, had all the traditional Army demand for strict discipline behind his action, and military folklore is replete with incidents in which mass punishment has been meted out to whole companies or even larger units for breach of orders.

At West Point, it is traditional that any cadet who can't keep his eyes straight ahead will get demerits. And it's no uncommon occurrence for parading units to receive mass demerits if they let their eyes stray as their column or line passes a pretty girl standing at the side of the drill ground.

The idea behind all this insistence on strict observance of courtesy to women is obvious. The way Army officers figure it, if they permit the yoo-hoo, one thing leads to another and pretty soon the civilian population in the vicinity of an Army post is yelling against the menace of the soldiers to the nice girls of the community—it isn't safe for women to walk alone on the streets any more, and all that. And if there is one thing an Army command dreads worse than actual it's getting in bad with the taxpayers.

Officers who have served under General Lear know him as a tough but fair disciplinarian. He isn't a West Pointer himself, having come into the Army as a Colorado volunteer during the Spanish War. Subordinates who have been called on the carpet by him say that they usually have had it coming. He doesn't spare his verbal tongue-lashes, but when the admonishment is over, he's just as likely to turn to the officer he has just dressed down and say smilingly, "How about a game of golf?"

Attorney Defending Himself Slips Upon His Own Question

PASADENA, Cal.—When attorney Clark Edwin Davis was arrested for speeding, he remembered above all he was an attorney.

Defending himself in police court, he asked the arresting officer, Paul Goble, if he could produce a certificate of accuracy for the speedometer of the officer's motorcycle. He could not.

NEW HOME MAKER FAILS

CHICO, Cal.—Police approved of the decision of a new bridegroom that he should have a furnished home but disapproved of the manner in which he went about it. The bridegroom and two companions were arrested for numerous recent furniture thefts with which they were gradually furnishing the home.

Mrs. J. S. McDowell and Miss Cecelia McDowell were in Dallas Saturday, where they joined some of Miss McDowell's classmates of S. M. U. to attend the opera Saturday evening.

Randolph Cadet Gets Punishment As Given To Youngsters

By United Press
SAN ANTONIO, Tex.—Reminiscence of grade school was the punishment given a Randolph Field cadet who stepped from his airplane at College Station and remarked:
"So this is Temple."
Superiors made him write, 500 times—"and don't leave out the punctuation!"
"I am a 'dodo' for not studying my maps before taking off on a cross-country navigation flight."

Many Babies Are Being Saved By Care In Summer

AUSTIN, Tex.—The lives of thousands of Texas babies are being saved this summer by intelligent parental care during hot weather. However, many more infant deaths could be avoided if parents would have a keen realization of the value of simple common sense precautions," states Dr. George W. Cox, State Health officer.

Records of the State Health Department's Bureau of Vital Statistics show that 2,506 babies died of diarrhea and dysentery during 1940, many of them occurring during the hot weather. The infant death rate for diarrhea and dysentery in Texas is too high, as can be seen from the above mortality figures. Public health officials cannot solve the problem alone; parental cooperation is the real key to its solution.

- The following suggestions, if followed by parents of infants, would go far in further reducing deaths from diarrhea and dysentery:
1. Whenever possible, infants should be breast-fed for the first 6 or 8 months. When bottle milk is used it should be boiled or pasteurized.
 2. Drinking water for the baby always should be boiled.
 3. Personal cleanliness should be the rule for every member of the household. Those handling milk or food should be particularly careful.
 4. Any member of the family or visitors showing symptoms of disease, no matter how slight, should be kept away from the baby. They should not be allowed to handle any of the food intended for him.
 5. The house should be screened to protect not only the baby, but all household food, from flies.
 6. Every home should have a

CHURCHES

Saturday Evening—8:15 p. m.

safe water supply.
While most of the above suggestions are applicable to all the seasons of the year, the following precautions are important in hot weather:

1. The baby should be kept as cool as possible; 2. He should be kept clean; 3. Clothing should be reduced to the simplest essentials; 4. He should be protected against insects; 5. He should not be overhanded; 6. He should be kept in the open as much as possible; 7. Water should be increased internally and externally; 8. He should not be overfed; and finally, if there are signs of illness, the family physician should be consulted promptly.

Rail Crossing Dog Dies While on Duty

SYRACUSE, N. Y.—A yellow mongrel dog is dead after five years of warning motorists of approaching trains at a crossing.
The dog began his vigil after making friends with the regular watchman. Long before the crossing signal sounded, the animal could hear an approaching train. Immediately the dog would run into the highway and herd motorists and pedestrians back from the tracks.
But the dog was killed by an automobile when it ran into the road to chase another dog.

Fearsome, Quite

The mouse that roars like a lion is here exhorting a division of his troops leaving Torino to battle the bear that walks like a man. It's a long way home, Benito, from Russia.

Nation Is Warned Of Race Suicide

By United Press
SCHENECTADY, N. Y.—Dr. G. H. Eastbrooks, head of the psychology department at Colgate University, believes this country is headed for race suicide unless intelligent parents of America have more children.
He said, during a science forum discussion, that the disastrous effect can be seen in the differential birth rate.
"Our more intelligent and capable groups virtually are sterile, but the highest grade of the feeble-minded people have large families," Dr. Eastbrooks added.
The psychologist declared that this intelligence has built up man's civilization and has taught him to preserve the unfit through medical science. It also has taught him the deadly secret of race suicide. Because of that knowledge, man's strongest organ, the brain, is his most fatal asset, according to Dr. Eastbrooks.
"It is necessary to draw on biology and psychology to illustrate our thesis of man's degen-

eration," he said in conclusion. "Man with his high intelligence has built up a civilization in which he himself is becoming a mechanical misfit."
"We illustrate from medical practice and our differential birth rate. Man chooses the course because of the pleasure principle, using his great intelligence to guarantee satisfaction of pleasure. But his selection of pleasure is generally on selfish, not basis. Moreover, he further his intelligence to justify in this course of action, the final mental twist which probably render futile any by the geneticist to save the downfall."
When two men return from fishing trip the fish are and their weight multiplied

In 1906 the Interstate Theatres were founded.
It was a creed that every Interstate Theatre should be a Safe, Clean, Attractive and Healthful Place of Amusement in which to present the best Entertainment available. In addition, it was insisted that it provide a proper and wholesome environment for Children.
And equally important, it was demanded that all Employees be Good Citizens, sharing in the Civic and Moral responsibilities of the Community. These motives were essential to the design for happiness for both the Community and Interstate personnel.

For 35 years this has been the policy which has guided Interstate Theatres—truly the Amusement Pioneers of the Southwest—in the successful operation of wholesome places of amusement.
So diligently have they lived and practiced these ideals that the citizens of Texas and New Mexico have naturally come to have a feeling of Respect, Warmth and Friendship for these fine theatres.
Interstate Employees, numbering more than 2,000, are proud of their organization and the role they are playing in making you Happy and of being a part of the Communities in which they live.
