Highlights in the Pacific War

U.S. warships strike in the Sea of Okhotsk west of the Kuriles, announcement of the 7th Fleet operations in Makassar Strait between the Celebes and Borneo, and the breakup of Jap forces on Luzon highlight the Pacific war news of the past week. (NEA Telemap.)

Ranger Tops Seventh War Loan Quota With Total Sales Hitting \$215,000

Ranger went over the top in the Seventh War Loan drive Saturday with a total of \$215,000 in bonds sold during the drive and a total of \$96,328 sold in the Series E bonds.

The drive was the greatest subscription ever made by Ranger and indications are that the same will be true of the entire nation. Ranger had an overall quota of \$145,000 and a quota of \$93,000 in the Series E bonds.

Last Rites For Mrs. McFatter Held On Sunday

Funeral services for Mrs. J. N. McFatter were to be conducted Sunday morning at 9:00 o'clock at the Morris Funeral Chapel with Rev. H. B. Johnson and Dr. W. H. Clark in charge of the services.

New Courses Planned To Aid Latin Relations

A new educational program designed to improve our "good-neighbor" relations with Latin America is underway in Michigan.

Four New Cabinet Members Go Into Office Saturday

WASHINGTON (UP)—Four new cabinet members took office today in the biggest shake-up since President Roosevelt first took office.

HEARINGS START MONDAY

WASHINGTON (UP)—The Senate foreign relations committee will begin hearings on the United Nations charter on Monday under rules designed to hold testimony to a minimum.

Chinese Invade French Indo-China Japs Say More Invasions Coming

STAFF SGT. IVY GETS BRONZE STAR AWARD

Mr. and Mrs. R. M. Ivy have received word that their son, Staff Sgt. Edwin E. Ivy with the Armed Forces now stationed in Belgium, has been awarded the Bronze Star for achievement in connection with military operations against the enemy in the European theatre.

Entering the service with the National Guards in November 1940 he received training at Camp Bowie, Camp Blanding, Fla., and Camp Edwards, Massachusetts. He went to foreign service in April 1943 and served in the North African campaign, the Italian campaign and the battle for Germany.

House Approves Extension Of Price Control

WASHINGTON (UP)—The House today gave last minute approval to legislation extending price control for another year and giving the new secretary of agriculture broader food control powers.

Ranger Red Cross Unit To Meet On Tuesday Morning

A very important meeting of the Ranger unit of the Eastland county chapter of the American Red Cross will be held Tuesday morning at 10:00 o'clock at the Chamber of Commerce and all members and officers are urged to attend.

GROWS OWN SMOKES IN BACKYARD PATCH

LOS ANGELES, (UP)—S. C. Weiss never has to cajole, coerce or bribe druggists to sell him a stogie, because he grows his own in his back yard.

TRUMAN SIGNS LAST MINUTE LEGISLATION

KANSAS CITY (UP)—President Truman signed today the measure to raise the pay of federal employees and awaited a last minute dispatch from Washington containing legislation requiring his signature before the end of the fiscal year at midnight.

Link Trainer Aids Disabled To Drive Again

SANTA BARBARA, Ca. (UP)—The Army is using a new type of "link trainer" at Hoff General Hospital to teach wounded veterans to drive automobiles again despite handicaps acquired during service.

Meat Shortage May Cut Trout Culture In N. Y.

ALBANY, N. Y. (UP)—Human beings are not the only ones affected by the current meat shortage.

Overseas Buddy Of Homer Gay Visits Gay Family

Mr. and Mrs. Homer Gay have had as their guest, Tech. Sgt. Lew Henderson of Aspermont, who has just returned from service in the Pacific where he had been associated with the Gay's son, Homer Gay, in the service.

Choice Of Eats And Seats Hit In GI Hospital

DAYTONA BEACH, Fla. (UP)—Things have changed. A convalescent soldier no longer "feeds his face in the mess hall"—he dines in holiday style with a dress for dinner air.

School Credits Won; Supervisor Praises System

As a result of the report of the state supervisor on Ranger schools the school has been given credits in radio, shop work, mechanical drawing and four credits in chorus.

Blinded Worker Shows Skill On Precision Parts

SCHENECTADY, N. Y. (UP)—Preston G. Harrington, who has been blind since birth, is proving himself a valuable war worker to General Electric Co.

German Experiments On Lake Bottom

Maj. Hayden Esty of the 11th Armored Division, left, and Sgt. Harley Hayes, Milwaukee, Wis., examine heavy flotation gear at Toplitz Sea, in Austrian Alps, where U. S. forces have revealed, German scientists carried on experiments by which they were able to fire V-2 weapons from 300 feet under the water, hoping to bombard New York in a plan which came near to success.

Psychoneurosis Term Dropped By The Army

MEMPHIS, Tenn. (UP)—The term "psychoneurosis" has been dropped by the Army Medical Corps because "it is unfair to stigmatize a man with a term that is misused generally by civilians," Kennedy General Hospital authorities report.

Summer Water Rates Announced By Department

Summer water rates effective June 15th have been announced by the city water department and will apply to residential consumers.

GI's Wife, Mother of 3 High School Salutatorian

WARSAW, N. Y. (UP)—Mrs. Juanita Robinson, 32 year old mother of three children, will be salutatorian of Wyoming Central school's graduating class here on June 25.

German Experiments On Lake Bottom

Chicago has the largest Young Men's Christian Assn. in the world. It is composed of 24 departments, 13 summer camps and 75,000 members.

REVIEW SET FOR TUESDAY NIGHT JULY 3

For the first time in several years Ranger's annual bathing review will be staged again and will take place at the Municipal Swimming Pool on the evening of July 3.

