## EDITORIAL

I will lift up mine eyes unto the hills, from whence cometh my help . . . my help cometh from the Lord which made heaven and earth. — Psalms 121:1-2.

**MEMORIAL DAY** is Saturday of this week. It is a holiday that originated in the Southern States during the Civil War and is dedicated to the memory of those men who died in the service of their country. It is well that we pause on this special day to remember and pay tribute, not only to those who have died in the service of our country, but also to all our loved ones and friends who have passed on.

**GRADUATION DAY** . . . is today for more than forty seniors in Lockney High School. Emotions are mixed . . . gladness with sadness . . . because it is also a day of parting for many. Friends of many years will be separated, teachers will be left behind, the beloved halls of Lockney High will no longer be a part of the life to the graduate. No statement ever made is truer than that one which says, "time marches on."

**THE REPORT** on the safflower crop in this area is encouraging. Although tinged with caution, the report says that the crop in the Lockney area is "better than expectations," and "the best we have

seen." It is important to the area that the safflower crop turn out well. Let us hope that such is the case.

**COLD WAR NOTE:** Part of a U. S. exhibition in Moscow this coming summer will be a typical \$13,000 American home, containing \$5,000 worth of furniture. A leading Soviet newspaper, Tass, has ridiculed the exhibit in advance, saying: "There is no more truth in showing this as the typical home of the American worker than, say, in showing the Taj Mahal as the typical home of a Bombay textile worker or Buckingham Palace as the typical home of the English miner." The fact is that the home is being built commercially in New York State to sell for \$13,000 — and that a major department store offers the furnishings to all comers for \$5,000.

**BACK IN THE** 50-caliber machine-gun era, a fighter plane could fire on an enemy at small cost. Now, says Newsweek, the missiles with which our new fighters are equipped cost \$7,000 each — and with an atomic warhead, \$243,000.

**THE FEDERAL** government collected \$540 million in excise taxes in 1929, and almost \$11 billion in 1958.

**CONGRESSIONAL** Quarterly recently polled a cross section of the nation's newspaper editors, asking for their opinion as to the strongest tickets each party could put forward in the 1960 Presidential race. On the GOP side, Vice President Nixon led, with Governor Nelson Rockefeller in second place. On the Democratic side, Adlai Stevenson was on top, followed by Senator Kennedy.

**AGRICULTURAL** Economist Karl D. Butler forecasts that the American people will spend about \$79 billion for food this year, and that the 1965 figure may be as much as \$109 billion.

**EXPENDITURES** by the states increased more than three times between 1946 and 1957—from about \$7.1 billion to about \$24.2 billion. In the same period, state debt multiplied more than six times—from \$2.4 billion to \$13.7 billion.

**ACCORDING** to Dr. Edward L. Bortz, a former president of The American Medical Association, a do-it-yourself health program is the greatest insurance policy for a longer-healthier life. The major scourges of the aging, he says, are largely the result of faulty diet, flabby bodies from poor hygiene, excessive fatigue, and aimless living.

## MEMORIAL DAY, 1959

### With Our EXCHANGES

#### YEAR OF ELMS

The Chinese, as a nation, have the reputation of absorbing all conquerors and Chinese elms seem to possess the exact same characteristics.

Any naturalist, we feel sure, would feel a great surge of triumph if he could stand in the average yard (front or back) in Hereford, and view systematic spreading of the white, flat seeds which high winds have helped the trees distribute. Gutters along many streets are stacked two and three inches deep with the elusive seeds.

Old timers point out that these "Years of the Elms" come around twice in each decade, and woe unto the homesteader who fails to eliminate the trees while they are small. Scores of garage foundations and fences have been literally up-set where the home owner is sluggish in eliminating the small trees.

Frankly, we wonder what would happen if these plants were left alone. Would they completely take over the town or, due to nature's lush overplanting, would they be eliminated in drought years? Since the Chinese elm is not a particular desirable variety to many people, it is our guess that we would become a dense forest.

Nature's struggle for perpetuation, based on survival of the fittest, was never more graphically illustrated than in Hereford this Spring. In many fashions, it actually does present a resume of plants and people. Man's superior intellect has brought him a long way and, for the same reason, the Chinese elm cannot possibly win the battle for supremacy. —Hereford Brand.

