Wheat Harvest Begins

Nichols Harvests First Lockney-Area Wheat

Weather permitting, two good weeks of combining and one of Floyd county's best wheat crops will be in the elevator...or stored on the farm.

Limited storage all over the United States means more wheat must be stored in farm granaries. Although this is not the largest

acreage for the county, it could very well be the best per acre yield in many years. Possibly the first Floyd wheat to

reach an elevator arrived at 7 p.m. Friday at Producers Cooperative elevator in Cedar Hill. Raz Ware brought in a load from "down below the hill" that had been hailed on and was making around seven bushels per acre. Raz brought in the first load last year...on the same date, but little earlier in the afternoon.

D&P Grain Company in Dougherty received some wheat as early as last Monday but it was not produced in Floyd county. It came from the Matador area and was making around 20 bushels per acre.

The current market price for wheat is a low low \$1.91 per bushel, and will go in the government loan at around \$2.07 plus protein rating.

Custom combine operators will begin moving into Floyd county today according to one elevator operator.

The total wheat harvest bushel tally will be off what it could have been had not hail struck the area northeast of Floydada and south of Dougherty.

ALVIN NICHOLS, who brought the first load of 1977 wheat to a Lockney-area elevator Monday afternoon, and custom harvester Dennis Priebnow (kneeling) from Fergus Falls, Minnesota check out machinery before continuing the harvest Tuesday morning.

LOCKNEY AREA

The first 1977 load of marketable wheat brought to a Lockney-area elevator arrived at Lockney Cooperatives South Plains facility at 5 p.m. Monday.

Alvin Nichols, the producer, donated the \$25 premium from the Lockney Chamber of Commerce to the Lockney Volunteer Fire Department.

The "first wheat" was cut from a dryland field three miles south and a mile east of South Plains. The 26,420-pound load tested 13.28 percent moisture. Test weight was 60 pounds. Nichols estimated the yield, from a hail-damaged field, at about 18 bushels per acre.

HALE COUNTY WHEAT

PLAINVIEW(spe)-The first 1977 wheat crop in Hale County is yielding 40 bushels per acre on dryland.

County Agent Ollie Linder reported on the yield of wheat delivered by Mike Price of Plainview from land 2 miles west of the Happy Union Community.

"The county average for dryland wheat is 12 to 15 bushels and the county average for all wheat, dryland and irrigated, was 34 bushels in 1976," Linder said.

The grain tested 13 percent moisture content when it was delivered Friday to the Happy Union Elevator.

Linder credited the yield to good winter and spring moisture.

Plainview has received 12.91 inches of rain since the first of the year, compared to 4.24 inches for the same period in 1976.

C Of C Starts Membership Drive

Lockney Chamber of Commerce is conducting a membership drive, and C of C directors have been divided into two teams, competing to see which will sell the most 1977-78 memberships. Chamber president James Race announced the contest at the monthly directors' meeting Monday morning. Apparently there is no reward to the winning team, but the losers' chairman will get a "booby prize," Race promised.

Omar Burlison and David Turbeville are team leaders. Burlison's team consists of Eleanor Schacht, J.D.

Copeland, Chuck Wilson, John Tye, John Belt, David Frizzell, John Peck and Laverne Christian. Turbeville's team members are Boyce Mosley, Paul Koonsman, Van Bradley, Paul Glasson, George Sprakman, Rainey Davis, Roy Howell and Maria Arellano.

After a discussion of the need for a new Chamber of Commerce brochure for Lockney (the present one, printed "probably sometime in the early sixties," was judged outdated), Race appointed Chuck Wilson Chairman of a committee to gather information about a new brochure. Co-chairman of the

committee is Eleanor Schacht, and they are to be assisted by Boyce Mosley.

Other committee appointments announced Monday included these: 1978 Banquet Speaker Committee—George Sparkman, chairman; Roy Howell, co-chairman.

Old Fashion Saturday Night—J.D. Copeland, chairman; David Frizzell, co-chairman.