Superforts On Move To Keep Jap Industry From Moving

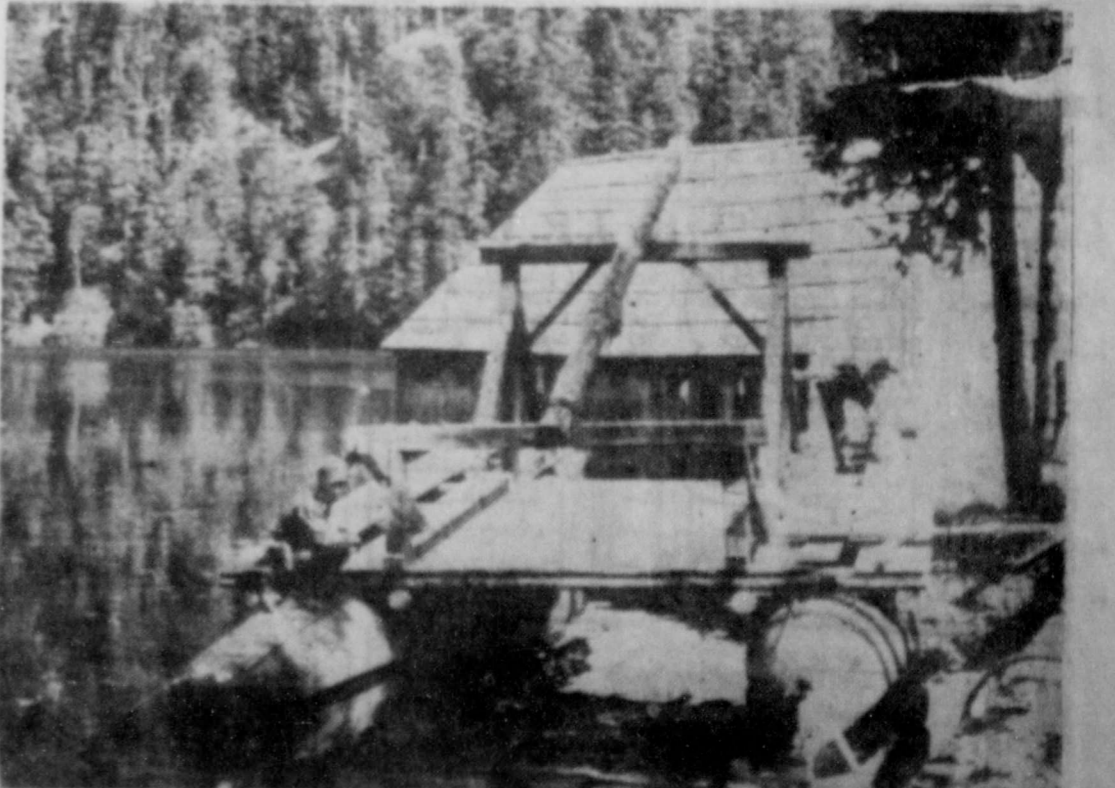

PEARL HARBOR (UP)—The Chinese invaded French Indo-China today and enemy broadcasts indicated two more Allied invasions were approaching or already underway.

German Experiments On Lake Bottom

The Japanese radio also reported that American destroyers and mine sweepers were in waters near Okinawa, in the Anami islands north of Okinawa in the invasion lane. The Japs previously have speculated freely that Americans will invade the Amami, Okinawa and 250 miles southwest of the home island of Kyushu.

German Experiments On Lake Bottom

The Japanese are trying to move their heavy war industries intact to Manchuria. The 20th Air Force, loath to see its targets disappear that way, has extended its blockade further north to interrupt the movement. Superforts today sowed mines in the harbors of Niigata, 150 miles north of Tokyo.

Maj. Hayden Esty of the 11th Armored Division, left, and Sgt. Harley Hayes, Milwaukee, Wis., examine heavy flotation gear at Toplitz Sea, in Austrian Alps, where U. S. forces have revealed, German scientists carried on experiments by which they were able to fire V-2 weapons from 300 feet under the water, hoping to bombard New York in a plan which came near to success. All experiments are now at the bottom of the lake and records have been destroyed. (NEA Telephoto.)

WASHINGTON COLUMN

BY PETER EDSON

NEA Service Staff Correspondent

SAN FRANCISCO, Calif.—The future of any established, privately owned electric power company in any part of the United States marked for possible development as a river valley "authority" is something on which there could well be a national policy determination before this government dam building business goes much further.

Active boosters of public power will differ with the conclusion to that flat statement, saying it merely proves how much influence P. G. & E. still has in California affairs.

RURAL Electrification Administration power co-operatives haven't been able to make a beginning in this area. There are less than 30 municipally owned distribution systems, all small.

If the government goes into active competition with P. G. & E., the government will have to build steam generating plants which will produce power when the hydro-electric power can't be delivered in sufficient and firm quantity.

In all the hullabaloo about saving private business and letting private business do the job of providing full employment, is there more to be gained by setting the government up as a competitor?

SPORTS

(Harry Grayson, NEA Sports Editor, is away on special assignment.)

BY JOHN I. DAY

Guest Columnist for Harry Grayson

RECORDS are made to be broken, especially in racing, but even though horses now are as high as they ever have been, it will be something of a feat if a new two-year-old earning record is established and even more so if some three-year-old tops the mark of Gallant Fox.

ALEX BARTH, Millbrook Stable's son of Chance Play-Jay Bird by Bull Dog, was nosed or headed out of four \$50,000 stakes last season and it wasn't until he finished third to Devil Diver and Apache in the Paumonok Handicap at Jamaica, that he entered the select but growing group of thoroughbreds which have earned in excess of \$100,000.

Back in 1929, Gallant Fox earned only \$13,300 as a two-year-old. In the following year, however, he won nine out of his ten starts to cop \$308,275. In amassing that sum, he became the first horse in history to earn more than \$300,000 in one season.

HAD Count Fleet not been injured during the running of the Belmont Stakes, he might have become the second horse to accomplish that feat. Yet the fact remains that a winner of the Wood Memorial, Kentucky Derby, Preakness, Belmont, Classic and American Derby of 1944 would have earned \$325,450.

It is impossible for any horse this season to top Whirlaway's all-time earning record of \$591,161. It took the Calumet champion 60 races in four seasons to amass that sum, although it was actually done in three seasons. As a five-year-old, in 1943, he raced twice and earned only \$250. Marriage.

By J. R. Williams

Co-Eds Prefer Security First In A Husband

CHEYENNE, Wyo. (UP)—Husbands this year don't have to be handsome, nor do they have to be romantic, according to a survey made among University of Wyoming co-eds.

If a fellow has a bit of intelligence and can provide a reasonable amount of security, then the girls won't mind as much if he happens to have big ears, or isn't particularly impressed by a nice noon.

The survey to determine what the co-eds prefer in a husband has been going on the last four years, and the likes and dislikes seem to change annually.

Last year, affection was one of the prime requisites deemed necessary. The season prior to that cleanliness was a virtue.

The desires of the co-eds this year, however, seem to have changed entirely in comparison with former surveys. Besides security, the co-eds prefer intelligence to charm, economic stability to personality, ambition to handsomeness and mutual interests to affection.

There's one quality which the girls desire in a prospective husband, that has been popping up

among the first five desires each year the survey is conducted.

A sense of humor is essential, it seems. According to the co-eds, it doesn't mean that you have to be a "life of the party" man. A general equanimity is suggested. That is figured to mean a man is preferred who could manage a rea-

sonable facsimile of a laugh at the bill for a new hat, rather than at the hat itself.

During the first three months of 1945, American soldiers in Europe required 340 Liberty shiploads of food. It included 13 shiploads of fruit juices, 33 of milk, 56 of fresh meat, 41 of

four and 54 of canned vegetables and fruit, according to the American Merchant Marine Institute.

Only three billiard balls of first quality can usually be cut from a single elephant tusk.

Kansas Getting Nazi Posters Used In France

TOPEKA, Kan. (UP) - Ex-propaganda minister Goebbels may not have thought that his picturesque posters would become part of the archives of the Kansas State Historical Society but that has just happened.

Maj. Martin Ripley of Topeka, Kan., with the 5th section of the Army in Europe recently sent home a group of posters dating from 1940 to 1944, and used for the sole purpose of subduing the French.

Many of the posters sent home by Ripley were threats of reprisals for acts of sabotage against the Germans. Others were pleas for the enlistment of French workers.

Goebbels and his Nazi aids were prepared for the Allied invasion. A series of posters urging the French people to be calm and to keep in line with the Germans, were issued.

