MOST OF US can get back to "business as usual" now that the first Democratic Primary is over. Although the positions of Commissioner, Precinct 2, and State Representative, 89th District, are still to be settled, interest in the second primary will naturally be much less than it was in the first. The vote will be lighter and thus the outcome in the few races that are still going will be harder to predict. The second Democratic Primary will be held on Saturday, August 23rd, just four weeks after the first.

CONTROL of the Democratic Party is a matter that many people are interested in and one that will vitally affect the future of the party. Press reports from over the state indicate those favoring Governor Price Daniel and the Democratic Executive Committee have won a majority of the Precinct Conventions but actually the outcome may not be known until the state convention meets. The fact that many delegations are "uncommitted" makes the situation doubtful. But when the state convention meets they will have to quit straddling the fence because there will be just one question—**who's going to run the Democratic Party in Texas**—Governor Price Daniel or Mrs. Frankie Randolph.

—oOo—
FLOYD COUNTY gave Governor Price Daniel better than 62 per cent of its vote in the primary last Saturday. In fact, as far as we remember, Governor Daniel has never failed to carry Floyd County by a substantial majority in any race. Yet, in spite of this, there is no doubt but that Floyd County's delegation to the state Democratic convention in September will go instructed to condemn and vilify the governor at every opportunity and to oppose his every effort to unity and bring peace to the Democratic Party in Texas. This is possible because a large majority of people will not attend their precinct conventions and let their wishes be known. Fear of

offending someone, of losing business, of making a friend angry, or just plain lack of interest is the reason that only a handful of people attend precinct conventions. Possibly another reason is that most people do not understand the purpose or procedure of precinct meetings. At any rate a minority of Floyd County people will no doubt bring shame to this county in their opposition to the governor because a majority has refused to let their voices be heard. This is one big reason why the Governor's proposal to elect delegates to the conventions by ballot is attracting favor among many people.

SENATOR LYNDON JOHNSON has this to say in one of his recent news letters: "American forces were sent to Lebanon for one reason and one reason only—to preserve the independence of a strife torn nation. The action was taken on the appeal of the Lebanese government. It followed a tragic series of events in the Middle East—an area of the world that is crucial in the struggle to maintain freedom."

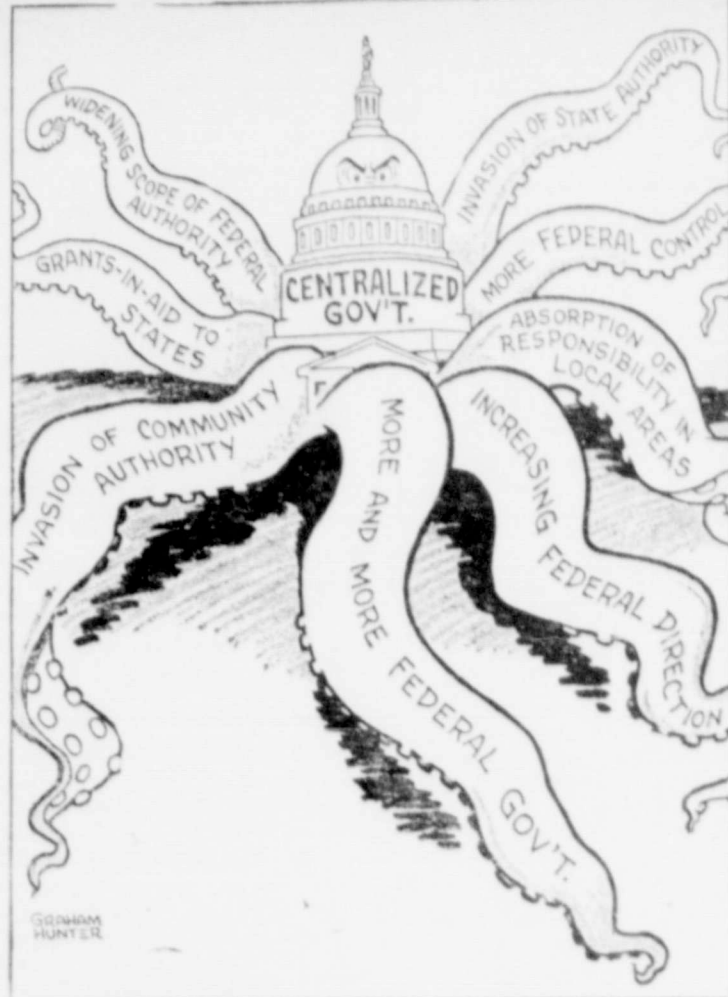

—oOo—
THE SENATOR says further: "The cold war continues. The basic communist objective in this cold war is the isolation of the United States. The communists have made frightening progress during the thirteen years since the end of World War II. If they now succeed in their aim of isolating the United States, we will have lost the cold war. And if we should lose just about everything that is important to us, except life itself, without a shot having been fired."

