THE LOCKNEY BEACON

LOCKNEY, FLOYD COUNTY, TEXAS, FRIDAY, FEBRUARY 9, 1951

NUMBER 23

Tulia Plays cotton situation got in tion. The following ex. Here Friday

Longhorns in the round robin High School district by the Floyd series will be played at the local County School Board Monday of gym Friday night of this week this week. Huckabee is from the against Tulia. The local boys de- original Ramsey district and feated Tulia previously at Tulia succeeds Frank Brown who has by a small margin but figure to moved over into the South Plains have a tougher time doing it this school district.

The boys B string will play as will the girls teams. The girls Three Injured game will also count in the distriet play. Lockney girls lost to In Explosion the Tulia girls in their game

As the district now stands, the Longhorns have lost two and won three while Tulia has won two and lost three. Should the plosion of butane gas at the Longhorns win Friday night they will go into the district playoffs north of Sterley Monday night with Abernathy. Should Tulia win the two teams will be tied for second place in the north Drouc creage controls for the half of District 3-A and a playoff will be necessary.

Abernathy has won five games and lost none, Lockney has won on consumption from three and lost two, Tulia has won two and lost three and Floydada normal. The domestic has lost five and won none, Spur and Crosbyton will represent the south half of the district in the playoffs, it was reported here. Two teams from the entire district will go to the regional play-

Lose To Abernathy

Monday night of this week the Longhorns lost a heartbreaker to the Abernathy Antelopes at Abernathy. The local boys were awas 9,637,000 bales, head twice during the game, as 2,100,000 bales less holding an 8 point lead going cipated. into the fourth quarter but two Longhorn guards fouled off and 950 there was available the Antelopes went on to win

> John Kendall was high for the Longhorrs with 9 points while furnishings from the house. The entire period. Starting with a Sherman and Bartram made 8 carry-over for 2,119,000 each. Standefer of Abernathy

The local B team won the B is 18,798,000 bales. To game at Abernathy 42 to 48. Sid upply we need to pro-Thomas made 13 and Orland 9,000 bales of cotton in Gilbert made 13 with Loper of Abernathy making 14 points.

On Tuesday night of this Honor Society 0-51 supply is low be week the local teams went to several factors these Ralls with boys A team taking 33 percent reduction that game 44 to 26. Sid Thomas creage harvested from made 14 points for the locals. an average of 27 pounds The B string lost their game 26 per acre; (3) high do- to 25 with Teddy Carthel making

The girls also lost their game en erop will have to the Ralls girls by a score of the form of a 16-26. June Wiley and Elizabeth 90% of parity Handley each made 5 points while Velma Seale made 4.

L. Quisenberry e in establishing Injured In Wreck

Lawrence Quisenberry is in istribution that ex. from burns from battery acid the cotton situation received when a truck he was sent state, and other driving over turned with him in nformation about 1951 New Mexico recently. Quisenberry was pinned in the wreckage for four hours before he was released. He was driving alone at the time. He was not injured in the wreck but the battery acid dripped on his legs while he was pinned in the wreckage causing the burns.

> Quisenberry was driving the truck for a Plainview firm and was going into New Mexico after a load of lumber. He was going down a hill after a rain when the truck skidded into a ditch and overturned. It was three hours before he was found and it took passersby an hour to get him out. His condition is improving steadily this week, relatives reported.

Wiggins of Midland and turned to the Houston Oil Co. for drilling. The oil company is handling the drilling out of their Midland office. Contract depth has not been revealed.

"Want To" And The Monday night program "Know How" Both Important—Root

T. C. Root of Southern Methodist University told a group of probably 400 Tuesday night at Floydada that in the American system of things "want to" was as important as "know how." He spoke at the annual banquet of the Floydada Chamber of Commerce and Floyd County Board

of Development. Root stated that "know how" had made America the foremost tion as in other things, but when by high taxes and government controls the "want to" of the individual was destroyed then the 'know how" would be worthless.

He brought out the fact that regimentation couldn't make a at South Plains Tuesday night. for "want to". STYLE AND POWER FEATURED IN 1951 CHRYSLERS

The 1951 Chrysler New Yorker Newport with new fender line that accentuates its low sleek beauty, and massive front-end that typifies the power and luxury of the new Chrysler line.

Interior of the 1951 Chrysler New Yorker Newport features rich appointments, extra roominess. Upholstery and trim selections are available in colorful, durable and luxurious combinations of leather and nylon cord.

View of the new Chrysler "FirePower" engine. Conservatively rated at 180-horsepower, the new 8-cylinder powerplant is a 90-degree valve-in-head V-type engine.

Advanced styling inside and out, a new 180-horsepower Fire-Power engine and an improved Chrysler Spitfire engine head the list of 73 major improvements incorporated in the new 1951 Chrys-

Chrysler Division officials state at in no previous year has the vision introduced so many ajor mechanical features, nor one more to increase the esthetic ppeal of the Chrysler models.

