### School Board Okays Raises For Custodians, Cafeteria Workers

After swearing in new trustees and reorganization of the board Monday night, Lockney Independent School District board of trustees rejected all bids on school-owned property near the elementary school, hired custodians, set salaries of cafeteria personnel, and hired a third-grade teacher for the remainder of the year.

PLAQUES OF APPRECIATION for service on the Lockney school board were presented to Bill Whitfill (center) and John Dorman (right) Monday night. Board president Tom Duvall (left) presented the plaques. Whitfill was a board member for nine years, Dorman for three. (Staff Photo).

Newly-elected trustees Eddie Joe Foster, Eugene Tannahill and Jerry Williams took the oath of office. Tom Duvall was again named president of the school board. Kenneth Brose is vice president. Austin Beedy secretary of the board. Outgoing trustees Bill Whitfill and John Dorman receive plaques of appreciation for their service on the board.

The board rejected bids of \$3,500 and \$2,750 on two corner lots across the street from elementary school.

Custodians Helen Dollar, Bertie Mae Phillips and Ray Dillard were rehired and received a \$25-a-month raise. Cafeteria workers also received salary raises.

Lynda Callaway was hired as third-grade teacher for the remainder of the school year.

Superintendent John Peck reported on the school-bus accident last Thursday and on an incident involving a high-school student and a teacher last week. The board okayed taking the damaged bus to Huntsville for repairs. There will be a called meeting of the board at 7 p.m. Monday, when trustees will meet in executive session to discuss discipline of the student.

Peck and tax assessor-collector Jack Samford made reports on proposed state school finance and operations legislation.

John Otey, the Cajun preaching person, will be the featured speaker at the Lockney Chamber of Commerce banquet tonight (Thursday). The banquet is scheduled to begin at 7:30 in Lockney Elementary School Cafeteria.

Otey is a native of Port Arthur, Texas and spent a major part of his childhood in Morgan City, Louisiana. Otey maintains that he is a total Cajun—one-quarter by descent and three-quarters by food and choice. A graduate of the University of Texas, Otey was in the field of Municipal administration prior to doing his theology graduate work at Austin Presbyterian Theological Seminary and becoming a Presbyterian pastor in 1964. (He is now minister at Covenant Presbyterian Church in Lubbock.) In addition to Cajun humor and Cajun cooking, Mr. Otey's other interests include bronze sculpture and orchid growing.

Mrs. Otey is an English teacher at Atkins Junior High School in Lubbock. The Oteys have four children, the two oldest daughters being students at Trinity University in San Antonio.

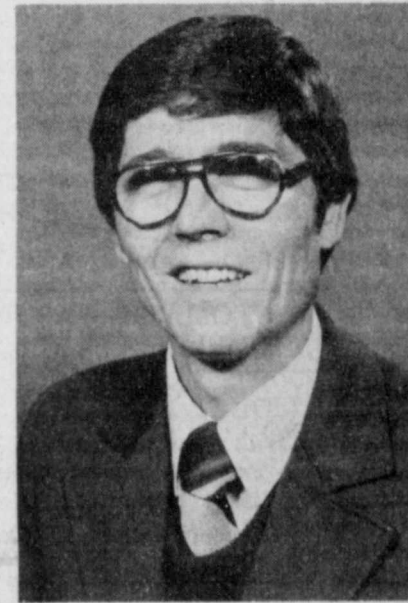

Also during the banquet tonight Lockney's "citizens of the year" will be named. The "man and woman of the year" are chosen by a Chamber of Commerce committee each year from nominations submitted by local organizations and individuals.

Newly-elected Chamber directors will be recognized at the banquet, and 1977-78 officers will be installed. James Race has been re-elected C of C president for the coming year. Other 77-78 officers include Paul Koonsman, vice president; Eleanor Schacht, secretary; and J. D. Copeland, treasurer. Ticket price of \$5 includes a roast-beef meal.

## President Carter Spends 50 Minutes With FU Presidents

WASHINGTON, D.C.—National Farmers Union officials from 22 states had a wide-ranging 80-minute discussion late Tuesday afternoon at the White House in which the farm group leaders indicated that "dismay" of the nation's farmers with farm commodity support rates established for 1977 and proposed for 1978.

President Jimmy Carter spent 50 minutes with the Farmers Union presidents, including Texas Farmers Union President Jay Naman of Waco.

The discussion included Vice President Walter Mondale and Secretary of Agriculture Bob Bergland. "I thought it was a worthwhile meeting," said TFU President Jay Naman. "The President expressed concern at the negative reaction from farmers to his proposed farm program."

"From the campaign assurances, farmers expected that support protection at the cost of production meant the full cost of production. What we have gotten so far is an almost straight-line extension of the Butz support levels," National President of the Farmers Union Tony Dechant said. "On top of that we are being nickel-and-dimed in the budget process."