WRITING IN National Review, Russell Kirk, the distinguished teacher and writer, finds this central fallacy in the federal-aid-to-education plan: "It isn't money that we need for the improvement of instruction in science, or in anything else. For already we spend far more on schools than any nation ever has before in all history—far more, per capita, than the Russians do. Our trouble is that we are not obtaining value for our expenditures." As Dr. Kirk sees it, too much money goes for non-essential frills, and not enough for real education.

FROM EDITOR & Publisher: "The advertisers in this county are not helping the current situation by curtailing their sales and promotion budgets with a 'let's wait and see' attitude. If advertising and promotion are supposed to do anything, they are supposed to SELL. How can they SELL if they are not being used by the people who need them most at a time like this? The companies and the areas that are hard hit in this economic slump will not automatically and easily come out of it if they forget to try to SELL their way out."

RELIGIOUS MONOPOLY
Last week we had a great deal to say about the leaders of the National Council of Churches of Christ in America. This organization is not to be confused with the Church of Christ. The latter has wisely refused to affiliate with this supposed voice of American protestantism.

However, we find that we are not the only ones concerned with the peculiar activities of this great organization for human welfare, apparently, communistic human welfare. Though I've clipped the following paragraphs out of context, Editor H. M. Baggariy of The Tullia Herald, tells us.

The National Council of Churches has been attempting to ban all religious broadcasts and telecasts except those "approved" by it. It would stop the networks and independent radio stations from selling time to independent religious radio and television programs.

Dr. Clifton E. Moore, director of Television of the Los Angeles Presbytery of the Presbyterian Church, USA, some time ago issued a release as TV Radio Coordinator for the Los Angeles Church Federation, identifying the purchase of time for the broadcast of religion with the "commercialization of religion." He further said that "religious hucksters" and "religious exploiters" can only be eliminated from the networks when they "refuse to sell time to any religious group." He indicated that only the "substantial" protestant bodies should be given air time, thus creating a monopoly in the propagation of religion. — Cecil Waggoner in Claude News.

CROSS ROADS REPORT

Dear Editor:
I see where free-hearted old Uncle Sam noticed folks over in Laos were getting low on feather dusters and fishing poles, so he financed 77 tons of same to get them out of this squeeze.

Seems that these and other necessities of life in Laos have cost us taxpayers over \$135 million, but I guess this is a small price to pay for saving those poor people from want.

My crusty neighbor says the program will also be highly beneficial to our own underprivileged contributors who happen to be in the feather duster and fishing tackle business.

Items of interest from the files of The Lockney Beacon.

August 2, 1928

Citizens of Lockney met in the Isis Theatre Monday afternoon at one o'clock to discuss the need and plans for raising money for the new hotel to be built here.

In the Floyd county election returns, C. M. Meredith was renominated tax assessor, E. H. Rankin was renominated for commissioner of precinct No. 2, over N. T. A. Byars, in precinct No. 3 M. H. Taylor received exactly the same amount of votes as both of the opposing candidates so he wins without a runoff.

A. B. Tarwater defeated Col. R. P. Smith for the office of representative from the 120th district composed of Bailey, Farmer, Castro, Lamb, Hale, Briscoe, Floyd and Swisher counties.

In the race for U. S. Senator there will be a run-off between Connally and Mayfield. Governor Dan Moody won renomination in the first primary. There will be a run-off between Miller and Love for Lieutenant Governor.

