PRINCE MAY BE KING 30

THE FORT WORTH

(Copyright, 1903, by W. R. Hearst.)

This picture shows the prince regent of Sweden and Norway, who, owing to he illness of his father, King Oscar II., is bearing the burdens of the crown of the two countries. The work is no sinecure as there is anything but sympathy between the two nations constituting the kingdom, and only the clever diplomaby and popularity of the sick King Oscar have prevented actual war. The prince regent himself is very popular, but the Norwegian people blame him for spending most of his time in Stockholm in preference to Christiania, where the royal palce almost always stands unoccupied.

The evidence did not connect Herman with the crime, but he denied all knowlto the question of movement and the edge of the girl's condition or that she had better weather must continue for a pe- parturition. Dr. J. M. Martin testified to the latter fact after an examination. He made the test on the infant prescribel by medical authorities and its lungs floated in water and also in alcohol.

He gave it as his opinion that it was born alive. The girl's condition was noticed by people living in the neighborhood, but Herman said he did not observe it. The officers visited the house where the defendants live the day after the infant was found. George Sweeney testified that as soon as they left he saw smoke coming from the chimney of the room occupied by Mrs. Herman and smelt burning rags.

Could Mrs. Bush have given a happier message than this to the thoughtful sufferers to whom she gives advice? What like health can bring the sufferer nearer to enjoying life? To make a sick woman well is to open almost every door of blessing and privilege to her—the blessing of having children in her barren home, the privilege of taking part in the real affairs of life.

This should bring you to consider her letter seriously and to decide to give Wine of Cardui a trial.
