Production Up In Foreign Countries

Abilene. — Senator Allen J. Ellender of Louisiana has uncovered a hoax which affects every American taxpayer, the West Texas Chamber of Commerce noted today.

"This hoax is being put over by the federal office-holders who are desperately seeking arguments in favor of continued heavy foreign economic aid," said a bulletin issued by the regional chamber's Taxation and Legislation department.

Remainder of the text of the bulletin follows:
 Sen. Ellender tried unsuccessfully to cut \$500 million from the \$1.6 billion economic aid authorization last week. In the debate over his amendment, he quoted some testimony by Paul Hoffman, former ECA Administrator, that when industrial production in any ECA country reached 125 per cent of the 1939 prewar levels, America's recovery help could be discontinued.

The startling facts presented by Sen. Ellender show that industrial production in Belgium and Luxembourg actually has reached 146 per cent of prewar. Industrial production in Denmark has reached 142 per cent. It has reached 144 per cent in Italy.

It has reached 146 per cent in the United Kingdom. And so on.

The average rate for all NATO countries was 145 per cent. Other countries participating in MSA have boosted their industrial production to an average of 136 per cent of prewar levels.

By Comparing Hoffman's Testimony With These Figures, It Would Appear That Continued Economic Aid From The United States Should Be Stopped Now.

But nothing could be further from the wishes and unrealistic ambitions of the office-holders who would have American taxpayers foot the recovery bill for years to come.

So they have switched yardsticks. Paul Hoffman's measurement was too good for them. And this is where the hoax comes in.

They substituted for the original 1939 index figure the much higher base rate of 1948 — the year the ECA program began. This put the economic aid program in a different light.

Sunday guests in the home of Mr. and Mrs. Ray Aston were Mr. and Mrs. Ed Powell and children of Ana, Texas, Mr. and Mrs. Curtis Poteet and family and Mr. and Mrs. Kenneth Powell of Floydada.

Mrs. Robert Williams left Thursday, July 3, for Ozark, Alabama where she will join her husband, S. F. C. Robert Williams. S. F. C. Williams has been in California the past six weeks on maneuvers and is now stationed at Camp Rucker in Ozark.

EDITORIAL

The Lord is my light and my salvation; whom shall I fear? The Lord is the strength of my life; of whom shall I be afraid? —Psalms 27:1.

Second guessers aren't usually very popular people and the person who can't see his mistake after he had made it is indeed lacking in wisdom, so the prophets tell us. But there is one comment we wish to make on the Republican convention. If Mr. Taft's organization hadn't tried to force their wishes on the people he might have stood a better chance to win the nomination. We firmly believe the aggressive attitude and steamroller tactics used by some of the Republican state conventions, such as the one in Texas, hurt Mr. Taft's chances very much.

Mr. Dewey, four years ago, had a smooth working, well-oiled machine and won the nomination without any trouble, but his organization was a persuasive one, not a demanding one. Mr. Taft's group was equally as well organized this year, or perhaps even better organized, but their

tactics were poor. The fact that a man could start campaigning June 1 and win the nomination is indicative either of powerful campaigning or poor competition.

We are persuaded that Ike will make a hard campaign. We were impressed with his show but strenuous campaign of the past few weeks. We wouldn't be surprised if he didn't wage as good a campaign as some of the professional campaigners and his drawing power is going to be due to his complete honesty and frankness. He has no axes to grind, no political debts to pay and will be free to discuss the issues without fear or favor.

Now all we have to do it wait for the Democratic convention, to be held soon in the same place, and then the race will be on.

Many an industrialist today is gravely wagging his head over the chronic labor unrest. Since the end of World War II approximately 38,000,000 tons of steel ingots have been lost due to strikes in coal mines and steel mills.

Since 1945 there have been five years in which coal strikes interfered with steel production, and three years when steel strikes directly stopped output. The loss in steel output would be sufficient to make 15,000,000 automobiles.

Whether the nation can afford chronic strikes — and the above figures refer only to major tie-ups, not wildcat strikes — is a question that many a businessman keeps asking. So far, labor legislation has not been very effective in maintaining production. There are some predictions that compulsory arbitration, such as some states impose with regard to public utilities, can be expected unless conditions take a turn for the better. At any rate, one of the first responsibilities of the new Congress may be to devise means for dealing with strikes.

