## EDITORIAL

I have called upon Thee, for Thou wilt hear me, O God. —Psalms 17:6.

**THE BEACON EDITOR** is having a hard time making up his mind. Last week we expressed some satisfaction with Lockney's growth during the past 10 years, looking to those towns below the cap which lost population. We've had a new thought on the matter since seeing what some other high plains towns have done. We're not as satisfied as we used to be. Looking, not especially at the present population, but at the percentage of growth during the past decade, we come up with a little different picture. Here's our figures, though we are not completely sure we have present population figures correct on Hale Center and Olton:

- Olton, now 1950, up 58%.
- Abernathy, now 2491, up 47%.
- Tulia, now 4395, up 36%.
- Hale Center, now 2171, up 34%.
- Silverton, now 1099, up 28%.
- Lockney, now 2139, up 26%.
- Ralls, now 2206, up 24%.
- Floydada, now 3744, up 17%.
- Crosbyton, now 2080, up 11%.

—O—  
THE 1960 CENSUS showed

very definitely that the population trend is to the larger cities, despite H-bomb threats, etc. This means that the smaller towns must fight for their lives. They must have a live civic organization, one that looks to the interest of the city and community. In other words, we better get to work.

**WRITING IN** National Review, Sylvester Petro says: "The fundamental defects of existing labor policy . . . can be stated very simply. We are suffering from too much government of the wrong kind, and too little of the right kind. In the United States, government, particularly the federal government, has given trade unions very special privileges. At the same time, it has failed to enforce those basic laws which are designed to prevent individual and special groups from abusing other persons and groups. The result of this failure is a threat to the freedom and well-being of our society, the threat the large trade unions nowadays pose."

**WRITING IN** U. S. News & World Report, David Lawrence says: "How can there be any progress toward disarmament when there is so little faith in the word of the present Soviet government? Only the peoples of the Soviet Union can assure world peace, and they can do so by ridding themselves of a tyrannical government that doesn't honor its agreements and by substituting a free government that the world can trust. That's the only sure road to a reduction of armaments."

**ACCORDING TO** Insurance Economics Surveys, the annual income of the nation's older population (65 and over) has increased by at least \$6 billion in the aggregate since the mid-fifties, and is now about \$30 billion. This rate of growth, it adds, is in keeping with the general rise in income levels and the progress of the economy.

**SINCE THE END** of World War II, the Association of American Railroads reports, the average railroad employee's hourly earnings jumped from 97 cents to \$2.72, an increase of 180 per cent, and prices of railroad materials advanced by 109 per cent. By way of contrast, the revenues the railroads receive for hauling the average ton of freight one mile have risen only 53 per cent.

**TAX FOUNDATION** finds that payrolls for civilian employees of the Executive Branch of the federal government last year reached an estimated \$12.3 billion. That works out to \$226 for each U. S. family.

## THE AMERICAN WAY

LET THE GOVERNMENT DO IT!

The Fatal Consequence

## With Our EXCHANGES

### RELIGIOUS PERSECUTION

In the presidential address before 12,000 "messengers," Rev. Mr. Pollard said the denomination must "keep on preaching and teaching" the doctrine of the separation of church and state. He then declared:

"I'm a little bit tired of hearing certain groups in this country fold their hands and piously cry out against bigotry and persecution in America, when I have been to Spain and South America and Portugal and Italy and I have seen Protestant churches closed by the government because of an agreement and an alliance between Catholicism and the government of that state."

"I want to tell you, Roman Catholicism must repent of her sins and she must come with clean hands and confession and admitting her own sin in the field of religious persecution and bigotry before they can dare raise their finger at us who claim that religious freedom is not only for Baptists and Pro-

testants, but religious freedom is for all men." — Rev. Ramsay Pollard, president of the Southern Baptist Convention, as quoted in the Star Telegram.

### A BE-LITTLED SOUTH

Quite often the inferior is highly critical of the superior. I had wondered about the North's constant, almost insane harassment of the South. I now find it to be deep irrevocable feelings of inferiority. The fertile brains that nurtured our nation arose in the South. In its very essence it was the culture that cradled our civilization of today. Let's go back in history a moment:

Its birth was the first permanent English settlement in America, at Jamestown, Virginia. The first legislative assembly in America, the General Assembly of Virginia, planted the seed of a freedom loving people. It bore the author of the Declaration of Independence, Thomas Jefferson; the commander in chief of American forces in the Revolution; the "Father of the Constitution," James Madison; the first President of the United States and 11 of his 32 successors; the greatest Chief Justice, John

Marshall; both patron saints of the Democratic Party, Jefferson and Andrew Jackson; the two great heroes of the Mexican War, Winfield Scott and Zachary Taylor; the great leaders of the Confederacy as well as such Union stalwarts as Admiral David G. Farragut and General George H. Thomas; the father of the League of Nations, Woodrow Wilson. You can also add to this list such men as Herry Clay, John C. Calhoun, Sam Houston, Daniel Boone, Robert E. Lee, Stonewall Jackson and George Washington.