Christmas Decorating—Van Bradley, chairman; Paul Glasson, co-chairman.

John Peck reported that about 80 persons attended the May 15 open house for Lockney Housing Development Corporation's new apartments. Three renters have moved into the 10 unit complex, and another application is being processed.

FIRST SWIM...Rainey Whittington, one-and-a-half-year-old daughter of Mr. and Mrs. Jack Whittington, is a little bit apprehensive about her first dip in the kiddie pool at Lockney Swimming Pool. The pool opened for the summer Saturday, and pool manager Violet Cooper reported good crowds for the first several days of operation. (Staff Photo)

Busy Saturday For Sheriff's Officers

Floyd Sheriff Fred Cardinal and his deputies experienced a busy and exciting Saturday as they arrested a lot of people with alcoholic beverages and investigated a drunken brawl near McCoy.

Deputy David Hart in Making a routine traffic stop on the Ralls highway Saturday afternoon arrested Ernest Johnson of Floydada and he was charged in J.P. Court with transportation of alcoholic beverages and is out on \$1500 bond. (five cases beer, one case wine)

Later that day two liquor control officers from Lubbock and the sheriff's department arrested Buddy Jenkins at his home in northeast Floydada and charged him with possession of alcoholic beverages. (16 half pints of whiskey and some beer). He is out on \$1500 bond.

Saturday night Floydada's Ruby Jones outran Lockney deputy Olin Poteet, but the liquor control officers caught and arrested her in Floydada. She was charged with possession of alcoholic beverages and released on \$1500 bond. (10 cases beer). Poteet first sighted Ruby in her auto on the Ralls highway headed toward Floydada.

BRAWL

However, on arrival the officers discovered only one injured man and the rest had "taken off." No arrests were made.

SOS This Is The Year

As in no other year since the eradication program began in the southwest in 1962, this year ranchers and the state and federal governments stand an excellent chance of stamping out screwworms once and for all.

Screwworms—the larvae of the screwworm fly and a deadly parasite of all warm-blooded animals—continue to plague the southwest in spite of efforts to push the fly south of the U.S.-Mexico border. Some years have been good years in the battle against screwworms. Other years, such as 1972, have been bad. But each year brings the renewed hope that screwworms can be eliminated from the United States forever.

Why is this the year to wipe out screwworms? Several things make this year unique:

(1) The weather is on our side. The cold winter has kept most screwworm flies dormant, inhibiting mating and thereby reducing the fly population ranchers will have to face in the spring;

(2) The new screwworm production plant near Tuxtla Gutierrez, Mexico, opened in July 1976 and has been producing millions of sterile flies ever since. Over 200 million sterile flies now are being raised each week in Mexico. Added to the Mis-

sion production, that gives the program about 400 million sterile flies each week to use in the stamp out effort:

(3) A new strain of sterile flies—many feel the best strain ever—was introduced last spring and seems to be a strain of "super flies." Scientists believe that this "009" strain is the first time a complete strain change has ever been made at Mission. This means we now have flies which fly and mate at the same time the wild fly does—in short, a competitive, aggressive sterile fly.

These three points, added to the ongoing hard work at the Mission, Texas, screwworm plant, make 1977 THE year for ridding the U.S. of screwworms.

There's only one catch. Sterile flies cannot do the job alone! It is not an excuse, it is the simple truth. Sterile flies only work when the fertile population is low. The fertile population is kept low by rancher cooperation such as treating all wounds and postponing wounding operations. The screwworm pro-

gram needs your help more than ever this year. It's an old refrain—Inspect, Collect and Treat—but this year it's the song of success.

Only if everyone—especially ranchers and pet owners—cooperates fully by inspecting animals frequently for screwworm infested wounds, by collecting worm samples and sending them in to the Mission plant for identification and by treating all wounds with approved insecticides, can the weather, the Mexico plant and the new fly strain make a difference.

So, if you own any animals at all:

—Inspect, Collect and treat.

—Postpone until cool weather any livestock handling operation which could cause screwworm attracting wounds.

The weather is on our side. The fly strain is on our side.