President Carter said that "for the future we would like to have a stable agriculture with an aggressive export capability."

The President noted Monday's increases in support levels for 1977 and the recommended levels for the four-year farm bill and said he regarded them as "better than the Butz figures."

Carter said that the support levels would be reviewed, but gave no indication of when changes might be made. "There will be adjustments as we find them possible," he said.

The President asked the Farmers Union leaders to keep in close and frequent consultation with him and the Department of Agriculture.

"We trust your judgment and need your advice even if we cannot entirely agree," he said. "We're approachable."

Never pass up an opportunity to say a kind and encouraging thing to, or about, somebody, advises Mrs. Ilene Miller, family life education specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

If you have passed over citrus fruit with brownish surface marks on the skin, remember some Texas citrus may have "beauty marks".

Those marks are not a sign of inferior fruit, but are caused by the warm winds of the Lower Rio Grande Valley blowing against the young fruit as it's growing.

### Florida Freeze Affects Texas Citrus Market

AUSTIN--Texas-grown oranges and grapefruit are some of the juiciest and sweetest ever produced and have been damaged only by adverse publicity concerning damaged Florida fruit.

The Texas Department of Agriculture has reported a "serious marketing situation" in the lower Rio Grande Valley. Consumers began shying away from state-produced citrus in reaction to national publicity

depicting damaged fruit and predicting drastic price increases following the Florida freeze.

"We have more fruit on the trees for this time of year than in recent memory," commented Ed Miller, general manager of Texas-Sweet, Inc. "Oranges and grapefruit are just not moving. The situation is getting very serious."

Another citrus spokesman, Lesley Whitlock of the Texas Valley Citrus Committee, said the quality of the grapefruit and oranges was "better than ever."

"In fact," Whitlock said, "at this time of the year it is really at its best." He explained that the juice content was very high, the fruit very firm and that the longer the fruit--especially grapefruit--stayed on the tree, the higher the sugar content.

**Juli Ratheal, Joe Womack  
Exchange April 9th Vows**

Juli D'Ann Ratheal and Joe Keith Womack exchanged wedding vows Saturday, April 9 in the First Baptist Church in Floydada. Rev. Joe Perkins, pastor of the Pansy Baptist Church, performed the double ring ceremony at 4 o'clock p.m.

The bride is the daughter of Mr. and Mrs. Arnold Ratheal and the groom is the son of Mr. and Mrs. Bill Womack, all of Floydada.

The church sanctuary was decorated with an arched candelabra decorated with white gladioli, blue carnations and Shasta daisies along with green palms, holding long white tapers.

Two chandelier candelabras and palm trees decorated both sides with two large white baskets filled with white gladioli, blue carnations and daisies accenting the altar.

Mrs. Bob Copeland was organist and accompanied Christy Stringer as she sang "The Wedding Song" and "The Lord's Prayer."

Feminine attendants were Brenda Vickers, maid of honor; Mrs. Judy Lloyd and Christy Stringer, bridesmaids and Buffy Joyce McDowell of Crosbyton, flower girl and cousin of the bride. They wore matching floor length gowns of blue batiste trimmed with white lace. They carried spring bouquets accented with blue satin streamers.

Jason Fonten of Lubbock, cousin of the groom and Misty McCowell of Crosbyton, cousin of the bride, were ring bearers.

The groom's father served as best man and brothers of the bride, Randy and Rodney Ratheal were ushers. Groomsmen were brothers of the groom, Jay and Tracy Womack.

Escorted and presented in marriage by her father, the bride wore sheer illusion over bridal satin fashioned with Bishop sleeves, Queen Ann collar and fitted bodice. The neckline, bodice and sleeves were accented with re-embroidered lace, with matching lace forming the high crown of her tiered bridal veil. An underlay of illusion formed a long train which highlighted the graceful folds of the chapel length skirt encircled and bordered with French lace.

The bride carried a cascading bouquet of white bridal roses, stephanotis and gypsophylla, accented with long white satin streamers.

Lee Ann Abbe registered wedding guests and those attending the reception which followed the wedding. The serving table was laid with a floor length lace cloth over blue and held the bouquets of the bride and her attendants. Punch and wedding cake were served from crystal appointments by Nanette Burk, Beth Stovall and Candy Burrow, the latter of Crosbyton.

For travel to San Antonio, the bride changed to a beige and pink rosette street length dress with beige accessories. She wore a shoulder corsage of spring flowers.

Upon returning to Floydada, the couple will make their home southeast of Floydada where the groom is engaged in farming.