Major developments in the new line include an Oriflow shock absorber, standard equipment throughout the line; Hydraguide hydraulic-mechanical power steering; and a Fluid-Torque Drive torque converter.

The power steering unit and torque converter are standard equipment on the Imperial 8-passenger sedan and limousine, and may be had as optional equipment on all other Imperial and New Yorker models.

twenty-one body styles in the Windsor, Windsor Deluxe, New Yorker and Imperial lines.

Styling Advances

In appearance, the 1951 line fully sustains the pace of the mechanical improvements. All models have been completely restyled, inside and out, and each model has its distinctive individual characteristics that make it readily distinguishable from all others in the line. Changes have been made in the direction of further streamlining and the en-hancement of sleek, luxurious ap-

Styling changes include a new wide sloping hood that helps to driver visibility; new front fenders; new curved bumpers and massive bumper guards; new front and rear ornamentation; new grilles that are distinctive for each model; new front

The 1951 Chrysler is offered in | belt molding that now completely encircles the car.

> The new wrap-around "Clearbac" window is now used on all models, increasing rear-window area by 201.7 square inches or 30 per cent as compared with 1950 models not having this feature.

> > Accent on Beauty

Length of the car is accentuated by the new front fender line, which extends further back in the front door panel. A distinctive turn signal and parking light combination is found on each model, and the span between the headlights has been increased 3.5 inches, better to outline the width of the car.

Interior styling includes improvements in upholstery and trim with an unusually wide choice of materials that are the most luxurious and tasteful that and rear fender moldings; and a | Chrysler has ever offered.

Socialism lives on the steaks of Free Enterprise and then shouts. LOOK WE FURNISHED THE TOOTHPICKS!"

Milk Production **Determines Profit** In Dairy Cattle

College Station. - Regardless of the price of dairy products. profit from a milk cow is closely related to her level of production. The truth in this statement is verified by the yearly analysis of Dairy Herd Improvement Association records.

A study of Texas DHIA records for 1949 shows that, if a cow is to pay for her keep, she must produce approximately 200 pounds of butterfat per year. As the level of production increases above 200 pounds, the profit per pounds of butterfat increases.

A. M. Meekma, assistant dairy husbandman for the Texas A. & M. College Extension Service. says that this greater profit at higher levels of production is due to the wider spread between feed costs and the value of the product. Feed costs increase as production increases, but at a slower rate.

Cows which produced 224 pounds of butterfat and less returned an average of \$2.17 worth of milk for each dollar's worth of feed they consumed. Since feed costs make up 50 percent of the cost of producing milk, the dairymen barely broke even on these low producers. An average of 71 cents worth of feed was required for each pound of butterfat produced by these cows.

At the other extreme of production in Texas DHIA herds, 475 pounds and over, butterfat was produced at a feed cost of only 39 cents per pound. These high producers returned \$3.58 worth of milk for each dollar's worth of feed consumed.

Cows producing at the 224 pound level returned \$164 above the cost of feed, while those producing 475 pounds returned \$497 above feed costs.

Although some of the lower producers may not possess the ability to produce at a high level, Meekma says that many dairy cows probably could have done better if they had received better feeding and management. Each cow has a limit beyond

which she cannot efficiently pro- be used as the basis for removduce, and Meekma reminds ing the inefficient producers dairymen that DHIA records can from the herd.

Pastures Are A Cash Crop

College Station.—Pastures are a cash crop and should be treated as such says A. W. Crain, associate pasture specialist for the Texas A. & M. College Extension

Although pasture production is y Lt. Cmdr. Richard E. often limited by available mos-ISN (Ret.) (now Rear ture, Crain points out that forage () and Floyd Bennett on plants cannot make efficient use 1926 in the "Josephine of available water unless enough a tri-motored Fokker of the fertilizer elements are present in the soil to stimulate plant growth.

Some parts of Texas have 25 inches or more of available water during the growing season and since only about four inches of water are required to produce a ton of Bermuda grass hay, six tons of hay can be produced with the 25 inches of available water. However, removing six tons of hay takes the equivalent of six sacks of ammonium nitrate, three sacks of superphosphate, and three sacks of 60 percent muriate of potash from the soil. If maximum production of

forage is to be obtained, Crain emphasizes that these fertilizer elements must be present in the soil in readily available forms. They must also be returned to the soil after the forage has been Swine Losses Can removed if the fertility of the land is to be maintained.

Crain advises applying the fertilizer elements that the soil needs. Phosphorous and potash deficient soils respond well to the application of these elements. but applying them on some soils is simply a waste of money, regardless of how cheaply the fertilizers can be obtained.

