## OIL INDUSTRY PLACE IN WAR TO BE TALKED

DALLAS, Tex.—The part played by the Texas oil industry in defense activities will be outlined before the Texas Mid-Continent Oil and Gas Association convention which opens here Friday, October 9, by Major General Ricardo Donoyan, Commanding the Eighth Service Command, according to an official announcement just received from Association headquarters.

Major General Donoyan, an Army man of over 30 years service, now stationed at Fort Sam Houston, will address officers attending the Texas Mid-Continent oil convention on the subject of "The Functions of the Eighth Service Command." His address will be of unusual interest to Texas oil men since it will stress the importance of cooperative effort in defense work and particularly as it involves the protection of vital oil properties in the event of an enemy attack through the Gulf Coast.

The Texas Mid-Continent Oil and Gas Association, through its statewide representation, has worked closely with the Eighth Service Command of the U. S. in safeguarding vital oil fields and refining centers against enemy attack according to the announcement. Major General Donoyan will cite the value of this work to the armed forces and will stress the importance of complete coordination of Army and civilian forces in the defense of vital industrial centers throughout the state.

Other speakers on the convention program include Donald R. Brown and D. E. Buchanan, officials of the federal government, Lt. Colonel D. B. Burns, and of selective service in Texas, George Sawtelle, president of the Association and a nationally prominent oil executive and advisor to the federal government, whose name will be announced in a few days, it was stated at Association headquarters.

Distinguished service awards will be given to prominent Texas oilmen on Friday afternoon. Entertainment which is being planned will include a reception and buffet luncheon at the Brook Hollow Country Club on Saturday morning. Over 400 tickets for the Texas-Oklahoma football game on Saturday afternoon have already been purchased by oilmen planning to attend the convention.

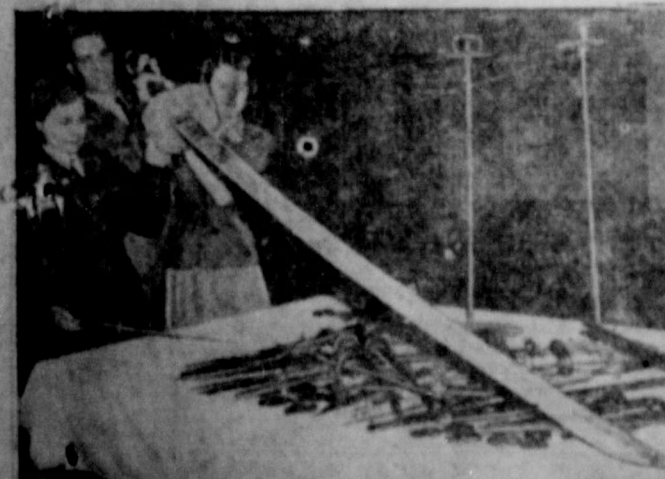

## Four Suits Filed In District Courts

The following suits have been filed in Eastland county district courts: A. E. Thorp vs. R. L. Pearson, et al, trespass to try title; Karl M. Harper vs. Emma Lee A. Scherburg; Sam H. Johnson vs. Lucile Johnson, divorce; Paulah Dotson vs. P. A. Dotson, divorce.

## Carl Barnes Post Will Meet Tonight

The Carl Barnes Post of the American Legion will hold its regular weekly meeting this evening at 8:30 in the American Legion Hall. All members above are urged to attend.

## Excuse It, Please, Must Modernize

Brooklyn, N. Y., turns the tables as Mrs. H. Tracy, salvage firmman, accepts an eight-foot 17th century sword along with two dozen smaller relics from the Brooklyn Museum for return to the Japs in modern form.

## Straight Talk

We cannot waste one man...

You must train replacements...

You must take the initiative...

## Paul Ray Davis Of Morton Valley Enlists In Navy

Paul Ray Davis, youngest son of Mr. and Mrs. S. A. Davis of the Morton Valley community, volunteered on September 23, last, for service in the United States navy and left the same day for Dallas for his final physical examination. Word has been received by his parents that he was accepted but it is not known as yet where he will be stationed.

Paul attended the Morton Valley school and has been outstanding in the County 4-H club work. He is also a member of the FFA. He recently received a pin from Texas A. & M. College in recognition of his excellent work in 4-H clubs. Paul was highly respected in his community and will be greatly missed by his friends while he is away in the service of his country.

Members of the family, including a number of brothers and sisters, came home for a visit with Paul before he left for Dallas and his work in the Navy.

**THE WEATHER**  
WEST TEXAS—Light local rains in the interior today and tonight. Little temperature change.

## BRITISH WRENS ADVISE WAVES KNUCKLE DOWN

By WALTER CRONKITE  
United Press Atlantic Fleet  
Correspondent

AN EAST BRITAIN PORT, (U.P.)—American girls will need patience, tolerance and an ability to "knuckle down" to get along in the WAVES, their new naval auxiliary service, according to members of the British naval auxiliary who now are veterans of three years of war.

In the British Isles, since a few weeks before the war began, women have been keeping long watches and performing strenuous tasks alongside the men of the royal navy. Their auxiliary organization is called the WRENS—Women's Royal (Emergency) Naval Service.

To this organization as to the WAVES, have flocked women of all walks of life, from skultery maids to society matrons. The Wrens have a niche for all of them and so well have they performed their assigned tasks that they have forced the most hard-headed opponents of the organization to recognize its valuable service.

This antagonism on the part of some officers, both high and low, and by enlisted men themselves is one of the principal difficulties which the Wrens had to overcome and which they believe the WAVES will face.

"We had to take a lot of teasing at first," said Miss Elsie McKersie, a pretty Scottish society girl whose home now is at Campbelltown because the army took over her former residence at Glasgow. "There were quite a lot of the officers who did not believe we had a place in the navy and we had to prove otherwise to them."

"They didn't actually put any obstructions in our path but we knew that they were just waiting for us to make a mistake so they could step in and say, 'I told you so.' It took a little patience and some tolerance and a great deal of hard work to get them to change their minds but I think all of them have come around now."

The jobs through which the Wrens have gained respect differ in some degree from those which the WAVES will perform. Wren enlisted personnel—"ratings"—actually are "manning" the many small craft on Britain's inland waterways. Here they have disregarded unburned faces and calloused hands to share the hardships of the boatmen and win the high regard of all the navy.

Officers are chosen for their past experience at administrative or clerical jobs or for their adaptability to them. Many work at highly secret chores, such as those in the coding rooms at shore stations. There is no known case of an official secret ever having passed their lips in 30 trying months.

## Fewer Charters Issued In State

AUSTIN, Tex.—There was a lull in the chartering of new business enterprises in Texas during August, as the number of charters issued dropped from 56 in July to 34 in August, the University of Texas Bureau of Business Research reported.

August charters were 11.6 per cent below those for August of last year, the decline amounted to 29.2 per cent, while the decrease in capitalization of new businesses was almost as large, the Bureau reported. Leading the way in numbers of new charters were manufacturing, oil, and real estate.

## Failures Show A Decline In August

AUSTIN, Tex.—The Texas et al failures were chalked up in Texas during August than were recorded for the same month last year, the University of Texas Bureau of Business Research has announced.

The decrease in failures amounted to 49.9 per cent, as only 8 firms were dissolved as compared with 14 in August, 1941. At the same time, the number in July, the Bureau noted. Liabilities of the firms failing in August amount to \$72,183, which was 27.7 per cent below liabilities of businesses failing during the same month a year ago. Assets of the bankrupt firms were recorded as \$51,319.

## Roadbuilders Forge on to Alaska

Workers on the new "Alcan" military road across Canada to connect the U. S. with Alaska are making rapid progress as they equalize topography by cutting through hilltop such as that shown above.

## TEACHERS OF OIL BELT UNIT MEET MONDAY

The executive committee of the Oil Belt District, Unit No. 7, of the Texas State Teachers Association met in Seymour Monday night, 7:00 for dinner and business at the home economics cottage of the Seymour High School.

Two resignations were accepted by the executive committee. They were those of W. E. Hancock, president of the District Association and superintendent of schools for Chillicothe, who is to leave shortly for the navy, and Martin Lawrence, vice president of the District Association, who left for the army last June. Lawrence was superintendent of the Seymour schools.

To fill the vacancy left by Hancock, the committee selected E. S. Cory, superintendent of schools at Sweetwater. Eula Handeman, second grade teacher in Sam Houston elementary school of Wichita Falls, was appointed to the vice presidency. Harry W. Rice, superintendent of the Throckmorton schools, was chosen as District executive committee member at large. The filling of this place had been overlooked by the District House of Delegates which met in Sweetwater last March.

Tuesday evening, November 17, was the date set for a meeting of the school executives of the District. This is a meeting held annually in the fall of the year, and the group will assemble in Seymour. Additional details will be announced at the proper time.

Friday night and Saturday, March 5 and 6, were the dates set for the annual convention of the Oil Belt District which is to meet in Wichita Falls in 1943.

In view of the unusual conditions which exist in the present transportation emergency, the executive committee voted to allow a maximum of \$10.00 for each member of the state house of delegates from the district who attends the business session in Dallas in November. Heretofore the representatives to the state house of delegates have paid their own expenses, and the present stipulation is considered a precedent.

At an earlier meeting of the district executive committee held last May it was decided to reduce the district dues of teachers from 50 cents to 25 cents. This reduction is effective for this school year only.

Those attending the meeting in Seymour were: Hancock, W. T. Walton and S. E. Bass, Abilene; T. B. Farnell, Joe B. McNeil, and Mrs. Ethel Parker, Wichita Falls; W. J. Stone, Nazona, and M. J. Weaver, Seymour.

## Rav Nawnham Now Is Out Of Danger

Mrs. Nannie Walker has received word that her son, Ray Nawnham, who underwent an operation at Rochester, Minn., recently, was greatly improved, and that doctors now state that he is out of danger.

## CRITICAL HOUR IN THE BATTLE OF STALINGRAD APPEARS TO BE NEARER

German Are Throwing Fresh Reinforcements Into The Battle For The Volga City In What Appears To Be Last Offensive For The Year 1942 In East

## EIGHT GRADE STAMP SALES ARE BOOSTED

The Eighth Grade of Hodges Oak Park School is probably setting some kind of a record for selling war stamps, it was reported here today when a report was made on three days of activities by members of the class.

At the first stamp sale the sum brought in was reported to be in excess of \$7.00.

Not satisfied with this showing the members had another stamp sale, this time the proceeds reaching over \$15.00, or double the amount sold the first day.

Still not satisfied with the results, another stamp sale was conducted, and this time the amount sold reached \$41.00, or nearly three times the amount of sales on the best previous stamp sale day.

New members of the class are wondering if they can again triple their last sales, and bring in more than \$123.

## LIVING COST BILL URGED BY SENATOR

WASHINGTON, D. C. (U.P.)—Sen. Prentiss M. Brown, Democrat, Michigan, said today that the Senate's anti-inflation bill will do the job of curbing the rising cost of living.

