PRICE FIVE CENTS

The Pathfinder

by Lee Harr

We think you will understand the magnitude of the new job that lies before us when you realize that through your efforts the fight against polio has expanded to include not only the thousands of healthy children and adults who can be protected from polio's ravages. Until an effective vaccine is widely available to the public on a commercial basis, the March of Dimes must expect to shoulder heavy financial responsibilities in the field of polio prevention.

But while this exciting work progresses by leaps and bounds, polio continues to strike dangerously among us. For tens of thousands of Americans, a polio vaccine already is too late. Their struggle is against disability, against crippling, against uselessness. They can be helped — they are being helped, with your contributions to the March of Dimes.

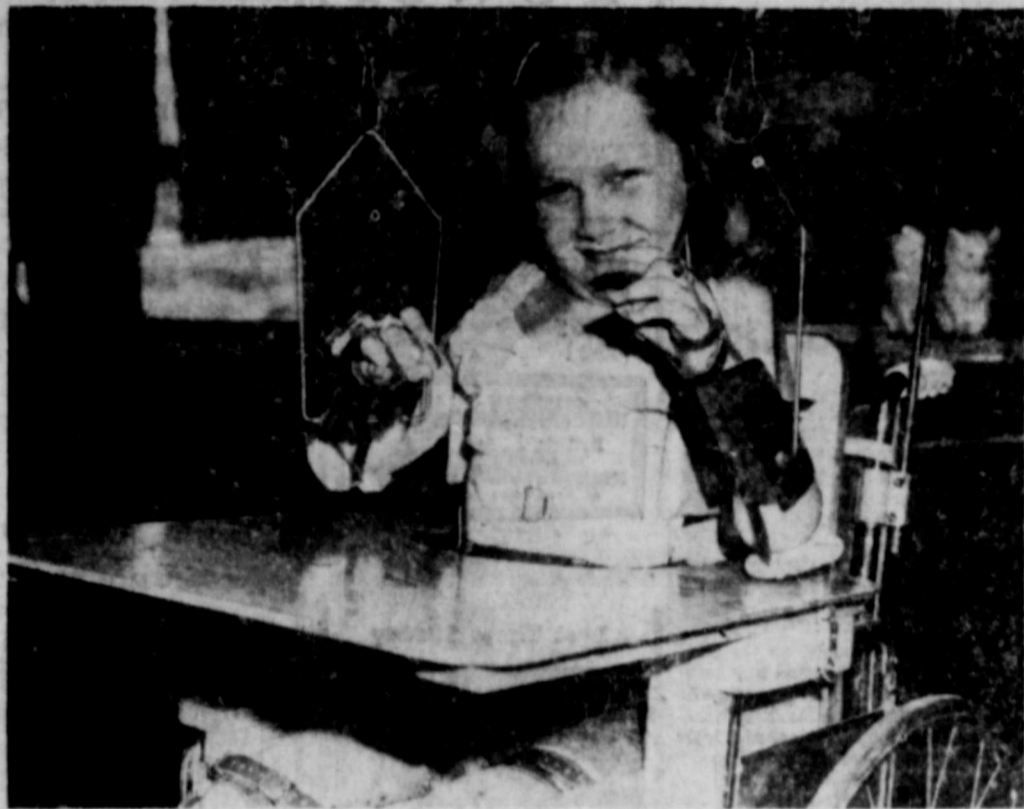

Today, the job of patient care is bigger than ever before. In the past six years there have been more cases of polio reported than in the previous 24 years. The financial burden of patient care has been staggering, far beyond the cast of our research and polio prevention programs. But today your March of Dimes money buys more than ever before. If there are more cases today, if there is more to do, there is also more that can be done. Tots who once were doomed to lives marred by crippling are now learning to live useful lives. Iron lung patients are shedding their steel jackets. A magnificent new era in rehabilitation is dawning, thanks to work have supported through the of Dimes.

are trained minds and to serve the polio patient and many others because the March of Dimes has created them. The largest program of professional training ever supported by a voluntary organization. Because new workers have been placed in the laboratories and by the bedside of patients, a new era of care and rehabilitation is possible. But it has only started. This is a job the future will accelerate in performance.

In January, 1955 there will be 70,000 patients on chapter rolls. Whether the new vaccine is effective or not, they'll still be with us. They will be joined by thousands more who must be expected to get polio in the months before vaccine can be given to anybody or is available to everybody. While others are fighting to prevent polio, the stricken will be learning to live with the disease, not just next year, but for the rest of their lives.

This then, is the bigger job that lies before us — help for the stricken and protection for the healthy. The fight against polio touches all of us now. Each of us has a bigger part to play, a more important contribution to make, and each of us has a bigger stake in the result. The final result will depend heavily upon your contribution to the 1955 March of Dimes. It's up to you.

Guard Turkey Shoot 'March' Set Monday

Larry Purfoy had the dubious honor of being the first person to be assessed a \$1 parking fine by Judge Dillard Jacoby as the March of Dimes campaign began its "big day" in Ranger this morning.

Only a few minutes after members of the Volunteer Fire Department began their check on city parking meters at 8 a.m. — the legal "jump point" — the first citation was issued.

Judge Jacoby, a Ranger polio victim, had no qualms as he set the "stiff fine" of \$1. He said that they would be the same throughout the day instead of the usual five cents.