Mexico is on our side. Are you on our side? Join Mission '77 and help stamp out screwworms forever.

Quick Vegetable Preparation Key to Spring Salad Success

AUSTIN—Spring days and Texas-grown salads make perfect go-togethers and the Texas Department of Agriculture (TDA) home economist suggests serving hints which enhance both the flavor and nutrition of any favored recipe.

"Once a food is picked or becomes overripe, the enzymes which have been working to make vitamins, begin, instead, to allow oxygen to break down nutrients," explained Cindy Hamm, TDA home economist.

"It is therefore paramount to prevent as much of the enzyme action as possible in order to maintain both flavor and nutrient loss," she said.

Always wash vegetables or fruit carefully but quickly, using only cold water, since enzymes act best in warm temperatures. Rinse and drain, then dry thoroughly, because water left clinging to the surface can take up nutrients and flavor.

Never soak vegetables in

water to "freshen" them, Hamm cautioned. Soaking or slow washing dissolve nutrients and sugars which ruins the flavor.

As soon as you have prepared the foods, chill as quickly as possible, using a covered refrigerator pan or plastic bags if your refrigerator is not moisture-controlled, she explained.

Hamm added that enzymes which destroy vitamin C are inhibited by acid, so that the addition of lemon juice or vinegar to vitamin C-rich foods such as avocado helps to prevent vitamin loss and discoloration.

Also, contact with any equipment which contains copper destroys vitamin C in the food instantly, turning the surface brown.

"Fresh salads provide essential nutrients and bulk to the diet and, when prepared with care, are a flavorful addition which are important to every meal," Hamm said.

SUPER SPRING SALAD—Proper preparation of the freshest Texas-grown vegetables makes spring saladtime.

NEWS 'N' NOTES

(by Sharon Hillis)

CHILDREN'S CAR SEATS

In a car, children need the vital protection only a car seat or harness can provide—but all are not safe for every child or car.

All children who weigh less than about 40 pounds need a restraint designed to protect their developing

CAR SEATS

bone structure. Adult lap belts can cause internal injuries under some circumstances. However, an adult seat belt is better than no restraint device at all.

Also, not all child carriers are safe. Be sure to buy "crash tested" restraints. Some restraints that "meet or exceed federal standards"

are not crash tested—and that is the only way to be sure the child restraint you buy is safe.

INFANTS

For infants up to 15 pounds, look for a tub-like infant carrier that faces rear. Expect the infant to outgrow the infant carrier between six and nine months of age, although use it as long as it fits the baby comfortably.

Some infant carriers are designed to convert to a child seat, thus saving the cost of a second, larger restraint.

Some civic groups rent infant carriers—ask community groups about this service or if they will consider it as a civic project.

For children who can sit erect, there are several styles, including a molded seat with an impact shield, a chair with a harness, and a harness alone.

CHILDREN 15-30 POUNDS—In buying a harness type restraint, be sure the straps are wide. For children who weigh between 15 and 30 pounds, the molded seat with an impact shield that the adult lap belt fastens around is a good choice. Children who weigh over 30 pounds may become restless and find the impact shield too restraining. Some

styles offer both an impact shield and harness.

CHILDREN OVER 30 POUNDS—Chair styles with harness are especially comfortable for children weighing more than 30 pounds. Look for seat backs high enough to protect against whiplash—and padded wings at eye level for protection in a side collision.

The harness-only type of restraint is much less expensive than other types and is effective protection.

However, it is best used in the center rear seat where there is less chance the child will be hurled against doors and other internal surfaces in a crash. Of course, that means the harness is not appropriate in subcompact cars without a rear center seat belt.

In addition, as parents shop for children's car seats or restraints, they may want to be sure the restraint will fit their child and allow for some growth, fit into their car—try it in the car before buying—and be easy to install and transfer from car to car to fit the needs of the family. Also, be sure all adults in your car fasten their own safety belts. Many small children have been hurt when an unbelted adult crushed them in a crash.