BITS O' BUSINESS — Over-all employment was 248,000 higher at mid-April than at the same time last year but factory employment was 410,000 lower. . . . Movie attendances so far this year are running six per cent below last year. . . . April retail store sales were \$12.6 billion compared with \$12.1 billion in March and \$11.9 billion in April, 1951. After adjustment for seasonal factors April sales were up two per cent over March and three per cent over the same month a year previous.

COSTLY TITLE

Americans naturally hope their new superliner, the United States will break the record for the Atlantic crossing set by the British ship, the Queen Mary, at 3 days, 24 hours and 42 minutes, back in 1938.

But the British probably will not sorrow too much if the record is broken. They could find satisfaction in the fact that the Queen Mary cost less than \$20 million, while the United States—a smaller ship—represents an outlay of about \$70 million. It is to be presumed, also, that engineering advances since the Queen Mary was launched in the 1930's have added to the new liner's speed potential.

So, if a record is set, some Americans may be sufficiently cynical to feel that they have paid a high price for the distinction—because \$42 million of the United States' cost came out of pockets through taxation.—Lubbock Avalanche.

YOUR FRIEND, THE TRAFFIC COP

How often have you, as a motorist, in travelling along the streets of your city or on a highway, seen a black and white patrol car and thought to yourself—"Oh, Oh, there's a cop—better watch yourself!" You may hit the brakes for a moment, or at least you automatically look down at your speedometer to see if you're well within the speed limit.

Or perhaps, in your travels on the highway, you've noticed a long string of cars trailing a highway patrol car that is cruising at 45 or 50 miles per hour, when the legal limit under good conditions during the day is 60. Why don't the motorists pass the patrol car? Are they afraid to pass even though they might do it well within the legal speed limit?

These officers have a keen sense of responsibility to the citizens of Texas. They are working in your behalf to make our highway safe. Let us all join with the Texas Safety Association in supporting these men for a safer Texas.—Tulsa Herald.

Long Ago In Lockney

Items of interest from the file of The Lockney Beacon.

February 13, 1914

Wednesday, one of the oldest business houses in Lockney was loaded on trucks and moved to the country. It was the building known as the old printing office that stood alongside of the Ayres building. It was moved here from old Deila Plains and the first Lockney paper was published in it.

Editor Ben F. Smith of the Lockney Beacon, has been placed on the state committee to entertain the National Press Association at its meeting at Houston in April. Bro. Smith is a gentleman of ability and versatility and will reflect credit upon West Texas.

The Lockney State Bank was re-opened for business last Friday after a temporary suspension of about three weeks. At the date of the closing of this bank its business matters were thought to have been in very bad condition, but later it was learned that conditions would warrant an early re-opening and the fact that the bank is again doing business is no surprise to those conversant with its condition.

Born to Mr. and Mrs. J. A. Baker, February 5th, a girl.

WASHINGTON AND "SMALL BUSINESS" By C. WILSON HARDER

As this column enters its third year in the weekly newspapers of America, recent Congressional actions reveal the influence wielded by weekly newspapers and their readers.

Events also prove if Americans are given facts, they will act to correct existing evils. So far the independent weekly newspapers of America have stood alone in bringing forth undisclosed facts, letting chips fall where they may.

Significantly Congress did far more than stop government power to control consumer credit, and to cut down the powers of the OPS or Office Plenty Service. Unnoticed, Congress took an even more important step.

Congress at the same time passed a measure to aid and encourage American newspaper production. An attempt will be made to combat the foreign monopoly squeezing the life-blood out of independent newspapers.

Action was taken despite previous protests by State Secretary Dean Acheson that nothing should be done to antagonize Canadian newspaper producers despite constant price increases totalling more than 150%.

In Washington leaders of independent business have long urged Congressmen to protect the free American press from monopoly exploitation. This need has been pointed out time and time as the first bulwark in the defense of American liberty. The Senate Small Business Committee, headed by Sen. John Sparkman, Ala., launched still another probe of the situation.

But in recent months, facts not covered by the big dailies have been brought to small cities and towns of America.

These facts, without adornment, caused readers of weekly newspapers across the nation to protest to their Congressmen. After all, in the big cities, there are people who can be persuaded that whatever sounds silly is really not silly.

But high flown theories do not ring true in the smaller cities and towns of the nation.

In these regions, where the vote is controlled, nonsense is still looked upon as nonsense.

