Labor Day

Labor Day was sponsored originally by the Knights of Labor, first general trade union organization in this country, which had much more resemblance to the present-day C. I. O. than to the A. F. of L.

Quite naturally, perhaps, we have come to think or Lahor Day as the particular property of those workers who Start Picture Soon are organized into trade unions—the ones of whom we speak, reverently or fearfully, as Labor with a capital "L." chez, one of the world's foremost

But this year we are fighting a bloody war for the pre- authorities servation of democracy, let's talk about democratic labor. with the small "I"-which comprises perhaps 85 or 90 that country who per cent of those who work for a living.

Because of the shortsightedness and sometimes the selfishness of certain union officials, Labor-with the Capital "L"-has brought upon itself frequent severe denuncia-

But Labor is made up largely of laborers. And the record fice of the cor-ord nator will show that labor-the men who actually do the workhas proven itself as actively, sacrificially patriotic as any an active interest in the more element in our population.

Because of our geographical position, because of our vast natural resources and because of our productive cap- into production shortly. Those acity the anti-axis world is forced to depend on the United who are interested in the project States for much of the material of war.

Upon the shoulders of American labor the fate of the world rests today. If labor continues to come through as it has been doing, totalarianism can be whipped. If labor were to let down, as nobody has the right to expect that it will, then all the courage of all the soldiers and sailors of the United Nations cannot save us.

The point to be kept in mind is that democracy depends upon American Labor, not American Labor. The first, without the capital "L," includes the 85 per cent who are not unionized, plus probably 99 per cent of those who do belong to unions,

The boxs in the front lines look for their weapons and ! munitions to the men at the machines -not to the relatively in 1943. It is hoped that the pre-few union officials who show an inclination sometimes to miere of the movie can be held forget that this is not their private war.

The men behind the machines are you and us, the folks with-whom we brush shoulders on the street, in buses and trolleys and elevators.

Give thm a chance to speak for themselves, and those millions are as willing to sacrifice for the preservation of democracy as any loud-voiced street-corner orator.

So on Labor Day this year let's forget that the first Monday in September used to be dedicated to Labor, and in the brief moment that we can spare fro mproduction for war. let us remember that labor should not be branded for the sint of a few of its self-proclaimed aracles.

Rugged, husky, fighting men who can take it-and dish it out!

Would you like good foodand plenty of it?

You'll get real man-size meals in the Navy. The finest food a fellow could ask for. Three square mesis a day, prepared by expert cooks trained in the country's best restaurants and hotels.