He deplored the Farm Bill claims that the agriculture price-combination was a "victory for the farmers."

Brown, manager of the senate bill, said he would attempt to arrange an informal conference with house leaders later today with a view to completing congressional action on the bill tomorrow.

## Arms Production Nothing To Brag About This Month

WASHINGTON, D. C. (U.P.)—War Production Chairman, Donald M. Nelson, said today that arms output last month was "still spotty" and no better than in August.

In comparing the output with the August production rate Nelson said that production for that month was 14 per cent below forecasts and nothing to brag about.

## Rev. Phillips To Fill His Pulpit After An Absence

Rev. David M. Phillips, pastor of the First Baptist church of Ranger, will again fill his pulpit this Sunday, after an absence of two weeks. He has been attending a Texas Defense Guard officers training school at Camp Bullis.

During the pastor's absence the pulpit has been filled by Dr. E. K. Braun of Dallas, Rev. Hubert Christian of Olden and Dr. W. R. White of Abilene, president of Hardin-Simmons University.

Special numbers given by the choir, under the direction of Mrs. Mamie Ruth Hamrick, and Mrs. F. P. Frasier, will be presented at both services Sunday.

Stars will be placed in the service flag for men in service who are members of the First Baptist Church and who have gone into service since Aug. 9.

## Two Ranger Youths At Perrin Field

FERRIN FIELD, Tex.—James W. Rolston and Samuel Hollin, both of Ranger, who entered the service during Perrin Field's campaign to enlist ground crew technicians for the Army Air Forces, have been returned to Perrin Field after a brief period of "processing" at Camp Walter. They have been classified as airplane mechanics.

Perrin Field's drive to enlist mechanics and radio men will be continued until November 1.

## SCHEDULES OF RAILROADS ARE NOW "FROZEN"

WASHINGTON, D. C. (U.P.)—The Office of Defense Transportation today "froze" all railroad passenger schedules in the United States.

The order becomes effective Oct. 4, on the basis of schedules used on Sept. 29.

APT Director Joseph B. Eichten said the order, which included even mixed trains, which carry both passengers and freight and mail, follows the agency's previously announced policy of restricting the use of equipment for transportation of crowds to football games, races and other sporting events.

The order becomes effective Oct. 4, on the basis of schedules used on Sept. 29.

## Eight 4-H Club Members To Enter A Heifer Contest

The eight 1942 winners of registered girls will compete for prizes at Eastland, Saturday, October 3, at 10 a. m., according to E. M. Gossett, Jr., of the A. M. College Extension Service.

The County boys who won registered girls in 1942 were: Russel Wood, Wince Graham, Troy Lee Gross, Billy Jones, John Howard Glatton, J. E. Curtis, Clifford Beck, and Bruce Browning.

First place winner at the Eastland contest will receive a registered Jersey heifer, second prize winner will receive 100 baby chicks. Third prize will be 50 baby chicks. The other five boys entering girls will be shown in Abilene for district prizes on October 6th along with the registered heifer won by Billy Henderson of Morton Valley.

## Senior Class Of Ranger High Is Now Organized

The senior class of Ranger High School met Wednesday evening and organized for the year, and officers were elected. Those elected were:

John L. McKeel, president; Betty Wright, vice president; Kathryn Britton, secretary-treasurer, and Beatrice Lott, reporter.

The officers of the class, in conjunction with Mrs. Mamie Ruth Hamrick and J. Warren Craig, sponsors of the class, form the executive committee.

## Roosevelt Back From A Tour Of Nations Plants

WASHINGTON, D. C. (U.P.)—President Roosevelt returned shortly after noon today from the White House called "a most successful" coast-to-coast tour of the nation's war producing plants.

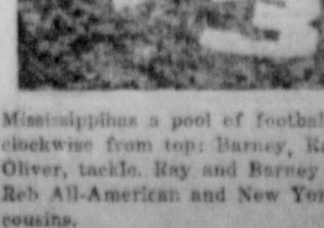

The White House announcement lifted the lid of censorship on the fact that the president had been away from the capital.

All the while he was gone, the press withheld the news in compliance with requests received from the White House.

## Bandsmen Are Hot On Rifle Range

AUSTIN, Tex. (U.P.)—Bandsmen at Camp Bullis have turned in a score from the rifle range that is as hot as any five they have ever succeeded in sending from the bandstands of the nation, where they sat as civilians.

## A Legitimate Football Poole

Mississippians a pool of football talent in the Five Pools. Reading clockwise from top: Barney Ray, Phillip and Fleming, ends; and Oliver, tackle. Ray and Barney are brothers of Jim Poole, former Red All-American and New York Giant professional star. Others are cousins.

Red Browder Rides Again

We have returned to normalcy, Earl Browder, secretary-general of the Communist party in the United States, again is telling us how to manage our affairs.

It would be more courteous than truthful to say that we had missed Mr. Browder's voice since he was confined in a federal penitentiary for deliberate, repeated violation of federal statutes.

Truth to tell, we had been getting on quite well. There were flaws, so me serious, in the conduct of our war effort, but none which deteriorated since we were deprived of Mr. Browder's guidance.

For example, here and there local unions had been conducting silly but vicious outlaw strikes, slowdowns, "vacations," and similar unfortunate interferences with the production of badly needed armament. This, many of us think was inexcusable under present circumstances.

But surely that was not for lack of Mr. Browder's personal attention. Because his Communist party for more than two years deliberately instigated strikes in key war industries for the purpose of slowing down our armament manufacture.

Why did Mr. Browder want to prevent us from making arms? Because they were for use against Adolf Hitler, then the ally of Russia.

Perhaps Mr. Browder personally did not instruct Communist units to promote such strikes. Perhaps all he knew about them was what he read in the newspapers.

It is a matter of court record, however, that Mr. Browder made several trips to Russia. It is officially established that, in order not to make a record of those trips, he used phony names in procuring passports for which he was convicted in federal court and sent to the penitentiary.

There are plenty of men available who will swear that they saw Mr. Browder in attendance at the Comintern's "universities" where sabotage, espionage, and other methodology of world revolution was taught to party agents stationed in capitalist nations.

For the world, we wouldn't be uncharitable, but Earl Browder's record does not inspire trust. We feel that the democratic people can get along quite well without his advice and assistance.

Obviously Red Browder is not constrained by any sense of shame to hide his head in oblivion. He insists upon foisting himself upon the public that is interested in noble things.

Well, we're not helpless. We have a ready recourse. We can ignore Mr. Browder's advice completely, and look to those whose line does not switch on orders from a foreign government.

If you save a dime a day from now till Christmas you will be broke on Dec. 26.

MOVIE STAR.

What's in the garage can make a package.

Want to hit the jars hard? Don't miss the back yard.

Use that junk in the basement for axis erasement.

Look behind every door - send your scrap off to war.

The Pay-Off

By Harry Grayson, NEA Service Sports Editor

GREAT LAKES.—Coxswain Carl Mullenoux was closer to Don Hutson than any man in the National League when he scored his touchdown the last four years. Mullenoux knows how the great Green Bay end speed breaks him away from tacklers.

Mullenoux, who played the end opposite Hutson, says the Alabama alumna knows more about snaring passes than any six ends you could name.

It's Hutson's setting as much as his speed and sticky fingers that enables him to lead the professional league in scoring by catching passes. The fellow positively comes from nowhere after making the defensive men believe he wasn't in the play.

MULLENOUX, now of the Great Lakes Naval Station squad, contends Hutson is the fastest man in the National League.

"On most of Green Bay's pass plays I was the decoy for Hutson," he explains. "Hutson knows when he needs interference and when he doesn't. 'Against the Detroit Lions a couple of years ago, he caught a pass behind me and we started for the goal line. Hutson followed me. 'Not this time, pal, you follow me,' he called back and in three steps he passed me and headed for a touchdown. He made a few yards on me in just about that many steps, and I'm not a slow starter or slow once I'm under way."

(Peter Ebbow is on vacation, during which time his column is being written by Robert Ruark.)

By Robert Ruark, NEA Service Washington Correspondent

THE man who is going to unravel the tangled skein of the American rubber situation quite frankly admits he doesn't know the first thing about rubber. But, says William M. Jeffers, newly appointed rubber czar, he "damn soon intends to find out about rubber."

And you believe him. Bill Jeffers, big and bold and heavy of jaw, doesn't look like one of the dilly-dolly brotherhood which infests Washington's bureau. He is a tough Mick whose pappy, an Irish immigrant, worked on the section gang which laid the tracks for the Union Pacific. Old Man Jeffers came over here with a special contingent of imported laborers.

Young Bill never cottoned to book-learnin'. He quit school at 14 and went to work as janitor in the U. P.'s station at North Platte, Neb. Like one of Horatio Alger's sink-or-swim heroes, young Jeffers began to climb the ladder so fast he scorched the rungs.

Bill moved from janitor to telegrapher to clerk to dispatcher to trainmaster, assistant superintendent of the Utah, Wyoming and Nebraska divisions, general manager, vice president, executive vice president and finally, in 1937, president. His span with Union Pacific ran from 1890 to the present.

JEFFERS is going to work for a dollar a year, and he is, according to WPBOS Donald Nelson's going to be Mr. Rubber. "I am delegating all my authority to Mr. Jeffers," Nelson said, announcing the appointment.

As sole boss of rubber, Jeffers' power will be immense. The Rubber Reserve Co. and "all other government agencies" have been instructed by a special Presidential directive to obey Nelson to the last inch.

Jeffers is to have "full and complete" authority over synthetic rubber manufacture, from initial research to plant operation.

"The controversy in Washington, as to whether it was smart to invest a total stranger to rubbery

with all the power of a czar, is being answered pretty well. Chief answer is that, knowing nothing about the commodity, Jeffers at least won't make the early mistake of prejudice in favor of any particular kind of synthetic rubber. He is going into the job with a wide open mind.

Although he has no plans as such, the rubber czar's brain must be immediately concerned with the six points of the Burchard recommendation—a national 33-mile speed limit, reduction of average annual mileage to 5000; release of more rubber for recapping; essential cars, nationwide gas rationing; enforced inspection of tires, and voluntary tire conservation pending nation-wide gas rationing.

He must have plenty on the ball as to whether it was smart to invest a total stranger to rubbery

Hospital Men Are Needed Now By U. S. Navy

A call for first-aid instructor, pharmacists, hospital attendant, laboratory technicians and even men who have a general knowledge of chemistry and botany was issued today by Lieut. I. H. Ridout, Jr., officer in charge of the U. S. Navy recruiting station at Dallas, with promise of special ratings in the Navy hospital corps.

Recruits are open from hospital, scientific, second class to pharmacist's mate, second class, with base pay ranging from \$54 to \$97 a month, in addition to allowances. Lieutenant Ridout pointed out that the lowest rating given in the hospital corps is hospital steward, second class, which calls for \$54 a month base pay equivalent to the pay of a fireman private in the army.