Sincere Congressmen of both parties voice pleasure over receiving so many expressions of opinions from the solid people who read weekly newspapers.

Typical comment: "We had a feeling that many things, if they were known, would not set too well with these people, but until we had something concrete to go on, it's hard to disprove the theory boys."

Many Congressmen give the weekly newspapers full credit for recent acts curtailing the power of the government to meddle in private business and lives.

Many Congressmen feel this situation is healthy, are prepared to act to aid weekly newspapers by newsprint on a competitive market.

Naturally, bureaucrats who have lost power, or position because of this reaction, will oppose such action.

So organized independent business is preparing to battle on this issue. The results of the past two weeks show that such a battle can be won.

RR Commission May Rule On Seismograph Drilling

Lubbock — Prospects are good for a solution to one of the irrigation farmer's most pressing problems—that of seismograph holes being drilled too close to irrigation and domestic water wells.

This word comes from Tom McFarland, president and manager of Hi-Plains Underground Water Conservation District.

McFarland recently received the assurances of Ernest O. Thompson, commissioner of the Texas Railroad Commission, that the matter may soon be regulated by law.

Thompson wrote: "A statute is being proposed regulating the drilling of seismograph holes, and we shall include in it the question of making them not too close to irrigation or domestic water wells."

Improperly placed seismograph holes frequently cause serious interference with pumping of irrigation and domestic wells.

"This question gives us a lot of trouble, and we felt that if the people knew some steps were being taken it would ease their minds to a great extent." McFarland said in making the announcement.

ONE-A-DAY HOME HINTS

The average person, according to the Gas Appliance Manufacturers Association, uses 25 to 30 gallons of hot water a day, which is one of the reasons why it is necessary to have an automatic gas water heater of proper size to take care of the more than 150 uses of hot water in the home.

Requirements For Children Working On Farms Announced

Dallas. — Amendment of the Fair Labor Standards Act's record-keeping regulations as they apply to children employed on farms was announced today by the U. S. Department of Labor.

Issued by Michael J. Galvin as Acting Secretary of Labor, the amended regulations become effective August 11. Under them, the farmer will be required to record three items for children under 18 years of age who work on his farm on days when school is in session. They are: (1) the child's name; (2) his date of birth; and (3) the address of his permanent home, and where he lives while working if not at his permanent home. These items need be entered only once for each child hired by the farmer.

Galvin's action was taken under the Act's provisions which prohibit the employment of children under 16 in agriculture during school hours for the school district where the child lives while so employed. The Act as now written does not prohibit the employment of children outside school hours and does not apply to the farmer's own children who work on their parents' farm.

Galvin's action simplifies the present requirements applying to farmers.

Complete text of the amendments was scheduled for publication in the Federal Register for July 8. Copies may be obtained from the U. S. Labor Department's Wage and Hour and Public Contracts Divisions.

In Texas, such offices are located in Dallas, El Paso, Fort Worth, Harlingen, Houston, and San Antonio.

ONE-A-DAY HOME HINTS

Broiler meals are quick and easy. Take one pound of seasoned ground beef, roll it out on a board between two sheets of wax paper. Remove the top sheet and put three cups of seasoned mashed potatoes on top of the meat and roll into a round cylindrical shape. Cut in two-inch slices and place in broiler under the direct heat of the flexible gas flame. Broil tomato halves at the same time.

Farmers' Income Below 1951

Austin. — Texas farmers' cash income for the first five months of 1952 was 5 per cent below that of the same 1951 period, the University of Texas Bureau of Business Research reports.

The fact that marketings of many grain and livestock products fell behind last year's schedule is the main cause of the drop, researchers say. Not equalling 1951 results were oats, corn, grain sorghum, peanuts, cattle, calves, sheep and lambs, wool, mohair and eggs.

Balancing those declines were increased sales of cotton (214 per cent), cottonseed (135 per cent), wheat (748 per cent), poultry (19 per cent), milk and milk products (10 per cent), and fruits and vegetables (139 per cent).

Santa Fe To Give 4-H Awards

Fifteen Texas boys or girls with top ranking 4-H records will each receive a 1952 National 4-H Club Congress award equivalent to \$175 provided by the Santa Fe Railway System.

In addition, the railway is providing two college scholarships of \$250 each in Texas, one for a 4-H boy and one for a 4-H girl selected from the Santa Fe winners who will attend the Club Congress in Chicago next November.