He stresses the importance of top dressing pastures with am- ating newly-purchased swine monium nitrate or other forms of nitrogen fertilizer. Legumes three weeks - until they are store nitrogen, but, if they are grazed or cut for hay, nitrogen applications are necessary for maximum production of the grass in the pasture mixture. Legumes and other sources of infection. respond to nitrogen fertilizer

Crain says that the use of nitrogen by pasture plants is very more severely affected by enterefficient. About 75 percent of the nitrogen applied is taken up by the plant the first year, and the best to supply adequate rations other 25 percent which remains to avoid lowering the hogs' rein the soil is not lost. It remains sistance to disease. in the soil and later becomes available for plant use.

from nitrogen fertilizer, Crain itis from their herds. cites the results obtained from applying 400 pounds of ammonium sulfate to Blue Panic, Bermuda, and Dallis grasses grown on the fertile soil of the Brazos River Bottom near College Sta-

The total yields per acre of each of these grasses were increased about two tons, and the percent protein was increased also. By applying about \$10 worth of nitrogen fertilizer, more additional protein was produced than is found in half a ton of cottonseed meal - worth about

The More He BREAKS The More He MAKES

Texas motorists, Texas highways and Texas taxpayers should be protected against the ONE PER CENTERS.

ONE PER CENTERS are truck combinations weighing, loaded, 20,000 pounds or more. Only one of every 100 vehicles registered in Texas pays a license fee for 20,000 pounds or more. FEWER than three out of every 1,000 are registered for more than 40,000 pounds.*

Our highways should be SAFE for ALL the people - individuals, commercial users and the military alike.

Texas highway tax dollars should be conserved and used wisely. This can be done

- (1) by limiting the weight (gross load and axle load) that may be transported legally by the ONE PER CENTERS and
- (2) by enforcing the law against those who persist in overloading.

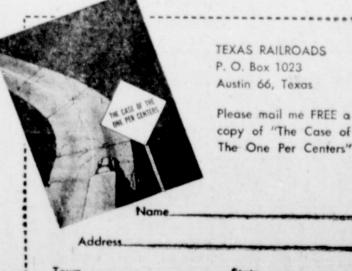

"The Case of The One Per Centers," an article in The Texas Tax Journal, July-August, 1950

Texas highways are paid for by and belong to ALL THE PEOPLE. Highways adequate for 99% of Texas users - individual and commercial - can be constructed and maintained for about ONE-THIRD of the cost made necessary by the weight of the ONE PER CENT-ERS.*

This is your problem. Send for your copy of the booklet, "THE CASE OF THE ONE PER CENTERS," which tells you, among other things, why

Corbin Wants Farm- SOCIETY To-Market Roads

Austin. - Continuation of the Plumlee-Hinds full \$15,000,000-a-year farm-to- Vows Read In market road program was put at the head of his list today by Senator Kilmer B. Corbin of Lubbock and Lamesa.

"I am opposed to any schemes and I am opposed to any schemes for taking road money away to the State Highway Depart. ment," the senator declared.

Corbin referred particularly to STORAGE SPACE for rent. See the plan announced last week 28-tfe which would take money now allocated to counties for lateral road construction, amounting to \$8,000,000 next year, and giving it to the Highway Department to replace the present \$15,000,000

"The proponents of this scheme a good water seal. See Orba Eil- school gymnasium on Tuesday say that many years from now night, Feb. 20, it was announced it will get more farm-to-market this week by school officials, roads built," Corbin said, "But Local basketball players will I say that we need more roads ride the donkeys and play the now, not 20 years from now, The \$15,000,000-a-year program Supt. Sidney Reeves said that is little enough as it is without

rolling plains of West Texas, where an annual average rainfall of 20 inches creates the most serious problem for agriculture, Ray E. Dickson will be long remembered as "the man who made water walk." In his 36 years as superintendent of the Texas Experiment Substation at Spur, this Texas A. and M. researcher led the way to full use of the country's precious rainfall through development of syrup-pan terraces. He learned and then preached, that the rainfall of the plains country was sufficient, if properly conserved. He proved that water conservation is the quickest way to soil saving. On the basis of his pigneering much of the work of the national Soil Conservation Service was established.

Church Parlor

of Mr. and Mrs. W. C. Plumlee of Floydada became the bride S. J. Latta, Sunnyside; Wesley Lakeview, informal ceremony performed Saturday morning at 10 o'clock from the counties and giving it in the parlor of the First Methodist Church. The pastor, Rev. W. E. Paterson, read the double ring ceremony as the couple stood before the altar decorated with baskets of white bladioli and white stock

Nuptial music played by Mrs. Charles H. Dean, organist, included "Ave Maria" by Shubert, 'Bridal Chorus" by Wagner and "Traumeri" by Schumann.

Miss Faye McMinn of Silverton attended the bride as maid of honor. She wore a gold suit with navy accessories and carcied a bouquet of blue iris.