One signed by Marshal Petain, urged the people not to "aggravate our miseries by deeds which may bring upon us tragic reprisals." It said, "France will save herself by observing the most rigorous discipline. Obey the orders of your government."

Perhaps the best of the group of posters—one not issued by Goebbels and his henchmen—is a

Hero's Reward

Blustering Gen. George S. Patton, hero of the U. S. Third Army, was calmed down to a zephyr when Mrs. H. C. Pratt, wife of Maj. Gen. H. C. Pratt, Patton's classmate at Virginia Military Institute, gave him a big hug on his arrival in Los Angeles.

and gold winged fish insignia because he was picked up out of the sea after using life saving equip-

ment to save his own life.

The silver boot in Maj. McLeod's case meant 67 days of walking through some of the hottest hot spots in Europe. It represents walking out of enemy-occupied territory.

And, the major says, he knows of several other men who have earned the right to wear the caterpillar, the boot, and the fish.

CRASH TEST HELPS NAVY SAVE PILOTS

PHILADELPHIA (UP)—The runway at Mustin Field is a far cry from the flight deck of a carrier, but many a Navy pilot can thank experiments made at Mustin for the success of his landings aboard his flattop.

Among the innumerable tests made at the Navy Yard and at nearby Johnsville under the direction of the Naval Air Material Center is the "crash" test. An unmanned plane is sent zooming down the runway into a wire barrier simulating the cable arrangement which prevents the planes from spilling over the sides of carriers or crashing into other planes on deck.

Purpose of the test is to determine how best to arrange the steel cables so as to cause the least possible injury to the pilot and the minimum damage to the plane as it is jerked to a halt.

Recently a Buccaneer dive bomber which was declared obsolete even before it went into action, was given "the works." The pilotless ship struck the barrier at

70 miles an hour and was pulled to a halt within four feet.

The cables lashed around the propeller and tipped the plane on its nose, but Capt. R. S. Milne, engineer of the Naval Aircraft Factory, told observers that if there had been a pilot in the ship he would have escaped with only a jolting.

The Naval Aircraft Modification Unit at Johnsville employs approximately 3,000 persons and occupies more than 1,000,000 square feet of floor space at the former Greener Aeronautical Corp. plant as well as an airfield. The unit was established July 1, 1944. Capt. Ralph S. Barnaby, commanding officer believes its activities may be continued after the war.

Other experiments made at the unit include the testing of a helicopter as a rescue craft. As the ship hung over the field, a rope was tossed from it to Capt. Barnaby—who had volunteered for the experiment—and he was "rescued" in the manner of shipwreck survivors.

The NAMU, besides its testing activities, also add the latest equipment to planes before they go into combat.

Through a new chemical process, salt water is being used on American hospital ships for laundry purposes. The space, formerly taken up by fresh water storage tanks, permits 10 additional ambulatory cases to be accommodated.

Bird Nest in Tree Worth Two Underneath Train

Plight of the mother robin who was raising a family under a Northwestern railroad car at Barkington, Ill., was alleviated when Trainman Arthur Fletcher and Mrs. Lillian Howell removed the nest and placed it in a tree 30 feet from the right-of-way.

U. S. Engineers Restoring Bridges At Strasbourg

STRASBOURG (UP)—American engineers are feverishly constructing bridges across this famous Rhine port, on whose activity France depends to a great extent for her economic recovery.

Before the war coal from the Ruhr, cereals from Middle Europe, and potassium from Mulhouse passed through Strasbourg. The whole French river fleet was 160,000 tons greater even than

its wartime fleet. Strasbourg received a larger annual tonnage than Le Parce. The Germans held a bridge head here as recently as April 15, but the port is still intact, with the exception of a few sunken ships and battered cranes.

Most of the bridges were blown up, however. The emergency ones the Americans constructed to get their armies across the river were too low to allow for boats, and so they are rushing new ones.

The flourishing river fleet of 12,000 pre-war boats has been reduced to 9,000. One-third of

the Rhine tugboats have disappeared. Eighty thousand river boats, some of them badly damaged, are being repaired however.

Because Strasbourg port was fed by a vast river network in the interior of France, as well as by the Rhine, it is too early to say when it can resume full activity. At the moment canals in France are functioning only partially or not at all. Only a portion of the Rhone-Rhone canal is in use. The Marne-Rhone canal is being repaired and it is hoped to reopen it for traffic next October.

TOWN and FARM in WARTIME. Prepared by OFFICE OF WAR INFORMATION.

CIVILIANS AT WAR

The Government needs and asks its citizens in the 186th week of the war against Japan to:

- 1. Keep your family well-fed by using the many alternates for scarce foods. Careful planning will help you to serve healthy and attractive meals despite shortages.
2. Budget your wartime spending. Saving now helps hold prices down. Spending later will stimulate prosperity when war production ceases.
3. Back up the men who will bring victory over Japan by becoming a Wave. 20,000 are needed for hospital and other assignments. Write Waves, Washington 25, D. C. for information.

SHOES — Airplane Stamps Nos. 1, 2, 3, in book three continue valid indefinitely.

Farm Loans For Returning Service Men

The Farm Security Administration has been authorized by Congress to lend \$25,000,000 in the next 12 months to returning service men who want to buy family size farms, and will start making these earmarked loans on July 2, through more than 2,000 county offices. Part of an additional \$25,000,000, not restricted for the use of veterans, also may be used to make loans to discharged service men.

The loans, made under terms of the Bankhead-Jones Farm Tenant Act of 1937, cover the full purchase price of a farm and allow up to 40 years for repayment. They bear interest at 3 per cent on the unpaid balance. Applicants must find for themselves the farms they wish to

purchase. Each farm is appraised, and a loan is made only when the purchase price is in line with the farm's actual value, based on its longrange earning capacity.