Men who qualify for the rating of pharmacist's mate, second class could be registered pharmacists.

—MODERN MENU—

By Mrs. GAYNOR MADDOX, NEA Service Staff Writer
If the thought of meatless eating worries you, stop before you study ways of getting protein into your family menu even though you may not have meat. If you study carefully tested diet plans, perfected by trained nutritionists, you will save yourself a lot of guesswork. The following menus for two days of meatless meals come from the Bureau of Home Economics of the Department of Agriculture. Note the liberal use of milk products, whole grain cereals and nuts.

First Day: Breakfast: Tomato or orange juice, rolled oats and milk, poached egg on wholewheat toast, milk, coffee. Luncheon: Toasted cheese sandwich on wholewheat bread, baked apple, peanut cookies, milk. Dinner: Baked egg or lima beans and tomato sauce, buttered green cabbage, grated carrot salad, hot gingerbread, milk, coffee.

Second Day: Breakfast: Orange juice, whole-wheat cereal with milk, enriched toast, milk, coffee. Luncheon: Navy bean soup, wholewheat bread and butter, apple, raisin and celery salad, cocoa. Dinner: Tomato juice, cheese soufflé, baked potatoes, buttered spinach, enriched bread and butter, ice cream, milk, coffee.

These scientifically worked-out menus will not only please the appetites of all members of the family, but will also provide the necessary daily amounts of essential nutrients.

TOMORROW'S MENU — BREAKFAST: Grapefruit juice, scrambled eggs, whole-wheat toast, jam, coffee, milk. LUNCHEON: Split pea soup with frankfurter rings, hard enriched roll, cabbage and apple salad, sponge cake, tea, milk. DINNER: Tomato juice, creamed whitefish, wholewheat toast with green peppers, baked potatoes, gre. n beans, Indian meal pudding, cream, coffee, milk.

laboratory technicians, registered nurse and college graduates who might have studied subjects applicable to duties in the hospital corps. The rating of pharmacist's mate, third class might be given to licensed embalmers, dental technicians and men with standard, advanced instructor's courses in first aid. General first aid work would qualify a man for hospital appren-

tice, first class, while the rating of hospital apprentice, second class would go to those having a suitable education and show an interest or aptitude for medical corps activities. All men from 17 to 50 years of age who think they might qualify for a rating in the hospital corps and who desire to serve their country in the navy uniform of Uncle Sam's Bluejackets are urged to investigate as soon as possible.

Interviews will be granted by Chief Pharmacist's Mate M. H. Williams in Room 470 of the Post Office Building, Dallas, or you may write Chief Williams in care of the Navy Recruiting Station, Post Office Building. Texas annually produces enough eggs to give one to almost every person in the entire world.

### Hodges Oak Park School News

Paul Donald, Jimmie Cross, Jimmie Martin, Jimmie Healy, Gwenna Weaver, Jacquelin Ward.

#### APPRECIATION

We wish to express our appreciation to the Ranger Times for space in the paper for our Hodges Oak Park School News. School news will appear on Thursday of each week. To you parents and patrons who read our news we appreciate your interest. We hope you will enjoy the facts, fun and fancy that will appear in this column in the future.

#### ARE YOU A SLACKER

A slacker in this day and time is considered almost a traitor. One who shirks his duty as a student in school, a worker in business, or even a housewife who is not patriotic and is considered by the public in general. You may think you are not a slacker, but if everybody does his share every day in and day out every day, he will be helping to bring the war to an early close. The cost of one person not doing his share of our war program can not be counted in dollars and cents but in soldier's lives. I'm sure one in our city is guilty of intentionally slacking up in our daily effort to help our country in this present crisis, but many of us do so unintentionally. Do you sometimes take a nap at noon before going back to school or to work? If so, what could you be doing at this time every day to help? You could gather scrap metal to help the person that cooks for our family drain grease that has been used before and sell it to your grocer so that it can be used in bombs and shells that will get Hitler and Hirohito. Everyone of us can do lots more for the defense of our country. Think yourself this question—"AM I A SLACKER?"

#### WE SOLD OUR SCRAP IRON TO JAPAN IN THE PAST NOW

### LET'S GIVE IT TO 'EM IN BOMBS AND SHELLS NEW PRINCIPAL AT HODGES OAK PARK

Miss Lillian B. Strain took over her duties at the beginning of this school term as the new principal of Hodges Oak Park. Miss Strain is new in this position, but she is not new to this school system, having worked here as a teacher for the past eleven years. Besides performing her duties as principal Miss Strain teaches math in the sixth, seventh, and eighth grades. All of us who have witnessed her faithful work in the past have the utmost confidence in her continued success in this new phase of her work.

#### HATS OFF

We say "Hats Off" to Mr. Scruggs and his fighting Bulldogs. We were proud of the outcome of our recent game with Gorman Panthers. We are behind you one hundred per cent over here at Hodges Oak Park for a successful football season.

#### OBSERVATIONS FROM AN ENGLISH STUDENT

The pupils of Hodges Oak Park English are finding it worthy of consideration. A person who enters any field of work must know some English, written and spoken. Yesterday we studied slang. The teacher had learned quite a lot of new slang before the class period was over. We are finding our new English books very interesting.

#### OUR GOOD NEIGHBOR POLICY

Spanish is the new subject being taught in our school this year. Our aim in learning Spanish is to help Mr. Cordell Hull carry out his good neighbor policy between the United States and our southern neighbors. We believe that through our study of the customs and languages of Mexico and the South American countries we can indeed come to feel that they are our friends.

We have not received our books yet, but we are learning a few simple expressions in Spanish and many things about the Pan American Union and all its member states.

### Mobilization Of Texas Police Is Now Completed

AUSTIN, Tex.—"Defense Police Mobilization in Texas is complete," Colonel Homer Garrison, Jr., Director of the Texas Department of Public Safety, announced today. A plan whereby the regular organized police and sheriffs of non strategic areas may be drawn to danger zones to quell riots, sabotage, and other disorders has been developed.

The Department of Public Safety has catalogued all law enforcement personnel, guns, munitions, and other equipment and adequate protection can be instantly drawn to troubled areas. The mobilization of these regular police, and the duties of War Reserve Police drawn from civilian ranks, will be the subject of this week's dramatization of "Texans on the Alert". Originating in the studios of WFAA in Dallas and carried over WPAB, WOAI, and KPRC, the program will be presented for the eighth time at 2 p. m. Sunday, October 4. Sponsored by the National Defense Committee for Texas, "Texans on the Alert" is produced as a public service feature of the Texas Quality Network and the Texas School of the Air.

#### HAVE YOU BOUGHT A DEFENSE STAMP TODAY?

#### SEVENTH GRADE DEFENSE STAMP DRIVE

The seventh grade organized a stamp drive last Friday. Mrs. Robinson conducted the stamp sale. We sold \$8.60 worth of stamps.

Buy a stamp every week and we will knock the Japs right off their feet.

#### RYTHM BAND

The Hodges Oak Park Rhythm Band has just been organized. Miss Baskin is the director this week. Miss Baskin is the director and Miss Cox the accompanist. Sixty five interested children from the first four grades of the primary department are taking part in the rhythm band.

### Proof of Fish Story

You may have heard some fish stories in your time, but Jack Lamb, famed sportsman, caught trout like these from daylight to dark in the Wilds of Alaska. Lamb is just back from an expedition of bold adventure into the rugged wastelands of the North country where he made the most sensational big game pictures ever filmed on the continent. Lamb will appear in person with these spectacular films on Wednesday, Oct. 7th, 8:30 p. m. in high school auditorium. Lamb walked more than 500 miles through the wilds and suffered innumerable hardships to make these pictures. Thousands have jammed the auditoriums in every city where they have been shown. In Amarillo more than 25,000 people turned out and Lamb was forced to run the picture through seven shows.

### How To Send A Christmas Gift To Service Men

Arrangements have been made by the Post Office Department in cooperation with the War and Navy departments for the acceptance of Christmas parcels for members of our armed forces serving outside the continental United States.

Young brevities of 1942 by Vanity Fair

A two-in-one wisp of smooth rayon jersey... brief combine of panties and bra. Wear it under sport clothes... defense coveralls... the new silhouettes. And wash it without ironing! The fitted bodice gives adequate support to trim, young figures... the croch buttons for easy putting on and taking off. Cameo and white, \$1.50.

For the purpose of these instructions Alaska is included in the term "outside the continental United States." In order that such parcels may reach the addressee on time and in good condition, mailers are requested to adhere closely to the following requirements:

TIME OF MAILING—Christmas parcels and Christmas cards should be mailed during the period beginning October 1 and ending November 1.

SIZE AND WEIGHT—In view of the urgent need of shipping space to transport materials directly essential to the war effort, Christmas parcels shall not exceed the present limits of 11 pounds in weight or 18 inches in length or 42 inches in length and girth combined.

PREPARATION—Owing to the great distance this mail must be transported and the handling and any storage it must undergo, it is absolutely necessary that all articles be packed in substantial boxes or containers and be covered with wrappings of sufficient strength not only to resist pressure of other mail in the same sack, but to withstand the weight of other sacks of mail.

PERISHABLE MATTER—No perishable matter should be included in any parcels.

PROHIBITED ARTICLES—No intoxicants, inflammable materials (including matches of all kinds

and lighter fluids) and poisons, or compositions which may kill or injure another, or damage to mail are unallowable.

#### HOW TO ADDRESS PARCELS

Army Personnel: From John E. Doe, 205 West State St., Boston, Mass. To Pvt. William D. Doe (Army Serial No.) Company F, 107th Infantry, APO 819, Postmaster, New York, N. Y.

Naval Personnel: From John R. Roe, 205 West State St., Boston, Mass. To John M. Jones, Seaman First Class (Naval unit or vessel), Postmaster, New York, N. Y.

Marine Corps: From John R. Doe, 205 West State St., Boston, Mass. To Pvt. John Henry Smith, U. S. Marine Corp., Care Postmaster, San Francisco, Calif.

Units located within the continental United States may be addressed direct, using name, rank, organization and location.

POSTAGE—Postage must be fully prepaid.

PERMISSIBLE ADDITIONS

UNITED STATES SAVINGS BOND AND STAMPS

### NEW METHODS DEFEAT LACK OF MATERIALS

By ANTHONY G. LORENZO United Press Staff Correspondent DETROIT, (UP)—Scarcity of critical materials is the biggest bottleneck along the war production front today.

The automotive industry's top engineering talent, forewarned of impending shortages by Production Chief Donald M. Nelson, are now working tirelessly to dig up new material, regardless of expense, so that the output of arms may be kept at near-capacity.

Although there has been encouraging progress on this problem, a few plants already have been forced to curtail operations because of the limited amount of materials available for operation. For example, a steel shortage forced one large producer of guns, a former passenger car builder, to reduce its work week from seven to five days per week.

The pinch on materials is having repercussions throughout the industry as war plants move into production "ahead of schedule" and consume vital metals quicker than had been anticipated. Meantime, the industry's technicians have heeded the plea of Nelson to "make more and more with less and less."

