The Law Of Dimishing Returns-

like the law of gravity, is controlled largely by natural forces. When man-made laws come in conflict with natural laws there is never any doubt which will win. Long before the point is reached where cause ectuals effect the dimishing process sets in. Levying taxes is an excellent example, but the law operates in all fields of endeavor. Successful business men escape serious consequences of the law by selling a quality product for a reasonable profit.