What better "insurance" for a good catch than a home freezer, as Mr. Pool, a partner in an insurance firm, testifies. Says sportsman Pool, "When I get home with fish or game, regardless of the hour, I can immediately put the catch in my freezer and preserve its fine quality. One of my great joys in hunting and fishing is sharing of the fish I catch and the game I shoot, all year, with friends, relatives and neighbors." SOIL CONSERVATION DISTRICT NEWS

In the Floyd County Soil Conservation District there are some 290,000 acres of cultivated land under irrigation. This acreage comprises approximately 65 percent of the cultivated land in the district. Irrigation is our biggest business and is instrumental in bringing additional millions of dollars to our farmers each year.

Since irrigation is so important to us, it might be well to stop and take a look at it. Irrigation wells are running around the clock in order to apply needed amounts of water to cropland to adequately meet the needs of the soils and crops. Even though farmers are becoming increasingly aware of the importance of water conservation each year, too much soil-water is still getting into our road-side ditches and into lakes where it is doubtful if it is of very much benefit to anyone.

Too, a lot of our land is being irrigated that is not ideally suited for irrigation in its present state. Mother Nature did not in most instances provide us with ground surface condition for best utilization with irrigation, especially by applying water by the gravity method. Therefore, in a lot of cases it is necessary to alter the topography of our land in order that we can do a more efficient job of irrigation. This is done by some type of leveling operation.

Land leveling is done to conserve soil and water. It is one of our most important conservation practices on the High Plains. The filling of lakes and removing of high spots that interfere with irrigation and farming operations are the jobs usually done in land leveling operations. Most farmers do their land leveling in the fall after crops are harvested. However now is a good time to begin making plans for leveling work to be done this fall. If you are not getting good distribution on your water or if you are irrigating land where the slope is too fast, the practice of land leveling should be seriously considered in your farming operations. The Government will share the cost of land leveling on irrigated land. This cost-share may be received under the Agricultural Conservation Program or the Great Plains Conservation Program. Technical assistance in installing this practice is available through the technicians of the Soil Conservation Service. Both

New 4-H Swine Program and Awards Open to State Club Members

A new 4-H awards program open to boys and girls interested in raising meat animals has been arranged by the National Committee on Boys and Girls Club Work, according to Norman C. Mindrum, director.

\$400 Scholarship Awards

It is the National 4-H Swine program, and is supported by the Moorman Mfg. Co., Quincy, Ill., makers of concentrate feeds and parasite control products for livestock and poultry. The company will provide \$400 college scholarships to six national 4-H champions as well as state trips to the 4-H Club Congress in Chicago, and medals will be awarded to county winners.

"It gives us a great deal of pleasure and satisfaction to become the donor in connection with the national 4-H Swine awards program," stated E. H. Wilson, president of Moorman.

Greater Interest is Aim

"We consider it to be a splendid way by which we can help farm boys and girls gain a greater appreciation of—and to acquire a greater participation in—the future of animal agriculture."

"It is our sincere hope that these awards will stimulate ever

Mr. Mindrum (left) and Mr. Wilson wind up details of 4-H Swine program.

greater achievements from the fine group of youngsters which make up the 4-H memberships," Wilson said.

Enrollment Now Open

Although this new awards program has just recently been launched by the State Extension staff, 4-H Club members enrolled now will be eligible to enter their records in competition for the 1958 awards. Detailed information may be obtained from the county agent.

Total tax receipts in fiscal 1958 (federal, state and local) will represent an estimated \$658 per capita, according to figures released recently by Tax Foundation, Inc. In fiscal 1957 receipts were at the rate of \$640 per capita; in 1956, \$608.

The \$658 is broken down this way: federal, \$468; state, \$101; and local, \$89.

To help talk up good times, we remind you that our standard of living has risen to undreamed-of levels. In the 1930's, you bought an apple to help the unemployed. Now you've got to buy an auto.—Changing Times

Liberals Win In County

Unconfirmed reports from over Floyd County indicate that the liberal element of the Democratic party, identifying themselves as "Democrats of Texas" have won most of the delegates to the county convention. The convention will be held Saturday in the district court room at Floydada, starting at 2 p.m.

All four Floydada boxes went to the liberal forces. The Beacon was told. The four boxes there will probably have enough delegates to control the convention since some rural precincts will not attend. The four Floydada boxes have 41 delegates out of the total of 97 in the county.

West Lockney was won by the conservative forces after falling to the liberals two years ago. The vote on the delegates was 19 for the conservative list to 17 for the liberal list. Wilson P. Kermickel was named chairman of the meeting and Edgar R. Hays was named secretary. The convention adopted a resolution binding the delegates to vote as a unit. The precinct has 18 delegates to the county convention.