C. B. Cline, Plainview, attended the groom as best man. The bride wore a navy suit trimmed in white, navy shoes and hat and carried a bouquet

of stephanotis and gardenias. Mrs. Plumlee, wore a gray suit and Mrs. Hinds an aqua suit. Both wore corsages of pink car-

Guests were present from Floydada, Silverton, Amarillo and

Following a wedding trip to New Mexico the couple will be at home at 301 East Third Street. Plainview.

The bride is a graduate of Floydada High School, attended Lippert's Business college and is employed as bookkeeper at Meinecke Bros.

The groom graduated from Plainview High School, was in and Sunday with Mr. and Mrs. the army two years and at the present time he is with the Plainview Safety Lane.

"Rocky Mountain blizzards couldn't stop me!"

says JACK W. SEEFELD of a group picked to prove its winter wear-fighting ability—we had 3030 Vrain St. Denver 12, Colorado "The two winters I tested new Conoco Super Motor Oil-as one the worst weather in years. Blizzards came in on top of blizzards, The temperature went to the bottom and stayed there.

"BUT MY CAR ACTED LIKE IT THOUGHT IT WAS JULY! With new Conoco Super that car performed better than it ever had. At the end of the test, with proper drains and regular core, gasoline mileage was practically as good as at the beginning.

After a total of 386,422 miles, logged by Mr. Seefeld and other winter test drivers, Conoco engineers found no wear of any consequence! Analysis of drains showed this great oil actually stopped the dangerous accumulation of free water and acids, chief causes of winter wear. This test proved that new Conoco Super Motor Oil, with Oil-Plating, fights off rust, corrosion and sludge. So, change to Conoco Super, now.

ANNOUNCING...THE LOVELIEST AND FINEST NEW CHRYSLERS EVER BUILT!

For 1951, Chrysler has developed for you more basic advances in motor car value than any new car line has offered in years!

Whether you expect to own one this year or not . . . you owe yourself a turn at the wheel of a new Chrysler for 1951. Here is brilliant new style . . . and new basic engineering, too, with over 70 new features and improvements. Here is progress in comfort and performance so bold and so new you will feel its impact in America's motor cars for years to come. Since Chrysler first introduced high-compression performance in 1924, it has been Chrysler tradition to bring you the good things first . . . to strike out in new paths and open new standards of what you can expect in a motor car. Here, for 1951, is one of the great Chrysler cars. See all these exciting new motoring wonders tomorrow at your Chrysler dealer's-America's newest new car is now on display.

Gracious new Beauty, to stay new for years!

Stunning new lines ... rich new interiors ... Clearbac full-vision rear windows . . . and remember, your Chrysler's baked-on enamel finish is the all-round toughest, most durable automobile finish known!

New Oriflow Ride, unequalled in smoothness!

On every Chrysler for '51, Chrysler presents the amazing new Oriflow shock absorber ... it has over twice the shock-absorbing power of any other shock absorber on any other car! New FirePower Engine, matchless in Power!

Here is Chrysler's revolutionary new Hemispherical Combustion Chamber . . engineering secret of FirePower... heart of the most powerful, most efficient, best-constructed engine ever put in an automobile. 180 horsepower. Will outperform any

other engine on the road today, with ease. The only engine design that can give full combustion, full compression, full use and value from every drop of fuel.

New Chrysler-built value throughout your new car!

Chassis undercoating at no extra cost . Safety Rims on every wheel ... Superfinish engine parts... Safety Cushion dash...Cyclebond brake linings...Chrysler engineering skill means extra value all through your car! COME SEE THE NEW

Best engineered car in the world!

How To Launder A Sweater Told

College Station. - Laundering a sweater is an art that any girl can acquire, says Dorothy Dixon, Sherman county home demonstration agent.

She recommends collecting all the material needed to wash a sweater before starting the job. This includes a dish pan, mild soap flakes, a towel, a large piece of paper, a pencil, and lukewarm water.

Miss Dixon advises using the fc lowing procedure:

Place all necessary material within easy reach. Draw an outline of the sweater on the piece of paper before wetting it. This will save considerable time in shaping the garment after it has been laundered.

Use both hands in the washing process. Cup the hands and squeeze the suds through the garment. Mild soap and lukewarm water are the best agents for cleaning a sweater.

Rinse the sweater in water that is the same temperature as used for washing. After the sweater

Tanks Move to the Rescue of Trapped G.I.'s

THE ROAD TO SAFETY for G.I.'s of the Second Division is blocked during the Korean withdrawal, Moving to the rescue are tanks and Tommies of the British Middlesex Regiment (pictured above). With air and artillery support, the Tommies broke the block and the G.I.'s streamed through, but their casualties were not slight. To their losses the Tommies had to add casualties of the previous day when they had unsuccessfully attempted to break the block without the aid of tanks, artillery and airplanes,
