EDITORIAL

Wherefore let him that thinketh he standeth take heed lest he fall.—I Cor. 10:12.

WE SINCERELY hope that the people of this community will not take lightly the citizenship training course which begins here tonight. Seems to this writer that too many people do not care much what happens in public affairs just so long as they are left alone and not bothered with it. Such an attitude in the part of most people could easily lead to the downfall of this nation. "Eternal vigilance is the price of liberty" is just another way of saying that citizens of a free country must stay on their toes, must be interested in the affairs of government, must take a part in the elections and must constantly be on the alert for misconduct or slackness in the part of office holders.

WE ALL NEED to take the citizenship courses. We hope that a large crowd will be present for the first one tonight.

LOOK AT SOME of the planks in the platform adopted by the DOTS in their recent Houston convention. See if you think these "ideals" as set out by the ultra-liberals of the state stand for Americanism:

1. "Make all democracies in the hemisphere partners" in the Panama Canal, sharing in its policing and defense."

the Panama Canal to such countries as Cuba, whose ruler spends much of his time vilifying the United States; to Columbia and to Argentina, both of which have expressed strong anti-United States sentiment on numerous occasions even in the presence of our President and Vice-President. Such a proposal must be classed as utter stupidity or willful disloyalty to the United States.

2. "Power generation on such major projects as the Amistad Dam on the Devil's River should not be privately owned but should be publicly owned and operated so as to further advance the development of the REA and public-owned power systems."

Here the DOTS show their true colors in wanting to advance socialism even to the point of government ownership of all power production. It is common knowledge that private enterprise almost always operates more efficiently and more economically than government-owned projects of like nature. Private enterprise will take over and develop the Amistad Dam project as well as others of like nature but the DOTS do not favor that. Government ownership is their goal, regardless of cost.

The DOTS adopted many other planks but we'll mention only one other:

3. "The failure of the state to improve the social security system calls for federal legislation for uniform minimums."

The DOTS have been unable to grab control of the state government to push through their socialistic goals so now they resort to calling on their old friend, the federal government to help them achieve their purposes, good or bad. The social security system has been "improved" now to where it costs every employer three percent of his payroll and every employee the same amount. If they keep improving it, small businesses will be forced out of existence and many present employees will lose their job. Even business can stand only so much socialism.

AN IMPROVED and simplified method of oral resuscitation is recommended by nine physicians in the Journal of the American Medical Association. It is known as the head-tilt method. Instructions are: Lift the neck of the victim. Tilt the head as far back as possible by holding its crown with one hand; sufficient tilting usually opens the victim's mouth. Pull the chin upward. Inflate the lungs through the nose or mouth or, in an infant, through the nose and mouth. Remove your mouth to let the victim exhale passively. In babies and children care must be taken to pull the chin upwards without exerting pressure on soft tissues, which could encroach on the air passages.

INTOLERABLE STUPIDITY

The abduction, beating and knife-marking of a Negro man at Houston is exactly the sort of stupidity the racial situation in the South can not tolerate.

When irritation becomes injustice there is no place for it. By all accounts, this Negro was jumped at random as the victim of a piece of irrational brutality. He had molested nobody. The fact that he was not seriously injured does not lighten the offense very much. It is obvious that the incident resulted from the series of Negro demonstrations in white lunchrooms over the South. These occurrences, and they have cropped up at Houston, have been an invitation to trawling. But there are insufficient excuse for an attack upon a Negro apparently not involved in any sort of prejudicial behavior.

If this sort of thing is not stopped the South will indeed be in for racial trouble—which, mercifully, it has largely escaped despite the abuse which has been heaped upon it. Let us, whatever happens in such racial jungles as New York and Chicago, keep the Southern record as clean as possible.

Nothing which has happened yet can excuse acts of a Ku Klux character. Resort to them would be a dangerous and un-

necessary complication of a situation which good judgment can still resolve. What has happened at Houston can only be a matter of shame for decent white Southerners.—Fort Worth Star Telegram.