Other states sharing in awards provided by the railway are Arizona, California, Colorado, Illinois, Iowa, Kansas, Louisiana, Missouri, New Mexico and Oklahoma.

To be eligible for these awards, participants must have passed their 14th birthday and must not have passed their 21st birthday on January 1, 1952. They also must have completed at least three years of 4-H Club work including the current year.

This program is conducted under the direction of the Cooperative Extension Service.

SERMONETTES FROM REVIVAL TABERNACLE

Isa. 30:21 says ". . . This is the way, walk ye in it." We are living in a time of great confusion in the world. Not only in the political and social realm but also in the religious realm. Many are saying, "We have it all — this is the Way." How can we know which is the right way? Jesus said, "I am the way, the truth, and the life." There is no substitute for Jesus Christ. Jesus is resurrected and is THE resurrection and unless He is resurrected in us, then He has died in vain as far as we are concerned.

Everyone is on a ladder, so to speak. We are all somewhere between the least commandment and having faith to remove a mountain. First on the ladder are the commandments of the law. Paul tells us the law is as schoolmaster to bring us to Christ and all are under the law that are not children of God. Most of the world is hung up somewhere within the realm of the law—somewhere from the least to the greatest commandment. But if we repent and believe in Jesus Christ as the scripture says, then we are born again and made new creatures in Christ Jesus. Many come on up the ladder and are born of the Spirit. Then as we climb and get closer to the Master, He reveals the endowment of power or the Holy Spirit. Jesus said to the disciples, ". . . ye know him (the Spirit) for he dwelleth WITH you, and shall be IN you."

But still there is no stopping place in Jesus. The disciples and apostles had only begun their ministry when they received the Holy Spirit. So there is a walking in the Way until Christ be formed in us. Col. 1:27-28. Jesus said if we had the faith of a grain of mustard seed, we could move a mountain. There's only one way and that is through Jesus Christ. Jesus is coming soon and only those who are in personal contact with Him will be ready. Rom. 8:14.

Those, who like the 5 wise virgins, had not only a lamp and oil (Holy Spirit) with them in their vessel, but they had trimmed their lamps or cut off everything that hindered, so their light was shining. They were virgins or unspotted from the world, not playing the harlot with other loves, but being espoused to one, even Jesus Christ and were in love with Him. Then when the cry of the coming of the bridegroom went forth, they arose and made themselves ready. Even so in this hour God is seeking those who will make themselves ready, having oil in our vessels with our lamps, trim the lamps, arise and accept Jesus as the head of all things and follow Him, keeping ourselves virgins, without spot or wrinkle. Jesus is the Way. Jesus said, "If ye continue in my word, then are ye my disciples indeed." Let us humble ourselves and repent of evil deeds and cry unto Jesus Christ to bring the Church (His body) into unity of Spirit, Faith, and Purpose.

MR. AND MRS. TROY RAY.

Here's how it seems in wishful dreams . . .

The right way back, the easiest way. When things started to worry you.

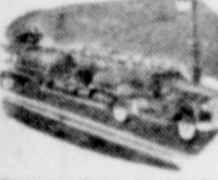

Quick as a flash you called about. And soon the fire was safely out!

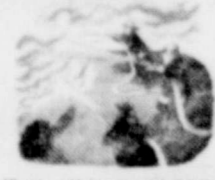

And at the door you told your tale. The flames stopped — 'twas really safe!

but here's what really happens

Deep in your sleep you heard the shout! "There's little time, you must get out!"

All you could do was watch it burn. And maybe think, "I've never seen!"

"Insurance I planned in my last year! I wonder now — who is to pay?"

What's the cost of fire?

The cost of fire is much higher these days because the value of things you own has been going up and up! Then, too, you are continually buying new things to add to your household goods. That's why the amount of insurance you had a few years ago isn't enough today. Before fire or any other peril strikes your home, let us make an analysis of your insurance needs and present a plan shaped to your own requirements.

Cotton Estimates Thought Too High

College Station. — State Agriculture Commissioner John C. White believes the U. S. Department of Agriculture has overestimated Texas' 1952 cotton plantings by 250,000 to 300,000 acres.

Recently the government estimated 11,325,000 acres were planted to cotton on July 1 in Texas. In 1951 Texas' 11,800,000 acres produced 4,100,000 bales.