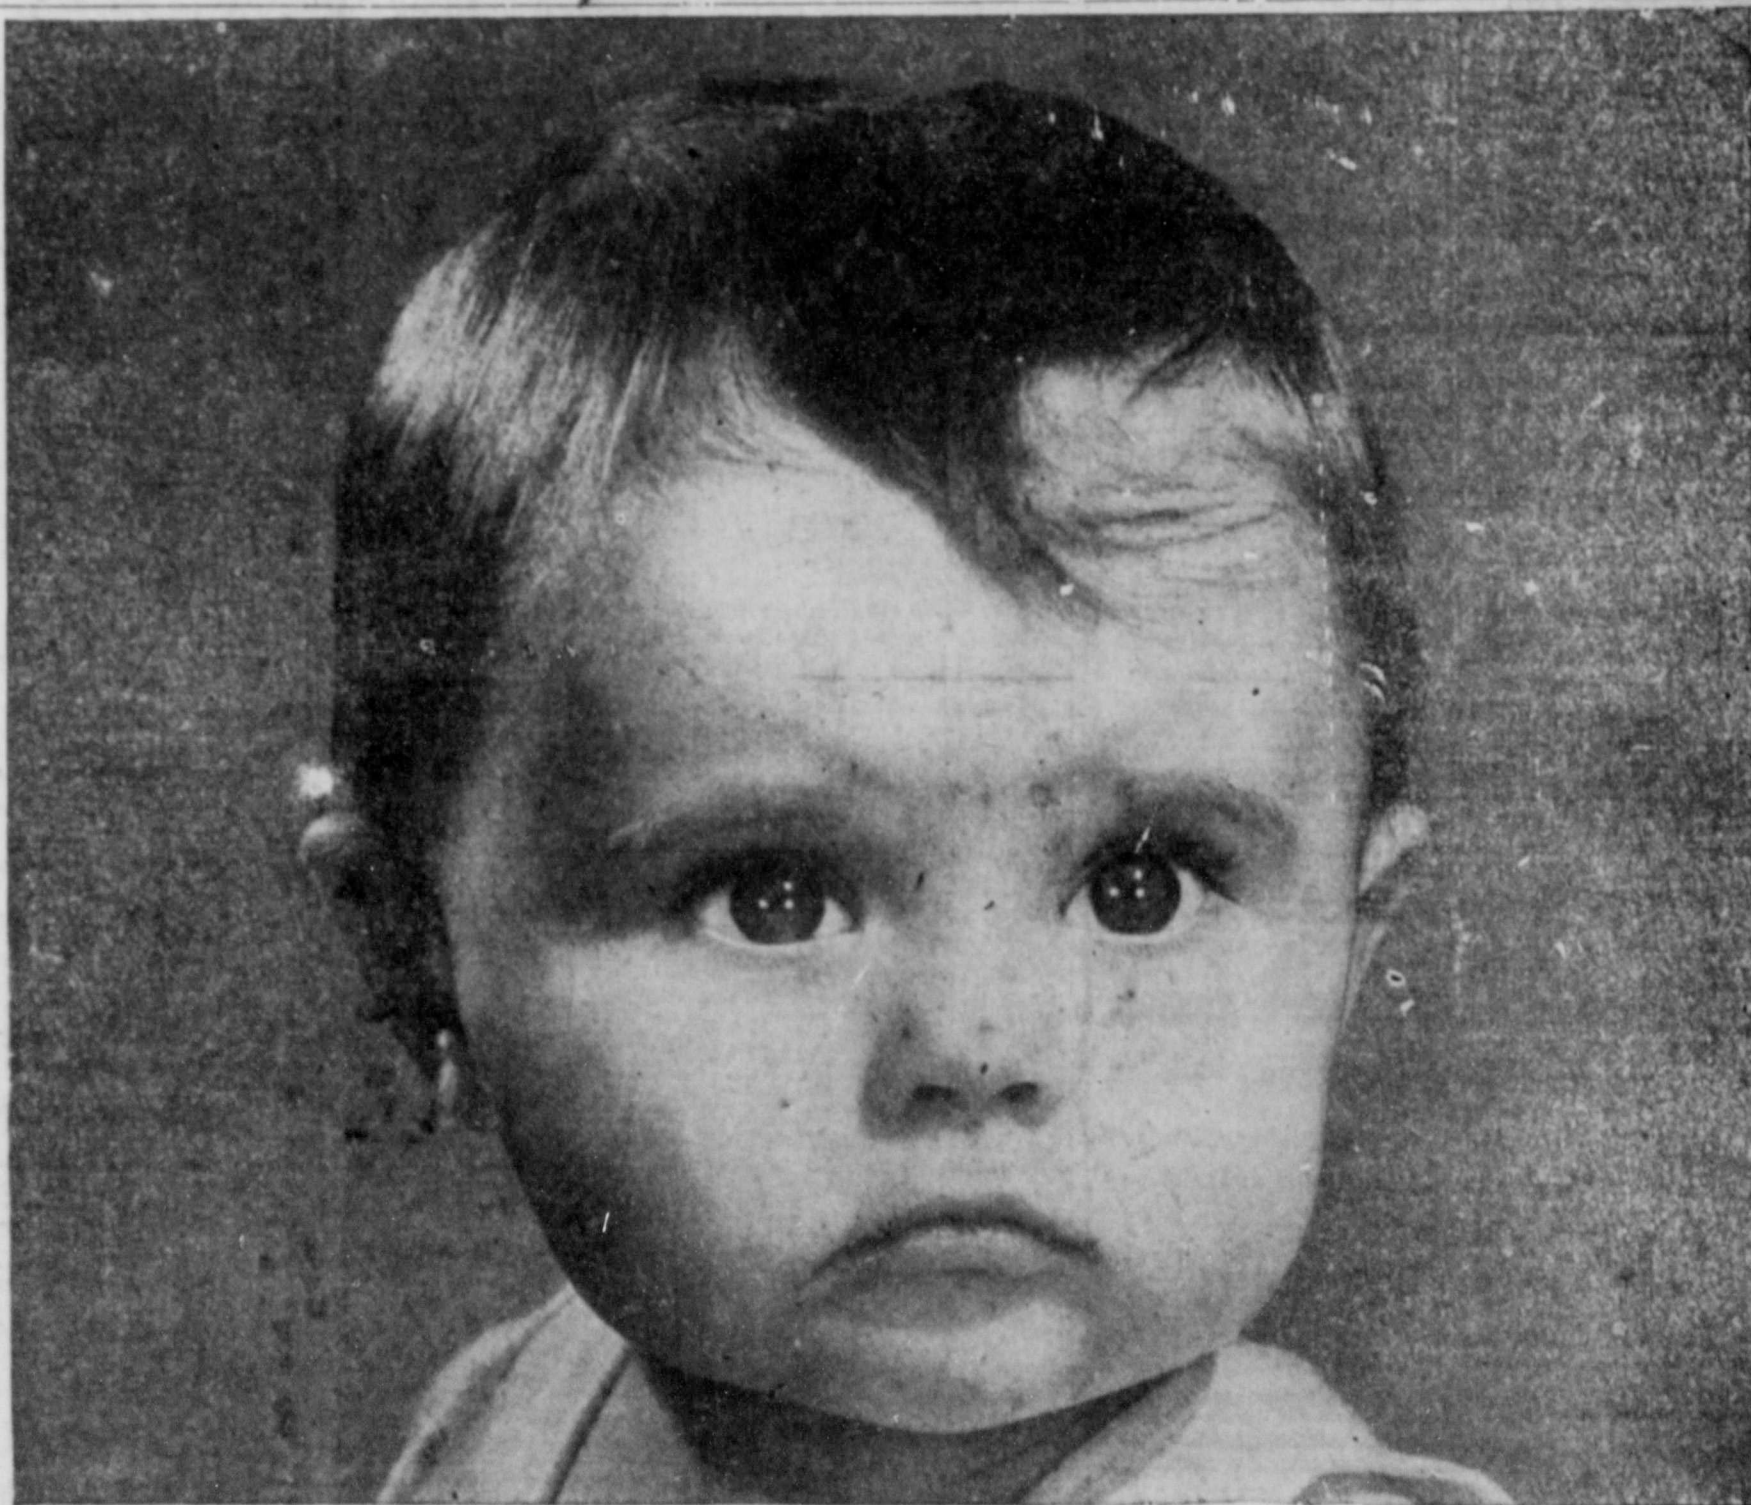

Extra Gasoline Rations For Service Men

Additional gasoline rations may now be obtained by service men having furloughs of more than 30 days. WPA Administrator Chester Bowles announced, "Furlough gasoline will still be issued at the rate of a gallon a day," Mr. Bowles explained, "but the 30-gallon limit is being removed for the benefit of released American prisoners of war who get leave or temporary duty assignments for sixty days in this country, and for those members of our armed forces who return from overseas and get more than 30 days leave."