The groom's parents hosted the rehearsal supper at King's Restaurant Friday night. Out of town guests attending included Mr. and Mrs. Ricky Copp and Jody of Kansas and Mrs. Vicki Ochoa and Chris of Dallas.

Mr. and Mrs. Mac Baker of Las Vegas, Nevada announce the arrival of a new daughter, McKay, Denise, who was born April 7, weighing 7 pounds 15 ounces. The baby has an older sister, three year old Kasey. The mother is the former Patty Dempsey. Baker is an electrical engineer with EGG in Las Vegas.

Grandparents are Mrs. Dennis Dempsey and Mr. and Mrs. A. E. Baker all of Floydada. A great grandmother is Mrs. Charles Osborne of Kerrville.

Carter and Mrs. Carter sending their greetings.

LET me encourage the people of Floyd County to attend a meeting for a new Revenue Sharing Budget Adoption in the County Court Room Monday, May 9th, at 10:30 a.m. Mark your calendar for this date and make it a point to attend this meeting, which will concern how to spend revenue monies on improvement programs. The presence of every concerned citizen in Floyd County should be noted at the meeting. I encourage each and every one who possibly can to be present.

WELL...as one woman commented at the Hagood half price sale Tuesday morning, "This makes me think of Macys." I've never been to a Macy sale but if the crowd was any larger than Hagoods had Tuesday I wouldn't want to be in the hassle. This is the first time I've seen so many people on the west end of town. Women were not the only ones taking advantage of the "sell out bargains." Plenty of men were there, too. I remember a word the late Homer Steen used quite frequently, "behoove", and I'm behooved to Hagoods for the wonderful sale, but it

sure puts a lump in your throat when you know there will no longer be a Hagoods.

AS yet I haven't attempted to make the Sauerkraut Cake but Arvie Schulz tells me she has made them before and they are very moist and delicious. She said if your family turns up their noses at sauerkraut, they won't be the cake, as you can't taste this ingredient.

THE Billy Staniforths have returned home from a ten day trip to Galveston, along the Gulf Road into New Orleans and other points. They were accompanied on the trip along the coast by their daughter, Sara, who teaches in Houston. A highlight of their trip was a tour of the Houmas House, Tezucuo House and Rose Down House at St. Francisville, La., north of Baton Rouge. Since the crepe myrtle has been designated as Floydada's flower or shrub, Frances said she was most interested in finding 50 foot crape myrtles (first spelling) on the plantations which were imported from Europe before the Civil War. The beautiful gardens at Rose Down contained Azalias from the Orient, Frances said. None of the flowers were at their peak, but were beautiful. Frances said it was a very inspiring tour and one that anyone could certainly enjoy. The Staniforths returned home by way of Austin where they spent Easter with their son, Bill and family.

AFTER a teacher had told her class, "Now don't copy what other people write, simply write what's in you," one little boy submitted this: "Liver, veins, heart, stomach, one pear, two eggs, a cup cake and a glass of milk."

## Another Hearing Set On County Budget Proposals

Due to the absence of a commissioner Monday morning Commissioner's Court have scheduled another meeting for 10:30 a.m. May 9, 1977 for the Revenue Sharing budget adoption. Voting of the spending of Revenue Money was tied two to two and the lack of majority votes required the second meeting.

Bob Jarrett made the motion that proposed Revenue Sharing budget be changed from \$49,408 to the sum of \$59,289.60 for county precincts and that the Muncy Road project remain at \$20,000; Floyd County Museum, \$1,000; Day Care Center, \$1,000; High Plains Health and Mental Retardation Center, \$3,200 and drop the proposed \$24,208 for county library, agriculture

building and jail to \$14,326.40 for jail only.

Voting for the proposal with Jarrett was Grigsby Milton. Voting against the proposal were Judge J. K. Holmes and Aaron Carthel. Jack Lackey was unable to attend the meeting, therefore the motion failed for lack of majority requiring a second hearing on May 9.

Commissioners canvassed precinct and common school votes which were found to be satisfactory, then accepted the resignation of Floyd County Librarian Nita Merle Hull effective July 31, 1977.

Milton made the motion, seconded by Carthel, that the equalization board hearing be set for Wednesday, June 8, 1977 at 9 a.m.

## Sales Tax Man In Floydada Today

AUSTIN—State Comptroller Bob Bullock announced he is sending a representative from his Lubbock office to Floydada on Thursday, April 14th to assist local taxpayers and answer questions about state taxes.

Bullock said Enforcement Officer Raymond Bogus will meet with local taxpayers at the Floydada Court House—Room 103 from 10 a.m. to 12 p.m.

"If Floydada-area merchants, or anyone else for that matter, have any questions about state taxes or need help in preparing tax forms, Mr. Bogus will be there to assist them," Bullock

said. "We're trying to cut the red tape in this office and we believe these face-to-face sessions with taxpayers help do just that," Bullock added.