"In order to become perfectly content, it is necessary to have a poor memory and no imagination." —Grit.

#### CITY EXPANSION

One of the problems which irk this and other small towns is that of expansion. There are 25 to 30 homes just outside Crosbyton city limits, homes which look and act as if part of the town.

These twilight-fringe residents bask in most city services — water, fire department, police protection. While they pay for such commodities as water, they are not taxed on homes for other expenses.

In all fairness, we must say that several of these residents are in the mood to get inside the town and accept full citizenship. There just hasn't been much effort to get the thing started.

To get full membership, outside home owners must petition city council for admittance. In turn, council must promise them water and sewer service "within a reasonable length of time."

It should be done, to do right by all parties. — Pat Bennett in Crosbyton News.

#### MORAL DEPRAVITY

There is probably nothing that has disgusted more people more often in these United States than the running account of the love triangle of Eddie Fisher vs. Debbie Reynolds Fisher vs. Elizabeth Taylor Todd. A few days ago, on the front page of many daily newspapers, there appeared a picture of Fisher and Mrs. Todd holding hands and more or less announcing their wedding plans.

This is a fine picture of moral depravity to be held up before the world. Not only are these screwballs causing something near to a scandal, but they're also trying to gain some more of their precious publicity so their shows can sell more tickets. This is commercialism of the worst sort and it would have been pleasant if a newspaper and magazine alliance could have been affected which would have given them not one printed word of publicity. — Bascom Nelson in Castro County News.

#### SUPREME COMMAND

While we sluggards sleep the supreme court has been busy little urchants. Their latest edict, your home can be searched without a search warrant for reasons of health. One by one the protective shields that stand between the American and his government is being struck down. As soon as the "civil rights" legislation doing away with trial by jury is cast, all will be lost.

One day soon someone will tie all these bits and pieces of the "supreme flaws of the land" together and slap the American people in the teeth with them. This is the paved road to dictatorship and don't you doubt it.

What to do about it. Demand now that congress take immediate action to stop this farce. Soon it will be revolution or servitude and you never gain back in revolution what you lost during the big sleep. — Cecil Waggoner in Claude News.

The tune of the Marines' Hymn, first sung after the Mexican War in 1847, occur in an old Spanish folk song and in the French comic opera "Genevieve de Brabant" by Jacques Offenbach.

Dear Editor: I see where the Supreme Court says a health inspector can charge into any citizen's home without a warrant if he is looking for something unhealthy.

My law-broke neighbor says exceptions prove rules, and so we have now got Court-contrived exceptions to prove our Constitutional rights to trial by jury, to bear arms, or be unharmed by double jeopardy and warrantless search, etc.

Says next we need a good exception whipped up to prove the Constitution shields us from cruel and unusual punishment, such as, say, being disenfranchised by seeing our dolls in Capri pants.

## Sand Hill News

By Mrs. James Jeffress

Rain has amounted to only about a half inch this week and the crops are beginning to look pretty. Only a small amount of hail was reported in the community. Further south the rain was a little heavier but not much damage. Most all of the cotton is up and feed planting has begun.

James Jeffress entertained the Primary Sunday School Class with a wiener roast last Thursday night. They enjoyed baseball then ate their hearts content. Present were Johnny Noel, Johnny Rowan, Jimmy, Timmy and James Jeffress.

Billie Gail Holmes plans to spend the summer in El Paso. LaWana Wornack is planning a trip to California, and I haven't heard Sarah Carey's plans but we wish all three much success as they journey along.

While we are thinking about summer vacation, let's all remember the bookmobile that will be stopping in the community every two weeks and take advantage of it. Especially those with time on their hands.

Bradley Earp from Munday has been visiting in the home of his sister, Mr. and Mrs. Billie Stringer, this week.

Mr. and Mrs. Ode Phillips and family were visitors at the Sand Hill Baptist Church Sunday from Plainview.

Mrs. Merle Weathers and daughter from Summerfield, Texas, were visiting in the home of her sister, Mr. and Mrs. T. C. Hollums and family, over the week end.