In fact the South gave 29 generals to the Union Army, more than any Northern state.

So it isn't surprising to find the South the last bastion of true human freedom and protector of individual worth who do not clamor for worship at the swill of federal troughs or shrines of the centralization and standardization of human thought. — Cecil Waggoner in Claude News.

Dear Editor:

I see where the U. S. submarine which got shot at by the Cuban Navy didn't know it had been attacked until Mr. Castro put out the news.

My foreigner-upkeeper neighbor says it appears like the Babbling Beard is getting kind of put out with us for not taking him seriously enough to declare war on him.

Say most likely his finances are getting a little run down and he needs to hurry and get whipped so he can commence getting his checks from our Free Lunch and Beer Fund for ex-enemies.

Dear Editor:  
I see where some cities and towns are not satisfied with the verdicts being handed down by the census bureau as to their populations.

My all-round expert neighbor says you can't blame the metropolis for being unhappy, considering the custom of trying to keep up with the Jones Cities, and that quantity is easier to measure than quality.

But he says it may be the government has got a policy of tight-counting, so as to hold down the number of \$600 exemptions.

### FROM THE County Agent's Office

By Cecil Lewis

#### Cotton Insect Situation

There have been many questions about insects cutting holes in the cotton leaves. This is caused by an insect called a Springtail. This is a greyish colored insect that hops like a flea. Their main source of food is decaying organic matter. This hole in the leaves is usually done before the cotton comes up. They work mostly in the soil. Control applied after the cotton is up for Springtails is not economical in most cases.

Thrips are moving out of

wheat fields into small cotton and in some cases are doing damage to young cotton.

The new cotton insect control guide which is available in the County Agent's office has been changed for 1960. The use of our common insecticides for thrip and fleahopper has been changed. The addition of DDT or malathion is necessary for thrip and fleahopper control. Thrips have built up a resistance to Toxaphene, Dieldrin, Endrin, Heptachlor and Strobane and for best results a combination of DDT or malathion should be used with the listed insecticides.

#### Grasshoppers

The grasshopper survey has just been completed in Floyd County. The count appears to be low in most areas except in

some soil bank land near Floydada. Some grasshoppers found in fence rows are not a very serious pest. Damaging grasshoppers to count 40 nymphs per yard. It is estimated that grasshoppers will reach a high control level.

If your fence row has a high control level, it might be beneficial.

### UNION OF CHURCH AND STATE

To understand how UNION OF CHURCH AND STATE came about during the Middle Ages we need to study the church of the first century and know the departures that took place over a period of several hundred years.

#### The God-Ordained Plan

Each congregation of the church Christ built, Matthew 16:18, was an independent unit, with Christ as the only universal head. God authorized elders over the local church to serve as overseers or superintendents. These are called elders, bishops or pastors (I Timothy 3:1-7, Titus 1:5-9, Acts 14:21-23, Philippians 1:1, Ephesians 4:11, Acts 20:17-32, I Peter 5:1-4). God also ordained deacons as helpers and workers with the elders in the local congregation (I Timothy 3:8-13; Philippians 1:1). Elders, bishops or pastors are three different names for the same officers in the Bible church. Scripturally speaking the preacher is only a "pastor" when serving as one of the elders of the congregation in addition to an evangelist or preacher. There is no such thing in the Bible as "the pastor" of a church. You will also note in the above passages there was always a plurality of these officers in each congregation and Christ is the universal head or chief shepherd (I Peter 5:4).

The Bible authorizes no ecclesiastical system and no universal head of the church on earth, such as now claims this power with headquarters in Rome.

Next week: How the departure prophesied by the apostle Paul brought a combination church and state dictatorship with headquarters in Rome.