POVL BANG-PENSEN

Received a card this week that reads:

"Povl Bang-Jensen, a Danish official of the United Nations was responsible for the excellent UN report on the Hungarian uprisings of 1956. Buy promising anonymity to the Hungarian eye-witnesses of Soviet atrocities who desired to protect their relatives in Hungary from reprisals he was able to secure invaluable testimony. The UN officials demanded the list of

names which Bang-Jensen refused to give them and then destroyed it. For this Bang-Jensen was dismissed from the UN service.

"The circumstances of his death are very mysterious.

"A report is circulating that Bang-Jensen knew too much about American agents in the Soviet apparatus so it was arranged for him to 'commit suicide.'

"It is hoped that the light of truth will be turned on this tragedy.

"The noble Dane is dead and those bureaucrats in the UN who hounded him are alive and flourishing. Is the UN an instrument of peace or a nest of subversion?"

The ghost of Bang-Jensen has stalked the corridors of the UN for some time and has now moved into the halls of Congress. His death may well prove to be the crowbar that pries open the UN and exposes to the American people the type of organization in which they have placed their hopes of peace. —Ceel Waggoner in Claude News.

Dear Editor:

I see where a Washington state education official got demoted here the other day for "bringing shame and disgrace to the state" by saying he believes the Bible instead of the Darwin evolution theory.

My backward neighbor says this incident, along with payola, and kowtowing to Khrushchev, proves we are evolving away from old Bible teachings, all right.

And says our next logical moves are to put "In Theories" We Trust" on our money, and when we get in a jam, start praying to Darwin.

Safflower Will Be Tested At Plains Station

Safflower will be tested at the High Plains Research Foundation this year in cooperation with the U. S. Department of Agriculture, as a part of the Foundation's program to develop new crops for the area.

Five varieties were used in the 1959 tests at Halfway. Heavy hail on June 22, 1959, damaged the crop so severely that the tests had to be abandoned. There is still a possibility that a variety can be found that will be adapted to the area. Dr. Earl Collister, Chief Agronomist, said in announcing the acceptance of the request of the U.S.D.A. and farmers in the area for further research on the crop.

The Foundation has been selected by the U.S.D.A. to conduct the regional test. This will be the only safflower test of its kind to be made in the area. The varieties to be tested are being supplied by Dr. Lester N. Leininger, Research Agronomist, of the Agricultural Research Service at Utah State University.

The eight varieties to be included in the test are U. S. 10, N-6, N-10, N-4051, N-4054, N-4055, Gila, and A 5731. Three of these varieties were included in the 1959 test program at Halfway.

STATE CAPITAL Highlights AND Sidelights

by Vern Sanford
TEXAS PRESS ASSOCIATION

AUSTIN, Tex. — Texas politicians have been finding it hard to make hay with no sun shining.

A number of statewide candidates are stumping the state, and legislative contenders are getting invitations to speak at rallies and before special groups.

But bad weather and the unaccustomed earliness of this year's election schedule have made it harder for most to get campaigns rolling.

Legislative candidates report they are most often quizzed on whether they favor (1) a teacher pay raise and (2) a general sales tax. "Yes" to the first and "no" to the second are

generally regarded as safest answers. But many old hands have misgivings, feeling that the two commitments together may put them in a hard situation come the next session.

AMENDMENT LINE-UP — In the hoopla of a presidential campaign year, amendments to the Texas constitution probably will get only secondary attention, though they are of vital importance to all Texans.

Four are to be voted on by the people at the general election Nov. 8. Their order on the ballot, as determined by a drawing conducted by Secretary of State Zollie Steakley, will be:

1. An amendment authorizing the Legislature to create a hospital district in Lamar and Hidalgo Counties and part of Comanche County.
2. An amendment authorizing

the Veterans Land Board to issue bonds at 3 1/2 per cent interest instead of the present 3 per cent maximum.

3. An amendment giving members of the Legislature annual salaries of \$4,800 a year and \$12 per day allowances for a 120-day session. Sessions could go no longer than 140 days.

