#### THE THRESHOLD OF

Another year is dawning! Dear Master let it be, In working or in waiting, another year with Thee. FRANCES R. HAVERGAL

Man's power of creation is his noblest and divinest attribute. Even more than the faculty of reason, it separates him from the animal. When men discovered that they were potential creators, civilization and culture began. When man perfects his skill as a creator, he will conquer himself and his world.

Think of the miracle in it! Man takes unorganized raw materials and creates them into something new.

Yet even preceding the creation of material inventions and arts, man created seeds of thought - the ideas and ideals - that made his material productions possible.

Man not only creates things and ideas, he literally creates himself. You at this moment are in a real sense self-created. You were given the raw materials of yourself by the process of heredity and environment, but you fashioned this raw material into your present self. Probably every thought, every emotion, every act of your life has gone to shape you into the person you are. What are you going to be tomorrow, next month, next year? That is largely in your hands; that will depend upon either your clumsiness of your skill as a spiritual craftsman.