**Gov. Price** money raising program that many of the tax battles will be on familiar terrain. The program submitted by Governor to the State Advisory Commission is the one he submitted as the one he submitted in 1959. Even the total in 1959. The Legislature passed the raising \$185,000,000 and estimated 1961 new needs at \$193,000,000. To cover an expected annual spending of \$2,527,000. To raise this money, the Governor suggests revising the franchise tax for liquor and increasing the liquor receipts tax on utilities and the auto sales tax. He suggests passing the property act follow-

ing the state to take over unclaimed bank accounts, property, etc.) and putting a tax on beer and cigarettes sold on military bases. Governor Daniel also told the Commission of four other tax ideas which he said had been suggested by others. These include:

1. A 10 per cent increase on all items in the Omnibus Tax Bill except cigarettes, tobacco and franchises.
2. A 1-cent-a-gallon increase in the gasoline tax.
3. A tax of 1 cent per thousand cubic feet on the processing of natural gas.
4. A 3 per cent tax on gross receipts of gas pipeline companies.

Governor Daniel said he knew his proposal would be criticized as "riding the same old horses." But he said the affected tax sources would not be taxed any heavier than those in neighboring and competing states. Finance Commission is to begin committee work this month and hold another joint session of its 34 members—all leaders in their fields—in June.

**TAX EXEMPT SALES JUMP** — Texas apparently is losing some tax revenue through sale of tax-exempt cigarettes on military posts, reports State Comptroller Robert S. Calvert. Statewide allowable for June will be 2,643,516 barrels a day, a 47,108 barrel a day increase from May. **Telephone Man Tells Of Miracles Of Communication**

Miracles in the communication world, both now in operation and those which are being developed, were described at the Friday meeting of Lockney Rotary Club by Glenn Scott, a Southwestern Bell Telephone Co. research scientist from Dallas.

Mr. Scott explained how the development of the tiny transistor made possible giant strides in the communication world. He also described the new automatic direct long distance dialing in which a person may get a number anywhere in the western world within 16 seconds. He told of the large central office in Dallas which handles the "long haul" calls from this area and also of the development of the 10-key telephone which will replace the dial system eventually.

Mr. Scott described a memory device which calls back on a

busy line when the called party hangs up. He said that eventually securing a number would be done by a "digit recognizer" merely upon the caller speaking into the telephone.

He told something of Bell Telephone's part in developing instruments for defense and how these electronic devices had helped to advance the defensive strength of the nation.

Visitors were present from Floydada and Plainview. President H. H. Nicholas was in charge of the program.

**WOODS ARE MOVING**

Awards were presented as follows:

## Lockney's 'Silent City' Has 1814 Population Now

Lockney community's "Silent City", the Lockney Cemetery, now has a population of 1314, according to information gathered this week by H. Cunningham, caretaker. Twenty-four of that number have been buried since January 1st of this year.

Most old timers here agree that the first person buried in the Lockney Cemetery was a man by the name of Roberts who was killed by another man in a quarrel over a girl who lived in a dug out about where Fey McCormick's house now stands. That was in the year of 1890. Buried the same year was a girl by the name of Alice Davis who died of pneumonia. Also buried about the same time were three Koger babies, children of J. E. F. and Ella Koger. Mr. Koger donated land for the cemetery, the reports say.

The oldest person in the cemetery, according to Mr. Cunningham's findings, is a woman by the name of Carolina Jones, who was 110 years of age when she died. The gravestone says she was born

## Egg Prices Are Due To Improve

College Station. — Egg prices to producers for the last half of 1960 are expected to average considerably higher than for the same period a year ago, says John G. McHaney, economist for the Texas Agricultural Extension Service.

A strong factor in the forecast is the likelihood that the number of layers will continue to decline during the months ahead. The production of egg-type chicks in the United States the first three months of 1960 was 37 percent below the production for the same period in 1959 and the trend continued through April, the economist says. The production drop in March 7, 1801 and died May 8, 1911.

Mr. Cunningham works almost full time in taking care of the cemetery, keeping down weeds and grass and similar work. He is paid by Lockney Cemetery Association, which organization gets its money from donations made by those who have loved ones buried there or from other interested citizens.

Texas for this same period was 38 percent.

Egg production in the nation was 9 percent more than the previous month but 7 percent below March of 1959. In Texas March egg production was up 21 percent over February but 8 percent less than March of 1959. The number of eggs produced per layer in Texas in March was 22 percent above February and this increased rate of lay, points out the economist, could have been responsible for at least a part of the price decline in March.

McHaney says egg production will remain below the year before and soon the egg supply will decline seasonally. With an increase in egg prices, the possibility is very good, he adds that many producers will hold hens which have been in production 80 to 120 months. From a marketing standpoint, this could mean more leakers and chacked shells and eggs with lower interior quality. These conditions, McHaney says, will lower the overall income from eggs.