Lakeview News

(By Penny Golightly)

Wheat harvest is upon us, and I will be working at the Lakeview D. and P. Grain. I will try to have the news in next week, but I know everyone else will be busy with wheat also.

I learned more about polo and polo horses today (5th) from Greg Bishop. We were discussing horses and we got on the subject of Monty Williams riding polo horses for a polo team on the Harold Berry ranch near Truscot, Texas. Mr. Harold

Berry has a son, Joe Berry, on the polo team. The team travels to the north and north eastern United States and to South America. Monty rides the young horses to get them ready for the sport. Joyce tells me the Harold Berry family is very down to earth considering the places they have traveled. The ranch family and working members do things the way they used to be done. For example when the farrier (horse shoer) comes, they all quit ranch work and go fishing. When they get fishing out of their systems, then they shoe the horses.

Mr. and Mrs. Q.D. Williams visited friends in Morton Sunday. They brought home Joanie and Brittany. Memorial day Mr. and

Mrs. Howard Bishop had a cook-out at their ranch in Roaring Springs. People present were Mr. and Mrs. Dee Adams, Mr. and Mrs. Q.D. Williams, Mr. and Mrs. Bob Cooper, Mr. and Mrs. Norman Muncy, Mike and Greg Bishop, Roland, Janice, and Misty Adams camped out on the Bishop ranch, but they were gone before the others arrived.

Mr. and Mrs. Donny Guess (former Cheryl McClintock) their two children Amy and Bryan Guess were home for the weekend. They visited Mr. and Mrs. Dwane McClintock, Dayne, Penny and cousin Rance Golightly. They came to see our registered filly, but had a surprise for all of us. They had brought a new van.

Mr. and Mrs. Holt Bishop went to Electra, Texas on the Memorial weekend. They went to see Mrs. Bishop's son and his family Mr. and Mrs. Gary Holt.

Mr. and Mrs. Leonard Alexander attended a family affair honoring Mr. and Mrs. W.M. Hambright on their Golden Wedding Anniversary Sunday. It was given by Mr. and Mrs. Hambright's children, Mr. and Mrs. Gordon Hambright, Mr. and Mrs. Bob Hambright, and Mr. and Mrs. Billy Joe Hambright in the First Baptist Church.

Mrs. Odell Breed is in the Central Plains hospital in Plainview. She had an ulcer

operation last Tuesday.

Last Monday at the Byron Kendrick's home was a family reunion. The reunion was Helen's mother's side. Members of the family present were Mr. and Mrs. Fred Thayer and family, Mrs. Ruth Evans, Mr. and Mrs. Walter Easter, Mr. and Mrs. Milton Evans, Mr. and Mrs. Danny Daniel and family, Mr. and Mrs. W.R. Daniel, and Keith Thomas and family from Floydada. From Amarillo was E.T. Evans, and Mr. and Mrs. Larry Adams and family were there also from Kentucky.

Mr. and Mrs. Brewer enjoyed a nice Sunday visit with H.T. Ayers of Lubbock.

Deanna Watson daughter of Mr. and Mrs. Dean Watson attended Bible school today (June 6th) at the First Baptist Church in Floydada.

Voting Procedures For Beef Checkoff Program

There has been much discussion about the proposed Beef Research and Information Program, which will be voted on this spring by beef and dairy cattle owners. The registration period for producers to qualify in the election is set between 6-6 and 6-17, and the actual voting dates are 7-5 and 7-15.

Pesticide Applicator Training Workshop

LUBBOCK—A training workshop for commercial and non-commercial agricultural applicators of pesticides has been scheduled for June 15-16 at Plains Coop Oil Mill in Lubbock, according to County Extension Agent Doyle G. Warren.

The educational workshop is to be conducted on June 17 by the Texas Department of Agriculture at the same location, says Warren.

Persons planning to attend the workshop must preregister by writing to Dr. Pat Morrison, TAEX, Route 3, Box 213AA, Lubbock, Texas 79401, indicating their intent to participate in the workshop. Details will be provided by return mail along with study

The first session of the workshop will include subject matter applicable to all categories of commercial and non-commercial applicators. Sessions that follow will deal with category specific subject matter.