Here are some examples: With the outbreak of war the Army decided it needed thousands of giant searchlights to pierce the skies for enemy planes. Faced with a shortage of aluminum, an automotive company re-designed and re-engineered the lights, saving 700 pounds of the strategic metal in every searchlight. How was it done? By substituting steel stampings for aluminum castings. Moreover, the newly designed light actually is lighter than the aluminum type.

In addition to the name and address of the sender, which is required, inscriptions such as "Merry Christmas," "Please do not open until Christmas," "Happy New Year," "With Best Wishes," and the like may be placed on the covering of the parcel in such manner as not to interfere with the address, or on a card enclosed therewith.

In the manufacture of an anti-aircraft cannon, a 1,000-pound alloy of copper, nickel and 257,000 pounds of chromium on one part alone.

A saving of 3,000,000 pounds of aluminum already has been achieved in the manufacture of a shell clip by changing from a die casting to a sheet stamping. Although sheet steel is used extensively in peacetime, it has relatively few wartime functions.

Still another company saved 41,000 pounds of nickel on its contract for a small combat vehicle.

### SHERIFF'S SALE THE STATE OF TEXAS County of Eastland.

By virtue of a certain Execution issued out of the Honorable Justice Court of Prec. 3, Tarrant County, on the 1st day of Sept. 1942 by T. E. Johnson, Justice of the Peace of said court upon a judgment in favor of Swann-Schulle Furniture Company for the sum of Eight Two and 20/100 Dollars "\$82.20" Dollars and cost of suit, in cause No. 19658 in said Court, styled Swann-Schulle Furniture Co. versus R. Q. Lee, and placed in my hands for service, I Loss Woods as Sheriff of Eastland County, did on the 15th day of Sept. 1942, levy on certain property situated in Eastland County, described as follows, to-wit:

All interest of R. Q. Lee, in the East 1/2, of the Northwest 1/4, Section 63, Block 4, H&TC RR. Co. Survey in Eastland County, Texas, and levied upon as the property of said R. Q. Lee, and on Tuesday, the 6th day of Oct. 1942, at the Court House door of Eastland County, in the city of Eastland, Texas, between the hours of 10 a. m. and 4 p. m. I will sell said property at public vendue, for cash to the highest bidder, as the property of said R. Q. Lee by virtue of said levy and said Execution.

And in compliance with law I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale in the Ranger Times a newspaper published in Eastland County.

Witness my hand, this 15th day of Sept. A. D. 1942.

Loss Woods, Sheriff of Eastland County Texas. By J. H. Mitchell, Deputy.

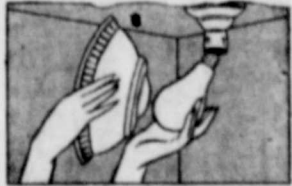

### REDDY KILOWATT'S Tips on How to IMPROVE Your Lighting ...without using vital war materials

In these days when metals are going into war products instead of new lamps, you can still improve your lighting without using vital war materials, and at little cost. Look over the list of suggestions below that may help you get more light:

Keep Lamps and Fixtures Clean. Dust is a frequent cause of poor light. Keeping lamps and fixtures clean by regular washing of bulbs and diffusing bowls gives you up to 30 per cent more light.

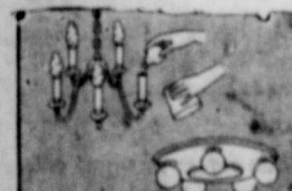

Change Blackened Bulbs to closets, back porches or other places where the amount of light isn't important, for they don't give as much light as new bright bulbs.

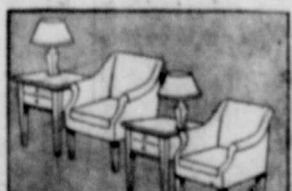

Replace Dark Shade Linings with white or very light linings to increase the amount of light reflected on the reading surface. Shades direct light where needed.

Use One Large Bulb instead of two or three smaller ones. One 150-watt bulb gives you more light than two 75-watt bulbs or three 50-watt bulbs, and uses no more current.

Eliminate Colored Bulbs, except for decorations. Replace flame-tint or amber-orange bulbs with inside-frosted bulbs which give you more light for the same amount of current.

Get Closer to the Light. If you shorten the distance between you and the lamp one-half, you increase by four times the amount of light on your book or paper.

KEEP SPARE FUSES on hand to save you time and trouble if a fuse blows. First, turn off the main switch and pull the cords out of wall outlets. Then replace the blown fuse, but don't reconnect any lamps or appliances suspected of having caused the fuse to blow out until they've been fixed.

## Red Browder Rides Again

We have returned to normalcy. Earl Browder, secretary-general of the Communist party in the United States, again is telling us how to manage our affairs.

It would be more courteous than truthful to say that we had missed Mr. Browder's voice since he was confined in a federal penitentiary for deliberate, repeated violation of federal statutes.

Truth to tell, we had been getting on quite well. There were flaws, some serious, in the conduct of our war effort, but none which deteriorated since we were deprived of Mr. Browder's guidance.

For example, here and there local unions had been conducting silly but vicious outlaws strikes, slowdowns, "vacations," and similar unfortunate interferences with the production of badly needed armament. This, many of us think was inexcusable under present circumstances.

But surely that was not for lack of Mr. Browder's personal attention. Because his Communist party for more than two years deliberately instigated strikes in key war industries for the purpose of slowing down our armament manufacture.

Why did Mr. Browder want to prevent us from making arms? Because they were for use against Adolf Hitler, then the ally of Russia.

Perhaps Mr. Browder personally did not instruct Communist units to promote such strikes. Perhaps all he knew about them was what he read in the newspapers.

It is a matter of court record, however, that Mr. Browder made several trips to Russia. It is officially established that, in order not to make a record of those trips, he used phony names in procuring passports for which he was convicted in federal court and sent to the penitentiary.

There are plenty of men available who will swear that they saw Mr. Browder in attendance at the Comintern's "universities" where sabotage, espionage, and other methodology of world revolution was taught to party agents stationed in capitalist nations.

For the world, we wouldn't be uncharitable, but Earl Browder's record does not inspire trust. We feel that the democratic people can get along quite well without his advice and assistance.

Obviously Red Browder is not constrained by any sense of shame to hide his head in oblivion. He insists upon foisting himself upon the public that is interested in noble things.

Well, we're not helpless. We have a ready recourse. We can ignore Mr. Browder's advice completely, and look to those whose line does not switch on orders from a foreign government.

If you save a dime a day from now till Christmas you will be broke on Dec. 26.

JEFFERS is going to work for a dollar a year, and he is, according to W.P. Boss Donald Nelson, going to be Mr. Rubber. "I am delegating all my authority to Mr. Jeffers," Nelson said, announcing the appointment.

As sole boss of rubber, Jeffers' power will be immense. The Rubber Reserve Co. and "all other government agencies" have been instructed by a special Presidential directive to obey Nelson to the last inch.

Jeffers is to have "full and complete" authority over synthetic rubber manufacture, from initial research to plant operation.

"The controversy in Washington, as to whether it was smart to invest a total stranger to rubber

### Scrap

## The Pay-Off

BY HARRY GRATSON  
 NEA Service Sports Editor

**GREAT LAKES.**—Coxswain Carl Mullenoux was closer to Don Hutson than any man in the National League when he scored 16 touchdowns the last four years. Mullenoux knows how the great Green Bay end's speed breaks him away from tacklers.

Mullenoux, who played the end opposite Hutson, says the Alabama alumnus knows more about snaring passes than any six ends you could name.

It's Hutson's acting as much as his speed and sticky fingers that enables him to lead the professional league in scoring by catching passes. The fellow coolly comes from nowhere after making the defensive men believe he wasn't in the play.

MULLENOUX, now of the Great Lakes Naval Station squad, considers Hutson to be the fastest man in the National League.

"On most of Green Bay's pass plays I was the decoy for Hutson, blocked for him after he caught the ball," he explains. "Hutson knows when he needs interference and when he doesn't."

"Against the Detroit Lions a couple of years ago, he caught a pass behind me and as we started for the goal line I yelled: 'Follow me, Don!' Not this time, pal, you follow me," he called back and in three steps he passed me and bounded for a touchdown. He made a few yards on me in just about that many steps, and I'm not a

slow starter or slow once I'm under way."

HUTSON'S ability makes the end playing opposite him a receiver extraordinary. When the defense tagged three or more men to cover Hutson, Mullenoux became the target.

"Two years ago Hutson was used considerably as a decoy," explains Mullenoux. "When he drew out the defense they threw to me so regularly that I led him in scoring until the last three games of the season and wound up fourth in the league."

"When it was my turn to do most of the decoying last fall, Hutson never failed to come over and shake my hand after he had made a long gain because men were covering me."

ONLY man Mullenoux considers nearly as fast and shifty as Hutson is George McAfee, formerly of the Chicago Bears and now of the Jacksonville Naval Air Station. After McAfee eluded Safety Man Hutson in one of the Packer-bear games last autumn, Mullenoux asked his teammate what happened.

"Well, sub," drawled Hutson, "I saw that man wearing a number five come bustin' through the line and I moved in to tackle him. Then McAfee started shiftin' from left to right and back again. The last thing I saw was four number five guys by me."

Don Hutson has the competitive temperament to match his game. He is a good sport and appreciative, which are other reasons why he is the greatest end who ever played the game.

(Peter Euston is an aviator, during which time his column is being written by Robert Rank.)

BY ROBERT RANK,  
 NEA Service Washington Correspondent

THE man who is going to unravel the tangled skein of the American rubber situation quite frankly admits he doesn't know the first thing about rubber. But, says William M. Jeffers, newly appointed rubber czar, he "plans soon to find out about rubber," and then he's going to pull all stops on rubber conservation and rubber manufacture.

"It won't be long to find out everything we need to know," says the 61-year-old president of the Union Pacific Railroad. "It is not our way to take long."

And you believe him. Bill Jeffers, big and bold and heavy of jaw, doesn't look like one of the dilly-dilly brotherhood which infests Washington's bureaus. He is a tough Mick whose pappy, an Irish immigrant, worked on the section gang which laid the tracks for the Union Pacific. Old Man Jeffers came over here with a special contingent of imported laborers.

Young Bill never cottoned to book-learning. He quit school at 14 and went to work as janitor in the U. P.'s station at North Platte, Neb. Like one of Horatio Alger's snail-or-swim heroes, young Jeffers began to climb the ladder so fast he searched the rungs.

Bill moved from janitor to telegrapher to clerk to dispatcher to trainmaster, assistant superintendent of the Utah, Wyoming and Nebraska divisions, general manager, vice president, executive vice president and finally, in 1937, president. His span with Union Pacific ran from 1899 to the present.

JEFFERS is going to work for a dollar a year, and he is, according to W.P. Boss Donald Nelson, going to be Mr. Rubber. "I am delegating all my authority to Mr. Jeffers," Nelson said, announcing the appointment.