This quality factor, along with the reduction of lay of older birds, should be analyzed carefully by producers in determining whether to "hold" old hens, keep them, or replace them with pullets, concludes the economist.

### Annual 4-H Club Round-Up Is At College Station

College Station. — Boys and girls, wearing the green and white of 4-H from every section of Texas, will assemble at Texas A&M College on June 7 for their annual statewide 4-H Roundup. The big day will be the 8th when winners will be determined in 25 statewide judging and demonstration contests.

The boys and girls who will be participating in the contests have already been named county winners and placed either first or second in their respective district elimination contests. They will be accompanied to the Roundup by their county extension agents, adult leaders and/or coaches. Also in attendance will be the members of the Texas 4-H Club Recognition Committee and the Friends of 4-H.

The annual barbecue, sponsored by the Recognition Committee, will be the program feature for the first evening of the Roundup. Director John E. Hutchison, Texas Agricultural Extension Service, will welcome the expected 1,300 delegates and others to A&M on behalf of the organization responsible for 4-H Club work in the State. After the brief program, each delegate will participate in an activity of his or her choice.

The contests will get underway — some by 7 a. m. — the following day and winners will be announced during the afternoon. A series of special activities planned and conducted by the different major parts of A&M College will be featured for early afternoon program.

For second evening program, the Recognition Committee will sponsor an entertainment program in Guion Hall. H. E. Burgess, College Station businessman and Chairman of the Committee, will introduce all members of the Committee who are present. After breakfast on June 9, the 4-H'ers will depart for home. Meetings of the Texas 4-H Council Roundup Committee and the Directors of the Recognition Committee are slated for the morning of June 9.

## Texas Spends Smaller Share Of Dollar On Schools Than 1950

Texas now spends a smaller share of its State dollar on public schools than it did ten years ago, the year of sweeping changes in school financing under the Gilmer-Aikin school laws.

One of the striking features of the latest annual "Trends" publication of the Texas State Teachers Association is the fact that the State spent 49.9 percent of its dollar on schools in 1949-50, the year before the State spent 51 percent on schools in 1948-49.

Like other State services, the total number of dollars spent for education has increased. But other State expenditures have increased at a faster pace, the figures indicate.

Much of the increased cost of schools, the research shows, has been due to the increased number of school-age children, plus the fact that they are attending school more.

"Trends" points out these significant changes in the last ten years: Scholastic population (5-17 years of age), up 33.6 percent; enrollment, up 46 percent; and average daily attendance, up 51 percent. To teach the 51 per cent more children in school, the total number of teachers has increased 49.4 percent.

The figures are: Scholastics: Up from 1,554,758 to 2,077,901. Enrollment: Up from 1,349,804 to 1,971,408. ADA: Up from 1,151,971 to 1,739,910. No. of teachers: Up from 54,934 to 82,088. With 2,168,000 school-age children for the 1959-60 school year, this means more than 1,795,000 children in school every day.

## Carey Safely Reaches Home From Hospital

Floydada. — Jim Carey is back at home at last after nine weeks and a day in John Sealy Hospital, where he was taken after suffering grave burns in an unusual fire on the Blanco cut off road near Harmony.

His mother, who had been with Jim for the entire period of his stay in the hospital, called Tuesday from their farm home at McCoy to say they had arrived safely and that Jim is happy to be back in Floyd County. He still has some infection and will have to return to the hospital in 30 days. Meanwhile the doctors tell the family he will do as well or better at home at the present stage of recovery as he would do at a hospital.

Jim suffered his burns about 11 o'clock the night of March 9. When his car failed to negotiate a corner it careened off a telephone pole and landed squarely atop a gas meter by the side of the road. The impact broke off the gas connections, and the natural gas flame was ignited by the exhaust of the car.

Unconscious Carey was lying on his back half out of his car with his feet in the burning vehicle.

First to reach him were Mr. and Mrs. Kenneth Bean and Mr. and Mrs. J. D. Webb of South Plains. They had been at a party at the home of Mr. and Mrs. David Battey Jr. They pulled Carey clear of the burning wreck and called an ambulance.

Carey was treated at Peoples Hospital and within a day or two he was flown to John Sealy. He lost both feet in the fire, and for a time it was questionable whether his life could be saved.

Mrs. Carey said so many friends had been good to them in so many ways they could never express the full extent of their appreciation, along with the happiness that their son is on the way to recovery.