"Service men applying for furlough gasoline should follow these three easy rules—1. Apply at any local war price and rationing Board, 2. Bring along the mileage ration record for the car to be used, and 3. Be ready to show furlough papers."

Penicillin For Civilian Use

Approximately 885,000,000 units of penicillin, equivalent to 8,850,000 vials of 100,000 units of the drug, have been released since March 15, through normal channels, for civilian distribution, WPA announced. Some 223,000,000,000 units a month are currently being used for civilian human and veterinary parenteral medication, WPA said. After military requirements and civilian and export parenteral needs are fulfilled, the considerable remaining quantities of penicillin may be made available soon in dosage forms such as tablets, capsules, ointments and dental preparations, convenient for physicians and patients. The initial shipping date for the new forms of penicillin may be August 1.

The World, the Peace and Andy Gribbin

It takes people to make a house a home and it takes people to make the earth a world. That's what the world is—people. Andy Gribbin here is the essence of the world because he's 1-4 about as small as people can be.

Now an important thing about Andy Gribbin's education is that his whole early life is spent in learning the essential business of cooperation, of getting along with fellow beings. First, he has to learn how to fit into his immediate family, learn the give-and-take necessary to get along with brothers, sisters, elders.

Then, after a few years, his world enlarges, he is sent to school. Pretty soon he learns how to spell C-A-T, a moderately useful thing to know. But about this same time he learns something much more valuable, which is that he mustn't pull the cat's tail because a cat is a being, and therefore entitled to certain inalienable rights.

He also learns that 1 plus 1 equals 2. That also is fairly useful. But much more useful is learning that 48 equals 1, that 48 states make 1

nation, indivisible, with liberty and justice for all.

As Andy grows up his world will continually expand. At church, at school, in business. And through it all will run the theme of cooperation, of getting along with people of different religious, political and economic beliefs; with people some of whom he doesn't even like.

But—the tragedy of world history is that the Andy Gribbins have not learned that in a constantly shrinking world, cooperation must extend beyond the borders of the country; that just as it is necessary to get along with neighbors and neighbor states, so is it necessary to get along with neighbor nations.

And today, with no spot on earth more than sixty hours away by plane, with oceans shrunk to the width of rivers, with the age of rocket-travel upon us, all nations are neighbor nations.

There are hopeful signs that finally we are awake to this. There are hopeful signs that Andy Gribbin will not face a World War.

Even so, a lack of determination, of resolu-

tion, of effort could again ruin the peace and set the stage for World War 3.

What can you do to help make sure that war will never come? You can...

First, get and keep yourself informed about the specific proposals for peace and international cooperation which are now before us. Read and listen to the discussions of them. Ask your Public Library, school, church for material on them.

Second, interest your friends in these questions. Get them discussed in all social, labor, business, religious or other groups to which you belong.

Third, say what you think—for or against—in writing, to your Congressman and Senators, to your newspaper. Declare yourself. Speak up.

The International Sunday School Lesson for July 1

Linking of God With Man Is the Intelligent Basis of True Religion

Scripture: Genesis Chapters 1 and 2

BY WILLIAM E. GILROY, D. D.

"GOD saw everything that He had made, and, behold, it was very good." This verse in Genesis 1:31 is an excellent keynote for this lesson.

If we could see creation as God saw it, we, too, would know that it is very good. We see it marred by what man has done, to himself, to his fellowmen, and even to the world in which he lives.

There are problems associated with the ugly, and cruel, and evil things in the world. Tennyson wrote of "Nature red in tooth and claw," though he wrote, also, of the trust that "somehow good will be the final goal of it."

HOWEVER these things may be, this lesson bids us contemplate God's joy in creation, and the great and beautiful things that God has provided for man. Bitter controversies have raged around the Genesis story of creation, but we should not allow these to mar for us the beauty of this poem of creation, or to obscure in any way its essential truth, which is: 1. That mind, and purpose, and creative

will be back of the universe. The world didn't just happen. "In the beginning, God." 2. That the creative process was a bringing of order out of chaos. Law and order are of the very essence of God's work and will for man. The Genesis writer, with magnificent vision, faith, and daring, links the Creator with man, made in the image and likeness of God, with the capacity of being himself a maker, or creator. "God made man in His own image." "Every house is builded by some man, but He that built all things is God." This linking of man with God is logical and sound, and it is the intelligent basis of all true religion. It is a commonplace of our faith today; but surely it was an inspired man who first perceived and uttered it.

WHEN one thinks or speaks of the beauty of God's world, one does not know where to begin. First is the beauty of that order and law by which the universe is upheld—planets moving so truly in their orbit that astronomers can define every movement for years ahead. Next is the beauty of the moral law, the things that pertain to man's integrity and relationship to his fellowmen. And manifold is the beauty of man's environment—skies and clouds, the starry heavens, green fields, and gorgeous trees and flowers, vast oceans, and pure rippling brooks, the beauty that man himself has created in art and literature, and in all the works of his hands that mark his kinship with God.

Churches

FIRST BAPTIST CHURCH
Walnut and Marston
W. H. Clark, Pastor

Sunday school meets at 9:45 a. m., with A. W. Warford, Superintendent. Morning worship begins at 11:00 a. m. with a prelude: "Now Let All the Heavens Adore Thee"—Bach, played by Mrs. W. H. Clark. Mrs. Clark will play as an offertory, "Contemplation"—by Frederick Smith. The choir will sing "Awake, Put on Thy Strength" by B. B. McKinney. The pastor will preach on "How to Develop a Good Memory." The Lord's Supper will be observed. Training Union meets at 7:00 p. m. with W. A. Lewis, Director. Evening worship at 8:00 o'clock with an organ prelude "Finlandia" by Sibelius, played by Mrs. Clark, who will also play the offertory—"Pastorale" by James Rogers. The pastor will preach on "The Marvels of Jesus."

SECOND BAPTIST CHURCH
Sunday School at 9:45 o'clock.

J. E. Marshall, Supt. Preaching at 11:15 a. m. Evening worship. B. T. U. at 7:15 p. m. Prayer group at 7:30 p. m. Preaching at 8:00 p. m. Tuesday evening at 8:30 p. m. Deacon's meeting. Prayer meeting and business Wednesday evening at 8:30 o'clock. W. M. S. Thursday at 2 p. m. Everyone is invited to attend all our services.

FIRST METHODIST CHURCH
Wallace N. Danson, Pastor

Church school—9:45 a. m. Preaching—10:50 a. m. Youth Fellowship—7:15 p. m. Prayer meeting—7:25 p. m.

Evening worship and preaching—8:00 p. m.

The Women's Society of Christian Service meeting Monday afternoon at 4:00 o'clock.