Mr. and Mrs. Blaylock and son from Clovis, New Mexico, were here Sunday visiting in the home of their daughter, Brother and Mrs. Bill Rowland and daughters.

Members of the Church of Christ at Sand Hill enjoyed a picnic dinner at Plainview park Sunday. Games of dominoes and 42 were enjoyed in the

afternoon. Beverly Jeffress attended with Janice Miller. Sunday dinner guests in the home of Mr. and Mrs. James Jeffress and family were Mr. and Mrs. Ed Noel.

The Sand Hill club met Wednesday afternoon at 2 p.m. with Mrs. Bill Stringer as hostess. Plans were discussed to complete the float for the old settlers parade. Suggestions were turned in for next year's year books. Mrs. Lynn Miller gave a demonstration on "Sea Foods". Refreshments were served to

Mmes. Lynn Miller, Hollis McLain, Walter Knight, Pat Bullock, T. C. Hollums, H. F. Jackson, Orion Miller, Johnny Miller, Bill Stringer, and one visitor, Mrs. Neva Smith. After the club meeting a 4-H meeting was held with Mrs. Orion Miller in charge. The 4-H girls will be in charge of the next meeting which will be June 3rd with Mrs. Johnny Miller as hostess. The next meeting will be Pollyanna day. All members are urged to be present.

Mr. and Mrs. J. M. Williams will be honored with a house warming Sunday afternoon, May 31st, at their new home in Floydada.

Sunday will be the last time Brother Bill Rowland will preach at the Sand Hill Baptist Church and we are hoping to have the building overflowing. Brother and Mrs. Rowland and family will leave for Ohio the first of next week. They have been a blessing to the community, and no words can express how we will miss them. We wish them much success as they go to work on the mission field in Ohio.

Mr. and Mrs. H. F. Jackson and Mr. and Mrs. Lynn Miller and family enjoyed the Old Settlers parade in Plainview Saturday afternoon.

Beverly Jeffress attended the eighth grade graduation in Floydada Monday night with Norma Hollums.

The G.A. coronation will be held Wednesday night at the church under the direction of

#### STAINS IN DARK COTTON

Dark cottons are popular for summer wear, but are not cut to be worn with dress shields, so perspiration stains and discolorations sometimes occur. These treatments are suggested for washable cottons.

The fresher the stain, the better your chances for removing it. Pressing a dress that is even slightly stained may set the stain and cause more discoloration. First try washing the stain thoroughly in warm water, rubbing soap or synthetic detergent well into the stain. If the fabric has discolored, try sponging a fresh stain with a little vinegar and water solution; for an older stain try a little ammonia and water. This may help restore the color. Rinse thoroughly.

Save any tags on ready-to-wear and yard goods and read carefully. Some dark cottons carry a label stating that the dye is fast to perspiration. Other labels give facts about both the fabric and its finish that will

### Memorial Day

No day in the year is more typically American than Memorial Day, observed each year on May 30. Its roots go deep into our national character. As a people, we have profound and abiding respect for courage and bravery, and thus we are bound close to those who have died in battle defending the ideals in which America, more than anywhere else in the world, the life of each individual is a very dear and precious thing, and death, therefore, assumes far greater proportion and significance.

Originating in the South shortly after the Civil War, Decoration Day, as it was first called, was later adopted by most of the other states, and now is a national observance. Originally intended as a day for paying tribute only to those who had given their lives for their country in battle, the day became generally popular for this observance seemed a logical time for relatives to gather at cemeteries to pay tribute to departed loved ones.

On Memorial Day, America remembers the courage exhibited on the battlefields, the lives sacrificed for an ideal, and those left broken and lonely by the destructiveness of war. And

### TIP FOR A BRIDE

Beginner cooks will enjoy cooking more if they approach new recipes in a systematic manner. Margaret Spader, home service editor of the Gas Appliance Manufacturers Association, suggests that they first read a recipe through. Then assemble the ingredients and utensils for making it. If the recipe calls for a preheated oven, turn the temperature control to the desired temperature before starting to mix. By the time the ingredients are measured and mixed, the oven will be at the desired temperature and delays will be avoided.

"No one so thoroughly appreciates the value of criticism as the one who's giving it." —Hal Chadwick.