In East Lockney Virgil Thomas, a conservative, was named chairman of the meeting and the delegates elected were from

both factions. However a resolution to condemn the DOT's was voted down and the majority were liberals although they were uninstructed, according to J. D. Copeland, precinct chairman. There were nine present. The precinct has six delegates.

Providence voted to support Governor Daniel and the conservative cause, according to Ewald Quebe, precinct chairman. There were 12 present. The precinct has three delegates.

At Lone Star the convention voted liberal. Precinct Chairman G. B. Johnston, Jr., said. The precinct has three delegates.

At Sterley the two delegates to the county convention were "uninstructed" according to Precinct Chairman Bert Bobbitt.

Speckled Cotton Showing Up

W. O. Whitehead, who farms in the Irick Community, brought several stalks of cotton to town Wednesday afternoon each with one to two speckled bolls on them. The bolls are well formed and the stalks were loaded with bolls, blooms and squares.

Mr. Whitehead said that it appeared now he had the best cotton he had seen since 1954. He expected to have some open cotton in August and "good pulling" by September 15.

Of Course You Gamble...

*you've bet your economic life
on this community*

And it's not penny ante... the stakes are big. You're betting some or all of your precious allotted time that this is where you can get the most out of life. But... what you take out in winnings depends greatly upon how you... and your neighbors... play the game.

If you give some of your better cards to your opponents as the play goes along, your take is going to be smaller.

The competition is tough... between areas and communities for bigger shares of Trade... the lifeblood of prosperity and better living. If you, or someone else on the home team give aid and comfort to the opposition by patronizing their stores and service establishments, your share of your community's winnings must be smaller, less satisfying... and a poorer return on your investment of the only years you have.

To The Voters Of The 89th District!

As a little boy, I had a burning ambition to be an athlete and play on the football and basketball teams when I got to High School. I have also had chronic asthma since I was born, and the doctors advised against my participating in athletics. I continued to work toward my goal and I played and lettered in basketball four years and played regularly on the football team for three years, being captain my senior year and making the all regional team. Many times while playing football, I would become so choked up with asthma that I would have to call time out, jog to the bench and inhale from an atomizer in order to unstop my lungs so I could breathe and then trot back on the field and continue to play. My coaches taught me that regardless of the score and regardless of whether you were winning or losing, you must play your best until the last whistle sounded. I have found this to be true in the game of life. A quitter never wins and a winner never quits. You may rest assured that I will be working to be your Representative until the final ballot is counted on August 23rd.

I am deeply grateful to all of the people of the 89th Representative District for the many courtesies you have extended to me. From the bottom of my heart, I thank you for your vote and support. Knowing that a man can only be measured by his friends and supporters, I am humbly grateful to you who have placed your faith in me. I know that I have a big hill to climb, but I believe the people of this progressive and expanding district want a Representative who will fight the battle for all the people and not be controlled by any minority group or clique. I seek your help; I need your help; I hope you will give it to me.

Sincerely, FRANK STOVALL

Cotton Council Supports Farm Bill Before Congress

Tenn.—The cotton industry is in a desperate fight for farm legislation today when the National Cotton Council threw its support behind a bill recently introduced in the Senate Agriculture Committee.

President Harry S. Truman stated that the bill represents cotton's legislation that will take effect in 1959.

The bill provides for the urgent reasons for the year is the virtual Agriculture Section, under present cotton allotments by acreage for 1959.

The Cotton Council advocates priority in the production of cotton on which to base cotton legislation, but had not supported a specific farm bill. Council membership is made up of cotton producers, ginners, merchants, warehousemen, cottonseed crushers, and spinners.

In a letter to Council officers, delegates, and advisory members, Mr. Baker voiced once again the urgent need for legislation this year and pointed out that Senate consideration of S. 4071 is likely within the next few days.

While agreeing that the bill is not perfect, Mr. Baker emphasized that it will move the industry toward expanded production and consumption of U. S. cotton. He said the bill provides for reasonable farm income; enough acreage to produce adequate supplies of all

Dear Editor:

I note that a firm blow has been struck in defense of us consumers by means of a new federal law which makes auto dealers put price tags on their cars.