Bullock reminded those taxpayers who are unable to meet with his representative on April 14th that they can still get their questions answered quickly by calling his TOLL-FREE tax information number in Austin. That number is 1-800-252-5555.

The Lubbock office, headed by Donald F. Paxton, serves Lubbock and surrounding counties.

sales goal of \$200,000. Texas sales during the month amounted \$23,903, 984, while sales for the first three months of 1977 totaled \$67,751,895 with 24% of the yearly sales goal of \$276.9 million achieved.

## FACTS & FANCIES

Although people had been carrying watches around since 1504, the first wrist watch was not invented until 1790. It was made by Jaquet-Droz and Leschot of Geneva, Switzerland.

The word "minute" comes from a Latin expression which denoted one-sixtieth of a unit. A minute is one-sixtieth of an hour, just as a minute in geometry is one-sixtieth of a degree.

The electric stove was invented by William S. Hadaway in 1896.

The first president to broadcast in a foreign language was Franklin Delano Roosevelt who addressed the French people on November 7, 1942 from Washington, D.C.

## Letter To The Editor

Dear Editor:

As we approach another Tax Day (April 15), there are a couple of bills pending in the House of Representatives which will be of interest to many persons in the Floyd County area.

Some 54 million Americans are hit with an income tax penalty of up to 20% because they are single, or because they are married with both partners working. The Committee of Single Taxpayers (COST) has been working for several years to eliminate this inequity. To accomplish this goal, Rep. Ed Koch has again introduced HR 850 in the House.

Also pending in the House is HR 84, introduced by Rep. Herb Harris, which would make a beginning toward income tax equality for renters, similar to what has for so long been available to homeowners.

Anyone interested in more information about these bills is urged to send a long, self-addressed stamped envelope to me at the address below, mentioning that this letter was read in the Floyd County Hesperian or Lockney Beacon. Thank you.

Sincerely,

## "Living Proof" Involving Baptists

"LIVING PROOF", an unparalleled \$1 million media evangelism campaign featuring testimonies by well-known personalities such as Houston Oiler Billy "White Shoes" Johnson; actor Dean Jones; former militant Eldridge Cleaver; country and western super stars Jeannie C. Riley and Connie Smith; successful businessman Allan Mayer of Oscar Mayer Company; Miss Teenage America, Rebecca Ann Reid; Rosargentina Pinel, Consul General of the Republic of Honduras; former band leader Paulino Bernal; and Antonio Mendoza of the U.S. Office of Equal Employment who have experienced changed lives through commitment to Jesus Christ is being funded by Texas Baptists.

Large numbers of professions of faith have marked the first wave of media saturation and revival meetings since the campaign began February 21

in North Texas. According to a recent issue of The Baptist Standard, many persons have responded to the "LIVING PROOF" testimonies by writing to Box 1000, Dallas, Texas 75221.

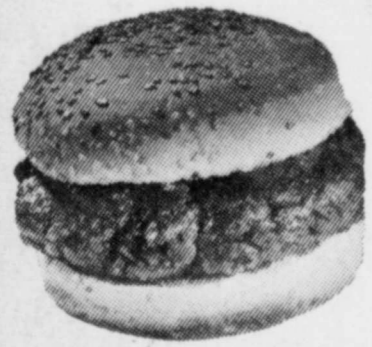

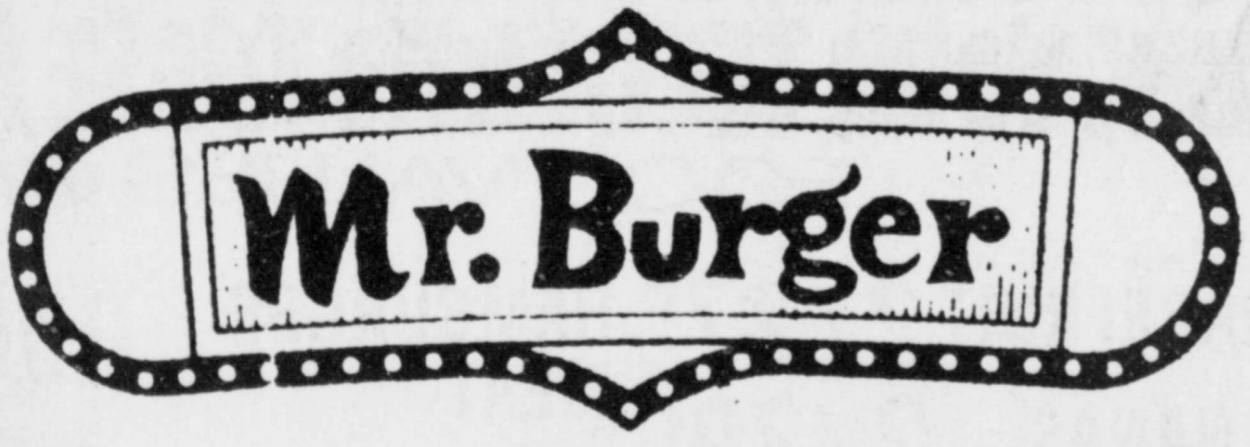

The primary response, however, is expected to come from local Baptist churches and people who have experienced "LIVING PROOF".