Dear Editor: I see where some folks complain because we once had a Constitutional guarantee against badge-happy officials prowling our premises without a warrant and now this guarantee has been judicially amended out.

But my forbearing neighbor says the new variable pitch feature of the Constitution whereby what it says can be reversed without changing the words will take lots of the monotony out of life.

Like, say, baseball games would be more exciting if umpires changed their minds every inning about what the rule book says.

## FARMERS ARE PLEASED WITH SAFFLOWER CROP IN AREA

(Editor's Note: The following story appeared in Sunday's Lubbock Avalanche-Journal and gives a report on the progress of the Safflower crop in this area.)

A cautious air of optimism blankets area plantings of safflower, an oilseed crop that is being grown on a sizable commercial acreage on the South Plains for the first time this year.

Farmers around Lockney, where some of the best safflower crops on the South Plains at this stage have been reported, appear pleased at this early date with the way the crop is progressing.

But they're withholding final judgment until they see what kind of yields they get. The production and cash returns they can get off safflower are unknown factors at this time.

Farmers here say the crop has grown off much more rapidly than they had expected. And they haven't had much trouble with weeds to date. They also obtained good stands without any difficulty.

### Grown On 4,500 Acres

Charles Corn, fieldman for the Farmers Oilseed Mill, Inc., which is contracting for the Texas safflower acreage, says the crop is being grown under irrigation on approximately 3,000 acres on the South Plains. The dryland acreage totals about 1,500 acres.

"I've never seen the crop look better at this stage," says Corn, who has been associated with safflower production in other states. "Farmers throughout this area are doing a better job of handling the crop than I've ever seen anywhere."

Corn believes safflower should be planted in this area when the soil temperature reaches 50 degrees. Some isolated plantings still are under way, he says. Most of the crop, however, was seeded in April.

"As near as we can figure now, we think production expenses for safflower will be about the same as for grain sorghum," Corn said. He hesitated to guess at the range of yields that could be expected, but said safflower should produce 60 to 75 per cent of the same poundage that grain sorghum would yield under similar conditions.

Farmers Pleased So Far  
Ray Sissney, Lockney farmer, said he "won't plant an acre of grain sorghum" next year if the safflower produces a high yield. "The way safflower comes up and grows off has been very satisfactory to farmers around here this year," he said.

Sissney planted his safflower on April 22 and "had a perfect stand six days later." He has about a plant for every inch of seed row. His seeding rate was 15 pounds per acre. On a small tract, he applied 100 pounds of a nitrogen fertilizer per acre after the crop came up for experimental purposes.

"It's the fastest germinating and easiest crop to get up that I've ever planted," Sissney said. "We could find long sprouts on the seed 48 hours after we planted."

Safflower is known for its slow growing characteristic immediately after it comes up in other sections. This increases weed problems in those areas, since farmers cannot throw dirt to the crop or work it very efficiently without covering up or damaging the safflower.

"We haven't had a bit of trouble with that here," Sissney said. "The crop hasn't stopped growing since it came up. If the yield is satisfactory, we think safflower will become a new cash crop for this area."

Major Expenses Given  
Corn says major safflower production expenses probably will involve proper seedbed preparation, including a pre-planting irrigation if it is needed, three cultivations and two to three supplemental waterings.

"Planted at the proper time, safflower will make a crop without irrigation after it comes up, provided adequate moisture was present when it was seeded," Corn said. "It naturally would make a bigger crop if irrigation was applied, though."

Safflower has a long taproot that extends about 6 feet deep under normal conditions. Corn explained its deep taproot breaks hardpans and opens up the soil, enabling the land to absorb more water, he added.

Yields of 2,500 pounds per acre have been recorded near Amarillo, Corn said, adding that it is believed that production in this area normally could be expected to fall somewhere around that figure.

Still Much To Learn  
"Frankly, we still have a lot to learn about safflower production in this area," Corn said. "We're going to keep close tabs on how different farmers handle the crop this year, their seeding rates, row spacings, amount of water applied, cultural practices and other factors before we develop a specific set of recommendations."

Data collected from different methods of handling this first crop will be correlated with yields to establish guides for future production, he said. The crop can be readily harvested with standard combines, although special adjustments may need to be made, he said.

