PLANNING ISN'T NEW

THE way a lot of people are talking these days, you'd think planning is something new.

But anybody who's over run a farm or a factory knows that if you don't plan, you can't get the most out of Last you have to work with.

o plan properly, the farmer has to know about crops. s, seasons, tools, and stock; and the man operating a factory has to know about machines, markets, science, a... cr. incoring.

14 for all this specialized knowledge which each of these activities requires, the managers of both farm and lattery have much in common in their planning. They have the some problems—to mention a few—of emproyment and taxes, of costs and a fair profit, of setting Lines reserves for a "rainy day."

And they have the same objective in their planaing -10 do everything they can for their country today, and, tomorrow, to make a fair living through greater service to their fellow Americans. General Electric Coop. puny, Schenectady, N. Y.

CENERAL ELECTRIC

Home Canning for guaranteed meals

ARTHUR BELLEVICE HELDER ALVER DAR STREET BETTER VALUE OF BUILDINGS OF THE STREET

Enjoy fresh foods, in spite of the war

ARE YOU A BEGINNER in the canning business? If you have a Gas Range with thermostat and simmer-burners, and a good book of directions (see notice below), you can stock a proud pantry, from Apple Sauce to Zucchini Squash. The photograph shows a Pressure Cooker, which handles vegetables and meats, as well as fruits. If you can rent, borrow, or share one, you can do fast, professional canning. But whatever method you use, the Pressure Cooker, Water Bath, Oven, or Open Kettle ... be sure the foods are FRESH. Otherwise it's a waste of money and work.

TEE Canning Booklet

Complete with charts and illustrations covering vegetables, fruits, theat, and poultry. You will find it p. actical and easy to follow. . . Given to our customers at your Lone Star Gas Company office.

COTICE: If your Lone Star town has no Company office send a postal to Miss Alterine Berry. Lone Star Gas Company, Dalles Texas, and your copy will come

Handle With Care

To take care of your Gas Kange during the canning, do not load the oven door with heavy jars going in or out. To protect the oven floor from accidental spillovers, the jars must stand in a shallow pan. Keep mats on the enamel top to catch hot drips from the spoon.

* Your cheap natural gas is very rich. Use what you need, but do not waste ir.

The Lesson-Sermon also inthe Scriptures," by Mary Baker Eddy: "The power of God brings deliverance to the captive. No power can withstand Love" (page 224).

Pick ONE DAY in the Week for Defrosting

The layer of frost that forms on the freezing unit of your electric refrigerator actually acts like a blanket, for it keeps the cold from reaching food that you want kept tresh and wholesome. This frost layer also harbors food odors, and should be removed when it becomes about 1/4 inch thick, about the thickness of a pencil.

Pick one day in the week to defrost your tetrigerator. A freezing unit free from a heavy layer of frost makes ice cubes faster and maintains a lower chilling temperature in the food compartment. Consult your refrigerator instruction book for a recommended method of defrosting.