West Texas saturation began March 28, and churches in the area are in the process of holding revivals to climax the campaign. In the Floyd County area, Baptist Churches scheduling revival meetings in connection with this campaign include: First Baptist Church of Floydada and Lockney.

## Limited Water For Wheat Farming Discovered

Bushland, Tx.—Growing as much crop as possible with limited water is the name of the farming game in West Texas.

Alternating irrigated and dryland wheat on the same field will increase wheat yield according to Dr. Paul Unger, USDA Soil Scientist at Bushland. Studies conducted over 4 years show that this system will increase total yield about 10 percent over continuous dryland or continuous irrigated wheat on separate fields. Alternating dryland and irrigated wheat averaged 52 bushels per acre while continuous dryland and irrigated wheat averaged 47 bushels per acre when the same sized areas were in dryland and irrigated wheat.

Prior to starting this research, the Agricultural Research Service Scientist had found that some water remained in the soil after irrigated wheat was harvested. Some of this water usually percolates out of the root zone when fields are irrigated each year. This would not happen if the extra soil moisture was utilized by a dryland crop. Unger said, "Dryland studies at Bushland by Dr. Wendell Johnson show that an inch of moisture in the soil will produce 3 bushels of wheat per acre."

Unger's experiment was designed to test the supposition that dryland wheat

would benefit from soil water remaining after an irrigated crop. In addition, he checked disking and sweeping for tillage in both the continuous and the alternating systems. With irrigation, beds were formed prior to planting with either tillage method. Dryland plots were left flat. Ammonium nitrate fertilizer was used. Irrigated plots received 120 pounds per acre of nitrogen. Tascosa wheat was planted at 30 bushels per acre on dryland. One bushel per acre of TAM-101 was planted for irrigation.

Unger found that sweep tillage increased irrigated wheat yields 4 bushels per acre over disk tillage. Continuously irrigated wheat tilled with a disk produced 65 bushels of wheat per acre. Irrigated wheat that was plowed with sweeps made 69 bushels per acre when it followed a dryland crop. The 4-bushel-per-acre increase was a bonus Dr. Unger did not expect. Soil moisture measurements proved that sweep plowing stored more soil moisture between crops than disking.

Tillage tool did not make any difference on dryland wheat yield. However, continuous dryland wheat tilled with sweeps yielded 31 bushels per acre while dryland wheat followed irrigated wheat yielded 35 bushels per acre.

Average yield for continuous dryland and continuous irrigated wheat grown on

separate areas was 47 bushels per acre. Where dryland and irrigated wheat were alternated, yield increased to 52 bushels per acre. Unger states that this extra 5 bushels per acre of wheat is profit. The alternate system took the same amount of

irrigation water as continuously irrigated wheat, provided equal areas were irrigated. "Farmers having a lot more land than irrigation water will find that alternating irrigated wheat with dryland wheat will pay dividends," Unger said.

**AGENTS SUPPORT KEY ISSUES**—The Texas County Agricultural Agents Association at its recent annual meeting in Waco pledged a united front in support of several key agricultural issues in Texas. Four major resolutions included support of Gov. Briscoe's goal "to make Texas No. 1 in agricultural income;" support of the

Screwworm Eradication Program; full support for Dr. H. O. Kunkel, dean of agriculture at Texas A&M University, and his vision for Texas agricultural production to play a key role in supporting the growing world population; and full support of Dr. Daniel C. Pfannstiel, director of the Texas Agricultural Extension Service, in providing leadership and service to the people of

Texas and to Texas agriculture.

## Calories And Weight

**COLLEGE STATION**—What calories do—and don't do—to weight control is often confusing.

"Technically, a calorie is a unit of measurement equal to the amount of energy required to raise the temperature of a liter (about a quart) of water by one degree centigrade. Bodies use this energy for breathing or moving," Mrs. Mary Sweeten, a foods and nutrition specialist, says.

Calories are provided by the food eaten. Each gram of sugar and starches (carbohydrates) gives four calories, for protein, four calories per gram, and for fat, nine calories per gram. If a person eats more calories than he needs, whether it is in carbohydrates, proteins or fats, then he gains weight—if he consumes less, then he loses weight, the specialist with the Texas Agricultural Extension Service, The Texas A&M University System, says.

