menting disease called Eczema. It slumbers through the summer and breaks out in winter. The head, feet and hands are the parts most often attacked, though it sometimes appears on other parts of the body, the skin hardens, cracks open and bleeds, while the itching and burning is at times almost unbegrable. Scratching only makes it worse, sores and scab-forming where the skin is broken. In this form of Eczema brownish white

crusts sometimes form which scale off SKIN CRACKS in fine particles, leaving the skin raw AND BLEEDS and inflamed. It is

especially painful and severe when confined to the hands, which often become so badly affected that the sufferer is unable to perform the lightest work. This, like all other types of Eczema, is due to acid poisons in the blood and not to local causes. The trouble is more than skin deep, and washes, soaps, powders and salves nor anything else applied to the surface can possibly do more than soothe the burning and itching or relieve temporarily the inflammation and pain.

It is the acids thrown off by the blood

and which are forcing their way through the pores that cause the skin to harden, crack and bleed, and produce the irritation and soreness. hese acid poisons

> and cleauses the blood of all irritating sub-

and does it promptly and effectually.

S. S. S. purifies and invigorates the thin acid blood, and builds up the entire system; then the unsightly eruption and sores heal, the skin becomes smooth and soft, and all signs of the Eczema disappear.

#### ASHORE ON A SAND BANK

Gibraltar, Jan. 19.-The North German Lloyd's steamer Lahn, Captain Malchow, from Mediterranean ports for New York, went ashore at 4 o'clock Sunday morning at Tumara, 19 miles east of Gibraltar. There was a heavy fog and rain was falling at at the time. On board the steamer were 300 salon passengers and 1200

All attempts to float the Lahn have been unsuccessful. The steamer probably will be compelled to trans-ship passengers and cargo. The attempt to pull off the steamer was made at high water by the British, Admiralty tug Energetic, the United States cruiser Hartford and the tugs Newa, Herclades and Hercules, but the Lahn remained fast on the sand bank.

#### Change of Life § (Woman's Most Critical Period.)

"The woman is a mother still, The hollest thing alive."

At about the age of 45 years wemen begin to pass into a condition on which their future health depends. This condition is known as the "change of life," or the cessation of the monthly function and capabilities for maternity. If they pass this change safely they may reasonably look for a quarter of a century of cond health, but if complications arise and are good health, but if complications arise and are not properly treated they will be left feeble wrecks. When symptoms of this change appear a woman should at once begin to take G. F. P. It will carry her through the ordeal safely and leave her enjoying good health.

"My wife suffered for seven years from the Chango of Life. We tried everything we could get from the doctors and paid out a considerable sum of money for treatment, but without any good result, so we then began using G. F. P. and it did more good than all else we had used for six years. It is the greatest remedy for suffering females ever yet placed on the market."—J. D. Borden, Colmesnell, Tex. G. F. P.-Gerstle's Female Panacea, cures G. F. P.—Gerstle's Female Panacea, cures irregular, seanty, too profuse and painful monthly periods; uterine and ovarian irritations; ulcers, displacements and falling of the womb; whites and all unnatural discharges; frigidity, barrenness and all impediments to maternity; also all associate allments of the private organs of women. At all stages of menstrual life, from budding womenhood until after the changes that end special womanly functions, it is the best friend of and remedy for womankind. Its use strengthens all womanly organs, regulates and renders natural all sexual functions. It is sold at drug stores for \$100 a bottle. Buy it, try it, and you will find these statements are true, for it is reliable and will not disappoint.

All ladies who are not perfectly right and well in a womanly way should write to the Ladies' Health Club, care of L. Gersile & Co., Chattanoogs, Tenn., for free medical advice and instruction.

Only one ballot was necessary to free Louis Disbrow Friday of the charge of murdering his sweetheart last summer. The picture above shows he accused supported by his father in court. Disbrow was suave and polite when he entered the room to hear judgment pronounced on him. After bowing to Justice Maddox and District Attorney Smith, he greeted Mr. Miles, his own lawyer, and took his seat by his father's side. There was just a faint suggestion in this to the minds of some of that other fathful father, Gen. Molineux, who stood by his son throughout his two trials.

(Special to The Telegram.)

NEW YORK, Jan. 19 .- with the Molineux trial still fresh in the public memory and the Louis Disbrow murder trial just closed, still another notable murder case, and one of absorbing interest to criminologists, will come up for trial next week. This is the case of William Hooper Young, a grandson of Brigham Young, who was indicted in October last charged with the murder of Mrs. Anna Nelson Pulitzer, a woman whom he is accused of having lured to his rooms in West

Fifty-eighth street. The crime was one of the most brutal the police have been called upon to deal with since the Guldensuppe murder. For some time prior to his alleged commission of the crime Young had been ocupying a room in the luxurious apartments of his father, John W. Young, a promoter and capitalist of wealth and high' financial position, and who was at the time absent in Europe on business. The son had the reputation of being a ne'er-do-well, drifting from one occupation to another and living at various times in Utah, the state of Washington and various other parts of the country. Evidence collected by the police, strengthened by the confession alleged to have been made by Young after his arrest, goes to show that the young man took the woman, with whom he had had some previous acquaintance, to his rooms on the night of the murder and there drugged her and then proceeded to cut up the body in the most diabolical manner. The remains were then taken in a trunk across the North river, where they were thrown into the shallow waters of a canal. The body was found next day weighted down with a hitching weight. The first clew to the identity of the murderer was furnished by a Jersey liveryman, who identified a photograph of Young as the man to whom he had hired a rig the day before and who also identified the hitching strap and weight as his property. A visit to the Young apartments furnished ample evidence of the commission of the crime. About the same time the Chicago police discovered a trunk which had been shipped to that city by Young and which contained the dead woman's clothes and valuables. For two or three days the New York police scoured the city in search of the young man. Before the end of the week he had been captured in Conecticut in the disguise of a tramp. It is alleged that he made a full confession to the police, but implicated another person in the actual murder. The authorities, however, refused to credit the story of an accomplice, as all the evidence tended to show that Young alone committed the

# THE SENATORIAL FIGHT

Denver, Jan. 19.-Interest in the senatorial fight in Colorado centers in the report of the house elections committee which has been investigating the contests filed against the seating of seventeen Democrats. The matter was in the hands of the elections committee for several days and while positive evidence has been brought that frauds were committeed in several precincts of Arapahoe county, the large majority is received by the Democrats ranging from 2000 to 5000. It is believed will be hard to overcome in every instance.

AMARILLO, Tex., Jan. 16. - The Potter county grand jury adjourned last Thursday, after being in session for six weeks. They reported six felony cases and seventy-five misde meanor cases, this being an unusual number for this county. Potter is a prohibition county, and it is understood that a number of these cases are connected with the violation of the local option law. During last summer a number of barrooms were run here under the name of "cold storage hous es," but all these were closed down about Nov. 1, the proprietors of two of them being convicted of violating the United States internal revenue tenced to a term of imprisonment of thirty days in jail.