Corn said the harvest of the crop this year will start about the middle of August and continue into September. He said the crop will grow from 24 to 40 inches in height, depending upon soil conditions, cultural practices and other factors.

"The height of the crop isn't necessarily related to yields," Corn said. He said safflower probably will reach its peak period of water usage around July 18 to the first week in August.

"We're proceeding slowly and cautiously, but we honestly believe that this area could become the largest single safflower producing region in the world," Corn said.

Contracting For Seed  
The Farmers Oilseed Mill, Inc., is contracting to purchase seed produced from the area crop for \$62 per ton. Seed from this first crop will be used for planting purposes next year, with very little of the seed this year to be processed, Corn said.

# STATE CAPITAL Highlights AND Sidelights

by Vern Sanford  
TEXAS PRESS ASSOCIATION

Austin, Texas. — There's a "get on with it" mood among house members during the special session.

House was the target of some criticism after the regular session for having made almost no progress in money-raising.

This session the House began processing money bills at a fast clip. Initial action indicated there was less opposition in the House to Gov. Price Daniel's tax program than during the regular session.

Many in the lower house seemed to be in a mood to get as much as possible over to the Senate and "let them worry with it a while." Then, if the finance problem still isn't solved at the end of this session, they hope people won't be saying that the House "sat on its hands again."

Senate attitude toward the various money-raising approaches is largely an unknown quantity. No money-raising bill ever came to a vote in the Sen-

ate — either in committee or on the floor — during the regular session.

**DEBT-PAYING BILLS**—Three bills recommended by Governor Daniel to wipe out the \$65,000,000 state deficit received first legislative attention. These measures are:

1. "Bookkeeping bill" designed to lop \$28,000,000 off the Aug. 31 deficit by crediting certain money to this year instead of next year.
  2. One-year increase in the corporation franchise tax to bring in \$17,000,000. Sponsor Rep. Joe Ed Winfree of Houston called it "a donation by Texas business" toward bailing out state government.
  3. Abandoned property act, to transfer to the State Treasury funds unclaimed for seven years. Estimates vary as to how much it would bring in; sponsors say about \$20,000,000 the first year, \$2,500,000 a year thereafter. It was re-written after its defeat last session, but bankers still aren't happy.
- First two of these bills received quick House approval.

**GOVERNOR'S PERMANENT PROGRAM** — To cover new money needs for the next two years, the governor is pushing a separate tax program, a "package bill" known as H. B. 7.

It would raise an estimated \$161,000,000 in two years.

Affected by the bill would be (1) natural gas, with a reduction from 7 to 5 per cent in production tax and addition of 5 per cent "severance beneficiary" tax; (2) interstate corporations, with a new and complex taxation formula; (3) utility companies, with an increase in the gross receipts tax; (4) cigarettes, one cent per package more; (5) other tobacco products, except snuff, to be added to sales tax fold; (6) liquor, increase from \$1.408 (correct) to \$2.50 a gallon sales tax; (7) automobiles, with sales tax increase from 1.1 to 1.5 per cent.

Rep. George Hinson of Mineola is sponsoring the bill.

In the past weeks the governor has been making a vigorous round of conferences and talks, rounding up support for his program. He launched it before the Legislature with a speech pouring fire and brimstone on the heads of lobbyists. He accused the "third house" of causing expensive delays.

**OTHER TAX BILLS** — As in the regular session, there is no lack of ideas for raising money.

Besides the governor's bills, these have been proposed:

- (1) One per cent tax on all manufactured goods, by Rep. Jerry Sadler of Percilla. To bring in an estimated \$200,000,000 annually. Businesses grossing less than \$25,000 annually would be exempt.
- (2) 1.5 per cent general sales tax, by Rep. Frates S. Seelingson of San Antonio. Food, feed and fertilizer would be exempt.
- (3) One per cent tax on retail sales, one per cent on personal income and three per cent on corporate income, by Rep. Louis Anderson of Midland.

**WINS FLOWER AWARD** — Mrs. Bill Roach, Lubbock, daughter of Mr. and Mrs. Valca Thomas, Lockney, won the tri-color award at the flower show given Friday afternoon by La Rosa Garden Club, Lubbock. Her arrangement was entered in the section "Stopover in Japan". The former Berry Jean Thomas, Mrs. Roach is a graduate of Lockney High School and Texas Tech. Her husband is principal of the Kay Carter school in Lubbock and she is a very active member of the Junior League.