"That 11,325,000 figure is probably 250,000 to 300,000 acres too high," White said. "The very best we could do this year would be 4,500,000 bales. We need more rain. If there is another late summer drouth there could be a tremendous acreage abandonment."

White, a candidate for re-election and frequent critic of the USDA, crop estimating system, said yesterday's rains in the South Plains helped cotton "but there isn't any part of Texas except along the coast where we don't need heavier, longer rains to replenish the subsoil moisture. One rain won't do it."

THINK IT OVER

TAXES: I propose taking steps to place a ceiling on federal income taxes. We are paying too much for too many things we don't need and don't want.

CAR INSPECTION: I favor a repeal of the present Texas vehicle inspection law. It is the drivers of cars and not the cars themselves that cause accidents.

HIGHWAYS: I favor a reasonable and stable expansion of our highway system with equal consideration to expressways, main highways, and farm to market roads.

WATER: I oppose and will fight any attempt by the federal or state government to assume ownership or control of our underground water.

TIDELANDS: I favor Texas regaining clear and absolute title to our off-shore lands, by whatever means necessary.

STATE RIGHTS: I favor the states taking back from Washington some of the powers they have handed over. Let Texas build its own highways, run its own schools, develop its own waterways, handle its own welfare problems—and then, keep its own tax money. Remember, there is no such thing as Federal Aid. It can only be a partial return of your tax dollar.

The Law Can Be In Simple Language

Any document signed by a Floyd county citizen may someday have to be interpreted by the Court of Civil Appeals at Amarillo. In over 41 years the court has existed. It has decided over six thousand civil cases. It is to the interest of the people of Floyd county that qualified men of the people sit on that high court. Judge Joe S. G. Rhine Enrolled At Aero Institute

Glen Rhine, son of Mr. and Mrs. L. G. Rhine, Sr., Lockney, has enrolled in the Aircraft and Engine Mechanic course at Northrop Aeronautical Institute in Hawthorne, California.

On completion of the Northrop Institute's intensive training program, Rhine will be eligible for certification by the Civil Aeronautics Administration air-planes or aircraft manufacturers.

Glen is a veteran of two years service with the U. S. Navy. He previously attended West Texas State College at Canyon, Texas.

Northrop Aeronautical Institute is a division of Northrop Aircraft, Inc. Rhine is receiving his training in the school's new buildings adjacent to Northrop's production facilities, where the U. S. Air Force's newest standard all-weather interceptors, the Northrop Scorpion F-89's, are now in production.

Haynes Buys Buick Firm In Oklahoma

E. N. Haynes, a teacher in the Lockney school system last year, has purchased the Buick agency at Blackwell, Okla., and will not teach in the local system next year, he notified The Beacon this week. Mrs. Haynes also will not be in the faculty since the couple have moved to Blackwell.

In his letter Mr. Haynes said "Mrs. Haynes and I enjoyed the honor of teaching in Lockney last year and leave with kindest regards to the many friends we made among the fine people there. Please express our thanks to Lockney schools."

ERROR ON BALLOT

The Beacon wishes to announce an error in the official ballot of the Democratic primary election. On the ballot it is printed "J. J. (Andy) Rogers" as candidate for State Senator, 30th Senatorial District. This should read "A. J. (Andy) Rogers." An error was made in printing Mr. Roger's initials.

Ben Wood is now associated with Bilbrey Motor Co. as a car salesman. Mr. Bilbrey announced this week. Mr. Wood is a former resident and has just recently returned to Lockney.

State Fair To Sponsor Free Horse Shows

A rip-roaring horse show program will provide excitement and color during all three week ends of the 1952 State Fair of Texas, Oct. 4 through 19. Livestock Manager Ray W. Wilson has announced.

Premiums totaling \$10,340 will be awarded for classes ranging from cow horses to pony cart teams. The judging program for Quarter horses, Palominos, Shetland ponies and the open cutting horse contest is one of the most comprehensive in the fair's history.

Mr. and Mrs. Bill Whitfill and children returned Monday after spending a weeks vacation fishing at Chama, N. M. Mrs. Whitfill's mother, Mrs. W. A. Miller of Panhandle accompanied them.

A free Shetland pony will be given away Sunday, Oct. 19, to a boy or girl 12 or under. Rules of the prize contest will be announced later.

Horse events at the fair are free. All judging will take place in the new Livestock Pavilion.