Regular meeting of Board of Stewards Monday evening at 8:00 o'clock. The choir will render the anthem, Follow Me, at the morning worship hour. "The Church With A Welcome"

FIRST CHRISTIAN CHURCH

H. B. Johnson, Pastor
Church school 10 a. m. with Lawrence Bryan supt. Golden Rule Bible class, taught by the pastor. Preaching by the pastor 11 a. m. Subject, Conversion and Conversion. Preaching again at 8:30 p. m. Monday evening at 8:30 p. m., the official board will meet with Hal Hunter, president of the board, presiding. At this time there will be a church social of all the members of the church invited. Make your plans to attend this meeting as it will be of interest to all.

CHURCH OF NAZARENE

Henry C. Thomas, Pastor
Sunday School 9:45 a. m. The juniors will render a special program at the Sunday school hour. There will be a group picture made of the entire Sunday School. Rev. Gatlin will bring the morning message at 11:00 a. m. services. Special music will be rendered by Rev. and Mrs. Gatlin. Junior service will be given at 8:00 p. m. Evangelist Service 8:30 p. m. Wednesday night prayer service at 8:30 p. m.

CHURCH OF CHRIST

Mack Stirman, Minister
Sunday, July 1.
Bible school—9:45 a. m. Worship service—11:00 a. m. Evening worship—8:00 p. m. Wednesday, July 4.
Mid-week service—8:00 p. m. Thursday, July 5.
Ladies Bible class—3:00 p. m. "Courage," will be the subject for the Sunday morning sermon. This is the third of the series of studies on Christian Characteristics. Plan to be with us for this lesson.

When asked to help in church work, so many say: "I can't do any thing." Yes you can. You can study the Bible, and be a good example to others. There is much that you can do, and should do. Andrew was not praised for preaching a fine sermon. He only brought his brother, Peter, to the Lord. Can you bring someone?

Bible classes for all ages start at 9:45 a. m. Bring some one.

The lesson for Wednesday evening will be the 10th chapter of Romans. Read it, and study it with us.

CHRISTIAN SCIENCE SERVICE

"Ancient and Modern Necromancy, Alias Mesmerism and Hypnotism, Denounced" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, June 3.

The Golden Text is: "When the enemy shall come in like a flood, the Spirit of the Lord shall lift up a standard against him." (Isaiah 59:19).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "God hath spoken once; twice have I heard this; that power belongeth unto God" (Psalm 82:11).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "God is everywhere, and nothing apart from Him is present or has power" (page 473).

Cash For Snake Meat Spurring Rattler Hunters

GUTHRIE, Okla. (UP)—Four Guthrie, Okla., men are doing something about the meat situation—they're providing snake steaks.

The four—Jene Nichols, Ray Brandenburg, and Jess and Alvin Brawner, brothers—have captured 117 rattlers alive in the gypsum hills "snake country" of Blaine county, Okla., in the last four years.

This year for the first time, they have a cash market for the reptiles. A Florida rattlesnake cannery has offered them 50 to 75 cents a pound for snake meat. The hides they either tan at home or send to a Chicago tannery to be turned into leather.

All work in war plants, and go on snake hunts more for the fun than anything else. But they envision some profits if the snake meat market holds up long enough.

The hunting "season" is best, they report, in March and April before the rattlers crawl from their dens and scatter.

The captured rattlers are brought to a pen in the basement of the Brawner home in Guthrie. Then the four men dispatch them at leisure.

The snake hunters carry only a .22-caliber pistol for protection.

STILWELL MEN MODELS FOR CHINA FORCES

With American Field Headquarters, Western Hunan (UP)—There are two entirely different types of Chinese soldiers in free China today.

One is poorly fed, undernourished, inadequately armed, and generally clad in rags and straw slippers. The other wears an American khaki uniform with steel helmet, is tough and husky and has the best of American equipment.

The former generally refers to the latter as "American forces," although actually they are ordinary Chinese peasants trained and equipped by Gen. Joseph Stilwell in India.

These Stilwell trained soldiers form the new Sixth Army, which was flown from west China to meet the Japanese assault on the American air base at Chikiang last December, helped take Myit-kyina, were flown to Kweichow province to stem the Japanese advance on Chungking, and now is participating in the Hunan campaign.

The Sixth Army is commanded by Gen. Liao Yao Hsiang, a native of Hunan province.

"My men are designed for attack. We cannot satisfy ourselves by mere defensive action," he said. "We are fully confident we are able to whip the Japanese as soon as we receive orders to start the attack from the high command. To my men, we are recovering lost territories for our country. To me

although Nichols admitted they were "plenty scared" of snake bites.

personally, I am to recover my native town, Paoching."

Americans on this front have a high opinion of the Sixth army. One says "they really look like soldiers."

The presence of the new army in China is serving as a model for the training and equipping of other Chinese units. The goal in the China theater, is to make all the Chinese outfits as well-equipped and as confident as the Sixth.

Indicative of the spirit of the early settlers of Maine are towns named Hope, Harmony, Friendship, Unity, Concord and Union.

Truett Messages To Be Broadcast

The voice and message of the late Dr. George W. Truett will be heard again in another and different series of broadcasts over WFAA of Dallas. These transcribed messages were delivered during the life and ministry of the late Dr. Truett. They can be heard on Sunday mornings 7:30 to 8:00 o'clock over Radio Station WFAA of Dallas.

Groggy, but She Still Came Up for Tenth Round

Smoke fills the skies as it rises from the flight deck of the USS Bunker Hill—another gallant ship that refused to die. The carrier was hit twice within 30 seconds by two Jap suicide planes just as she was ready to send off a flight of gasoline-filled and bomb-loaded planes for the target over Okinawa. Resulting catastrophe cost lives of 392, with 264 wounded. Ship survived to limp into a West Coast repair yard where she is being refitted for further duty.

Neatest Engine Room On Lakes Is Chief's Pride

BUFFALO, N. Y. (UP)—Crew men of the freighter J. J. H. Brown boast that their ship's engine room is the neatest and cleanest on the Great Lakes. As the man responsible is Chief Engineer Fred Vieau, of Buffalo.

Three years of painstaking work completed Vieau's "dream engine room."

The huge "work bench" is equipped with hundreds of highly polished tools, ranging from small belt punches to large wrenches. A duplicate set is in use aboard ship and only when one breaks is a crewman permitted to remove a tool from the bench. In drawers of the cabinets are hundreds of other tools.

Vieau's pride, however, is the floor. With ordinary paint he fashioned a huge copy of a compass dial. In the center he placed a chart of the Great Lakes and its principal ports. Squares painted around the compass gave a fluorescent-like effect to the lacquered floor.

Chief engineer Vieau explained he made up his mind 20 years ago when he first started sailing, that when he reached the top he'd have a "dream engine room" that would be a model of neatness.

His shipmates are sure he has achieved his ambition and they are convinced that nowhere on the Great Lakes is there a ship's engine room as spic and span as the Brown's.

Aircraft Corp., Upper Darby.

W. Wallace Kellett, president of the company, said that it would be some time before the ship is available for civilian use. He said it would cost considerably more than the most expensive automobile.

Kellett pointed out that the present ship was designed principally for landing aircraft under extreme conditions where there is limited space. The plane will be used by the Army where there is an urgent need for emergency equipment and for patrolling and inspecting forests, pipe lines and communication routes that are not easily accessible.