4. An amendment authorizing the Legislature to license and regulate lenders and fix maximum rates of interest.

SCHOOL COSTS JUMP — A baby boom in the fifties means scaring school bills in the sixties, as indicated by the State Board of Education's 1960-61 estimate.

Board reported that cost of Texas public school program for next year will be \$365,000,000. This is an increase of some \$15,000,000 over the previous year.

Reason for the rise is more children — requiring more teachers, more books, more desks, etc. Total enrollment for next year is expected to be 2,254,574, an increase of more than a half million since the 1954-55 year.

Counties will have to pay \$73,080,000, or 20 per cent of the \$365,000,000 total cost.

"SLEEPY VILLAGES" GO BIG TIME — Twenty-one small Texas towns mushroomed into cities during the fifties.

Texas Municipal League reported on towns that had grown 150 per cent or more — some as much as 1,617 per cent.

Twelve of the 21 big growers are towns near to one of Texas' three largest cities — Dallas, Houston and Fort Worth. Topping the list with runaway expansion were three Dallas County towns—Irving, up 1,617 per cent; Mesquite, up 1,323 per cent and Farmers Branch, up 1,211 per cent.

Industrialization was the key to the spectacular growth of most of the 21. In a number of cases, the coming of a single large plant started the boom rolling.

TEACHER FUND GROWS — Texas' teachers retirement fund has increased more than 35 per cent in the past decade, according to State Auditor C. H. Cavness.

Cavness reported that at the end of the last fiscal year the fund stood at \$389,341,289. This is \$140,000,000 more than 10 years ago.

Teachers pay 6 per cent of their earnings up to \$8,400 into the fund. State matches their payments.

Fund provides for a minimum of \$100 per month retirement pay for teachers and \$75 a month for other school employees. To make the fund grow, it is invested in municipal, state and federal bonds and certain corporate securities under supervision of a board of trustees.

ATOMIC DISPOSAL HIT — Water pollution from atomic waste materials could pose a real threat of public health, fish and wildlife in Texas, said Gov. Price Daniel.

Daniel praised the Sportsmen's Clubs of Texas for their concern over a proposal made at one time to dump containers of low grade radioactive waste materials in the Gulf of Mexico.

State Health Department, said the governor, keeps a continuous check on the state's surface waters for atomic pollution from fallout.

NEED FOR ECONOMY CITED — Need for the next Legislature to raise between \$150,000,000 and \$200,000,000 in new tax revenue has been predicted by the director of the Texas Research League.

Alvin A. Burger, head of the private organization which studies state government, said state spending will require \$1,000,000,000 a year in the 1961-63 biennium.

Burger urged careful analysis of the highway, education and welfare programs which take 85 per cent of the state budget.

As a money saver, he recommended taking the cost of maintaining farm-to-market roads out of the farm road funds. At present, this money can be used only for new construction, and farm road repair has to be paid out of other highway funds.

He suggested school consolidation as another avenue for economy. County governments, he said, need reorganization to eliminate duplication and problems in the efficient handling of money.

CAR INSPECTIONS DUE — Drivers without a green Texas-shaped sticker on their car windshields are advised to stop by an inspection station the first pretty day.

Department of Public Safety estimates that only about half of the 4,300,000 vehicles in Texas have had their 1960 inspection. Deadline is April 15. Col. Homer Garrison Jr., DPS director, suggests that the trip be made soon, before the lines get long.

CROSS ROADS REPORT

Dear Editor:

I see where Cuba's Primed Minister Castro claims the U.S. government hired somebody to blow up his little shipload of munitions.

My motivation expert neighbor says this is just more of Fidel's act to lather himself into declaring war on the U.S., because he has noticed how we lavish our substance on the people we whip.

Says likely Castro forgets that we forfeited the Korean war, maybe on account of not feeling financially able to afford another victory.

Floyd Co. Noxious Weed Control Dist.

By Douglas Degge

Zant Scott, vice-chairman of the board of directors of the Weed District, and Douglas Degge, supervisor, attended a joint meeting in Denver Feb. 22-25, if the Weed Society of America and the Western Weed Chemical Control Conference.