## Floydada Youth Is Appointed To Air Academy

He will report to the academy July 1. Following completion of the intensive four-year course, he will be graduated with a bachelor's degree with the major course of study of his choice, and will be commissioned a second lieutenant in the U.S. Air Force.

Dempsey is president of the Floydada chapter of National Honor Society and maintains an overall grade average of 90.

He is captain of the Floydada High School Whirlwind Band and vice president of the Math Club. He lettered in football four years, basketball three years, track, three years and golf two years.

Dempsey is the son of Mr. and Mrs. Dennis Dempsey of Floydada.

## G. C. Collins Succumbs At San Bernardino

Floydada. — G. C. (Bud) Collins, for more than 30 years prominent in Floyd County as a farmer, business man and civic leader, died on April 30 at a hospital in San Bernardino, Calif.

He went to the hospital on April 25 and succumbed five days later, a brief note from Mrs. Collins to the C. W. Burton and J. M. Williams families said. He was buried at a cemetery there.

He was about 78 years of age at the time of death. He has no living relatives, except nieces and nephews in various parts of the southwest including Texas and California.

G. C. Collins and Mrs. Collins moved to Floyd County from Knox County about the year 1915. They farmed near Sand Hill for many years. They sold their Sand Hill farm to J. M. Williams in 1948 and shortly thereafter moved to California.

# NOW LOOK WHAT CORVAIR'S GONE AND DONE!

The same Corvair that tallied a thumping 27.03 miles per gallon\* in the Mobilgas Economy Run . . . went right on to climb Pikes Peak earlier in the spring than any car has ever tried!

We wanted to show you what the fabulous traction of Corvair's rear-engine design and the sure-footedness of four-wheel independent suspension really mean. So the identical Economy Run car went right on to 14,110-foot Pikes Peak—and right up to the top of that savage mountain, on April 15, still deep in winter's snow and ice. No other car—even specially equipped—had ever been able to conquer that nightmare alpine road so early in the spring. But Corvair (with United States Auto Club officials aboard to certify that not one nut or bolt was changed) purred right to the summit without chains or even snow tires! That just underscores the fact that Corvair is totally unique. But you'll find that out the first five minutes you're at the wheel!

### CROSS ROADS REPORT

Dear Editor: I see where some cities and towns are not satisfied with the verdicts being handed down by the census bureau as to their populations.

My all-round expert neighbor says you can't blame the metropolis for being unhappy, considering the custom of trying to keep up with the Jones City, and that quantity is easier to measure than quality.

But, it may be the government's policy of undercounting, so as to hold down the number of \$600 exemptions. D. E. SCOTT Crossroads, U.S.A.

### Wheat Referendum Is Set For July 21

College Station. — In line with currently controlling legislation, Secretary of Agriculture Benson has proclaimed marketing quotas on the 1961 wheat crop and set July 21 as the date for a referendum to determine producer approval or disapproval of quotas.

The Secretary also proclaimed a national wheat acreage allotment of 55 million acres, the minimum permitted by law and announced State shares of the allotment was set at 4,047,136 acres. This compares with 3,092,251 acres in 1960. An announcement was also made that the minimum national average support price for 1961 production will be determined before the wheat referendum on the basis of the latest available supply information.

If producers approve marketing quotas, under the proclamation announced, the national average support price available to eligible growers in the com-

mercial area will be not less than the minimum support to be announced before the referendum. On the basis of the present supply of wheat and present legislation, the legal minimum wheat support price for the 1961 crop would be at 75 percent of parity.

Individual farm marketing quotas will be the normal production or the actual production from the farm acreage allotment, whichever is larger. Growers in the commercial area who stay within their allotments will be eligible for price support on their entire production. Growers who exceed their acreage allotments will be subject to market quota penalties if they have more than 15 acres of wheat for harvest.

Growers who sign applications for exemption under the feed wheat provision permitting 30 acres or less to be used exclusively for feed on the farm will not be subject to marketing quota penalties.

If marketing quotas are not approved by the necessary two-thirds of the voting producers in the July 21 referendum, there

will be no restrictions on wheat marketings. Acreage allotments will remain in effect as a condition of eligibility for price support at 50 percent of parity as required by law.

Linda Cole of Hart, a former member of the Eighth Grade graduating class here, attended graduation exercises Tuesday night.

Kenneth Kendrick of Tucumcari, New Mexico, visited his parents, Mr. and Mrs. Ray James and Gayle Wednesday.