A certification examination is to be conducted on June 17 by the Texas Department of Agriculture at the same location, says Warren.

Persons planning to attend the workshop must preregister by writing to Dr. Pat Morrison, TAEX, Route 3, Box 213AA, Lubbock, Texas 79401, indicating their intent to participate in the workshop. Details will be provided by return mail along with study

materials.

For members of their organization, the Texas Plant Food Institute will sponsor a similar workshop June 28-29 at the Lubbock Civic Center, Warren adds.

The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, enforced by the Environmental Protection Agency, includes among other requirements "(1) classification of all uses of pesticides as either restricted use or general use and (2) certification of applicators (private and commercial) as a requisite to the legal use or supervision of use of restricted-use pesticides."

The Texas Pesticide Control Act (TPCA) establishes

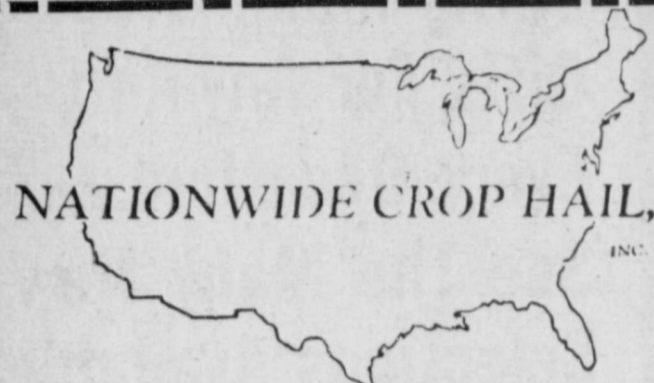

an additional category of pesticide applicator, the non-commercial applicator, and requires certification and licensing of the commercial and non-commercial applicator "as a requisite to the use or supervision of use of restricted-use and well as state-limited-use pesticides."

The commercial applicator as defined by the TPCA means "a person who owns or manages a pesticide application business engaged in the application of restricted-use or state-limited-use pesticides to the land of another." The non-commercial applicator as defined by the TPCA means "a person or government agency or department which wants to use restricted-use or state-limited-use pesticides or the authority to demonstrate restricted-use or state-limited-use pesticides and does not qualify as a private applicator and is not required to have a commercial applicator's license."

Certification is granted by the state regulatory agencies on the basis of an examination.

The full implementation of the amended Federal Insecticide, Fungicide, Rodenticide Act is scheduled for October 21, 1977. On this date, barring any changes in the law, certification will be a requisite to using or supervising use of restricted-use pesticides.

contact their county Agricultural Stabilization and Conservation Service office to receive a registration form. The county ASCS offices will conduct the referendum, explains Doyle Warren, County Extension agent.

"There are two separate parts of the referendum, registration and voting," he reminds. "A producer must register during the first period and must make another trip to vote during that designated period."

At least 50 per cent of the cattle owners who register must vote—and 2/3 must vote affirmatively—in order for the referendum to be valid. Those eligible include 4-H youths, FFA members, men and women who own livestock.

"There is no age limit or minimum requirement of the numbers of cattle owned in order to qualify to vote. Any questions about bonafide ownership can be resolved by tax records, sales slips, registration papers or any other valid papers showing ownership of livestock," adds the county agent.

A partnership, cooperative, corporation or similar business is considered as only a single entity for the purpose of voting in the referendum. Where a husband and wife own cattle jointly, this will be considered a single entity

and only one may vote. If each owns cattle separately and has documented proof of ownership, this is considered as two entities and each may vote.

In the event that a person owns cattle in a county other than where he lives, or if he cannot make it to the polls during the registration or voting period, it will be possible to write or tele-

phone the county ASCS office for an absentee ballot, explains Warren.

If approved, the Beef Research and Information Program will allow establishment of projects for advertising, promotion, education, producer information and consumer information with respect to the use of cattle, beef and beef products.