But my quibbling neighbor says the lawmakers don't seem to know much about buying cars, on account of their made up the rule so it calls for tags showing the dealer's asking price.

Says what's needed, so we can tell when we have dickered long enough, is to make them tag each car with the lowest taking price.

The Department of Agriculture has indicated that it would be willing to accept a program for cotton along the lines of the proposed Senate bill.

qualities of U. S. cotton; and for moving as rapidly as possible toward a competitive price, and a one-price system, for U. S. cotton.

The bill provides that during 1959 and 1960, which are considered years of transition to ward a long-range cotton program, the individual farmer would be able to choose between two combinations of price support and acreage allotment. Under Choice "A", he could choose the price support level and acreage allotment as it would be computed under existing formulas. Choice "B" would give him 40 per cent more acreage, coupled with a price support lowered by 15 percentage points of parity.

The government would support prices under Choice "A" through a purchase program. No government-owned cotton could be sold at less than 110 per cent of the price support level under Choice "B".

Should it become law, the Senate Agriculture Committee bill would establish 16 million acres as the minimum national acreage allotment, compared with the prospect of only about 14 million acres if the present law remains unchanged. Although 16 million acres would be the minimum acreage allotment, the total cotton acreage could be increased substantially above this if a large number of farmers took advantage of their option under Choice "B".

The bill, in addition, sets up a reserve of 310,000 acres to ensure that no farmer with 10 acres or less in cotton this year will have his future allotment reduced below its present level. Beginning with the 1961 crop, price support for all farmers would be 90 per cent of the average market price for the preceding three years, but not less than 30 cents per pound for Middling one-inch cotton. Minimum government sales price in 1961 and thereafter would be 115 per cent of the current support level.

The national acreage allotment would be based on estimate disappearance of cotton but with provision for any adjustments needed to assure adequate supplies of all qualities of cotton needed in the U. S. and foreign consuming coun-

CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT THE GENERAL ELECTION ON NOVEMBER 4, 1958.

SJR #3—Number Nine on the Ballot.

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 4, 1958.

SENATE JOINT RESOLUTION NO. 3 proposing an amendment to Article IX of the Constitution of the State of Texas, by adding thereto a new section to be known as Section 5, to provide that the Legislature may authorize the creation of a Hospital District coextensive with the incorporated limits of the City of Amarillo, Texas; authorizing the County of Potter to render financial aid to and participate in the operation of such Hospital District; authorizing the Commissioners Court of said county to assess and levy taxes on the unincorporated territory within the limits of such city; further authorizing a countywide Hospital District for Wichita County, Texas, and authorizing the creation of two districts in Jefferson County, and further providing that any existing law to the contrary be invalid because of their anticipatory character.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article IX of the Constitution of the State of Texas be and the same is hereby amended by adding thereto another section to be designated as Section 5, which shall read as follows:

"Section 5 (a) The Legislature may by law authorize the creation of two hospital districts, one to be coextensive with and have the same boundaries as the incorporated City of Amarillo, as such boundaries now exist or as they may hereafter be lawfully extended, and the other to be coextensive with Wichita County.

"If such district or districts are created, they may be authorized to levy a tax not to exceed Seventy-five Cents (75¢) on the One Hundred Dollars (\$100.00) valuation of taxable property within the district; provided, however, no tax may be levied until approved by a majority vote of the participating residents, qualified property taxpayers who have duly rendered their property for taxation. The maximum rate of tax may be changed at subsequent elections so long as obligations of \$100.00 valuation, and no election shall be required by subsequent changes in the boundaries of the City of Amarillo.

"If such tax is authorized, no political subdivision or municipality within or having the same boundaries as the district may levy a tax for medical or hospital care for newly individuals, nor shall they maintain or erect hospital facilities, but the district shall be re-

lief assume all such responsibilities and shall assume all of the liabilities and obligations (including bonds and warrants) of such subdivisions or municipalities or both. The maximum tax rate submitted shall be sufficient to discharge such obligations, liabilities, and responsibilities, and to maintain and operate the hospital system, and the Legislature may authorize the district to issue tax bonds for the purpose of the purchase, construction, acquisition, repair or renovation of improvements and initially equipping the same, and such bonds shall be payable from said Seventy-five Cents (75¢) tax. The Legislature shall provide for transfer of title to properties to the district.