As sole boss of rubber, Jeffers' power will be immense. The Rubber Reserve Co. and "all other government agencies" have been instructed by a special Presidential directive to obey Nelson to the last inch.

Jeffers is to have "full and complete" authority over synthetic rubber manufacture, from initial research to plant operation.

## Hospital Men Are Needed Now By U. S. Navy

A call for first-aid instructor, pharmacist, hospital attendant, laboratory technician and even men who have a general knowledge of chemistry and biology was issued today by Lieut. L. H. Rideout, Jr., officer in charge of the P. S. Navy recruiting station at Dallas, with promise of special ratings in the Navy hospital corps.

Lieutenant Rideout said there is an urgent need at the present time for men with experience in pharmacy, hygiene, sanitation, medicine, first aid and all related work.

Ratings are open from hospital attendant, second class to pharmacist's mate, second class, with base pay ranging from \$34 to \$74 a month, in addition to allowances.

Lieutenant Rideout pointed out that the lowest rating given in the hospital corps is hospital attendant, second class, which calls for \$24 a month base pay equivalent to the pay of a first-class private in the army.

Men who qualify for the rating of pharmacist's mate, second class, could be registered pharmacists.

## MODERN MENU

BY MRS. GAYNOR MADDOX  
 NEA Service Staff Writer

IF the thought of medicine rationing worries you, then here are study ways of getting protein into your family menus even though you may not have meat.

If you study carefully tested diet plans, perfected by trained nutritionists, you will save yourself a lot of guesswork. The following menus for two days of meatless meals come from the Bureau of Home Economics of the Department of Agriculture. Note the liberal use of milk products, whole grain cereals and nuts.

**First Day:**  
 Breakfast: Tomato or orange juice, rolled oats and milk, poached egg on wholewheat toast, milk, coffee.  
 Luncheon: Toasted cheese sandwich on wholewheat bread, baked apple, peanut butter, milk.  
 Dinner: Baked soy or lima beans and tomato sauce, buttered green cabbage, grated carrot salad, hot gingerbread, milk, coffee.

**Second Day:**  
 Breakfast: Orange juice, wholewheat cereal with milk, enriched toast, milk, coffee.  
 Luncheon: Navy bean soup, wholewheat bread and butter, apple, raisin and celery salad, cocoa.  
 Dinner: Tomato juice, cheese souffle, baked potatoes, buttered spinach, enriched bread and butter ice cream, milk, coffee.

These scientifically worked-out menus will not only please the appetites of all members of the family, but will also provide the necessary daily amounts of essential nutrients.

**TOMORROW'S MENU**  
**BREAKFAST:** Grapefruit juice, scrambled eggs, wholewheat toast, jam, coffee, milk.  
**LUNCHEON:** Split pea soup with frankfurter rings, hard enriched rolls, cabbage and apple salad, sponge cake, tea, milk.  
**DINNER:** Tomato juice, creamed whitefish on toast with green peppers, baked potatoes, green beans, Indian meal pudding, cream, coffee, milk.

laboratory technicians, registered nurse and college graduates who might have studied subjects applicable to duties in the hospital corps.

The rating of pharmacist's mate, third class might be given to licensed embalmers, dental technicians and men with standard, advanced instructor's courses in first aid.

General first aid work would qualify a man for hospital apprentice, first class, while the rating of hospital apprentice, second class would go to those having a suitable education and show an interest or aptitude for medical corps activities.

All men from 17 to 50 years of age who think they might qualify for a rating in the hospital corps and who desire to serve their country in the navy uniform of Uncle Sam's Bluejackets are urged to investigate as soon as possible.

Interviews will be granted by Chief Pharmacist's Mate M. H. Williams in Room 470 of the Post Office Building, Dallas, or you may write Chief Williams in care of the Navy Recruiting Station, Post Office Building.

Texas annually produces enough eggs to give one to almost every person in the entire world.

### Hodges Oak Park School News

Paul M. Donald, Jimmie Crossley, Jimmie Martin, Jimmie Heilins, Glenn Weaver, Jacqueline Edward.

#### IN APPRECIATION

We wish to express our appreciation to the Ranger Times for this space in the paper for our Hodges Oak Park School News. This school news will appear on each Thursday of each week.

To you parents and patrons who read our news we appreciate your interest. We hope you will enjoy the facts, fun and fancy that will appear in this column in the future.

#### ARE YOU A SLACKER

A slacker in this day and time is considered almost a traitor. Any one who shirks his duty as a student in school, a worker in business life, or even a house wife is unpatriotic and is considered so by the public in general. You and I ourselves may not win the war, but if everybody does his share day in and day out every day, he will be helping to bring the war to an early close. The cost of one person not doing his share in our war program can not be counted in dollars and cents but only in soldier's lives. I'm sure no one in our city is guilty of intentionally slacking up in our daily effort to help our country in this present crisis, but many of us do so unintentionally. Do you sometimes take a nap at noon before going back to school or to work? If so, what could you be doing at this time every day to help? You could gather scrap metal, help the person that cooks for the family, drain grease that has been used before and sell it to your grocer so that it can be used again in bombs and shells that will get Hitler and Hirohito. Everyone of us can do lots more for the defense of our country. Ask yourself this question—"AM I A SLACKER?"

#### WE SOLD OUR SCRAP IRON TO JAPAN IN THE PAST NOW

### LET'S GIVE IT TO 'EM IN BOMBS AND SHELLS NEW PRINCIPAL AT HODGES OAK PARK

Miss Lillian B. Strain took over her duties at the beginning of this school term as the new principal of Hodges Oak Park. Miss Strain is new in this position, but she is not new to this school system, having worked here as a teacher for the past eleven years. Besides performing her duties as principal Miss Strain teaches math in the sixth, seventh, and eighth grades. All of us who have witnessed her faithful work in the past have the utmost confidence in her continued success in this new phase of her work.

#### HATS OFF

We say "Hats Off" to Mr. Scroggs and his fighting Bulldogs. We were proud of the outcome of our recent game with Gorman Panthers. We are behind you one hundred per cent over here at Hodges Oak Park for a successful football season.

#### OBSERVATIONS FROM AN ENGLISH STUDENT

The pupils of Hodges Oak Park English are finding it worthy of consideration. A person who enters any field of work must know some English, written and spoken. Yesterday we studied slang. The teacher had learned quite a lot of new slang before the class period was over. We are finding our new English books very interesting.

#### OUR GOOD NEIGHBOR POLICY

Spanish is the new subject being taught in our school this year. Our aim in learning Spanish is to help Mr. Cordell Hill carry out his good neighbor policy between the United States and our southern neighbors. We believe that through our study of the customs and languages of Mexico and the South American countries we can indeed come to feel that they are our friends.

We have not received our books yet, but we are learning a few simple expressions in Spanish and many things about the Pan American Union and all its member states.

### Mobilization Of Texas Police Is Now Completed

AUSTIN, Tex. — "Defense Police Mobilization in Texas is complete," Colonel Homer Garrison, Jr., Director of the Texas Department of Public Safety, announced today. A plan whereby the regular organized police and sheriffs of non strategic areas may be drawn to danger zones to quell riots, sabotage, and other disorders has been developed.

The Department of Public Safety has catalogued all law enforcement personnel, guns, munitions, and other equipment and adequate protection can be instantly drawn to troubled areas. The mobilization of these regular police, and the duties of War Reserve Police drawn from civilian ranks, will be the subject of this week's dramatization of "Texans on the Alert". Originating in the studios of WFAA in Dallas and carried over WPAB, WOAI, and KPRC, the program will be presented for the eighth time at 2 p. m. Sunday, October 4. Sponsored by the National Defense Committee for Texas, "Texans on the Alert" is produced as a public service feature of the Texas Quality Network and the Texas School of the Air.

#### HAVE YOU BOUGHT A DEFENSE STAMP TODAY?

#### SEVENTH GRADE DEFENSE STAMP DRIVE

The seventh grade organized a stamp drive last Friday. Mrs. Robinson conducted the stamp sale. We sold \$8.60 worth of stamps.

Buy a stamp every week and we will knock the Japs right off their feet.

#### RHYTHM BAND

The Hodges Oak Park Rhythm Band has just been organized. Miss Blaskin is the director of this band. Sixty five interested children from the first four grades of the primary department are taking part in the rhythm band.

### Proof of Fish Story

You may have heard some fish stories in your time, but Jack Lamb, famed sportsman, caught trout like these from daylight to dark in the Wilds of Alaska. Lamb is just back from an expedition of bold adventure into the rugged wastelands of the North country where he made the most sensational big game picture ever filmed on the continent. Lamb will appear in person with these spectacular films on Wednesday Oct. 7th, 8:30 p. m. in high school auditorium. Lamb walked more than 500 miles through the wilds and suffered innumerable hardships to make these pictures. Thousands have jammed the auditoriums in every city where they have been shown. In Amarillo more than 25,000 people turned out and Lamb was forced to run the picture through seven shows.

### How To Send A Christmas Gift To Service Men

Arrangements have been made by the Post Office Department in cooperation with the War and Navy departments for the acceptance of Christmas parcels for members of our armed forces serving outside the continental United States.

Young brevities of 1942

by *Vanity Fair*

A two-in-one wisp of smooth rayon jersey... brief combine of panties and bra. Wear it under sport clothes... defense coveralls... the new silhouettes. And wash it without ironing! The fitted bust section gives adequate support to trim, young figures... the crotch unbuttoned for easy putting on and taking off. Cameo and white, \$1.50

and lighter fluids) and poisons, or compositions which may kill or injure another, or damage to mail is prohibited.

**HOW TO ADDRESS PARCELS**  
Army Personnel:  
From: John E. Doe,  
295 West State St.,  
Boston, Mass.  
To: Pvt. W.D. D. Doe (Army Serial No.)  
Company F, 167th Infantry,  
ATO 819,  
Postmaster,  
New York, N. Y.

**TIME OF MAILING**—Christmas parcels and Christmas cards should be mailed during the period beginning October 1 and ending November 1.

**SIZE AND WEIGHT**—In view of the urgent need of shipping space to transport materials directly essential to the war effort, Christmas parcels shall not exceed the present limits of 11 pounds in weight or 18 inches in length or 42 inches in length and girth combined.

**PREPARATION**—Owing to the great distance this mail must be transported and the handling and any storage it must undergo, it is absolutely necessary that all articles be packed in substantial boxes or containers and be covered with wrappings of sufficient strength not only to resist pressure of other mail in the same sack, but to withstand the weight of other sacks of mail.

**PERISHABLE MATTER**—No perishable matter should be included in any parcels.

**PROHIBITED ARTICLES**—Intoxicants, inflammable materials (including matches of all kinds

and lighter fluids) and poisons, or compositions which may kill or injure another, or damage to mail is prohibited.