"One pound of fat is equal to 3,500 calories. By eating 500 calories a day more than you need for one week, in one week you have gained one pound. If you eat 500 calories less than you need in a day for a week, then you lose one pound.

"Nutritionists have been aware of energy as it relates to weight control for many years. Since 1770, it has been known that you take less energy when resting at a comfortable temperature, twelve hours after your last meal, so you need less calories during the night. It takes more energy to digest a meal, when you are exposed to cold or exercise, so you burn up more calories during this time."

Research over the past two centuries has shown that an adult requires the following:

Activity—Rest: 1800 calories per day for man, 1500 for woman.

Activity—Much Physical Activity: 2400 per day for man, 2100 for woman.

Activity—Greater Activity (Sport): 3000 per day for man, 2600-3500 for woman.

"A trained male athlete may use between 3,500 to 5,000 calories per day. Children require more energy in proportion to their weight, because they are growing, active and have more body surface to keep warm. Pregnant mothers require 300 more, and nursing mothers require 1,000 more calories a day—both require more energy.

### As It Looks From Here

Omar Burleson, M.C. 17th District, Texas

WASHINGTON, D.C.—NOTHING SEEMS QUITE AS PERMANENT as a temporary Government program. Year by year the Congress continues to extend supplemental unemployment benefits beyond the 39 weeks available under the regular Federal-State payments. The unemployment program has been in effect for many years, paid for by employers. The additional 26 weeks of benefits are paid from general revenues which means the costs come from all taxpayers of the Nation.

JOBLESS BENEFITS CAN NOW REACH the maximum of 65 weeks in States with a rate of 6% or more unemployment. This drops to 52 weeks when the rate is between 5 and 6%. The sum of 500 million dollars is budgeted for the payments between now and October 1. The various States administer the program with Federal "guidelines." Some States are more "liberal" in determining payments than others. California and New York are the big beneficiaries under this program. The bulk of all payments will go to a few States which provide high benefits. Texas has one of the best administered programs in the Nation and, because of our comparatively low unemployment rate and because it is well run, we just about draw a goose-egg in this extended benefits program but we help pay for it.

THIS PAST WEEK THE "TEMPORARY" ADDITIONAL COMPENSATION PROGRAM was passed by the House of Representatives. The Senate had approved the legislation a few days before to which was attached an amendment requiring future pay raises for the Legislative, certain Executive and Judicial officials, to be voted on by recorded vote. This had an appeal since the recent increase in salary for Members of Congress, Cabinet and other Executive officials and Federal Judges, came under such heavy criticism. Some Members, but certainly not all, voted for the increase in unemployment compensation, hoping to "get off the hook" for their previous support of the pay raise. It had a real wholesome sound (as if another raise was about to occur, the fact being there definitely is not going to be any for years in the future and just maybe never).

THE SENATE WAS ON RECORD AND VOTED FAVORABLY on the recent pay raise but the House, under parliamentary procedures, avoided it. Unlike the House of Representatives the Senate can put an amendment on a bill which has no relevance to the measure but the House, under its rules, cannot do so. The House has the rule of "germaneness" which requires any amendment to relate to the subject of the legislation. This more nearly accounts for this amendment. As a matter of fact, there is already legislation avoiding automatic pay increases. An amendment recently adopted in the Budget committee prohibits increases which otherwise would occur in October.

THERE WERE ONLY TWO VOTES against the measure on extending benefits for unemployment compensation: this Member being one of those two. The vote was cast on the judgment that, first, there is a big question as to the rate of unemployment; the fact that our State is on the short end of any benefits; the further fact that every dime of this money has to be borrowed, adding to the Federal deficit and; the further fact that unemployment is dropping as the economy improves. The States with the high payments are a drain on those who try to hold a reasonable line on these costly payments but reap the greatest benefit. These payments and other available benefits which make it more attractive not to work than to work simply cannot be justified.

Clark and Lucille were taken sightseeing in the Wenatchee area (a fruit growing region along the Columbia River); they report cherry and apricot trees were in bloom. At Richland, Washington, they toured that part of an Atomic Energy Plant open to the public. They also toured the sights of Seattle. Mr. Olan Poteet entered St. Marys Hospital, Lubbock, Tuesday of this week, and is scheduled to undergo surgery on Wednesday, April 13th.

### The Scientists Tell Me...

#### Peppers are "Hot Stuff" In Texas and U. S.

By Robert L. Haney  
TAES Science Writer

increasing U.S. market demand has stimulated interest in domestic production centered in Texas.

Peppers can be grown in all areas in Texas but climatic conditions and varietal differences yield peppers that are extremely hot and lacking in flavor. Existing commercial jalapeno varieties exhibit tremendous variability in pepper pod shape, size, heat and flavor.