Books On U. S. Life Are High On Youth's List

CHICAGO (UP)—American youth looks for humor, adventure and imagination in its literature, but doesn't necessarily find them only in the comics.

That is the conclusion of the American Library Assn., which has completed a survey of 150 public and school libraries to determine the popularity of children's books.

Librarians reported that "boys and girls want good stories, regardless of background and quality of writing."

"They like animal stories, book based on family life and the adventures of everyday boys and girls, whether the scene is laid in present-day America or the past," the association said. "In spite of the attention focused in recent years on foreign lands, books with a foreign setting are not first choice with youth."

Many librarians said first-hand reports from war correspondents are more popular with boys and girls than war books written especially for the younger reader.

"Boys and girls do not follow their elders in demanding books hot off the press," the association said. "Few books published after 1943 have yet reached peaks of popularity, because demand for them has not yet been built up."

"While the reading choice of adults is influenced by book reviews and advertising, juvenile demands are built on personal recommendation. Once popularity is established, it lasts for a long time, and some authors develop such devoted followings that any book of theirs immediately becomes a favorite, even as in the case of adult books."

KP WAS CHOICE JOB FOR U. S. PRISONERS

MEXICO, M. (UP)—EPC. Saul E. Silvey spent 110 days in a German prison camp, and all that time he dreamed of chicken—but he ate horse soup. Silvey, now at home in Mexico, is eating chicken now. He said he was one of the luckier prisoners. Out of the 7,000 men the Nazis picked him to do KP duty. "I was the choice job in the camp."

\$5000 Ham

Ila Killen, of Bristol, Tenn., displays a ham recently injured for \$5000 by the Gwaltney Co., of Smithfield, Va. The precious pork was cured 43 years ago, and, outside of a little shrinkage, is still in good condition.

Beri-Beri Saves Yank From Term In Jap Prison

SAN ANTONIO, Tex. (UP)—The tropical disease of Beri-beri saved Cpl. George W. Shropshire from possible years of horror.

Shropshire, interned by the Japanese when Corregidor was seized, was twice taken to Manila from the prison camp at Cabacapan to be shipped to the home islands. Both times he was unable

to go because of his physical condition.

"The Nips wanted only the healthiest men—and healthy Americans were scarce by then—to go to their home islands. I guess Beri-beri was the luckiest thing that ever happened to me," he said.

Shropshire was rescued with the other prisoners at Cabacapan by the 6th Ranger Division.

"It was the most beautiful sight imaginable to see the Yanks moving down the way that had made our life so miserable."

We've been boosting Ranger for many years and once again it is our privilege to cheer the old home town for sponsoring such an elaborate bathing review as it is to be staged at the Municipal Swimming Pool July 3.

Oil Workers Speak Lingo All Their Own NEW ORLEANS, La. (UP)—The Greeks didn't have a word for it, so the oil field workers of south Louisiana made up some of their own. An average newspaper reader, confronted with a technical journal of the oil business, might find himself open-mouthed—reading a language made up of letters unmistakably English but utterly foreign when joined together. The initiated know that the

"three-jaw chuck" is a device for steadying the rods into the well and that the "rope choker" is a cable tool driller. Since the average South Louisiana lives near an area where oil is produced, he probably would be acquainted with the most familiar expressions. He'd have little trouble identifying a roughneck as a driller's helper, a roustabout as a general handy man and a tool pusher as the man in charge of drilling operations. He'd very likely know that when the driller speaks of his tour, he's talking about his work-day, and any griping about a "fishing job" means the oilman is making an attempt to recover tools lost in the hole. But where the dictionary won't help is when a "rooling dog" method slips, which, among other things, speeds up the "round trip." A "swivel neck" (rotary driller) could tell him that the "rolling dog" slip is a device for holding drill pipe in place and that a round trip is the removal and replacement of a bit in the hole. And now just try these on for size, and figure them out—if possible: junk pusher, cores, doodle-buggers, shot, wildcat and sucker rods.

Three Bladed Helicopter Being Made For Army UPPER DARBYS, Pa. (UP)—The Army has a new experimental helicopter, the XR-8—a small, bean-shaped craft with three-bladed rotors revolving in opposite directions. The principle of the rotors revolving in opposite directions eliminates torque, or the side push reaction of one rotor turning in one direction. It is a new patented process of the Kellett

SURVEY HITS PET THEORIES DELINQUENCY

RED WING, Minn. (UP)—You can make a sow's ear out of a silk purse, regardless of whether the reverse is true. C. J. Jackson, superintendent, implied in a statistical report on the personnel at the Minnesota State Training School for Boys.

The report threw several established social theories for a loss. For instance, the one about most wayward boys coming from broken families, Jackson said there were 279 boys living at his institution. Parents of 157 of them are

living together. In 139 of those 157 cases both parents are rated "good" on the youth's enrollment cards.

Although the divorce rate in Minnesota is 18 per cent of all marriages, only 8.9 per cent of Jackson's boys are sons of divorced couples. Twenty five of them are in this category.

The superintendent's figures also ran contrary to the popular notion that the offspring of foreign-born people contribute in large measure to juvenile delinquency problems. Only 15 of the state training school inmates are from families in which both father and mother were immigrants.

In 32 cases one of the parents was a native of some other land. Information was lacking in this respect in four cases, but 227 of the boys are sons of American-born couples.

Supposedly ideal for family rearing is the situation in which the father is employed and the

mother stays at home tending the house and training the children. Jackson said, however, that 152 of the school's inmates have such a background.

Both parents of 51 of the boys are employed, while 22 represent homes in which widowed mother work.

One hundred fifty are sons of temperate parents, and in just four cases are both parents intemperate.

Jackson reported that crimes involving property—thefts and related acts—resulted in the sentencing of most of the reform-school inmates. Generally speaking, he said, their wrong doing did not result from poverty.

The Chicago Service Men's Centers since opening in 1941 have distributed more than 5,000,000 free tickets to theatres and sporting events.

High Output Credited To Hybrid Chickens

CHICAGO (UP)—The hybrid—or increased—chicken is one of the most promising, yet one of the most doubted, developments in poultry history. This innovation is now feathering under poultrymen's noses.

There were only a handful five years ago. Now the nation's flock of hybrid chickens approaches the million mark, with more than a half million baby chicks being turned out during the current hatching season.

The hybrid may displace a sizable proportion of standard breeds, just as hybrid corn drove open-pollinated varieties out.

According to the June issue of Successful Farming magazine, a leading production records and unbelievable laying persistency can be credited to this new type of chicken, bred through adoption of the same principles employed in developing hybrid seed corn.

Commonly confused with ordinary crossbred chickens, this hybrid or increase is derived through several generations of inbreeding and crossbreeding of unrelated

Long Arm of Law Disappoints Boy

HOUSTON, Tex. (UP)—A 15-year-old Easton boy sighs for the days of the Texas past, when a fellow could disappear if he wanted to.

The boy ran away from home with a parting word to his parents: "You won't be able to find me."

Three hours later he stepped off a bus in Galveston. A policeman's hand caught his arm.

"How did you find me?" said the amazed boy.

"Oh we have police radios these days," the officer replied.