**POSTAGE**—Postage must be fully prepaid.

**PERMISSIBLE ADDITIONS**—

### NEW METHODS DEFEAT LACK OF MATERIALS

By ANTHONY G. LORENZO United Press Staff Correspondent DETROIT, (UP) —

Scarcity of critical materials is the biggest bottleneck along the war production front today.

The automotive industry's top engineering talent, forewarned of impending shortages by Production Chief Donald M. Nelson, are now working tirelessly to dig up new material, regardless of expense, so that the output of arms may be kept at near-capacity.

Although there has been encouraging progress on this problem, a few plants already have been forced to curtail operations because of the limited amount of materials available for operation. For example, a steel shortage forced one large producer of guns, a former passenger car builder, to reduce its work week from seven to five days per week.

The pinch on materials is having repercussions throughout the industry as war plants move into production "ahead of schedule" and consume vital metals quicker than had been anticipated. Meantime, the industry's technicians have heeded the plea of Nelson to "make more and more with less and less."

Here are some examples: With the outbreak of war the Army decided it needed thousands of giant searchlights to pierce the skies for enemy planes. Faced with a shortage of aluminum, an automotive company re-designed and re-engineered the lights, saving 700 pounds of the strategic metal in every searchlight. How was it done? By substituting steel stampings for aluminum castings. Moreover, the newly designed light actually is lighter than the aluminum type.

In addition to the name and address of the sender, which is required, inscriptions such as "Merry Christmas," "Please do not open until Christmas," "Happy New Year," "With Best Wishes," and the like may be placed on the covering of the parcel in such manner as not to interfere with the address, or on a card enclosed therewith.

In the manufacture of an anti-aircraft cannon, a 1,000-lb. shell clip by changing from a 4-casting to a sheet stamping. Although sheet steel is used extensively in peacetime, it has relatively few wartime functions.

Still another company saved 41,000 pounds of nickel on a contract for a small combat vehicle.

A saving of 3,000,000 pounds of aluminum already has been achieved in the manufacture of a shell clip by changing from a 4-casting to a sheet stamping. Although sheet steel is used extensively in peacetime, it has relatively few wartime functions.

### SHERIFF'S SALE

THE STATE OF TEXAS

County of Eastland.

By virtue of a certain Execution issued out of the Honorable Justice court of Prec. 3, Travis County, on the 1st day of Sept. 1942 by T. E. Johnson, Justice of the Peace of said court upon a judgment in favor of Swann-Schulle Furniture Company for the sum of Eight Thousand and 20/100 Dollars "\$8,200.00" Dollars and cost of suit, in cause No. 19058 in said Court, styled Swann-Schulle Furniture Co. versus R. Q. Lee, and placed in my hands for service, I Loss Woods as Sheriff of Eastland County, did on the 15th day of Sept. 1942, levy on certain property situated in Eastland County, described as follows, to wit:

All interest of R. Q. Lee, in the East 1/2 of the Northwest 1/4, Section 6B, Block 4, H&TC RR. Co. Survey in Eastland County, Texas, and levied upon as the property of said R. Q. Lee, and on Tuesday, the 6th day of Oct. 1942, at the Court House door of Eastland County, in the city of Eastland, Texas, between the hours of 10 a. m. and 4 p. m., I will sell said property at public vendue, for cash to the highest bidder, as the property of said R. Q. Lee by virtue of said levy and said Execution.

And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks, immediately preceding said day of sale in the Ranger Times a newspaper published in Eastland County.

Witness my hand, this 15th day of Sept. A. D. 1942.

Loss Woods, Sheriff of Eastland County Texas.

By J. H. Mitchell, Deputy.

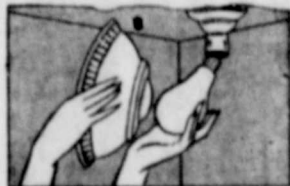

### REDDY KILOWATT'S Tips on How to IMPROVE Your Lighting ...without using vital war materials

In these days when metals are going into war products instead of new lamps, you can still improve your lighting without using vital war materials, and at little cost. Look over the list of suggestions below that may help you get more light:

**Keep Lamps and Fixtures Clean.** Dust is a frequent cause of poor light. Keeping lamps and fixtures clean by regular washing of bulbs and diffusing bowls gives you up to 30 per cent more light.

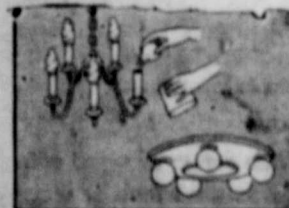

**Change Blackened Bulbs** to closets, back porches or other places where the amount of light isn't important, for they don't give as much light as new bright bulbs.

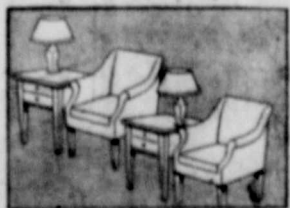

**Replace Dark Shade Linings** with white or very light linings to increase the amount of light reflected on the reading surface. Shades direct light where needed.

**Use One Large Bulb** instead of two or three smaller ones. One 150-watt bulb gives you more light than two 75-watt bulbs or three 50-watt bulbs, and uses no more current.

**Eliminate Colored Bulbs,** except for decorations. Replace flame-tint or amber-orange bulbs with inside-frosted bulbs which give you more light for the same amount of current.

**Get Closer to the Light.** If you shorten the distance between you and the lamp one-half, you increase by four times the amount of light on your book or paper.

**KEEP SPARE FUSES** on hand to save you time and trouble if a fuse blows. First, turn off the main switch and pull the cords out of wall outlets. Then replace the blown fuse, but don't reconnect any lamps or appliances suspected of having caused the fuse to blow out until they've been fixed.

### Pipeline Movement Of Oil Increased Rapidly During The Past Year

Petroleum pipe lines provided more transportation in 1941 than in any previous year, and the net addition of new pipe line mileage by companies reporting to the Interstate Commerce Commission last year was greater than in any single year since 1931, a report of the Commission reveals.

Nearly 105,000 miles of pipe lines, including crude oil gathering lines, and crude oil and refined trunk lines, were operating at the end of last year, the report shows, but this does not include an estimated 25,000 miles of pipe lines which are not required to report to the ICC because of private carrier status or some other reason.

The 63,577 miles of ICC petroleum trunk lines transported 350,785,000,000 barrel miles of crude oil and refined petroleum products, mostly gasoline, in 1941. This was an increase of nearly 15 per cent compared with 1940. The trunk line transportation revenues of these lines gained only 10 per cent indicating a substantial average reduction in pipeline tariffs. Gathering lines, which collect the oil from wells in the field and transport it relatively short distances, reported 41,858 miles to the ICC.

By comparison, the trunk line movement is equivalent to approximately 52,000,000,000 ton miles of transportation; the addition of the pipe lines not included in the ICC report undoubtedly would bring the total petroleum trunk pipeline movement to more than 60,000,000,000 ton miles. By comparison, the nation's Class I Railroads delivered about 475,000,000,000 ton miles of freight last year, largest in their history, and trucks carried nearly 45,000,000,000 ton miles.

Because of duplications and omissions no accurate data on the actual number of barrels of petroleum transported can be obtained from this report, but it is obvious that there has been a marked increase in the movement of refined oils by pipe line than the shipment of crude oil, although the latter is still more than twice as great. Refined oil shipments originated by ICC lines totaled only 15,638,000 barrels in 1931, but increased continually to 71,915,000 barrels in 1940 and jumped again to 82,373,000 barrels in 1941. The ICC report covers only about two thirds of all refined oil pipe lines hence to all shipments of refined oils, almost all refined oil by pipe line, is substantially increased.

Almost all of the crude oil produced in the United States, normally starts its journey to the refinery in a gathering pipe line, but only about 75 per cent of it continues all the way by trunk pipeline. The remainder is trucked, shipped, or otherwise along the route, which may be 2,000 miles from the tank ships, inland tank trucks, and independently in the year into tank cars, to com-

plete the trip to the refinery. Refined petroleum products have been shipped from the refinery to market by pipe line only within the last 10 to 15 years, however, and although this method of transportation is growing with extreme rapidity, probably less than 10 per cent of the total output of U. S. refineries is moved in pipe lines. Tank ships, barges, tank cars, and tank trucks still transport the greatest quantities of gasoline, kerosene, and fuel oils to distributing bulk stations and terminals.

Average wages of pipe line employees increased substantially in 1941 compared with 1940, the ICC report discloses. The lines reporting had 19,929 employees other than general officers and general office workers last year, with a total payroll of more than \$41,000,000. In 1940 these employees totaled 19,324, with a payroll of \$36,800,000.

The complete ICC report gives detailed information on income, investment, balance sheet items, operating revenues and expenses, taxes, net income, depreciation, employees and oil transportation for each of 71 companies, as well as consolidated figures by years from 1930 through 1941.

### Safety Courses Offered By Texas Universities Now

AUSTIN, Tex. —The Texas Safety Association today appealed to industrial management to enroll key employees in war training courses in safety engineering being offered by six state colleges and universities.

"Some of the most serious battles America has lost in this war have been those of production," said George Clarke, managing director of the Texas Safety Association.

"These battles in the main have been lost because of accidents, a far greater menace than strikes, labor unrest and raw material shortages. 480 million man-days of industrial labor was lost last year by reason of accidents. The loss will be even greater this year."

"The nation has a right to demand of industrial management new, better, and more adequate accident prevention programs that its factory doors be opened to safety."

"One way would be the enrollment of key workers in the war training courses offered, tuition free, by engineering schools of Texas major colleges and universities."

The schools teaching the courses are: A. & M. College, Southern Methodist University, Colleges of Arts and Industries, Texas Technological College, the University of Texas, and the El Paso School of Mines.

Factors of the course is to study trained industrial safety leaders in corporate and protect man and material in war industries through accident prevention. It is offered under the war training program of the U. S. Office

Scenes above are from Mr. A's gay romantic hit, "I Married An Angel," which comes to the Arendia Theatre for 2 days beginning Wednesday. In the circle are Jeanette MacDonald and Nelson Eddy surrounded by a bevy of beauties contributing no end of glamour to the delightful picture.

### College Jobs For Students Plentiful

LUBBOCK, Tex. (UP)—Wac-tion youth seeking to go to college will have little trouble finding student jobs to help finance the move.

Here at Texas Tech there is a student labor shortage for the first time in history. College faculty jobs, heretofore scarce in Lubbock, are going begging. Even a reduced quota of NYA jobs now are filled.

Domestic houses on the "avenue" which cater to college life are unable to get owners help as proprietors are washing dishes and waiting on tables.

In 1940, Texas had more than any other kind of livestock, 2,000,000 head, according to the Bureau of the Census.

Oil is the most widely distributed Texas mineral.

Education in America with the National Committee for Education, the American Society of Safety Engineers and the Texas Safety Association.

### State Law Is Scrapped for Duration To Aid City Transportation System

AUSTIN, Tex. (UP)—Texas ditched another state law this week, deciding to ignore it in the interest of winning the war. Effective Sept. 21, state departments at Austin were placed on staggered hours as a step to cooperate with the City of Austin in its war time transportation program.

