The average extra poundage carried by obese Americans is 16 pounds. Imagine carrying a 16pound iron weight around 24 hours a day!

Dieting authorities know that the biggest problem about ow-calorie diets, the only effective kind, is that people are tion 39, Block 2, ETRR Survey. human. They crave sweets. The Ranger Daily Times is presenting daily, a new 14-

day diet which solves the temptation of the dieter to favor his or her sweet tooth. The answer is in dietetic foods, those low in

calories, yet flavorful and satisfying. Those foods have long been on the shelves in most stores. They are inexpensive.

Author of the diet is Tillie Lewis, who was named Businesswoman of the Year in 1952. She lost 26 pounds, yet ate hearty meals, as outlined in her diet.

Scientific new diet removes unhealthy fat, is absolutely safe and satisfies hunger!

Tillie Lewis Dietetic foods recommended in this diet

have been accepted for advertising by the official journals of American Academy of General Practice: American College of Physicians; American Association of Obstetricians, Gynecologists and Abdominal Surgeons: American Gynecologic Society; American Heart Association; California Medical Association; Illinois Medical Association; Medical Society of the State of New York; Interstate l'ostgraduate Medical Association; Society of Clinical Endocrinologists; American Osteopathic Association; American Hospital Association; Catholic Hospital Association, and American Nurses' Association.

Tillie Lewis, Business Woman of the Year for 1952, created a 14-day diet based on over ten years study of dietetic foods. The diet on which she lost 26 pounds will be carried in The Ranger Daily Times starting Tucsday. This new reducing formula contains a taste-satisfying variety of dietetic foods and sweets which are available at most grocery stores. Unlike most old style reducing methods, this medically approved diet causes unhealthy fat to fall away by safe ounces instead of dangerous pounds-aday. The Tillie Lewis diet takes little will power to follow. Dietetic meals lower calorie consumption, but do not leave you with a decided craving for food.

Statistics prove the death rate for both men and women goes up in proportion to excess weight. Overweight people are invited to try this scientific, medically approved 14-day diet. It will be printed daily starting Tuesday in the Ranger Daily Times.

"WHITE SHEEP" OF THE FAMILY-"Snowdrop," above, is a dog of distinction. He's an albino cocker spaniel and was born in Yakima, Wash. All of his brothers and sisters are black, and should Snowdrop survive, he'll be one of the few true albino dogs in existence. Mother, however, doesn't care what color he is—he's her puppy, and that explains the distrust with which she is regarding the photographer. Snowdrop is a biological "sport," not a true mutation, or new type of spaniel. Should he ever sire a family, the puppies will be black.

FRESH GROUND

DANGER IN WET FEET-Parisians keep a weather eye on the statue of the French fighting the statue of the French fighting man in the foreground, which stands guard at one or the pillars of the Pont de L'Alma, over the Seine River. When his feet are wet, it means the Seine is at flood stege. When water reaches his waist, downtown Paris is flooded. When the stony guardian of the Seine is submerged, much of central Paris is under water. The last time this happened was in 1910.