(4) Five per cent tax on corporation net profits, by Rep. Dean Johnson of Houston.

(5) Five per cent tax on trading stamps, by Rep. Joe Chapman of Sulphur Springs.

(6) Graduated oil tax, by Rep. Bob Eckhardt of Houston.

**RE-RUN ON APPROPRIATIONS** — Re-approving the appropriation bills passed during the regular session was no great stumbling block for either House or Senate.

As before, both houses passed bills calling for 1960-61 spending totaling about \$2,400,000,000. House bill would require some \$333,000,000 from the general revenue fund; the Senate bill, about \$20,000,000 less.

Only change on either side was a House amendment to cut off aid to dependent children payments for illegitimate children after the first one in a family. By having more children, said H. J. Blanchard of Lubbock, unwed mothers get more money from the state. House members agreed the payments encouraged illegitimacy.

Hard part on getting out an appropriation bill will be settling the House and Senate differences in conference committee. No conference group was appointed in the regular session. Some predicted there would be no effort to come to final agreement on spending this session until ways to pay for it had been agreed upon.

**TOO MUCH OIL** — Texas oil allowable for June will be 282,738 barrels a day less than for May.

Texas Railroad Commission set the statewide flow at 2,904,414 barrels a day on a 10-day producing pattern.

It is the lowest allowable since last July. Both independent producers and major buyers asked the Commission for a sharp cut. They said there is a surplus of petroleum and the threat of a glut on the market.

**GONE WITH THE WIND** — If you inherit some of grandfather's Confederate bonds, just look on them as keepsakes. Texas Supreme Court has held that the state cannot pay them off.

Holder of some state Civil War bonds issued in 1862 received legislative permission to sue the state for \$46,000 payment on his bonds. Lower courts held the state was not liable because of a general statute of limitations against debts that old. Supreme Court upheld that ruling.

It takes at least a full year aboard an active submarine for an officer to become eligible to pin on his "dolphins" and become a full-fledged submariner.

**Grain Sorghum Fertilization**

Many people are wondering if nitrogen can be placed on 40" centers for grain sorghum fertilization. Research shows us that this time of the year when soil temperatures are high that just as good results can be obtained on 40" centers as compared to 20" centers are recommended. It has been proven that the highest return per dollar invested for fertilizer on grain sorghum is about 80 lbs. of actual nitrogen either applied before planting or as a side dress application.

### Home Making Hints

by Phyllis Roggendorff  
County Home Demonstration Agent

A tender broiled steak makes any meal or picnic a real occasion. Do your steaks always turn out tender? If not, your difficulty may be in the selection of the steak for broiling.

Choose a tender cut of meat. These are: porterhouse, T-bone, sirloin and club. Rib steak is a fairly good choice also and usually costs less. Have the steak cut from 1 to 2 inches thick, depending upon your preference. It will be less tender if less than one inch thick.

Look for a well marbled steak. Marbling is fat interspersed with the lean. A well marbled steak will usually be tender and juicy when broiled — if it came from a young beef animal. The food shopper has no way of judging this last point but federal meat graders do, and the shopper can use the U.S. grades as a guide in selecting meat.

USDA prime and choice grades provide steaks which are best for broiling. If the meat is Federally graded it will have a purple shield stamped on the fat covering. The choice grade is the most common.

**Cotton Insects**  
Control of thrips and flea-hoppers may not be successful on young cotton due to these insect building up resistance to some of our commonly used poisons. The same thing may be noted with thrips on onions. The addition of 1 pint of malathion, 1 pint of methyl parathion and 1/2 Guthion to the regular insecticide mixture will control these insects.

The 1959 Cotton Insect guide is available in the County Agents office and may be picked up there.

Damaging infestations of thrips have been noted in several patches of small cotton. Each person should check and keep watch on his field for infestations.

Which my trucking neighbor says is very unfair to the common people, who are apt to feel some impressive looking stranger only to find out it is time wasted because the fellow hasn't got enough money to make him worth knowing.