The act making the appropriation for maintenance of state departments is now in effect.

"Operating herefrom Sundays and state legal holidays, offices

hours of state departments shall be from 8 o'clock a. m. to 5 o'clock p. m. with one hour off at noon; provided however that all departments shall be allowed to close at noon on Saturday."

There is also a proviso that the head of a department may stagger his force on Saturday afternoon, dismissing part and keeping part, if the department work makes that necessary.

There is no general exception however for changing working

Other Coats 6.95 To 45.00

**JOSEPH'S DRY GOODS**

Under the staggered system put into effect this week, employees will still work the same number of hours as specified in the appropriation act.

The Banking Department, Bureau of Labor Statistics, Department of Agriculture, governor's office, Game, Fish & Oyster Commission, secretary of state's office, State Board of Cosmetology, Teacher's Retirement Office, state library and veteran's service office will continue to have their employees report at 8 a. m. and quit at 5 p. m.

Workers in the General Land Office, the Industrial Accident Board, the Insurance Department and the State Highway Department are scheduled to go to work 15 minutes later and quit 15 minutes later.

At 8:30 a. m. employees will arrive for the Attorney General's Office, auditor's office, Board of Water Engineers, comptroller's office, State Board of Control, State Treasury, Texas Unemployment Compensation Commission, State Department of Health and State Department of Public Welfare. They will quit at 5:30 p. m.

Last arrivals, at 8:45 a. m., will be the employees of the adjutant general's office, Lower Colorado River Authority, Public Roads Administration, State Railroad Commission and Selective Service headquarters. Their work will end at 5:45 p. m.

The plan takes into consideration the location of the offices.

### Electrical Power Output Increased

AUSTIN, Tex. —Consumption of electric power by all types of users — commercial, industrial, residential—was up in Texas during August by a 10.1 per cent over

some of which are in the state capitol and state office buildings, and others in rented offices in downtown business buildings. The Department of Public Safety, being situated at Camp Mabry, does not enter into the downtown traffic problem.

Affected by the schedule are approximately 500 workers in the highway department, 400 in the health department, 280 in the employment section, 200 in the comptroller's office, 150 in the railroad commission, 112 in the State Board of Control and 110 in the State Department of Public Welfare. The other departments range from 100 down to a minimum of four in the veterinary service office.

Since May, fuel tax collections have been from \$205,000 to \$1,000,000 less than for the corresponding months of 1941.

Net decrease in collections for the year was \$1,094,417, after deducting refunds that are allowed for gasoline used in motor boats in farm work or in operations not involving use of state highways.

er July, reports the University of Texas Bureau of Business Research.

Industrial concerns used the largest share of the state's electricity output during August, with commercial enterprises coming second. Consumption of electric power was also greater during the month than it was during August, 1941—an increase of 7.3 per cent—the Bureau has reported.

Texas is the ranking cattle-raising state by a wide margin, according to the census of 1940.

Texas' annual cheese production of over 20,000,000 pounds is valued at more than \$2,000,000.

### DEFENSE to OFFENSE

# Men Make the Navy

... THE NAVY MAKES MEN

A fairly accurate phrase describing the typical U. S. Navy or Naval Reserve sailor seems to be that "a sailor is made not born," for he has never set foot aboard anything larger than a canoe or a row boat and doesn't know the bow of a ship from its stern. From Shipping Day (the day a new recruit is sent off to Navy Training Station) to the end of his shore training, the new bluejacket's days and nights are crammed full of new experiences. When finally he is assigned to active duty—"boots"—the Navy's name for the recruits—derived from the regulation canvas leggings he must wear from a seasoned sailor, but he has hardened up a bit; absorbed a lot of basic sea-faring knowledge; fallen into the habit of regular living; learned to keep his quarters, equipment and person clean

active duty only as long as the emergency period lasts—or for a six-year enlistment in the Regular Navy.

Within a couple of hours after his arrival at the Training Station "boots" has been given another dental examination, been introduced to the official Navy haircut by the "Mad Russian" as recruits call the Navy barber, been given another physical examination, packed up his civilian clothing and all personal items except his wallet, toothbrush and shaving kit for mailing home.

One complete set of uniforms was issued to him and he complained a bit because they seemed loose fitting. A few weeks later he will be glad he was issued uniforms a trifle large for, unless he proves to be an outstanding exception, he will take on from five to fifteen pounds, at the same time changing a lot of that flat-by-civilian flesh to solid-sea going muscle.

He finds that his company barracks are spottless. The wood floor is scrubbed and waxed. If he sleeps in a hammock his barracks will have four parallel lines of galvanized pipe, five feet from the floor, extending the length of a floor the size of a dance hall. A chief petty officer, who will act as his commander during the training period will give instructions in slinging these hammocks on the pipes.

The petty officer will also explain that from now on the sailor's sea bag will be his closet until he arrives on shipboard and is assigned a personal locker.

About this time a bugle, or more likely a bugle played on a recording over an amplified system, will introduce the new recruit to his Navy meal. The cafeteria system is used and each recruit will be given a metal tray divided somewhat in the manner blue-plates are divided. The tray will be heaped with bread and butter, a bowl of soup, meat and vegetables, a green salad, dessert, and a pint-sized mug of Navy coffee—called "joe" or "java."

For three weeks new recruits are checked carefully for any disease which might have been overlooked in the physical examination conducted before Shipping Day or the physical check made when "boots" arrived at the Training Station. These days are filled with preliminary training in marching by squads, companies and battalions, light-arms drills, signaling with lights and flags, learning knot-tying, making ropelines, rowing and the use of hand leads and deep sea leads. "Boots" also learns the names of various parts of a ship and her gear from large-size ship models. Also our new bluejacket will discover that wash day comes twice a week in the Navy and he will learn how to wash clothes and

## Pride --- And Groomed

Lucky lamb, being prettied up by comely Ruth Reed, pride of New York "sweater girls," is prize-winning "snowball," whose fleece may one day furnish the yarn to grace future sweater wearers.

stand guard over clothes line. No ironing boards are supplied the apprentice seaman and he learns how to press his clothes by folding them tightly and parking them properly in his large canvas sea bag.

Swimming test are given; and for those who don't know how, instructions are given until the new swimmers can pass required examinations.

"Boots" learns that "Irish pennants" (loose rope ends) are taboo, that the walls of the barracks are called bulkheads, that the "scuttle butt" is the ship's drinking fountain and a "blow-makers mate" is an awkward sailor—in fact, "boots" soon realizes that he must learn an entirely new vocabulary.

Athletics during the day, motion pictures, backgammon, cribbage, letter writing and some book study by night fill the new recruit's spare hours. After three weeks he gets his first liberty pass. Then he begins to receive lectures on torpedoes, powder magazines, handling boats under sail and manning the big guns.

The last day of training "boots" begins to feel that he is a real blue jacket and gets a thrill as he receives his pay and is given a nine-day leave. For the first time he is permitted to wear his dress blues, and after this leave he will be off for active duty on shipboard or will be sent to a Navy Trade Training School for further instruction in some

## Poem On Patience Given Impatient Drive-In Patrons

AMARILLO, Tex. (UPI)—If you drove up to one of the local drive-in stands and show signs of getting impatient, you are likely to be reading the following bit of poetry, printed on a card which will be stuck under the windshield wiper:

Patience With A Smile  
Remember Pearl Harbor and  
don't swear  
For labor is scarce and metals are  
rare.

Jim has been drafted and Bill is  
a job.  
And Sarah has left us to fill their  
job.

You'll get your order, don't be  
waxed.  
Maybe this week—or maybe  
next.

They've gone in defense of you  
and me  
So all that counts now is —  
Victory.

specialized work.  
Weather the new men are selected for Trade School Training or are assigned to immediate duty at sea, they have an opportunity to get free trade training which will pave the way for careers in later civilian life.

## SERIAL STORY OF BRIGHTNESS GONE

BY HOLLY WATTERSON

COPYRIGHT, 1942, NEA SERVICE, INC.

**THE STORY:** Candace Beck, nurse, is leaving her apartment for a trip with an elderly, rich woman patient—and probable marriage to the patient's grandson. As she packs an evening gown her thoughts go back to the last time she had worn such a dress, and to her tragic love for Martin Corby.

### AT FIRST SIGHT

**CHAPTER II**  
MARTIN happened to her when she was 18. It was cataclysmic. Martin's coming made it seem as though nothing in her life up until that time had mattered at all, and he colored everything that went after.

She was in her last term at the Barrett School. In March, her Uncle Bruce came up to talk over with her what was to happen after graduation.

They sat over a table at Ye Campus Tea Shoppe and Uncle Bruce drank quantities of scalding coffee, black, while Candace made the hearty mid-afternoon tea of an adolescent. "Think you'll have trouble getting by on the college entrance exams?" Uncle Bruce asked, teasing.

"I'm not even taking them." Though he smiled too, Uncle Bruce sighed a little. "That's rather too bad," he said lightly. "It would have pleased your aunt."

"Would it? I don't see why," Candace said.  
He had realized for some time why Belle had insisted on the expensive Barrett School for Candace; it was fast because she wanted to do something nice for the child whom, he acknowledged reluctantly, she disliked and resented, but because of the possible husband Candace might meet through it: the brother, or the cousin, or perhaps even the boy friend of one of the socially prom-

It was only Martin she saw as Peter said with a hint of pride, "My cousin Candace, Martin."

inent girls there.  
Belle could forgive the child a lot, even her mother's ridiculous marriage, if she were to make it for her to her to marry. "My niece, Mrs. Somebody-or-other-Important." Belle had apparently given up hope at last that Peter, his own son by a former wife, would endorse her in any similar fashion. Peter was a medical student, and "actually grubbing at it," Belle said in disgust. And likely not, she would add, to marry some little nobody, he might even marry a nurse.

BUT Candace, he thought, real- ized none of those things, nor did he want her to. He was sorry for even that slight slip. He said lightly to cover it, "Your aunt is old-fashioned. The only career she can see for a woman is marriage."

"Oh, I'll probably marry," Candace conceded, "but years from now after I've worked, after I've paid it all back."

"Paid what back?" Bruce demanded.  
Candace flushed. "Don't think I haven't realized what an expense I've been to you all these years."

"Who has ever said anything about expense? Have I ever—"

"Oh, no," Candace said hastily. "Oh, no. It's just myself, just what I've felt. I'm only Aunt Belle's sister's child, I'm not really related to you at all. And yet, all these years—I've been a nuisance to everybody all my life," she added.

There was no hint of self-pity, she gave it simply as a statement of fact. Behind her seeming placidity, her quiet dignity, there had always been then this awareness of the unwanted, unloved child. He had felt that it must be so, but he had been busy. His conscience rebuked him, and the pathos of her position twisted her sensibilities; and because he was uncomfortable he spoke sharply. "We've loved you, we've done what we could. And to speak of paying back, of money—it's ungracious of you, it's insulting."

