Last Planting On RJC Campus Until Next Fall

The last tree to be planted this spring in the "Plant a Tree for One You Love" campaign of the Landscaping Committee of the Ranger Garden Club is a fruitless mulberry given by Xi Zeta Nu. Exemplar Chapter, Beta Sigma Phi. It was placed in the area between the Administration Building and the Science Building.

Others interested in donating trees are asked to wait until fall to place their orders. The plantings will be resumed then, according to Mrs. W. Brazda, member of the Landscaping Committee.

How the Savings Bonds you buy help our State grow

-a message from our Governor

Chances are you live a little better because of the U.S. Savings Bonds program-because so many people in our State buy Bonds and eventually redeem them to buy things for which they have saved.

During the last 24 years, many billions of dollars have flowed back into the economy of the State and the Nation in this way.

These dollars have benefited our merchants, manufacturers and builders. And in so doing have created jobs and improved earnings for countless workers-in our cities and farming communities alike.

The people of our State and America today hold a record total of over \$48 billion in Series E and H Bonds ... money that will someday be spent in worthwhile ways to help us grow further

I urge every one of you to help your future and the future of our State by investing regularly in U.S. Savings Bonds.

> John Connally Governor of Texas

Series E Bonds come in 8 different sizes

Information On

University's Agricultural Extension Service, the health and vigor of the producing trees and the quality and amount of fruit and nuts depends on a well-planned and executed insect control pro-

Losses due to insects can be reduced through the carrying out of a spraying proand the use of good orchard sanitation practices, say the entomologists.

In order that fruit and nut producers may have the latest commendations on insect have made available through the county agricultural agents of Texas information covering the major fruit and nut crops grown in the state.

Such subjects as spraying equipment, when and how to spray, precautions on the use of insecticides, a preventative spray program for small peach and plum orchards, a dilution chart for mixing small quantities of sprays and charts for commercial orchardists listing the latest control recommendations are

The entomologists point out that the recommendations are based upon results of experiments conducted by the Texas Agricultural Experiment Station and other research agencies and that copies of the publication may be obtained from local county agents or from the Extension Entomology Office, Texas A&M University, College Station, Texas.

Plentiful Foods List Has Prunes, Eggs And Honey

COLLEGE STATION Eggs, honey and prunes are topnotch suggestions for May

All three are plentiful, reports the Texas Agricultural Extension Service. Shoppers likely will find

egg prices especially attractive this month, since continued heavy production is predicted. May is a good month for serving all your favorite.

Honey also is a dandy item for May meals. An excellent sweetener, honey is in much heavier supply than a year earlier. You'll find it a welcome item on breakfast tables to serve with pancakes, waffles and plain or French

Honey also can be used as a welcome afternoon treat the perfect topping for ice cream or fruit salads. And don't overlook its many cook-

Prunes complete the May list of plentiful foods announced by the U. S. Department of Agriculture's Consumer and Marketing Service. California dried prune production now indicated at 179,000 as is more than a third larger than the volume pro-duced during 1963-64, according to industry reports.

Clergymen Gave Last Chance For Social Security