"(b) The Legislature may by law permit the County of Potter (in which the City of Amarillo is partially located) to render financial aid to that district by paying a part of the expenses of operating and maintaining the system, and the County shall be authorized to issue bonds to the extent of Ten Cents (10¢) per One Hundred Dollars (\$100.00) valuation (in addition to other taxes permitted by this Constitution) upon all property within the county but without the City of Amarillo at the time such tax is made for such purpose. If such tax is authorized, the district shall by resolution assume the responsibilities, obligations, and liabilities of the county in the manner and to the extent hereinabove provided for political subdivisions having boundaries coextensive with the district, and the county shall thereafter levy taxes (other than herein provided) for hospital purposes for providing hospital care for needy individuals of the county.

"(c) The Legislature may by law authorize the creation of a hospital district within Jefferson County, the boundaries of which shall include only the area comprising the Jefferson County Drainage District No. 1 and the Fort Arthur Independent School District, as such boundaries existed on the first day of January, 1957, with the power to issue bonds for the sole purpose of providing a site for, and the construction and initial equipping of, a hospital system, and with the power to levy a tax not to exceed Seventy-five Cents (75¢) on the One Hundred Dollars (\$100.00) valuation of property therein for the purpose of paying the principal and interest on such bonds.

"The creation of such hospital district shall not be final until approved at an election by a majority of the resident property taxpayers voting at said election who have duly rendered their property for taxation upon the file rolls of either said Drainage or said School District, nor shall

such bonds be issued or such tax be levied until so approved by such voters. The district shall not have the power to levy any tax for maintenance or operation of the hospital or facilities, but shall contract with other political subdivisions of the state or private individuals, associations, or corporations for such purposes.

"If the district hereinabove authorized is finally created, no other hospital district may be created embracing any part of the territory within its boundaries, but the Legislature by law may authorize the creation of a hospital district incorporating therein the remainder of Jefferson County, having the powers and duties and with the limitations presently provided by Article IX, Section 4, of the Constitution of Texas, except that such district shall be confirmed at an election wherein the resident qualified property taxpayers who have duly rendered their property within such proposed district for taxation on the county rolls, shall be authorized to vote. A majority of those participating in the election voting in favor of the district shall be necessary for its confirmation and for bonds to be issued.

"(d) Should the Legislature enact enabling laws in anticipation of the adoption of this amendment, such Acts shall not be invalid because of their anticipatory character."

Sec. 2. The foregoing constitutional amendment shall be submitted to a vote of the qualified electors of this state at the general election to be held the first Tuesday after the first Monday in November, 1958, at which election all ballots shall have printed thereon:

"FOR the constitutional amendment authorizing the Legislature to create a Hospital District coextensive with the incorporated limits of the City of Amarillo, Texas, and authorizing Potter County to lend financial aid to and participate in the operation of said Hospital District, and further authorizing the Legislature to create a countywide Hospital District in Wichita County, Texas, and Hospital Districts in Jefferson County, Texas."

"AGAINST the constitutional amendment authorizing the Legislature to create a Hospital District coextensive with the incorporated limits of the City of Amarillo, Texas, and authorizing Potter County to lend financial aid to and participate in the operation of said Hospital District, and further authorizing the Legislature to create a countywide Hospital District in Wichita County, Texas, and Hospital Districts in Jefferson County, Texas."

J. D. Stennett Seriously Hurt In Auto Wreck

Jimmy D. Stennett, laboratory technician at the Lockney General Hospital, was seriously injured Saturday afternoon when the car he was driving overturned on Highway 70 (17 miles east of Plainview).

The extent of Stennett's injuries hasn't been determined due to his condition, but he does have seven fractured ribs and possible internal injuries, Mrs. Stennett said Wednesday. He is so sore that it is difficult for him to move and physicians haven't completed x-raying him, she said. He is receiving treatment at the local hospital.

Investigating officers believed that a tire blew out on the late model Ford car as he was traveling toward Plainview. The car went off the road, struck a guy wire and rolled over one and a half times. He was riding alone at the time.

The injured man was feeling much better Wednesday, his wife said. The car was believed to be a total loss.

The family lived here until about 1945 when they moved to Plainview, later moving to Lubbock and then to Idalou. He moved back to Lubbock early this year.