"Oh, Uncle Bruce, I didn't mean—" She held her jaw rigid, he guessed, in an effort to keep from tears, and her hands twisted together. "But if my own mother didn't want me—"

Bruce swore. "Who ever said such a thing?" She pointed out with simple logic, "She gave me away, didn't she?"

Bruce became aware that his voice had been rising and that the waitress was taking an interest in their conversation. He leaned across the table, spoke low, quietly. "Let's get this straight."

Your father, too. They loved you so much that they could bear to part with you—but only to your mother's own sister, mind—so that you could have better care than they could give you."

She was quiet, digesting that, and making a pretense of eating while she fought for self-control. She asked finally, painfully, as though only a desperate need could drive her to mention it. "Uncle Bruce, I've always wanted to know—were they happy together? Was she glad she did it?"

He thought back, remembering the shabby, sick little woman in rusty clothes, with only the fine eyes left as a remnant of her youthful good looks; he thought of the man with the face of an ascetic, singing to her, because his crippled fingers could no longer coax music from his violin, the melodies which he had once taught her and which she had always loved. And he remembered their faces as they looked at each other. . . . He said, "They were very much in love. They were poor, and sick, but they were happy together."

He couldn't stand much more of this. He prepared, briskly, to leave. He said firmly, "You'll take your college entrance examinations. You'll spend the summer with us, and you'll enter college in the fall."

He couldn't know that in June she would be meeting Martin, and that then everything would be changed.

BRUCE'S resolve to "make things up" to Candace hadn't lasted quite until commencement; he wrote that he was involved in a deal and couldn't get away. Ann Belle was abroad. It looked for a time as though Candace would have no one of her own there at all.

But she might have known that she could depend on Peter. Big, raw-boned, gentle Peter who was kinder than any blood brother could have been. He wrote that he was leaving school a day early so that he could be with her for commencement, and would then take her home. He would have a friend with him, Martin Corby.

Candace came down the stairway when she got the message that they had arrived and were waiting, and though the sitting room was filled to overflowing with other youths all faintly similar in appearance, it was only Martin she saw: Martin with his dark brooding face, his sensitive hands. Peter said with a hint of pride, "My cousin Candace, Martin."

Martin took her hand in his—and it was as though a switch had been thrown, a current of feeling that left her dazed swapt through her, stopping her breath, stopping her heart, draining all color from her face. Martin murmured a polite something and she murmured back, and they walked out together onto the grounds.

It was over finally. Her trunk was in back and suitcases overflowed onto the running board, and she sat dreamily between Peter and Martin. Peter was driving and Martin suggested that Candace move closer to himself to leave Peter room. All along her side where it touched his she felt warm and tingling. His arm was draped along the back of the seat; he moved it forward once and she felt it rest on her shoulder, she thought she felt a faint pressure of his hand on her arm. The feeling of suffocation came again, the warm hazy brightness.

How to make your shirts last longer

1-When you send your shirts to the laundry, turn up the collar instead of leaving it folded. Tests show that it adds many wearings to the shirt when it is laundered with the collar turned up.

2-Don't starch fused collars heavily - they are made to stiffen automatically when they're laundered.

3-Remove stains before sending shirts to the laundry. They're often overlooked and run in the washing. For fruit, tea or coffee stains, pour boiling water on the spot. For others, use soap and water.

4-Buy Arrow Shirts in the first place; their fabrics are pre-treated for wearing qualities. They also have the Sanfested label, which means permanent freshness.

MORTON VALLEY

By MRS. W. E. TANKERSLEY  
Mr. and Mrs. Willis Apple and son, Dennis, visited Mr. and Mrs. Frances Apple and daughter here last week-end.

Mrs. Eddie Jameson and children, Byrnedean, Mary Lou, and Tommie Lee and Mrs. Ada Phillips of South Bend, visited in the home of C. K. Westfall and family last week-end.

Mr. and Mrs. Clint Jones and daughter, Betty, moved last Tuesday to Pueblo, where Mr. Jones is employed.

Mr. and Mrs. Charles Brazil, of Arlington, are visiting Mrs. Brazil's father, Mr. J. P. Tankersley and son Shelton.

Mrs. Howard Throatt and son, Douglas, of Pampa, are visiting Mr. and Mrs. Cowan, and Mr. and Mrs. Joe Tow, and son.

Mr. and Mrs. Eldon Smith of Dallas, and Mr. and Mrs. R. W. Smith, of Bedford community, spent the day Friday with Mr. and Mrs. H. C. Pounds.

Anna Joy Horn, who is attending Ranger Junior College, spent last week-end with her parents, Mr. and Mrs. O. H. Hearn.

Mr. and Mrs. Jack Brown, Mr. and Mrs. Fowler and son, of Lubbock, visited Mr. and Mrs. J. L. Harbin, Sunday.

Mrs. George Cazez and daughters, Alice, Vernell, and Mahlon and sons George and Clarence, of Eastland, Arthur Gilbreath, of New Mexico; Mr. and Mrs. Barney Smith and Brenda Joyce, of San Angelo; Onetha Cazez and McGee of Ranger, and Mr. and Mrs. Felipe Garcia and twin sons, Donald and Ronald, of San Juan, New Mexico, spent Sunday in the home of Mr. and Mrs. Harrison.

Mr. and Mrs. Francis Apple spent Sunday in Hockley visiting relatives.

Mrs. Inez Rucker visited her husband, Byron Rucker, who is stationed at Camp Hood near Temple, last week-end.

Mr. and Mrs. Till Wheat and children, T. L., Jr., Doris, Dorothy and Verna visited Buster Wheat at Abilene last Saturday.

Junior Wheat returned Sunday to A. & M. where he is attending school.

Gorman Plans A Demonstration By Military Forces

The 113th Mechanized Cavalry from Camp Bowie, under the command of Capt. John A. Logan, will give a demonstration in the Athletic Park in Gorman, Tuesday night, October 6th, demonstrating the different types of equipment and practices of this once mounted division.

This demonstration will be shown under the newly completed 100,000 watt lighted field. No charges. Absolutely free. There will be some good talks made by Captain Ben L. Rose and officers of this organization.

This might be the last demonstration given in this area, so come and bring the children as it will be worth your time. We need something to put us in a fighting mood.

Society, Clubs and Church Notes

**MARRIAGE ANNOUNCED**  
Mr. and Mrs. Addie Williams have announced the marriage of their daughter, Geneva Laine, to Sgt. S. Garth, of Pennsylvania. The double ring ceremony was performed Tuesday at the home of Rev. and Mrs. Swanner of Eastland with Rev. Swanner officiating the service.

PERSONALS

Mr. and Mrs. Bryan Garner left Wednesday for a few days visit in San Antonio.

Human Factor Is Most Vital In Safety On Roads

Of the three major elements in highway safety, (1) the machine, (2) the road, and (3) the driver, "there can be little dispute that the human element is paramount," Harry E. Dudley of Yale University asserts in his new book, "Why We Have Automobile Accidents."

"Experience has shown," he says, "that no matter how clever the construction of a machine, it is the man who operates it who determines what its end result will be. The safe and efficient flow of motor transportation depends primarily on the man at the wheel. No matter how well-maintained the cars, how good the roads, or how bronzed the laws, in the last analysis it is the individual's reaction to the situations he encounters on the highway which assure us safety or spells disaster."

Referring to the many proposals made for superhighways as a cure for motor vehicle accidents, Mr. Dudley says that it is questionable (1) whether such highways could be made " foolproof," against accidents and (2) whether "we could afford to build very many miles of such superhighways."

"The most modern superhighway in the United States is the Pennsylvania Turnpike, a divided four-lane toll highway, 160 miles long between Harrisburg and Pittsburgh. Far from being foolproof, during the first six months of its use the fatality-per-vehicle-mile rate was double that for the United States as a whole," continues Mr. Dudley. "Largely, usually, superhighways facilitate the more rapid flow of traffic, but they are far from being foolproof. Somehow drivers continue to have accidents even on highways into which engineers have incorporated the latest and most expensive safety features."

Men with A-A draft classification, or those with minor physical disabilities which preclude them from military service, are also urgently needed, and may find out about the classes by call at the United States Employment Service, Room 2, Sinclair-Pratt Building, Eastland.

Evening classes in sheet metal work and riveting will be conducted at Eastland six days a week, from 6:30 to 10:30, with the instruction extending over a period of six weeks. Evening classes also are available in Ranger for those who wish to take up welding.

"Many men, and possibly some women, will qualify immediately for placement in defense industry," Keller pointed out today. Others will be sent to the defense industry training schools, and after six or seven weeks training will be placed in industry vital to the war effort. These training courses are free and there are now many vacancies. Men and women are urgently needed. Please call at once at the United States Employment Service, Sinclair Building, Eastland.

NAVY SIGNALMEN COMMUNICATE AT SEA

Signalmen in Uncle Sam's Navy must be able to attain a speed of twenty words a minute in sending messages with semaphore flags in the manner pictured above. Other means of communication from ship to ship or ship to shore are the flashing light system, that uses large electric lights similar in appearance to searchlights equipped with blinkers operated by twists of the wrist; "blinkers" made of communication used at night, consisting of a series of small lights arranged horizontally and operated by an instrument resembling a telegraph key; signal flag hoists, employing multicolored signal flags and radio.

Signalmen in the U. S. Fleet are trained at Navy Trade Training Schools. Recruits in either the regular Navy or the Naval Reserve will have an opportunity to attend Navy Trade Schools and receive free schooling in any one of nearly fifty different skilled trades and vocations.

causing a paternal eye along the length of his 50-foot auxiliary schooner. "It is less expensive than a house and it carries the added advantage of mobility."

Brooke rented a house when he first moved here, but was forced to move a few days later when the place was sold. He couldn't find another dwelling. Necessity mothered the idea of a boat (house).

Fort Arthur, Tex. (UP)—The war-time housing problem in this busy defense area has been pleasantly circumvented by the R. J. Brooke family.

Ants, roaches, weeds and those other foes of domestic felicity do not menace the housekeeping happiness of the Brookes.

The family, which includes Jimmie, 4, and Mandy, 2, make their home aboard a schooner moored at the yacht club.

Evenings when Brooke comes home from his job as draftsman at a local manufacturing company he sits in solid comfort on a boom and reads the paper, pleasantly oblivious to the rattle of lawn mowers pushed by prespiring hangers throughout the city's suburbs.

"It is the life," says Brooke.

Cement Production Is Off Slightly

AUSTIN, Tex. —Texas production of cement during August was 3.8 per cent below that for July although national production during the month rose 4.6 per cent above the figure for the preceding month, the University of Texas Bureau of Business Research has announced.

In spite of the small decrease from July to August, cement production and shipments are still well above the marks set in August, 1941—the rise from 1941 to 1942 having been greater in Texas than the national figure.

Stocks on hand in Texas plants at the end of August amounted to 216,000 barrels, 69.3 per cent below stocks at the end of August, 1941, and 13.6 per cent below those on hand at the end of July.