The greatest factor limiting the profitable production of any type of pepper in Texas is the prevalence of virus diseases. The problem is serious enough to warrant a wide ranging research project by the Texas Agricultural Experiment Station at the Weslaco Research Center under the direction of Dr. Ben Villalon.

Villalon, a plant pathologist trained in virology and genetics, named the viruses in order of importance as tobacco etch virus (TEV), potato virus Y (PVY), tobacco mosaic virus (TMV), cucumber mosaic virus (CMV) and tobacco ring-spot virus (TRSV).

No effective control measures for virus diseases in pepper are available or practical. The best alternative is searching for and finding genetic resistance.

A substance called capsaicin, located in a lining or membrane on either side of the partition walls of many different pepper fruit, has been characterized as the heat source of hot peppers. Hot pepper, such as the fiery chile piquin, is native to the extreme South Texas area. The longer slim hot chile serrano and thicker chile jalapeno are commercially grown farther south in Mexico around the Tampico-Veracruz area.

The cost of the imported product has risen from about \$3.50 per 6 gallon carton to over \$10.00 in the past 3 years. This sharp price increase caused by decreasing Mexican pepper acreage and

been done. Many other plant species, especially the wild types along roadsides and ditches, harbor the viruses.

Resistance to TEV, PVY, and TMV has been found in some primitive Mexican hot peppers. This resistance has been transferred by cross-pollination to most commercial varieties including sweet bells, Anaheim chilies, jalapenos, pimientos, cayennes, cherrys, serranos anchos and some yellow types.

With the help of the Lower Rio Grande Valley's subtropical climate allowing for the production of two crops a year, the breeding program, now in its seventh year, has made considerable progress in pepper improvement. Villalon and his co-workers are approaching release of several virus-resistant varieties within the next year or two. The improvement and variety program has now become a state-wide research project.

Virus-resistant varieties will benefit consumers, home gardeners and commercial producers. And the entire state will benefit with another profitable addition to our growing economic strength in agricultural production.

**Floydada Nursing Home Happenings**

By Faye Walters

"They shall hunger no more, Neither thirst any more; The Sun shall not strike them, Nor any scorching heat. For the Lamb In the midst of the throne will be their shepherd, And he will guide them To springs of living water, And God will wipe away every tear from their eyes." We all feel that Della is in this place now and will never have to suffer any more. Della Finley had been to Lubbock for several weeks when she passed away but

we still felt like she was one of us at the Nursing Home. We all loved her and will miss her. The staff and residents send our sympathy to her daughter-in-law, Georgia Finley and her grandchildren, George Ray Finley and Mary Ann Ferguson.

We have had real good devotions this week and thank everyone who took part in them.

Tuesday was manicure day and a lot of nails were very pretty.

We have had good exercise classes and some new ones attended. Mollie Jones and Icy Biggs were new class members and seemed to enjoy it. We are happy to have them.

Wednesday we took a field trip and had two new ones to go, Mollie Jones and Dotia Manning. Also taking the trip were the driver Mr.

Freeman, Henry Love, Agnes Anderson, Florence Badgett, Dora Langford, Hope Hammonds and myself. It was an enjoyable trip.

Thursday was bingo day and the top winners were Agnes Anderson and Clara Williamson with 3 games each; Hope Hammonds, Hallie Bertrand, Ray Reed and Willie Mae Stambough all won two games each. We hope Icy Biggs and Mollie Jones will feel like playing next week.

We are happy to announce that Myrtle "Mom" Buchanan celebrated her 101 birthday Saturday, April 9th. We all hope she has many more happy ones.

We appreciate all our visitors this week which included Sue Moore, Mrs. Mary H. Wilson, Mrs. George Wexler, Alma Ruth Nelson, Mrs. Carrie Snodgrass, Mrs. Woodrow Hill, Estell Hinkle, Mary Stanley, Mable Smith, Otis and Dorothy Anderson; Flora Fawver, Hattv Thomas, Floydada, Hershel and Ruth Fields, Carthage, Missouri, Paul and Jeanette Buchanan, Bois D Arc, Mo., Josephine Smith, Lockney, Verdie Smith, Lockney, Sally Rogers Victoria Asher, Hazel and Kim Bradley, Frances Badgett, Lisa and Ferne Anderson, Mr. and Mrs. Hubert Davis and Edd and Dorothy Neff all of Floydada.

**Takes A Possibly Inadequate Look**

**At The Senate's New Ethics Bill**

Editor's note: The Floyd Philosopher on his Johnson grass farm takes a sidelong glance at the Senate's new ethics bill this week.