Wants OPA Shift

Rep. Thomas A. Jenkins (R-Ironton, O.), has proposed transfer of food pricing and rationing powers from OPA Administrator Chester Bowles to Clinton F. Anderson, who becomes Secretary of Agriculture July 1.

tion of a lapidary, some of the tools are not. A 54 angle jam peg for facet cutting or beveling is of a 5,000 year old design. The pump drill, resembling a small crossbow, was used 10,000 years ago in a crude form. Ferguson's model is made of metal, with a diamond point drill in silt tubing.

Incidentally, the Chinese, who originated the first tools for stone cutting long before Christ, have ordered 50 of Ferguson's machines for postwar delivery. They are also purchased in American for export to the erstwhile "Jade Kingdom."

Before the war, Ferguson, explained, all cutting and polishing was done in foreign countries by cheap labor. He believes a wide new field has been opened by combat for Americans.

Ferguson can train anybody to operate the machines. Of course, he had a good start as trainer of the St. Louis zoo's famed tigers, chimpanzees and other animals.

Mrs. Ferguson converts stones and gems into jewelry, using silver pieces for mountings. She thinks wives of disabled servicemen can aid their husbands by fashioning and selling rings, pendants, bracelets, tie clasps, pins, lockets and earrings.

All this work is done by hand, with the silver heated over a small Bunsen burner and twisted or formed into proper shape to receive the stones.

sail closer to the wind and do away with standing and running rigging.

Capt. Keeney says British ship operators were anxious to find something like this before the war when the Board of Trade had to prepare a law obliging every vessel and 1,000 tons of heavy emergency sails.

GHOLSON HOTEL

Injured Taught Lapidary Skill By Californian

VAN NUYS, Cal. (UP)—Over in a corner of the occupational therapy room of Birmingham General Hospital stands a strange machine with a strange name—lapidary.

Wounded American fighting men are learning a pleasant and profitable new trade through the designer, builder and donor of the machine, Cassius W. Ferguson of Burbank, Cal.

Ferguson instructs these "Men of the Purple Heart" in grinding, cutting and polishing precious and semi-precious stones.

Seated before the compact cabinet-like apparatus, a man with one arm can take inexpensive, rough cut stones and turn out finished products bringing many times their original cost.

The machine was designed especially for use by handicapped persons. Divided into two compartments and powered by a small motor, it carries full equipment for sawing, cutting, grinding, polishing and shaping the stones.

While the device is a new ver-

Miss Henz And Corporal Yung Married In Ceremony In New York On June 17

Mr. and Mrs. Benjamin Yung, Sr., have received word of the marriage of their son, Cpl. Benjamin F. Yung, Jr., to Miss Gladys Barbara Henz, daughter of Mr. and Mrs. Peter Henz, Sr., of 100 Reigelman St. Port Richmond Center, Staten Island, N. Y.

The ceremony was performed June 17th in Immanuel Union Church, Westerleigh, Staten Island with the Reverend Fred M. Sellers reading the double ring ceremony. Miss Claire Crawley of Silver Lake, N. Y. was the soloist with Miss Grace M. Lissenden of Westerleigh at the organ.

Miss Helen Page of Westerleigh was maid of honor and wore a blue marquisette gown over taffeta with short sleeves, sweetheart neckline and train. She wore a small matching hat with shoulder length veil and carried a colonial bouquet of pink flowers.

Bridesmaids were Misses Bernadette and Rose Jordan of Chicago, Illinois. They wore shell pink marquisette gowns over pink taffeta with quarter length sleeves. They wore ruffled hats and carried colonial bouquets of blue flowers.

The bride wore a white satin gown styled with a sweetheart neckline and trimmed with hand-made French satin roses. The skirt swept into a long train overlain by a long veil of illusion attached to a head dress of French roses and her bridal bouquet was of white roses. Her only ornament was a small gold watch on chain, an heirloom of her family.

Sgt. Jack Maier of Ft. Belvoir, Va., brother-in-law of the groom attended him as best man. The ushers were friends of the groom from his company at Halloran General Hospital, Staten Island.

Immediately after the ceremony a reception was held at the home of the bride's parents.

Mrs. Yung is a graduate of Port Richmond high school and is a member of the choral group of the Staten Island Institute of Arts and Sciences, St. George. Cpl. Yung is a graduate of Ranger high school. The couple will make their home at the Reigelman street address after they return from a trip to Ashland, Pa., the home of the groom's father.

Out-of-town guests at the wedding were Mr. and Mrs. Carl Yung and Mr. and Mrs. Robert Yung of Ashland, Pa.

FORD OUTLINES POSTWAR PLAN FOR VEHICLES

DEARFORN, Mich.—Plans for the 1946 Ford, Mercury and Lincoln car and truck production and distribution program were discussed here this week by Ford Motor Company executives, regional and branch managers and assistants and branch plant superintendents.

The meetings opened Monday in the Ford Rotunda with a talk by Mr. J. E. Davis, Director of Sales and Advertising.

Mr. Davis indicated that the post war line of Ford, Mercury and Lincoln automobiles would be greatly expanded to provide models and body styles to cover every price field from the lowest to the finest in style and performance in the automotive industry.

The meeting was highlighted Wednesday by a luncheon address from Mr. Henry Ford II. Mr. Ford spoke to the entire Ford supervisory family of approximately 200 executives and department heads.

Mr. Ford covered the trend of the automotive business for the past 10 years and projected in detail the engineering, manufacturing and distribution plans of the company that eventually will provide thousands of additional jobs.

He outlined the company's 150

million dollar expansion program, designed to step up Ford's share in the automotive business, on condition, however, that the company still has a war job to do.

Mr. Ford explained that "Many of our war contracts have already been terminated, and more of them will be soon because we were principally engaged in manufacturing material for the European theater.

"As our services become less and less necessary to the direct war effort," he said "We will complete the shift from war work to mass assembly of automobiles just as rapidly as government restrictions are removed.

"We will do everything in our power to shorten the transition period, and to prevent a serious jump in employment which would result from a prolonged postponement of passenger car production for civilian use."

HOUSTON, Tex., (UP)—John S. Redditt, Lufkin, chairman of the State Highway Commission, believes Texas will have the greatest highway system of any state in the union within the next ten years.

Redditt said on a recent visit here that the commission hoped to have 50,000 miles of primary and secondary highways in the

MRS. ROBINSON IS HOSTESS TO YWA

The regular meeting of the YWA was held Thursday evening in the home of the sponsor, Mrs. George Robinson.

The meeting was opened with the group singing two hymns and a prayer offered by Mrs. Robinson. A discussion of the Women of the Month was given by Miss Billie Faye Pounds and Letters to a Lieutenant were read by Miss Elsie Gagner. YWA's study of Juvenile Delinquency was discussed by Mrs. Robinson and the subject, Pray Ye, was discussed by Miss Mary Joy Wilson.

The closing prayer was offered by Miss Caroline Robinson and Miss Ruby Jewel Lindsey was welcomed as a new member.

At the close of the meeting refreshments were served.

METHODIST CLASS LUNCHEON IS HELD

The monthly luncheon for members of the Martha Dorcas class of the First Methodist church was held Thursday at 12:30 p. m. in the home of Mrs. B. F. Godwin.