Many new herbicides and methods of weed control were discussed at this meeting as well as improvements of our old methods. Weed experts from all over the United States and several foreign countries attended the meeting. Foreign countries represented were Switzerland, England, Canada, and Australia.

In the monthly meeting of the board of directors last week plans were made and date set for the annual meeting which is to be on Monday night, April 25, in the District Court Room. An interesting and informative program has been planned and all interested persons are urged to attend. Nominating committees were selected to select nominees from Precincts 2 and 3, for the terms of the board members representing those precincts expire this year. Nominations from the floor may be made at the meeting.

The district has traded for a second 4-wheel drive pickup which is to be equipped to spray all patches of bindweed on the county bar ditches. Plans are to begin this work as soon as the vines reach the 6 to 8 inch runner stage.

Robert Lee Smith, chairman of the board, has been selected to serve on a panel to discuss the problems and benefits of Weed Control Districts at the Great Plains Field Day at Bushland on April 21.

WHY FEWER BABIES DIE TODAY!

FIFTY YEARS AGO, one out of every 10 babies died during its first year of life. Today, infant mortality during that first year has declined to only one out of 40 babies. Much of the credit for this huge drop belongs to the potent drugs that help defenseless infants fight the diseases that once meant certain death. That's why we say

An impressive film was shown. The public is invited to attend these Sunday night services to enjoy and benefit from these films.

The three circles of Trinity congregation met this past week. The Mary Martha circle met with Mrs. Melvin Keim with eight members present. The Ruth circle met with Mrs. Weldon Smith with eight members present. The Candlelight circle met at the church with Mrs. Mae Howard as hostess. Due to the bad weather the attendance was small at each circle meeting. At each meeting Rev. Windecker gave an inspirational Bible study on the gospel of Mark. Mention was made that the vanilla and pepper is here and an all out effort is being made to dispose of these articles. The aim is a beautiful lighted bulletin board when we have sold all our vanilla. See any one in any of the circles. The Mary Martha circle will send articles to missionaries and their families.

More fog and drizzle moved into the community Sunday night bringing the farm operations to a standstill again. About three days last week helped a lot of them get some plowing done.

Jim Carey, son of Mr. and Mrs. C. P. Carey, remains in a critical condition this week after being in a car wreck on the Blanco highway Wednesday night. He was rushed to Peoples Hospital in Floydada by Kenneth David Battey Jr., of Plains and David Battey Jr., of Harmony. Friday morning he was flown to Galveston where one of his badly burned legs was amputated Saturday. Reports were that blood donors were needed badly and that his other leg would possibly have to be amputated. Blood donors are to contact Brother Frankie Rainey at Sand Hill. Our prayers are with Jim and his family at this time.

For Want of a Nail

For want of a nail, a shoe was lost
 For want of a shoe, a horse was lost;
 For want of a horse, a rider was lost;
 For want of a rider, a kingdom was lost.

Through the centuries this bit of philosophy has been used to bring home a fact we've all observed . . . how an insignificant event can lead to more and more important occurrences . . . and eventually to great calamity . . . or to great good.

► The casual purchase of a pair of shoes . . . a garden hose . . . an occasional chair . . . a tube of toothpaste . . . multiplied thousands of times . . . is the base upon which the prosperity of every community is erected.

► Better paying jobs, more profitable business, more valuable property . . . better schools, stronger churches, fuller living . . . depend on these thousands of little transactions . . . each

one important as each brick is important in a great structure, and as the fabled nail was important to all the people of a kingdom.

► One drop of water out of the ocean makes it a smaller ocean; every penny of local money that is spent in some other town makes this community smaller and less prosperous . . . and every penny that is spent here at home means a little better place to live for all of us who make our homes here.

★ Buy at home . . . where your dollars go on working for you

**It Pays to Buy
 where you Live**

YOU get everything that your money pays for . . . merchandise AND a trade-invigorated community to live in . . . when you buy from your home town merchants . . .