Dear editor:

As I understand it, the U.S. Senate has passed an ethics bill. It's not, as some people first thought, a bill banning ethics. No, no, it's another branch of the government that's in charge of banning, and it was saccharin, not ethics, that was banned. Nobody has yet proved that ethics causes cancer in rats.

The Senate bill attempts to define ethics for the benefit of any Senators who heretofore didn't know what it was.

It was no easy task. It was like Lewis and Clark exploring the west. They were in unfamiliar territory.

Mainly, the bill declares that a Senator's warned income from the outside, like money accepted for making speeches before his committee, can't exceed 15 per cent of his yearly salary, which is now \$54,000. That means he's limited to \$8,600 a year in earned income. Any bribe beyond that is unethical. What "earned" income is threw the Senate into an uproar. Some members were afraid it

meant they had to earn their regular Senate salary and they weren't about to vote to have their pay cut in half. Senators with large holdings such as oil and gas wells, stocks and bonds, certificates of deposit, family businesses, etc., didn't want to have to limit their outside income to \$8,600 a year. That'd be carrying ethics too far. It costs that much just to keep a kid in Harvard, and more than that to keep him out of jail.

Another thorny problem was how to classify the income of a Senator who owns a farm and spends his weekends telling his hired hand what to do. Should his farm income be limited to \$8,600 a year? This buffaloes me. I've always thought it ought to be against the law for a farmer to make less than \$8,600 a year, not more. If that Senator can do it just on weekends, he ought to be Secretary of Agriculture.

The gist of the ethics bill as finally boiled down and passed is that a Senator cannot ethically get paid for more than \$8,600 worth of speeches a year. It sets no limit on the amount of free speeches he can make.

The bill doesn't go far enough.

**Brown Takes Over State Ag Department**

**NEW COMMISSIONER**--Reagan V. Brown has been sworn in as the seventh Texas Commissioner of Agriculture. Brown, a special assistant for agriculture and rural development on Governor Dolph Briscoe's staff, is from Bryan.

AUSTIN--Reagan V. Brown of Bryan has been named the seventh Texas Commissioner of Agriculture since the position was initiated in 1907.

Brown was appointed by Governor Dolph Briscoe to serve out the remaining term of John C. White, recently named U.S. Deputy Secretary of Agriculture to the Carter cabinet.

A popular public speaker throughout the state, Brown has been a special assistant for agriculture and rural development on Briscoe's staff since March, 1974. He has been in charge of rural development and agricultural programs and has been involved with industrial and job creation programs.

Bringing his knowledge of agriculture from nearly 30 years with the Texas A&M Agricultural Extension Service, Brown has pledged his efforts to see Texas the number one agricultural producer in the nation.

In accepting the nomination, Brown included energy, water, cattle prices and soil depletion among the major agricultural problems being faced in the state today. He also stressed the need to keep Texas farming and ranching profitable.

The new commissioner holds masters' degrees in rural sociology and educational psychology. For many years he was in charge

of community improvement with the Extension Service and has served as county agent in three counties.

During his service at Texas A&M, he organized 1,000 rural community improvement programs and was named "Man of the Year in Texas Agriculture" by the *Progressive Farmer* magazine in 1968.

**Added Moisture Generally Aids Dry Cropland Throughout State**

AUSTIN--Recent rains were a welcome sight in most areas of the state, although excessive amounts caused flooding in North and East Texas, according to the Texas Department of Agriculture.

The widespread rain should offer some relief to hard-hit fields on the Plains and Edwards Plateau. Some farmers in the Edwards Plateau and a few East Texas areas had delayed planting until rain fell, the Texas Crop and Livestock Reporting Service has

reported, and progress should be in full swing this week.

Cotton planting continued active in Central and South Texas and is currently four per cent complete, well behind the 1976 rate of eight per cent. Many fields in the Lower Rio Grande Valley are up to good stands, TDA experts say, with some worms reported in early fields in South Texas and the Coastal Bend.

Sorghum planting jumped ahead again last week and is now 38 per cent complete,

**77 Onion Crop 'Crying Shame'**

AUSTIN--The 1977 spring onion crop will most likely have everyone in tears -- both the consumer and the producer -- since this year's harvest will be almost half that of 1976, according to reports from the Texas Department of Agriculture.

Cool, wet weather throughout the winter months have slowed crop development and normal cultivation for weed control, and have slashed yields in the Lower Valley, Laredo, and San Antonio Winter Garden areas. This year's crop, which should go on the market this week, is the smallest since 1966.

A total of five million 50-pound sacks are to be harvested, according to the Texas Crop and Livestock Reporting Service, compared to 9.7 million sacks last year. Prices are already reflecting the shortages, with jumbo onions selling for \$18 per 50-pound sack and \$14 to \$15 for medium onions.

Marketing experts predict that prices will remain at that level throughout the season, possibly rising even higher.