Other than the parking meters and fines, the "Dimes" program will benefit from the sale of miniature erasables during the day by the Sub-Deb Club, and the Lions Pancake Supper at the Gholson beginning at 6 o'clock.

The high school band will kick-off the afternoon program at 1:30 p.m. in front of the Gholson Hotel. There, two of Eastland County's polio victims will exhibit some of their talents which have been acquired through necessity since being struck by the disease.

Burleson Introduces Bills Before Congress

WASHINGTON (Sp.) — Omar Burleson, representative of the Seventeenth District of Texas, recently introduced five bills to Congress covering a wide variety of subjects. It was announced Thursday.

Eggleston, stressed however, that they are not new but rather re-introductions, since he had introduced them in previous congresses.

The bills that he introduced and the effect they would have are: Child Labor—This bill would amend the Fair Labor Standards Act which would do away with the present law which now prohibits children from picking cotton during school hours. It is especially applicable to the Latin-American seasonal workers.

Old-Age Pensions — This bill would allow any person who receives an old-age pension to earn up to \$50 per month without affecting the pension. There are many elderly people who want to work and earn a little something in addition to the meager allowance which they receive. It would also have the effect of giving the older citizen a feeling of pride and self-dependence.

Oil — Oil imports into this country are seriously affecting the independent oil operator and every-

one who derives any income from the oil business, whether it be by lease or royalty. He is introducing a bill on the subject which would limit oil imports to 10 percent of the domestic demand in the United States.

Brassos River — Burleson is introducing a bill which would authorize the Federal Government to purchase a portion of lands owned by the Brazos River Authority, an agency of the State of Texas, to finance the building of dams on the Brazos River and to improve Possum Kingdom Dam.

Communists — A few years ago Burleson introduced a resolution calling for a study to determine the desirability and the practical aspects of deporting persons convicted of disloyalty to some remote island in the Pacific, instead of putting them in our Federal prisons where their influence can be continued.

Sewell Avery Terms Wolfson Ward Control Fight 'Financial Venture'

Without experience or skill in real estate, Sewell Avery, chairman, today termed the fight of Louis E. Wolfson to gain control of Montgomery Ward & Co. "a financial venture launched for the benefit of his backers and himself."

In his first letter to stockholders, since Wolfson announced he will seek proxies in opposition to the present management at the annual stockholders' meeting to be held April 22, 1955, Avery said that while management has endeavored to carry out its obligations to the stockholders, it should be noted that Mr. Wolfson is not a long time stockholder who has any complaint about the treatment he has received.

Avery pointed out that Wolfson became a registered holder of 20,000 shares of Montgomery Ward stock on August 18, 1954, only eight days before he announced at a press conference that he was seeking control of the company. This fact is pertinent to an after the fact criticism of his management which is simply a financial venture launched for the benefit of his backers and himself.

"Ward," Avery continued, "has no experience in real estate. In my opinion he is not qualified to manage this great corporation in the best interests of the stockholders."

"In contrast to the many promises which Mr. Wolfson is making, and which I shall comment on in a future letter to you, the performance of his management is a matter of record."

"Ward," Avery pointed out, "has a net worth of over \$600 million, including over \$300 million in cash. There is no debt of any kind. This financial strength gives the stockholders a security of investment unobtainable by few companies."

The letter revealed that chain store competition appearing in the small order institution led "this race for store locations." During the past year, 1954-1955, 532 stores were opened without delay by these mail order men who were confident.

Stanley Webb will direct a home service and Mrs. Carlton Hollister will accompany at the plans for the El Paso conference by March. Other important factors will be the Association of Youth Clubs for April 9th, and the Training School Sponsored Study course for February 15th. Instructors and members are expected to be present.

Mr. Webb recently received a shipment of 11,850 tags. In the past year approximately 10,000 tags were sold. He reminded car and truck owners that they can be "of great help by buying their license plates early."

"Can Persons Now Living New-er Die Off Earth," will be the subject of a Bible lecture to be held in Eastland, Sunday January 30, at 3 p.m.

The guest speaker will be Mr. Clayton Short, representative of the Watchtower Society of Brooklyn, N.Y., and Minister Wells, Texas. Mrs. Zetty Parmack, presiding minister here and spokesman for the local congregation, pointed out the quest for life in past ages. "and today," she said, "we are scientific efforts toward extending the life span of man."

RED CHAIN

CHICK STARTER

A Complete Feed - Mash or Granules

ONLY A LITTLE NEEDED SO IT MUST BE TOPS!

Baby chicks have a very small capacity for feed but when growing normally they attain 20 times their hatching weight in eight weeks. This means that the feed you give them must be high in nutrient levels . . . and every particle of feed must contain the right quota of the various ingredients. Only by using the most modern weighing, blending and mixing machinery can this be assured. For example, when 10 grams of antibiotics is provided in a ton of feed each 100 pounds of finished feed must contain 1/2 gram. This is equivalent to 1/2 teaspoon of antibiotics. Very small amounts of vitamins and minerals are also needed . . . but these amounts also must be present for fast, healthy growth.

When you feed your chicks RED CHAIN Chick Starter you provide them with the very best feed we know how to make. SEE YOUR RED CHAIN DEALER TODAY.
